I think the SW+ series has a VFO with a broader range of tuning. If you want to work QRP contests as well as drop down to the bottom of the band and try QRP Dxing, then this is a better rig.

Gotta give you credit, Bill. Your response brought a laugh to me and I don't usually laugh at much, except for K1MAN's rantings that is.

Glenn has finally gone off the deep end...or went deeper than before. He wants $500,000 dollars from his tormentors? Whatta nutcase! You see that letter? Poorly written at best, meandering and very disjointed. OK, Glenn. I give up. You got me. I'll send you a check for my share if you promise not to send me any more felony notices.
Let's see...the way I figure it I owe you about two cents, cash money. Would you prefer a check, money order, or cash? I understand that for the small sum of three cents more I can get a membership in your AARA. Do I get a certificate suitable for framing? No need to include the frame...I'll tack it to the inside of my toilet seat where it will be properly and proudly displayed for all my guests.
Oh, and Glenn? I hear that there are some pretty risque' photos of your wife circulating on the newsgroups. Want one?

Relax, Drew. It was a troll, probably written by someone no more racist
than yourself. He trolled, you bit, he's happy. Do you really think a
serious hard core racist is going to bother posting to r.r.a.m.? They've
got better crosses to burn.

If you can set aside your prejudice against prejudice for a minute and
read it again, you'll see it's a fairly clever piece of writing in the
same sense that Hitler was a fairly good public speaker.

A young fellow took a K2 and repackaged it so it would mount
on his bicycle. Since the K1 and K2 are the best tested, could you
build and then doing your own mechanial repackage?

1339. "High-End" Scanners for Sale !

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-13 15:32:12 UTC
From: klarrg@aol.com
Message-ID: <20030213103212.20685.00000249@mb-fb.aol.com>
Source record: 69134

SCANNERS FOR SALE! SCANNERS FOR SALE!!! SCANNERS FOR SALE!!!

1.)...I have a MINT CONDITION AOR AR-2002 scanner available for sale. Radio is pristine in both appearance and functionality with "surveillance-grade" reception.Covers 25-1300 Mhz (less 550-800 Mhz)but includes cellular phone bands: mil-air and civil-air bands, and even FM broadcast band). "Full" 800 Mhz reception: no "blocks".Colorful segmented LED signal-strength meter..Selectable modes (FM, WFM, AM)and search steps (5, 12.5, 25). VFO tuning knob and LCD display. Radio looks nearly identical to the AOR AR-3000 base/mobile unit and can be used as either mobile (mobile hardware NOT included)or BASE...20 programmable memories plus search and priority features.No BOX or MANUAL (if I can find manual, will include but NO LUCK SO FAR...).Operation is common as to AOR scanners, tho'... Purchase will include radio:power supply;, and back of set antenna.Approx,. 8 CPS scan speed.Great audio: works superbly.Outstanding sensitivity......$260 DELIVERED via USPS parcel post..

2.)...I have a BRAND-NEW Commtel base scanner, model COM-225 available for sale. This is a base scanner made by GRE for the European market and is also sold under the model designation "ALBRECHT AE-100T". It is a 500 channel unit capable of UNINTERRUPTED coverage from 25-1300 Mhz CONTINUOUS (no gaps..includes cell range and the usually "deleted" 520-760 Mhz range as well.).It resembles a cross between the PRO-2035/2042 and a PRO-2040.The unit has a VFO dial like the PRO-2042 and a large, yellow/orange backlit LCD display.Scan speed is a very respectable 40 CPS.Fixed search steps depending on range in increments of 5, 12.5, 25, and 50 khz. Receives FM broadcast, AM civil AND MILITARY airbands.Radio has NEVER BEEN USED but was PROFESSIONALLY converted to USA 110VAC (from UK 220VAC)using GRE parts, so no power converters, etc., required..plug-n'-play ! Good, LOUD volume and EXCELLENT sensitivity.A TRUE collector's item or, an outstanding main scanner for the novice or experienced scanner user !Includes all original packing, manual, aerial, and is in PERFECT , UNUSED condition both physically AND electronically. Selling for $265 plus $13 fully-insured, excellently-packed shipping with tracking via common carrier.

Sorry, NO TRADES or "offers" needed.Pics not available as P/C scanner "died" recently...pics can be found using browser on your P/C.. Payment by MONEY ORDER ONLY expected within 7 days of sale.All serious replies answered.Likely the only one in the USA ! Your chance to own a true one-of-a-kind radio , PLUS...you don't have to RISK trying to IMPORT it!)<: ! No sales outside USA, Email me with ???'s: all serious replies answered. THANK YOU !

One big advantage of the SW+ series is that there are a large number of sites that use it as a tutorial example. If you plan to build it, and learn from the experience, it is the way to go. There also seem to be a lot more of them floating around, for whatever that's worth.

For the moment, forget amateur radio and just get a 802.11b or .11g device.
Commercial products have outdone us on this for the time being.

Just how do you figure I wanted useless testing. I got my license
at the FCC office, in front of an FCC examiner, when the test
meant something. Listen to 10 meters and you hear the future of
ham radio, all the 10-4 gud buddies are there.

This is interesting, because I've had this impression for years.

I became interested in ham radio because of my interest in CB radio back in the 70s. The hams in my area would hang you if you dared to compare CB to ham radio. When I obtained my first HF rig, a Ten Tec Triton IV, which I still have, I tuned in the 75 meter band shortly after obtaining my novice license. It was one of the frequencies that has been notorious, even to this day. How could the hams that I know say that CB and ham are different? They didn't sound very different to me.
I obtained my novice in 1981, and upgraded to advanced about a year after that. I mostly used the Alinco study guides for the test. I sat on the advanced license for about sixteen years. In 1997, I decided that if the government was giving licenses away, I thought why not get one for myself? Memorizing the 400 questions in the pool was pathetically easy. As for the code, which was still 20-wpm, I got up to speed for that in about two weeks. I aced the written and missed two on the code test, which had also become pathetically easy because of being multiple choice.
Three years later, ham radio became even more like CB with the de-facto elimination of the code test. The only difference is that hams have more toys at their disposal than do CBers.

To use a "GW Bush" euphemism, Radio Shack has become "Irrelevant".

They only sell Chinese-made consumer goods
toys and pure useless junk. They want to become the
WalMart Electronics Store and are allegedly going to
discontinue selling their brands of police scanner
radios and shortwave sets shortly. Phooey!

I say "good bye" to them. They have nothing any more
that interests me and their salespeople are either complete
morons who can't get a sales job anyplace else, or are
college/high school kids who don't give a shit regardless.
Our local place has 3 teens/twenty-somethings in there
and all they ever do on Co time is talk on their Sprint cellphones to their
girlfriends trying to set up a time to go visit em' and get their
ass laid... (can't fault them for that....hey-hey!)

I predict that Radio Shack will file for Bankruptcy and
their stores will all dissappear by 2006 at the latest.

It is for the reasons above that I avoid Radio Shack like the Plague. Rad
Shack has for years made customers feel unwelcome what with their policy of
demanding the names and addresses of their customers. Couple this with the
fact that the Rad Shack employees don't know one end of the radio spectrum
from the other and what you have is a group of idiots working for minimum
wage.

True on all counts. I remember "The Good Old Days" when a lot of parts
house workers got their jobs because they loved electronics and the
people who hung out there. Those days are gone, I'm afraid. Damn.

While you are listening tonight, be SURE to have
these implements ready for quick use!

Whenever Vic says "I think that..." or someone
says "Scum..." or Harvey slows down to
0.003 MPH speech - be sure to use one or
more of the implements of 75 Meter SWL'ing listed below.....

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2912007323&category=19257

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2811590669&category=1063

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2910862966&category=11837
(this last one can be uses in your 2 Meter HT also - "Homer sez: Wooooo
Hooooo!")

Note: This is similar to the old "Art Bell Drinking Game"
learn about it here:

WHAT parts?? Our R.S. dumped it's "parts pegboard" 7 Months
ago and all they now carry is a goofy drawer in a corner which
has fuses, 1/4" audio jacks and mabey ONE or TWO horizontal
output transistors if your lucky......

Radio Shack is DEAD. Stick a FORK in it and have it for
lunch with your takeout WonTon soup and noodles...
Sooner everyone admits it the sooner we'll all feel better.

We have to first realize who RadioShack's market is. From what I have seen and read RadioShack is becoming less and less interested in serving the electronics hobbyist. The market now is the average joe who knows really nothing about electronics and really isn't concerned about where his product is made or the quality of it. Rat Shack is for the impatient and ignorant general public who are always in a rush and never have time to sit down and actually think about something. Rat Shack knows this and takes advantage of this by selling the overpriced cheap Chinese labor items. And also selling outdated electronics and computers which they sell as "new" Who honestly buys a computer or TV at radioshack?

But really, would a nationwide chain store like RadioShack survive if it only focused on electronics parts and equipment for the hobbyist? Absolutely not. For it to survive, it has to market things to the general public.

I haven't had real bad experiences with my local RatShack's. The people there tend to be knowlegable, it's a suburban shopping center anyway, your not getting innner city high school dropouts working there.

Amateur Radio Newsline™ Report 1331 - February 14, 2003

Amateur Radio Newsline report number 1331 with a release date of Friday, February 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The terrorism warning level goes up in the United States and ham radio operators should be prepared. The details on Amateur Radio Newsline report number 1331 coming your way right now.

(Billboard Cart Here)

**

THE WAR ON TERROR: NATION GOES COLOR ORANGE: HAMS SHOULD BE ALERT

Homeland Security Secretary Tom Ridge says every American must be vigilant. This as the Bush administration raises the nations terror alert from Code Yellow to Code Orange and says this represents the most significant warning since the Sept. 11, 2001 attacks. Among those best equipped to assist the nation in fighting terror are its ham radio operators. Amateur Radio Newsline's David Black, KB4KCH takes a look at how hams can prepare themselves and how they can help:

--
The government isn't minimizing the threat. Officials expects more attacks against the United States and its allies in coming days. The only thing they can't do is predict when and where an attack will occur.

Federal officials recommended that Americans should take basic disaster preparation steps. This includes maintaining a three day stockpile of food and water. They also recommended obtaining duct tape and plastic sheeting to seal a house in the event of a chemical or biological attack or disaster. They also say to have some sort of emergency radio receiver. One that can operate for days without being plugged into a power outlet is best. This will be the primary way the government talks to you should the unthinkable happen.

How can ham radio operators help? Start by making sure that your ham gear works. Especially your hand held and mobile radios. If you only have one battery pack for your H-T, go out and buy one or two more. Or even better, get a case that lets you use alkaline batteries that are widely available. If the power goes out, you can't recharge Ni-Cads or NiM-H cells. But you can operate for a number of hours with Alkaline batteries. So have several sets of these on hand -- at least enough to get you through 72 hours of non-stop operation.

If you are a trained communicator active with an ARES or other emergency communications group, be sure to let the chain of command know where you will be. Give them a list of phone numbers where you can be reached 24 hours a day -- 7 days a week. Better yet, get a pager and give its number only to the person who will be calling you. That way if that pager goes
off, you know it's for real.

What about looking out for terrorism in your own community? Do it. Observe and report.

If you see something that looks out of the ordinary or suspicious, call the police. Remember that old adage about better to be safe than sorry. While it's not likely you'll encounter a real live terrorist cell, it's not out of the question, either. And that's where your radio, your local repeater and its autopatch come in.

Even if you don't own a cellular telephone, your hand held or mobile radio is your emergency lifeline. If you have access to an autopatch equipped repeater its a lot better than a cell phone. Cellular phones are known for not being reliable in many areas. With a ham repeater, if you can hear it, the chances are it will hear you. And even if there's no autopatch, another amateur can relay your message to authorities.

What about on the air? What are the chances that a terrorist cell might take to the airwaves on your favorite band? Not very likely but again not impossible, either. Terrorists tend to try to blend in with the background. Setting up a communications network on even an underutilized band like 6 meters would be like waiving a red flag in front of a bull. Hams are very protective of their spectrum and are not afraid to go after those on a band illegally.

It's far more likely that a terror group would set up shop on license free public frequencies than on 2 meter F-M or 20 meter sideband. And it's a pretty good guess that government monitors are keeping a close ear on F-R-S, MURS, Class D CB and the frequencies nearby to each service.

What if you hear something that seems suspicious? There are three letters to remember: F-B-I. The agency set up a website and dial-in tip line immediately following the September 11th attacks. Both are still in service.

The website U-R-L is www1.ifccfbi.gov and it puts you only a link away from filing a report. Just click on the words "Report Terrorist Activity."

And this word to hams who have never handled emergency communications. If you hear a net going on, don't break in to ask if you can help. The chances are that you cannot. You can do more good by listening and learning procedures. Better yet, go to the ARRL's website and sign up for one of their Emergency Communications Training Classes. With the stark new reality of terrorism on our homeland soil, it should be incumbent on every ham regardless of age or license class to become

skilled in emergency communications techniques. It might be you who's called on to save a life.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham, Alabama.

--

The bottom line. As the Office of Homeland Security has said, every American must be vigilant. In retrospect, all of our lives could depend on it. Hams can sign up for emergency communications training at the ARRL website -- www.arrl.org. (ARNewsline™)

**

ENFORCEMENT: HAM FINED $12000 FOR MULTIPLE VIOLATIONS

A ham has been fined $12,000 for violation of the Amateur Service Rules. We have this report:.

--

Its one of the largest fines ever assessed for ham radio rules violations and its been handed to Scott E. Kamm, the license holder of amateur radio station N0UGN. And it comes after the Federal Communications Commission finds Kamm apparently responsible for causing intentional interference, broadcasting music and failing to identify with his station by its FCC assigned call.

Kamm's story goes back to December 9, 2002. In response to complaints of continuing interference on 146 point 31 MHz, an agent of the Commission's Kansas City Field Office began monitoring. At approximately 7:00 P.M., the agent observed a very strong signal on the frequency. It was reportedly made up of music, sound effects and unmodulated carriers. No station identification was transmitted. More important. These transmissions were interfering with existing communications that were in progress between other amateur stations.

Using radio direction finding the agent determined the source of these interfering signal to be Kamm's residence in near-by Waterbury, Nebraska. The FCC says that Kamm has two addresses that they know of. One in Sioux City, Iowa and the other in Waterbury where they traced the interference as coming from.

The scenario repeated itself a day later on December 10th. This time the agent entered the premises and inspected Kamm's station. The agent found an amateur radio transmitter capable of operating on 146.31 MHz but Kamm stated that no transmissions were made from his station. That he used the radio to receive only. Kamm also asserted that no one else operated the station.

But the FCC is not buying that story. It says that the Amateur Service Rules state that no ham shall willfully or maliciously interfere with -- or cause interference to -- any other radio communication or signal.

Also amateur stations are prohibited from transmitting music using and that they must identify at the end of each communication or at least every 10 minutes.

And, based on the evidence before it, the FCC says that it finds that Scott E. Kamm did willfully and repeatedly violate the Amateur Service Rules by causing intentional interference, broadcasting music and failing to identify. He is being fined $7000 for the interference, $4000 for transmitting the music and $1000 for failing to identify.

In Blair Alper, KA9SEQ, reporting for the Amateur Radio Newsline.

--

Kamm was given the customary thirty days to pay up or file an appeal. (FCC)

**

Break 1

With studios in Los Angeles California, the United States of America, and with reporters around the globe, we are the Amateur Radio Newsline, heard on bulletin stations worldwide, including the Ole Virginia Hams Amateur Radio Club net serving Manassas Va.

(5 sec pause here)

**

ENFORCEMENT: UNLICENSED RADIO BROADCASTER SENTENCED TO 18 MONTHS PROBATION

The FCC has announced that Benjamin Leroy Carter has been sentenced to 18 months probation. This, following his conviction on seven counts of unlicensed radio operation.

The conviction and subsequent sentencing is the result of an investigation that began in February of 1999. The Commission's Tampa Florida Office says that it received complaints from residents and broadcasters in the Orlando, Florida area of interference to the reception of licensed radio broadcast stations. Carter, who also went by the name of Malik Copafeel Abdul, pled guilty to seven counts of unlicensed radio operation in November of 2002. He also agreed to forfeit all equipment used in connection with the station.

The FCC says that 4 months of the sentence will be served as home confinement. In addition, Carter will be required to perform 50 hours of community service. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231068A1.doc (FCC, CGC Communicator)

**

RESCUE RADIO: NEW CLASS OF FIELD DAY STATION

Amateur Radio's premiere emergency preparedness operating event is changing. This with word that the annual ARRL Field Day will gain another entry class for 2003.

Called Class F, these will be Amateur Radio stations which are set up and operate from emergency operations centers, or EOC's. ARRL says that the change renews the emphasis of Field Day's 1933 origins as an emergency preparedness exercise as opposed to a routine contest. (ARRL)

**

RESCUE RADIO: A NEW CB SIDEBAND EMERGENCY CHANNEL

Doug Schwinn N0LAY, reports over the QRZ.com website that the Michiana Emergency Monitoring Group is promoting an iniative to have C-B channel 39 designated as an additional frequency to be used and monitored during emergencies. This in addition to the existing C-B channel 9.

The reason? Schwinn, who also holds the call KDZ0430 says that he joined in the effort because of the mountainous region of Colorado where he lives. He says that he would likely be heard using lower sideband on C-B Channel 39 than A-M on Channel 9 during an emergency situation. He also notes that a spokesperson for the group stated in an article in Popular Communications that this is part of an effort to restore and legitimize the Citizen Band Service. (N0LAY via Internet)

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN COLUMBIA DEBRIS RECOVERY ENDS

Ham radio communications assistance in finding parts from the fallen space shuttle Columbia has wound down. According to several Internet reports, February 12th was the last day hams were to be called out to provide communications in the recovery effort.

During the height of the recovery, activities being conducted over the W5NAC repeater in Nacogdoches Texas could be monitored using Echolink's EDU_NET conference. Rick Hambly, W2GPS, says that there was a very active effort by RACES and SKYWARN to aid NASA and government agencies like the FBI with the identification, G-P-S location, cataloging and recovery of space shuttle Columbia components.

As previously reported, the Columbia was at 203,000 feet when it disintegrated plummeted back to Earth. All seven Astronauts on board were killed. Three of the 7 were licensed radio amateurs but no ham radio gear was carried on that ill-fated flight. (VHF Reflector, W2GPS, others)

**

REMEMBERING COLUMBIA: HAM CREATES ON-LINE MEMORIAL

A former Amateur Radio Newsline Young Ham of the Year ward recipient has created a lasting Internet tribute to the space shuttle Columbia.

The memorial website was created by Kevin Boudreaux, N5XMH, of Orlando Florida. Boudreaux, who grew up just outside New Orleans was the recipient of our 1993 "Young Ham of the Year Award" for his organizing Amateur Radio emergency communications following a devastating hurricane.

Today Boudreaux is a Manager with the Hilton Hotels and a professional website designer. He tells Amateur Radio Newsline that he was so personally touched by the Columbia tragedy that he created this memorial website to the shuttle and its crew.

The webpages he has created are filled with facts about the orbiter and its mission along with photos and short biographies of its STS-107 crew. Kevin also provides links to other Columbia memorial websites along with the complete statement of President George W. Bush when he sadly went on the air to let the world know that the Columbia was lost.

Kevin was only 14 when he went out to help his community in time of disaster. He was 15 when he received the "Young Ham of the Year Award" and his dedication has never stopped.

You can view his web tribute to the fallen Columbia and its crew at www.sscolumbiamemorial.com or www.columbia7memorial.com (ARNewsline™)

RADIO LAW: ALLEGED PAY TV INFO THIEF PLEADS NOT GUILTY

A 19-year-old University of Chicago student has pleaded not guuilty to federal charges of stealing plans for security systems used by satellite broadcaster Direc TV and distributing them freely on the Internet. Igor Serebryany is accused of stealing information related to Direc TV's latest access cards and then posting the priporotity information to websites dedicated to the hacking of the companys security systems

As previously reported, the theft allegedly took place while Serebryany was working at the Los Angeles office of a law firm that represents Direc TV. He was indicted by a federal grand jury last month on three felony counts of theft of trade secrets and faces a maximum sentence of 10 years in prison if convicted on all charges. (Published news reports)

CONVENTIONS AND HAMNFESTS: CHARLOTTE NC IN MARCH

March 8th and 9th are the dates of this years Charlotte North Carolina Hamfest and Computer Fair. The venue is the Charlotte Merchandise Mart on Independence Blvd. Doors open 8:30 a.m. both days with talk in on the 145.29 Mhz repeater. This years featured forum speaker is FCC chief rules enforcer Riley Hollingsworth, K4ZDH. More information is in cyberspace at www.w4bfb.org/Hamfest.html (Press release)

**
RESCUE RADIO: HAM RADIO IN TV DOCUMENTARY

Ham radio is part of a soon to be shown documentary produced for the Discovery Channel. Joe Moell, K0OV, has the details:

--
Members of the Hospital Disaster Support Communications System of Orange County, California have been included in tapeings for a new documentary series on the Discovery Channel. "Critical Rescue," a series of programs featuring rescue workers and those who support them, made its debut on February 6.

A team from New Dominion Pictures spent a half-day with HDSCS last August. They interviewed founder and leader April Moell, WA6OPS, and taped reenactments of ham communications that took place on April 23, 2002. On that day, hams were awaiting their assignments for one of the four large-scale disaster drills in Orange County each year. At 8:10 AM, a 6000-ton mile-long freight train struck a standing Metrolink double-decker commuter train at a crossing in Placentia, causing three deaths and over 200 injuries. The drill was immediately cancelled, and as rescuers converged on the train crash scene, area hospitals braced for the wounded passengers.

As Net Control, WA6OPS quickly deployed hams to the 14 hospitals most likely to receive victims. There they handled countless messages, verifying victim dispatch and patient counts, providing information for inquiring victim families, and communicating with hams supporting the Red Cross. Within some hospitals, HDSCS provided direct links to handle messages between triage areas, Emergency Departments, and Command Posts.

Additional HDSCS operators participating in the reenactments were Sam Creason K6EW, Cheryl Simpson KD6MWZ, Ralph Swanson WB6JBI, and David Mofford W7KTS. It is not known how much of the HDSCS footage will appear in the edited program.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, "Fateful Journey" will air 8 and 11 PM Eastern and Pacific times on Thursday February 20th, and again at 2 PM Eastern and Pacific on Saturday February 22nd. (ARNewsline™, K0OV)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARRL PACIFIC DIVISION DIRECTOR JIM MAXWELL, W6CF, SK

ARRL Pacific Division Director Jim Maxwell, W6CF, has died. The 69 year old Maxewll passed away on Thursday February 6th at his home in Redwood Estates, California. The cause of his death has not been announced.

Maxwell, who became a Director in January 2000, joined the ARRL Board in 1994 after being elected Pacific Division Vice Director. He also served as an ARRL Emergency Coordinator from October 1991 to March 1999.

An avid DXer, Jim Maxwell belonged to mumerous DX clubs, contest clubs and organizations. This included the famed Northern California Contest Club. He also served as a member of the ARRL DX Advisory Committee from April 1988 through 1994 and was an accredited Volunteer Examiner.

Professionally, Maxwell held doctoral degrees in aeronautical engineering and biomechanics. He retired from the Lockheed Missiles and Space Corporation as a technical consultant in 1992 and from Scitor Corporation in 1998.

Pacific Division Vice Director Bob Vallio, W6RGG, takes over immediately as Director. ARRL President Jim Haynie, W5JBP, will appoint a new Vice Director in the coming days. Maxwell previously held the call W6CUF. (ARRL)

**

HAM RADIO IN SPACE: ISS PACKET RETURN DELAYED FURTHER

When will the packet system on the International space station come back on? Nobody is quite sure but ARISS International Chairman Frank Bauer, KA3HDO says that his group has been working with its colleagues in NASA and Russia's Energia to get it operational again. Unfortunately, so far they have only been successful in getting it turned on for about one orbit.

Bauer says that several factors are impeding the packet startup. First, the progress vehicle docked with ISS and the crew is currently unpacking and stowing about a ton of supplies and equipment. Also, the crew is working with their mission control counterparts on schedule changes that have occurred due to the Columbia accident.

Given these items its apparent that this crew is not as engaged in ham radio the way the last ISS Expedition crew was. And because of this the packet system may be off for a bit longer. (ANS)

**

CONTESTING: ARRL SAYS BEACONET IS OK

ARRL Contest Branch Manager Dan Henderson, N1ND, says that BEACONet does not violate any contesting rules. According to Henderson, after additional review the ARRL has come to believe that BEACONet is similar to an automated CQ'ing system. That it only facilitates the

solicitation of contacts and as such it seems to comply with the letter and spirit of the contest rules. (VHF Reflector)

**

DX

In DX we take to the sky this week. This with word that Wayne Estes, W9AE, plans to operate the Amsat Oscar 40 satellite as FG slash W9AE from the island of Guadeloupe. The tentative plan is for Wayne to start operation at 2300 U-T-C on February 21, 22, 25, and 26 for windows to the Americas and the Pacific. Also listen for him on Sunday February 23 from 1500 to 2000 UTC for a satellite window to Europe and central Asia. Exact operating times will depend on the RUDAK schedule and Wayne's vacation activities. If you work him, QSL to Wayne Estes, 18673 W. Meadow Lane, Mundelein IL 60060, U.S.A. (ANS)

And Hagal International reports that Israeli amateur operator Dov Gavish, 4Z4DX is the first ham in the world to completely confirm DXCC using electronic QSL's. Although still not recognised by the DXCC, electronic QSL'ing is gaining ground in the DX community. (Hagal International)

Also, the ARRL's new Logbook of the World secure electronic contact-confirmation system took a major leap toward public release in January. This, with several weeks of limited tesrting of the concept. (ARRL)

**

THAT FINAL ITEM: TURN AROUND IS FAIR PLAY

And finally this week, we have all heard the expression "turn around is fair play. And one person who has just found that out is former computer hacker turned on-line security expert Kevin Mitnick, N6NHG. That's because Mitnick's new company website has been -- well -- hacked. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the story:

--

The ham who holds the honor of being the world's best-known computer hacker suffered the indignity of having hackers break into his new security consulting company's Web site -- twice. But news reports say that Kevin Mitnick, N6NHG, simply shrugged off the incidents as amusing and not serious enough for him to call authorities to investigate.

As I said, two electronic break-in's have taken place. The first was on January 30th. In that one a hacker calling himself "BugBear" added a page to Mitnick's corporate website that read "Welcome back to freedom, Mr. Kevin." This is probably a reference to Mitnick's probation which ended ten days earlier on January 20th. During his probation Mitnick was barred from accessing the Internet and this hack may have been more of a welcome home -- in this case -- home being the World Wide Web.

The latest incident took place over the weekend of February 8th and 9th and was more of an on-line job application than a hack. In this case a hacker in Texas broke in and asked Mitnick to hire him as the company's security officer.

Mitnick says that the hackers apparently exploited separate flaws in Microsoft's Internet server software. He says that the person responsible for the company's Web site failed to install patches available from Microsoft.

In neither instance did hackers vandalize the Website. One said in e-mail that he didn't do damage out of respect for Mitnick.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Mitnick's new organization is called Defensive Thinking and is located in Los Angeles. A company spokesman said that no customer information was released nor was there any danger of information being compromised. (Published news stories)

The rest of the Sam Voron Interview that was on K1MAN? What happened? Did Glenn pull the plug? Too much stuff that was incriminating? I heard on his bulletin this week, that Glenn may call Mr. Voron back to the states and help with crew 22.

I have a cool project for Glenn. He needs to go down to Walterboro SC and give radio equipment to Brother Stair. They could rebuild the ship Fury and give the biggest false prediction ever.

Then Glenn needs to get Hal Turner some tips on fundrasing. Hal needs to get VISA cards and not sell "Savage Negro beasts" coffee mugs.

Just think, a new talk show on WWCR/WBCQ
Starring

Glenn Baxter
Sam Voron
Brother Stair
Hal Turner

Have fun!

> Brand Name Consumer Electronics Store.
>

How many of the folks moaning the passing of the "good ol' days" actually BOUGHT all that they could of their last large component order from Radio Shack? Or, did they mail order it to save money, then run into Radio Shack looking for the $0.29 5 pack of resistors they left off the order?

If components were even close to profitable, or even paying for their fair share of wall space, Radio Shack would pursue stocking it to the ceiling! Think about it, the only game in town selling components! Any profitable business stocks what sells, period. If we're not buying it, a business stocking it will soon fail. _WE_, the public, drive the change at profitable retail stores.

Been to a "ham radio" store lately? How many components did they have in stock? <G> Most ham ops are "appliance operators" these days, with more and more of the hardware microprocessor based, not field repairable, and not hardware modifiable. "Mods" will be done more and more via software. The electronics and radio hobby of the last 10 years and the future requires as much or more knowledge of c++ than it does of a soldering iron.

Barry

You're equating brains with education. Big mistake. I've seen college educated salespeople that can seemingly operate very complex computers but not know how to turn a shortwave radio on. They simply don't care to learn about things anymore. Just cell phones, computers, and games. If I had idle time (as a salesperson) I'd be tinkering with everything. They can't be bothered, and as a result, they are increasingly looking like imbeciles. The Radio Shacks around here don't sell enough computers to justify having salespeople that are ignorant of most of the commonly sold items.

Years ago I went to Montgomery Wards to buy a mattress for a child's crib. The saleswoman said that they had the item but it was too high on the shelf for her to reach and that I would need to come back some other day. I insisted that she get the manager, and eventually I got the mattress. Her inability to solve the problem independently is characteristic of the average Radio Shack employee today.

THEY DON'T CARE.

Many other businesses "Changed" themselves into oblivion. I suspect that Radio Shack is on this course. When you have a blind captain, blind first mate, and a retarded crew, the likelihood of avoiding the sinking of your ship is nil.

RedOctober has it nailed. There just aren't enough hobbyists around
anymore to support a brick-and-mortar parts house. The only real
hobbyists in any quantity are computer guys, and they wouldn't be caught
dead in RS when all their goodies are available better and cheaper on the
internet.

RS is either going to have to change their business philosophy or die.
Right now they are doing a half-assed job of competing with CompUSA and
the like and they're not making it.

1415. Yaesu FT-2600 Advice Needed

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-16 16:51:06 UTC
From: jweiner@softstar.com
Message-ID: <92cd4545.0302160851.22fef066@posting.google.com>
Source record: 69010

Yaesu FT-2600 Advice Needed:

I have a new ... (purchased from AES in December)... Yaesu FT-2600M.

The FT-2600 should have a RF high power output of 60 Watts.

I have just measured the high power RF output using a Diamond SX-600
Watt Meter, and it reads only 40 Watts.

The meter is accurate as it reads correctly on the 3 other radios that
I have.

I have also read on eham.net that others have experienced the same
problem.

Does anyone know of a fix for this issue, software or hardware, or is
my new radio defective.

Any advice is appreciated.

My experience has been the EXACT OPPOSITE!

Buxcomm sold me a superior product at the BEST PRICE.

If you wanted something in a fancy metal box you should

have bought one of those $150 interface boxes.

If you were not smart enough to figure out how to use it
you bought the wrong thing. To be honest I had a couple of questions,
but K4ABT personally answered me via e-mail twice and got me up and
running easily.

I have had ZERO problems with Buxcomm! GREAT guy!

Maybe you should stick to "slop bucket" (SSB) hi hi!

Advice to the eternal spelling correction posters. Copy and paste the entire section into Microsoft Word or a similar program. Find the misspelled words, see what the suggestions for the correct words might be, choose the appropriate words. If a mindless software program is intelligent enough to determine the correct words, so should you be.

Repsonse obviously is misspelled. Word offers response and responses as suggested replacements. Dah!

No need to correct the spelling of others when you can't think of anything else to say.

Regards.

Sounds good to me. Better than that claptrap that is spoon fed to us by the mainstream media. If it wasn't for shortwave and the internet, imagine how mind numbed Americans would be then. I suspect that with concerns about terrorism that the internet may be throttled or shutdown during certain crises. Fortunately Shortwave broadcasters in other countries will still be able to broadcast and the radios will still be able to receive.

>It is still redundant, anytime you give your call you are id'ing.
>Why else would one give their call, it is for identification purposes.

<Sarcasm mode>

... so basically, by providing your call to the other station, you're
actually also fulfilling the FCC's ID requirements? Shocking!!!

So when I turn the key in my car's ingnition switch, I no longer have
to advise it "I'm now starting the engine?"

When I pull the trigger on my .357 Magnum, I no longer have to
announce "I'm about to ignite a primer charge, thereby causing the
gunpowder in the cartridge to burn rapidy, thereby causing a 125 gr.
projectile to be ejected from the barrel?"

My goodness! You have NO idea how much that little gem of COMMON
SENSE is going to simplify my life!

</Sarcasm mode>

Okay folks... the man is right. The FCC says you need to identify
every 10 minutes during a contact and at the end of the contact. Your
10 minute ID is REQUIRED to consist of your callsign. That's it.
That's all that's required. If you figure the other guy is too stupid
to realize your giving your call for ID purposes, then go ahead and

tell him that it's "for ID." The rest of us will be able to figure it
it, as will Uncle Charlie if you just toss out your call without
explanation...

Unfortunately, I believe the spelling is duh!

Alas, being a sesquipedalian is not conducive to being a correct speller. The insistence of those that post their IQs as 73 then have the audacity to correct the spelling of others is beyond me.

>> moving from one district to another, you would get a new callsign."
>>
I don't know why the district rule was changed either. It is true that
hams with an Extra class license could buy a 1x2 callsign, and that there
would be an effort to give the licensee a choice. Around 1975 I knew I
was going to move from Pennsylvania in the 3rd district, where I had the
call W3UKI, to Ohio in the 8th district. I was afraid that when I moved
I would get a 2x3 call, WB8xxx, so I bought K3EL, which was converted,
when I did move, to K8EF.

The current system of assigning calls was adopted when a ham requested a
particular call sign and enclosed a $50 bill with the application. The
person at Gettysburg who assigned calls pocketed the money and issued the
requested call. The word was passed around, and an unofficial market
grew up. When the venal FCC employee was on vacation his substitute
found money with applications and blew the whistle. This the old
practice of reissuing call signs that had expired for five years was
dropped, and the complicated KA, N and so on system of sequential issue

was dropped.

The fee which the FCC thought was legal when they collected it for my 1x2 was outlawed by a court (the plaintiff was a commercial licensee, not a ham), and the money was refunded.

Spelling errors, while annoying, are usually only pointed out after one side has either lost the argument or can't come up with a decent comeback. The way I see it is if you have to point out the one or two mispelled words in someone's post, think long & hard whether it's worth keeping the argument alive.

Howdy all!

Have for trade, one Yaesu FT-90 mini dualband mobile radio. Includes manual, box, etc.

Radio has MARS/CAP mod. and has been mobile all its life. In excellent condition, not beat, not scratched up, not faded or any other common cosmetic problems. Only in a family vehicle for about 2 years.

IF YOU ARE LOOKING FOR A RADIO TO USE OUT OF BAND, MARS/CAP, ETC, THIS IS NOT WHAT YOU WANT.

Which is exactly why I'm wanting another.... this radio is not an "out of band" unit. It performs poorly outside the UHF ham bands and I need a reliable monitor for frequencies other than ham. Works all over VHF band and does well.

I would like to trade this for something in the Kenwood, Icom, Standard line, about the same vintage/value. I will pay small differences, etc. if necessary.
Anyone have anything that will perform well around 462 and 155 as well as amateur freqs?? PLEASE make sure your offered radio doesn't drop off major wattage or sensitivity across the bands 136-174 and 440-470.
Not interested in Alinco, ADI or low-end radios. I'll consider another Yaesu if it can support the requirements!
Please email offers direct but keep the flames within the group, I appreciate it.

Who sends first? Depends on what references you can offer. I will extend same. Sorry to be so hard on strangers. You can thank your local internet crooks for that.
Thanks for the time!

Randy
KC8CPK

Well so much for this troll, not even a real email address.

My Rascal worked perfect after I built it per the instructions.

Maybe this Tony guy needs to setup his comm port properly.

Just caught a few minutes of Baxter's BlabCast on .272. All I heard was, "cheap and sleazy poliician" time after time after time. Just what the heck does Baxter's drivel have to do with Ham Radio?
It appears that Glenn has gotten even goofier if such can be done. Oh, well.

Ooooooooooooooh Noooooooooooooooo.....Oh well, perhaps that eternal porker Lloyd
Davies will finally slit his wrists.

That disgusting fat slob tried to go down on me in the steam baths in St.
Croix.

When I slapped him away, he started crying that he loved me and just wanted to
prove his love by taaking me in his mouth. Goddamn queer!

Lloyd Davies was the best sponge boy I ever had!

Then again mabey he can arrange a sleepover at M. Jackson's house..... :)

> Lloyd Davies was the best sponge boy I ever had!

Who exactly was the ham that KA4MUJ used to
call "Bucket Mouth Sponge Boy" ?

It wasn't the guy (forget his call) in Fla who used
to coax Judy into the "D-Cell Vibrator" shtick was it??

Recently I got a FT-817. Works very good and 6 meters and 2 meters. It seems to work a little better than my R-75 on the HF ham bands and the SW bands.

I really love this little radio. It works good for those who live in apartments and space-limiting areas.

I use a 2m half-wave whip for 2m and can make several local repeaters.

Lloyd, N0VFP

Hello Max,

Unfortunately, Lloyd Davies N0VFP is the author of the above listed filth. Yes, he is a technician class amateur operator who will never advance any higher due to a mental deficiency.

The amateur radio community apologizes for this moronic indiscretion.

Herb KV4FZ

Yet there are electronics stores throughout the country doing a fairly good business. If someone came out with clean, well organized, stores centering on electronics with related items like radios, scanners, shortwave, and so on (perhaps somewhat similar to early Radio Shack stores), I'm certain those stores would do just fine today.

And, of course, knowing that men are the ones most interested in electronics, moving the stores out of malls and into better traveled streets might attract less female mall shoppers and more men on their way home from work.

Here's an update- I've been really struggling with code for what seems like forever. I didn't have problems with the easy letters like e,t,i,m,n, etc., but the longer ones were problems. I was blanking a lot and confusing letters as I just couldn't "hear" it. I finally was able to get a copy of Code Quick. I have literally seen a difference over night using Code Quick. It's amazing and I probably wouldn't have believed it if it happened to someone else. I'm now copying 10 WPM at a character rate of 18. This is practically a miracle for me. The software alone is probably not really enough for someone just starting on code, but for someone like me it should be. I wish I'd gotten their software and cd's or cassette bundle years ago. It would have saved me repeatedly giving up in frustration after weeks of study.

> I use a 2m half-wave whip for 2m and can make several local repeaters.

I agree, the FT-817 is a good all-around rig. I use it as my main
radio, and only resort to my FT-470 HT when I need the smaller size,
such as when working at the Rose Parade each year. The 817 does a great
job of pulling in some of the weaker SW broadcasters.

On a net, when someone says they are "Checking in for the numbers" what does that mean? What numbers? What does the net control do with the numbers when the net is over? (Is there a contest of some kind that net controls participate in to see who gets the most numbers?)

1471. New SXList.com Design Contest!

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-19 01:22:12 UTC
From: Josh Koffman <listsjosh@3mtmp.com>
Message-ID: <3E52DC44.44BAF465@3mtmp.com>
Source record: 68964
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.model.rockets

Hello all. I'm extremely proud to announce the opening of a brand new SXList.com contest! This contest is amazing, there are tons of prizes, and entering isn't that difficult. There are three main categories, and one basically just involves adapting code to the Scenix chip. If you've had an idea for a microcontroller based project, why not check out the Scenix chip? You could win great prizes!

The contest is focused on the Scenix microcontroller (a PIC compatible unit that offers up to 75MIPS). Have an application that needs blazing speed? The Scenix chip is easy to get into and offers tons of speed. By just coming up with an idea, you may win all the development tools you need to put it into action!

If you wish to pass this information on to others, please feel free. The contest is an excellent opportunity for beginners and experts alike. And everyone benefits by the addition of SX examples to the web library.

For complete contest details go to http://www.sxlist.com and follow the Design Challenge Contest link. At the end of this post will be the official release.

Enter soon, and enter multiple times! We look forward to your submissions!

Thanks!

Josh
--
A common mistake that people make when trying to design something completely foolproof is to underestimate the ingenuity of complete fools.
-Douglas Adams

SXList.com 3 WAY WINNER CONTEST

There is a new contest at sxlist.com! And this one has 3 ways to win! Are you a HARDWARE wire head? A SOFTWARE guru? or are you the IDEA person? Anything is ok! You can just send us a good idea, or share a circuit or (learn?) PCB design, or show us some cool code.

Prizes will include SX-Keys, SX chips, SXWiz BASIC to ASM code generator, Ethernet demo boards, RS232 level converters, and your name in lights on SXList.com!

In the past, I've set the focus on nearly finished projects (code ready to debug, design finished, etc...) and we have received some really nice

entries...

http://home.attbi.com/~andrew.g.miller/sx-x10/ The SX-X10 Internet Home Automation Remote Control.
http://www.sxlist.com/lib/io/dev/video/servid.htm The SERVID 4x20 bit banged video terminal.
http://www.sxlist.com/contest/reverb Digital audio reverb and echo effects box.
http://www.sxlist.com/contest/sxohm SX PBX On-hold messaging switch
http://www.sxlist.com/bindicator Bindicator remote display
http://www.sxlist.com/contest/aquamon SX Aquarium Monitor (in SXWiz BASIC)

I'd like to move the focus to a slightly less demanding contest and offer several different points of entry:

A) Ideas that match the SX chips well: What application can you think of for which the SX chips are a perfect fit? Something that could be done in a PIC except for the lower clock speed. Something that needs THROUGHPUT (or that involves doing a bunch of slower tasks all at the same time so that one SX could replace several PICs) but doesn't need a lot of RAM or a huge amount of code. An application where the power supply can support the high speed requirements. Here are some examples: http://www.sxlist.com/idea/sx.htm

B) Great Circuits or Printed Circuit Board Design. Have a really killer little circuit that involves an SX? Then you have an entry! But I want to encourage another path here as well: Right now, AutoTraxEDA is GIVEING AWAY the current (first) release of their professional PCB design software: It supports Mult-sheet schematic entry, circuit simulation, rule driven PCB layout, fast autorouting, 3D visualization and Computer Aided Manufacturing tools. WOW! They will be charging for it at some future date, but for now this is a fantastic deal for the little guys. http://www.autotraxeda.com/Purchase/purchase.html

Co-incidentally, a PCB manufacturer is giving away PCB panels in return for posting a public design using a compatible processor. SX is ok. See: http://www.sxlist.com/piclist/pcbcontest These are limited to double side, 160x100 mm, solder mask, component print and must follow the guidelines posted at http://www.olimex.com/pcb/techinfo.html but you get an entire
panel free and the quality is great! So... Design a PCB using an SX, if you haven't done one before, this is a great opportunity to learn and you can get a fantastic design program FREE. If you win, I'll throw in one or more of the prizes above in addition to your PCBs.

C) Code snippets: Any bit of code that does something better, faster, or that hasn't been published already on the SXList.com site. If you can't publish the entire project, but you have one part that you are especially proud of, share it (and let the world know who you are). Lots of people have published something on sxlist.com and been amazed at the number of questions, thank you's and even, sometimes, yes, actual paying

jobs! Come on! You've figured out something that you're jazzed about! Show us what you got! Just starting? No problem: Browse the PICList code library http://www.piclist.com/lib or PICList archive and find some code that you would like to see in an SX. Use the MPASM to SASM code converter:
http://www.sxlist.com/cgi-bin/mpasm2sasm2.exe and then check for any warnings and clean up the code for the SX.

The prizes are nice, entering is easy... I expect to be overwhelmed with entries! Use the little form at the bottom of the webpage to describe your entry and/or send the files to JamesNewton@sxlist.com

The net control operator takes the numbers, goes down to the corner
7-11, and buys lottery tickets based on those numbers.

Can you please tell me where the ignition noise in a disel truck comes from,
I think you should look for alternator noise instead.

Regards Max

There's a nice article that addresses this sort of problem at the League webpage. Check out http://www.arrl.org/members-only/qst/doctor/comments.html?qid=99&nextq=Q2 . I don't know whether it will suit your particular application, but it's a nice place to start.

High voltage injectors!!!

I read a thread regarding this type of noise sometime during the summer
months. Included was a suppression technique for the noise.

Try an archive search.

Oh, I forgot to mention that the frequency of the pulsing noise is directly proportional to the engine RPM. Therefore, I don't think it's the fuel pump. Maybe the fuel injector solenoids?

Hi Rudi,
I've heard that the cause is the injection computer and can be helped
with ferrite beads on the output wires. I haven't had time to try that yet,
but my FT-100D's noise blanker eliminates it on all but 40m, where it is
reduced to the extent that I can hear the 40m swap net on 7240. Hope this
helps.

If you have ignition noise, you do not have a diesel truck.

Most likely the noise is coming from the fuel pump and alternator.

That may well be, however it is not "ignition" noise.

Most all of the "dinky" ham mobiles seem to do pretty well for the
size of the radios. With the dinky surface mount parts, they are
cramming more into a small
package than many of the older radios using larger componants. Lots of
options too like scanning, etc. If the small radios have a weak point,
it's AM-BC blocking, or crud on the VHF/UHF bands compared to the big
radios. The ham rigs have no sync detect, etc for AM, but otherwise
they are usually better than most "portable's" and quite a bit closer
to a full size "ham rig" as far as overall performance. Myself, I went
with the IC-706mk2g, which is about the same size and all band up to
70cm, and receive to 470 mhz. It's a 100w radio on HF and 6m. The
receiver on MW and the SWL bands is quite good. It sucks on the
longwave bands due to AM-BC crud, but thats because I use big
antennas, and the radio just can't block it all. In the mobile, where
the radio is really designed for, this is probably not a problem. But
the MW, and HF bands sound great, with very little crud. Very good
clean audio quality for such a small radio. Use an external speaker
though...I run through the sound card here, and it sounds like a 756.
:) I use it mobile, portable, and here at the house as a "puter"
radio. Yea, I've had a ft-470 for years. Tough little bugger. I've
banged it, dropped it, etc for a long time, and it refuses to die.
It's handy as a portable scanner also. I also have a ft-2500M 2m rig,
which has a good clean receiver, but it's got a "weak audio" problem
on xmit. I retired it to the truck as an emergency radio. It works,
just weak audio, so I talk loud...:/

Most modern light diesel trucks use solenoid injectors they make
lots of noise that sounds just like spark noise. Since the injection
of fuel during the compression cycle causes ignition in a diesel
engine thus it could be considered ignition noise.

You call yourself "Dr." might I ask Dr. of what? Just interested
in the relevance to antenna matters, if any.

So, whatever your name is.....;^)
Can you put grounded, steel cans around the solenoids?
I think I've seen similar problems in ignition systems where the coil was
not shielded.

There was this same thread over on rec.outdoors.rv-travel a while back.

Noise source is definately the solenoids, or rather the pulses that
drive them.

Don't recall the fix but any of the "outlaw" CB shops found near truck
stops prolly knows what to do. <grin> Ain't that awful!

The solenoids are probably already in steel cans to survive the pressure. The noise is not from the solenoids. The noise is generated by the fast semiconductor switch which drives the solenoid, and radiated by the wiring which runs from whichever computer contains the switches over to each solenoid.

If the manufacturers followed good electrical practice by putting all this electronic junk in proper shields with the power connections properly bypassed, there would be no RFI nor problems in the other direction where your transmitter causes automobile malfunction. But, If you modify it, your warranty probably isn't worth a plugged nickel.

Hi George,

That's if you are lucky. Changing the pulse characteristic to suit
the radio may leave you with dribblers instead of injectors.

1501. N8WWM BUSTED SAYS RAIN REPORT

N8WWM guilty of FCC violations. According to the FCC, N8WWM, Dog Adair committed several violations over the air at the expense of the Toledo Amateur Radio Club by utilizing their repeater to break the law. The amateur club received a warning letter from the FCC concerning Adair's violations and were told to take steps to make certain the violations by Adair will not be repeated. Adair not only hurt the entire image of amateur radio with his inexcusable behavior, but damaged the reputation of yet another entity trying to further the good of amateur radio. It's a shame when bad apples like these make it so clubs can't even trust their own users to abide by the rules they were sworn to uphold. Adair is also an infamous presence on the internet. A google search of "N8WWM" reveals a peek into the world of the individual identified as Adair. In addition to FCC violations, Adair has, in the past, been accused of being a prolific spammer, breaking several internet laws and violating several terms of service agreements with internet providers.

1502. eBay removes legal 10m ham gear but allows illegal CB equipment

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-20 18:06:06 UTC
From: toomanyradios@aol.com
Message-ID: <20030220130606.05751.00000017@mb-ba.aol.com>
Source record: 68897

I've noticed something interesting on eBay lately: selective enforcement and removal of legitimate gear.

Several 10-meter radios have been removed from the site, prior to the close of the auction. HR2600s, HR2510s, RCIs, etc. I'm talking about radios which are advertised as NON-MODIFIED, for amateur use only, and are being sold in the "Ham Radio: Transceivers" category. As such, there is nothing illegal about these radios.

On the other hand, I have witnessed several radios which were advertised as being modified, listed in the CB section, reference to "upper and lower channels", "can be used with kickers", etc. These radios clearly ARE illegal, as is their intended use on the CB band. Yet, these auctions are allowed to proceed. Here are a few current examples:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3008370255&category=1501

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3008183762&category=1501

Seems to me that eBay is opening themselves up for legal action here. Allowing illegal CB equipment while not allowing similar, legal amateur radio transceivers.

Your thoughts?

What legal action?

Doesn't ebay have the right to pull *any* ad it likes?

From what I hear, the CBs are fighting back. They are sick and
tired of whiney geek hams complaining about CB radios on ebay,
now the CBs have turned the tables, doing like hams do, they are
complaining about ham radios on ebay. Childish hams who appoint

themselves as ebay policemen brought this on themselves. I think
its funny as hell. Law suits? Nope! You better go read ebay
rules. They reserve sole right to pull ads, anytime, for no reason.
Now, your assignment is to educate ebay personnel how to tell
what a CB radio is and what a ham radio is. Good Luck!
HA HA HA

Yes they do. I believe, however, they are required to be consistent with their guidelines. Cancelling *some* auctions while allowing other, identical items to be sold on their site is tantamount to discrimination and selective enforcement.

Also, it should be noted that, as per eBay's written policies, amateur radio equipment IS allowed on the site. "10-meter transceivers" are specifically mentioned as being permitted.

Legal action? Come down from out
of your gum ball tree and catnip!

75% of the time that e-Bay has pulled Ham/CB/Radio auctions
it is for numerous complaints against the
Sellers for not shipping earlier auction
products won, non-payment of fees or fraud.

E-bay does not think ham radio
as some type of a special group worthy of
merited special attention - apart from the fact that
ham and CB related equipment sales usually are
in the top-5 categories for complaints of
Seller fraud filed to e-Bay from buyers.

Bottom line: When you bid on anything on E-Bay
be DAMM SURE your Seller is on the level and
IS NOT one of these (former) "traveling hamfest bum gypsies"
we used to see set up in the flea market at all the hamfests
trying to pass off the same overpriced non-working junk
to suckers or newbies. Many of em have abandoned the
"Hamfest Flea Market Circuit" and now sell exclusively on e-Bay

The above 2 auctions contain item types that I have seen for
sale at **NUMEROUS hamfests** in the past - and that
INCLUDED the DAYTON HAMVENTION. What's the difference
selling this stuff at Dayton....or on e-Bay ??

(none if you ask me - but I sure will not be the first one to place my bid
on saidsame items - JUST IGNORE THEM AND THEIR SALE
SIMPLE EH ? How difficult is that to do..???)

Lets see if I've got this right, first I fire Lloyd from the B.A.R.F., then he tries to join the Stumpjumpers to no avail, then Glenn basically tells him to get lost. Now he furiously baack pedals and slobbers while making slurping noises while he attempts to suck off K3VR and sign on as his "valet"....which is a nice word for "Cabin Boy", too bad Lloyd, nice try, but you have failed miserably once again.

I'll say one thing about Lloyd,

Lloyd Davies was the best sponge boy I ever had!

When I said all the junk in shielding, I include the wires to the injectors. We have the same problems with Adjustable Speed Drives (ASDs) on air handlers in radio receive sites. ASDs will tolerate no change in impedance at the output which drives the very noisy cables from the controller to the motor. Have to thoroughly bypass the input power, and carefully shield everything else. Fortunately, (knock on wood) so far, no plastic cased motors have shown up, but I expect that next. Really annoys the electricians when we make them go back and replace a fair amount of the PVC and Liquidtite with real EMT with the correct connectors. The oversize Hoffman boxes are no favorites either. That Liquidtite is a real fooler. Steel spiral which looks like an inductor since they have managed to insulate the turns from each other. Fortunately there are still some steel braid alternatives which combine flexibility with an acceptable level of shielding and conductor protection.

I downloaded the brand new ARRL ham video Amateur Radio Today from www.arrl.org today and found it very interesting just 30 seconds in. Walter Cronkite (he's the narrator) turns up the volume on a what looks like a Yaesu FT-817 ham radio set to listen to what he says are "two average guys." They seem to be talking in a fire emergency on 3.990 LSB according to the radio's front panel. But whats strange is that they sound like they're on an FM repeater.

Even stranger is that the rig's S-meter doesn't fluctuate with voice peaks, nor does it drop down between transmissions. There is also a "channel 9 rodger beep" following each of their transmissions.

Queston. Does anyone know if the hams have an LSB repeater on 3.990? Or maybe the rig was in "Dual Watch" mode where the display was not showing the active VFO. Or was it all done on channel 9? I've never used an FT-817 and I am very confused.

An oh yeh. I found out that Walter Cronkite is really a ham operator. His ham call is KB2GSD

As long as they do not discriminate on the basis of race, religion,
gender, national origin or ethnicity, they are free to discriminate any
other way they want.

Please quote your source for requiring them to be consistent. I've never
heard of any such thing. They can change their rules every five minutes
if they want to provided they don't breach any written contracts.

>Watch out doug doesn't sue you for libel.

This is highly unlikely on Usenet. The burden of proof rests with the person being libeled. Anyone can sign any name in a Usenet posting. Even if you prove that a post came from a certain computer via an IP address, you still have to prove that *that* *person* made the posting. The only way of defending would be to build a case against the poster if libelous postings continue. IOW, N8WWN should be patient and give the poster enough rope to hang themselves with

> From what I hear, the CBs are fighting back.

Actually, no. According to what I heard (from an eBay employee), eBay was given a list of which radios were "easily modified to operate on frequencies outside the CB band" and are therefore questionable (read eBay's rules on electronic devices). This list included Uniden and Ranger radios like the ones mentioned ("HR2600s, HR2510s, RCIs"), resulting in these radio auctions being routinely removed when discovered.

Like anything else the news media reports on concerning with technology, they are quite aware that the average Joe, wouldn't know LSB, from FM, a repeater from simplex, or ham radio from CB. They show pictures of a few fancy ham radios, and supply audio, from some other source, and unless you are "into" the technology, you wouldn't know the difference. They were probably piping in the audio from a public service band while showing pictures of ham radios.

That fact that this "production" was done as a promotion for people interested in ham radio, the content is somewhat misleading and a bit insulting.

In the future, think of news coming from the ARRL as having the same factual content as information coming directly from Radio Habana Cuba.

Broadcasts from either are self-serving propaganda.

Below is not a true statament. There are now and have been many private HF repeaters around the country. The key word is "private". I use to have one myself and it worked very well and most people didn't know I was on a repeater. Most are 2/hf or 440/hf and a few 6 meters/hf links.
Mine was 2 meters/75 meters.
Now I have no idea what good old Walt had.

Sounds like they showed the HF rig while playing the audio from a 2 meter radio. Instead of a "roger beep," it was probably a repeater's courtesy tone (which lets operators know that the repeater's timeout function has been reset).

It was probably done for the general public instead of regular hams, who would be able to spot the difference. But the general public doesn't know the difference between HF and VHF. It was probably done more for the convenience of producing the video than for technical accuracy.

You might have alternator whine or noise from body panels not grounded together; maybe even stastic noise from wheel bearings. Best bet might be a Radio Shack Noise Filter on the power leads to the radio. There are two versions: 10 amp [R-S # 270-051 @ 14.99] and 20-amp [R-S # 270-055 @ 19.99]. I've used both the 10-amp [on Honda Aspencade M/C with Icom/Kenwood/Yaesu 2M rigs and the 20-amp in Dodge Caravan with Yaesu 2M radio. Blocks 99% of noise I hear when I take the filters out of the line.

Is Chris Sweeny one of those extras? If so, why hasn't he been busted
yet? He's certainly asking for it. No, BEGGING for it is a better
word!

> quit whining about no-code techs. we are here to stay and there isn't

Isn't it strange how they can't appreciate the irony of the fact?

> get over it! adapt or fade away, those are the options.

You got that right! Fortunately, the biggest "bitchers" will be dying
off soon. Good thing there will be SOMEBODY to take their place. If
there wasn't someone in the wings, the FCC could auction off the
hambands for disuse.

You guys finally got me to wondering, I'm
a high school drop out with two college degrees(bachelors and masters in
education).
Since any of you of the several disciplines with typical Doctorate degrees
may be identified as Doctor, why is it out of line if we underachievers with
Masters degrees want folks to call us Master. Hunhhhh?(g)

Nothing wrong with calling you 'Master'. If you check the development of
the english language usage of 'Mister' you will find that it is a
corruption of 'Master'. Where 'Master' indicated completion of higher
education.

That's the extent of my knowledge of 'Master'.

Any linguists on the reflector?

Motorola GP2000 V or U, complete pkg.

I have several new GP2000 V/U 99ch. radios for sale. They are NOT the
PRO2150 radios, but the true GP model.
Included in the price:
-Radio, batt, antenna, spring beltclip
-DESKTOP drop-in standard charger
-Comprehensive programming instructions
-Free PC programming cable (makes putting in Alpha tags a breeze!)
-Free Mystery Gift

Total price is $265 with FREE shipping CONUS! <PayPal accepted>

Now available: ADD RAPID CHARGER or SPARE HI-CAP BATTERY: $45 ALSO,
Comprehensive keypad programming instructions available on CD in good
quality .pdf format!

Email if you need more info... this package makes the perfect 2m or 440 rig!
(radios are NOT approved for use in the commercial bands!!)

Thanks!
Randy

Sam had been in business for 25 years and is finally sick of the
stress.

He quits his job and buys 50 acres of land near Athens, Alabama as far from
humanity as possible. Sam sees the postman once a week and gets no visitors.
After six months or so of almost total isolation, someone knocks on his
door. He opens it and there is a balding, obese man standing there.
"Name's Lloyd Davies, your neighbor from forty miles up the road... Having a
Christmas party Friday night... Thought you might like to come. About
5:00..."
"Great," says Sam, "after six months out here I'm ready to meet some
local folks. Thank you.
As Lloyd is leaving, he stops. "Gotta warn you... There's gonna be some
drinkin'."
"Not a problem," says Sam. "After 25 years in business, I can drink
with
the best of em."
Again, as he starts to leave, Lloyd stops. "More 'n' likely gonna be
some
fightin' too."
Sam says, "Well, I get along with people, I'll be alright. I'll be
there. Thanks again."
Once again Lloyd turns from the door. "I've seen some wild sex at these
parties, too."
"Now that's really not a problem," says Sam, laughing. "I've been all
alone for six months! I'll definitely be there. By the way, what should
I bring?"
Lloyd stops in the door again and says, "Whatever you want. Just gonna
be the two of us."

I'll say one thing about Lloyd,

Lloyd Davies was the best sponge boy I ever had!

That's right Mr. ND8V. With over 5,000 hours available to record, I will record 14.275mhz 24/7/365! We will track down the canadian scum who made those threats at you. The Pollacks will bend to thier knees! We will crush Glenn Baxter and his gang of radio thugs! After that, we will give those pruto ricans the radio whipping they surely deserve!

Can I have Glenn's Collins S-line, after we're done taking him off the air?

1562. Nimh Battery / HT Question

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-22 04:54:07 UTC
From: Muddy <noname@noname.net>
Message-ID: <da0e5v8u0gocl34j56fqqsva713eojtol3@4ax.com>
Source record: 68857

Is it OK to use Nimh batteries in an alkaline battery pack for a HT? My Kenwood TH28A can use a BT-8 Battery Case. Kenwood prints on the case not to use NiCD batteries. Actual warning says:

WARNING never use general purpose rechargeable nickel-cadmium batteries type R6 (AA)

I want to use 1800mah NiMh AA batteries. I don't plan to charge them through the DC in jack of the HT .... only through a standalone battery charger unit. I can't see that there would be any harm. Any thoughts.

Rotund ND8V is hardly one to emulate. The Kalamazoo Kunta has self-esteem
problems that he finds difficult to impossible to rectify.
Simply running an ampifier does not make him right.
Ask ND8V how his diet is going....
What diet?
Simple.
ND8V has no diet.
Obvious, isn't it?

Message-ID: <5738751358.FF2198538@ncvillage.net>
Source record: 68863

If you're going to auction something on eBay, be sure that you use some kind of disposable email address there. If you don't, you will be spammed senseless -- take it from someone who has had it happen.

My son decided to sell off some hobby parts and was successful, but his mail box was never the same. The spam started rolling in and never stopped. Finally, we had his address shut off by his ISP and then obtained a new one as the only real solution to his problem.

He could have avoided the whole mess by using a service like the free one available at http://www.sneakemail.com. Sneakemail allows you to mask your true address from the outside world while generating an alias address that is a valid one. You give the alias out to people you don't completely trust, and if the spam gets to be too much, you simply cancel the alias. Your real email address remains safe, and the spammers are foiled.

Bottom line: NEVER use an email address on eBay that is unprotected.

Did your son use his email address as his ID? If so, should not
have done that, but instead, choose a nickname id. Then the only
way someone can contact you is through ebay (they must be
registered with ebay) and then they do not get your real email
address unless you respond back to them via email.

1584. Old war story, suggested by article about ARRL video

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-22 22:28:10 UTC
From: haynes@alumni.uark.edu
Message-ID: <_PS5a.846$cD5.96211@newsread2.prod.itd.earthlink.net>
Source record: 68879

I was in the Air Force in the early 1960s. We had a mission that required a mobile ground station use HF to communicate with an aircraft. They were using a WW-II vintage TCS radio for the ground station. Quite often communications failed, requiring part of the mission to be reflown at great expense.

When Collins brought out the KWM-2 in a Samsonite suitcase my boss thought that would be just the thing to replace the TCS and get reliable communication. The colonels upstairs who had to approve the purchase were not so sure; they didn't think an amateur radio bought off-the-shelf from a dealer was suitable for military use.

One morning I went over to the BX and brought back a copy of the latest CQ magazine and laid it on my desk. The cover photo showed Gen. Curtis LeMay in uniform, with a youngster and some kind of ham radio gear (but definitely not a KWM-2). My boss saw the magazine cover and asked to borrow it for a few minutes. He took it upstairs and showed the colonels, "This is the equipment I am recommending we acquire to replace the TCS." Within a few minutes he had all the signatures and we ordered the KWM-2.

(This was all sometime before the military bought vast quantities of S/Line equipment to use in Vietnam.)

Poor little Evie...got his shorts all atwitter because those big, mean,
nasty Hams wouldn't let him have the frequency, and this after HE broke in
on THEM! So what does he do? Well, the next logical thing, to him, is if
they won't let him have the frequency he will just jam everybody. That way,
you see, if he can't use it, they can't use it either.
What a twit.

Good show. The military version was called KWM-2A. Came with a bunch of crystals, the spare tubes, and the silver hand mike. It had a added crystal switch above the band selector that allowed insertion of variety of additional rocks (crystals) that allowed operation basically anywhere. Except in its VFO range of 5 mhz of course.

It also came with either the phone patch or just speaker consule that included the wattmeter. Sometimes the 30L-1 linear and all in samsonite cases. Quite a deal actually.

Last ones I saw were being burnt in a pile....ah well.

David gets a bit tiresome. I hope someone did record him, but his prissy
sounding voice drives me up the wall. I usually shut him off simply because
I know he doesn't have anything of value to add to a conversation.
Didn't he get in hot water with the FCC once before for jamming?

Several times actually.....and this is NO LIE. Check it out if you want.
A few years back David was ordered to re-test under the VE program because
of this same sort of crap on 14.313. He used to be KC1ZQ...an advanced
call. If you notice he is now a GENERAL.

David Tolassi is the first and ONLY ham in history to actually downgrade his
license after testing. My oh my.

Very interesting, indeed. I do not doubt you and won't check it out. The
troublesome part of this is, why the heck is he repeating the process all
over again? One would like to think that he would have learned the first
time but apparently he didn't.
I wonder if he ever reads these newsgroups to see what is being said about
him? He doesn't seem to have any friends, does he?

3.947.4

Some blowhard is on there now saying that
there are "foreign Norwegian UN troops" in
the southwest USA or something.

The strange thing about this is I thought that on the
LN, they'all liked those blond haired-blue eyed
aryan type Norwegians! Why they bellyachin
about this? Would they rather have a chevy
van full or 30 mexicans in UN blues instead?

Same shit different weekend on 3.947.4 - OyVey!

I am just finishing up working on a KWM-2 that some previous owner
installed the various Collins mods. Never saw such a mess, the
cluck obviously did not know how to properly solder. Each
connection was covered with a hugh blob of solder. I have spent 2
weeks off and on cleaning it up. Must have sucked a half pound of
solder out. I am surprised it was working. The chassis, being as
crowded as it is, makes it a real PITA to work on. Am going
through all the alignment and hope to get it on the air soon.

> Bottom line: NEVER use an email address on eBay that is unprotected.

When establishing an account on eBay, DO NOT USE YOUR E-MAIL ADDRESS AS YOUR
EBAY ID. Instead, make up an ID that bears no relationship to your email
address or to your name. Don't use your call sign, your mother's maiden
name, or anything else that links to you. Make up a gibberish name -- just
random letters and numbers.

If your son still has his eBay account, he can go to "My eBay" and change
his ID. That way, the only way anyone can contact him is through eBay, and
to do that, they must be registered on eBay themselves.

Hey all, have a VHF HT1000 16ch. with regular charger, speaker/microphone and battery. Battery is holding a charge but datecoded '96. Working good after a ride on the analyzer, but ??? Battery is also missing one of the release tab ends and is hard to get hold of but both sides secure fine. Will have programmed to your specs.

Radio, charger and mike are in excellent condition, working properly.

H01KDC9AA3DN

$290 (SHIPPED CONUS.)

NOT parting out, complete pkg only.

thanks!
Randy

Rudi; the wiring diagram for the 1993 7.3L diesel indicates nothing in the way of electronic injection. There is however a Powertrain Control Module (PCM), that has an engine RPM sensor. Perhaps that sensor is the source of the noise. Look for a sensor with dark green and pink/orange wires on the engine block. You might try a clamp-on type ferrite choke (radio shack) over those leads.

Perhaps the 95 model had electronic injectors if so, the same solution might work on those.

The Lib Nutz are still going strong at 0644 hours. (that is UTC for no-code Lloyd and 0144 for TeleTubby jammer ND8V..)
Do these conspiracy goons ever give up?

Tune in tomorrow on 14.275 to hear Tiny Tim Tolassi go toe to toe with Mighty Mike as they duke it out and air their dirty laundry for all to hear. Tiny Tim will likely repeat today's performance and have a little hissy fit if the guys ignore him. Watch for TT to jam and act like a woman scorned. David should take some time to visit his family doctor...I hear that modern medical science is working wonders these days and he may be able to get an injection of male hormones. Sorry, David, rectally injected male hormones do not work.
I wonder if this would lend any more bass to his whispy voice or just send it up into the next octave?

Amateur Radio Newsline™ Report 1332 – February 21, 2003

Amateur Radio Newsline report number 1332 with a release date of Friday, February 21 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Snow causes outages in the East and ham radio comes to the reascue. Hear the details on Amateur Radio Newsline™ report number 1332 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE NORTH-EASTER OF 2003

Snow plowing crews struggled to clear roads and airport runways on Tuesday February 18th. This after one of the worst storms in decades buried parts of the United States eastern states in 2 to 4 feet of snow. And in some areas ham radio was called out as we hear in this report:

--
Snowdrifts were piled high from the Ohio Valley to New England, mudslides and floods wreaked havoc in the southern Appalachians, and layers of ice snapped trees and power lines. At least 47 deaths had been blamed on the storm since it charged out of the mid-West Plains states over the previous weekend. Schools were closed from West Virginia to Connecticut and more than 250,000 homes and businesses lost power and telephone service. Enter ham radio.

During the height of the storm on the 17th, two communications emergencies were declared by the Federal Communications Commission in conjunction with the ARRL. The first was in Virginia to protect amateur emergency communications on 3.947 and 7.243 Mhz -- plus or minus 3 Khz. Also included were 145.430 MHz and 146.880 MHz repeaters in Richmond, the 147.360 MHz machine near Chesterfield and the 146.760 Mhz repeater serving Williamsburg at times when each was handling emergency traffic. It was only in effect for a few hours and terminated at 19:00 hours UTC the same day.

The second communications emergency was declared for Kentucky. Former ARRL President George Wilson, W4OYI, lives in the city of Owensboro. He says that his area recieved about 2 inches of glare ice and quite a bit of sleet on top of it.

But the big problem was in Fayetteville near the city of Lexington. Again the problem was mainly ice related and radio amateurs were ordered to keep from using repeaters on 146.760 Mhz, 147.165 and 444.125, MHz unless they were specifically taking part in the handling of emergency traffic

Further to the North, Bob Josuwait, WA3PZO tells ARNewsline™ that Montgomery County in suburban Philadelphia Pennsylvania had about 20 inches of snow. Montgomery County RACES was activated at 1800 on Sunday, February 16 th.

Bob Lees, W3ZQN, is Montgomery County RACES Radio Officer. He reports that members with four wheel drive vehicles were told to help, as possible, by providing transportation for essential hospital and nursing home workers within the county.

The Radio Officer sent an alert via the pagers carried by over 50 members, convened a net on the county two meter repeater and began making phone calls to determine specific needs.
RACES responded or attempted to respond to 17 different requests for transportation services until about 10 P.M. local on February 17th. A total of 21 people were transported by six different drivers in their personal vehicles. Each vehicle was in constant contact with net control by radio as they traveled.

Lees says that six hams acted as net control stations from their homes. Another 14 who did not have four wheel drive vehicles checked into a net called at noon on February 17th. Each operator indicated that they were monitoring and could possibly help in other jobs if requested. In all it was a good job done by RACES and ARES in the face of one of the worst North-Easter’s of the past hundred years.

For the Amateur Radio Newsline, I’m Blair Alper, KA9SEQ.
--

For the region as a whole, it was the worst snowstorm since the blizzard of 1996. In that one at least 80 deaths were blamed on the weather.
(ARNewsline™, ARRL, WA3PZO, W4OYI, VHF Reflector, Repeater Owners Remailer, published news reports.)

**

INTRUDERS: DRUG RUNNERS ALONG THE VK COASTLINE

What appear to be illegal drug runners have taken to the ham bands along the Australian coastline. Q-News Graham Kemp, VK4BB and Chris Wright, VK2UW, have the latest details:

--

“14.044 daily at 08:30 U-S-B are "Big Voice" -- must be thee HQ Stn.. and "Low Voice" Supply Boat ?? On the 23rd January "Big Voice" was joined by another Big Voice -- signal 59+ -- also in the same direction...

The N.T.News carried an article about the "roadside drug distribution points in Western Australia. Maybe these two 'Big Voices' are running the distribution points and the 'smaller Voice' keeps up the supply to the Distributors ??

There was a video report on Darwin TV picturing an 'abandoned' Chinese Fishing Boat along the West Aust. Coast tied up to the Shore. No Crew and No Cargo. And there are some Indonesian Voices 'Hopping' in on the Frequency when it is not in use. Maybe they have a part to play in the business?

If my bearing of 250 degrees and VK6XW bearing of 360 degrees were used, they would cross in the vicinity of Broome.
--

According to Q-News, Australian hams are being encouraged to report anything they hear to the nations Intruder Watch Coordinator. (Q-News)

**

HAM RADIO IN SPACE: JAPAN ARISS CONTACT TO THE ISS

Ham radio contacts with the International Space Station continue. One of the latest took place on Tuesday February 18th when 8N3HES at the Hirano Elementary School in Kobe Japan succeeded in connecting its students with the ISS crew using Amateur Radio curcuits. One of the first questions answered had to do with ecology. How do you dump your garbage in space?

--
CONTACT AUDIO
--

That recording was made by JN1GKZ and you can only hear the I-S-S side of the contact. And some of the questions brought more information than many needed to know like when one student asked: “How do you take a bath in space?

--
CONTACT AUDIO HERE
--

This is the 3rd ARISS School contact with a school in Japan. To see a list of questions and herar all of the answers you only need to take your web browser over to the JN1GKZ website. You will find it at:
http://www.qsl.net/jn1gkz/sound/ariss/8n3hes.htm (ARNewsline™ with sound from JN1GKZ))

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W3BN Reading Amateur Radio Club repeater serving Reading Pennsylvania.

(5 sec pause here)

**

ENFORCEMENT: PIRATES CANNOT EVER HOLD RADIO LICENSES

Pirate radio operators cannot ever get licenses to operate a legitimate radio station. So says a court of appeals. Amateur Radio Newsline’s Ken Locke, N8PJN, has more:

--

A United States appeals court has upheld as constitutional a law that bans a pirate broadcaster from ever obtaining a license for a low-power FM radio

station. In fact, it bars a current or former pirate broadcaster from even being involved with a station.

In its action, the full court reversed a ruling last year by a three-judge panel of a court that had struck the law down. By a 7 to 1 vote it ruled the law and the government regulations implementing it do not violate free speech rights under the First Amendment.

Back in 2001 Congress mandated that the FCC adopt rules to ban anyone who had been a pirate broadcaster or currently was broadcasting illegally from obtaining a license for a new low-power station. The appeals court appears to have taken this one step further in banning any affiliation bu current or former pirates with a legitimate FCC licensed broadcast operation.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting.

--

Thanks Ken. (FCC)

**

ENFORCEMENT: NO TWO METER SETS FOR HUNTING SEASON

The FCC has written to the manager of a Radio Shack store to warn against selling ham gear to unlicensed persons.

The letter went to Dennis Wilfong who manages the Radio Shack at the Valley point Shopping Center in Elkins West Virginia. In it the FCC says that it has information indicating that numerous individuals are purchasing Amateur radio Service Two-Meter radio units from that store for use during hunting season and the purchasers are using them without the required license.

But thats not all. The FCC says that those purchasing the radios are either not being told that the units require a license, or are being misinformed as to the licensing requirements.

The FCC tells Wilfong that he should advise purchasers of Amateur Radio transmitting equipment that unlicensed radio operation is a violation of Section 301 of the Communications Act. That using the transceivers without first obtaining an Amateur Service license may result in a monetary fine of $7,500 to $10,000. (FCC)

**

ENFORCEMENT: FLORIDA UPGRADE SET ASIDE

John S. Gregory, W3ATE, of Lake Worth Florida has had his General class upgrade set aside. This, based on complaints about the operation of his station on frequencies not authorized by his Technician class license.

According to the FCC, at various times in 2002 Gregory apparently checked into a net on 14.300 Mhz while still a Technician class license holder. He was issued two warning letters but the FCC says that both were returned as unclaimed. (FCC, W5YI Report)

**

ENFORCEMENT: FCC ISSUES A RASH OF FINES

Hams are not the only ones hearing from the FCC. The Commission is continuing to flex its enforcement muscle by issuing a number of monetary forfeitures. Here are some recent examples courtesy of the CGC Communicator:

How about $2,500 to a telephone company for failing to exhibit prescribed tower painting. Or $4,000 to a CATV operator for failing to retransmit the EAS required monthly test.

But those are small in compariason to a $10,000 fine issued to a communications operator for failing to exhibit prescribed obstruction lighting on its antenna structure. Another $10,000 was issued to to an FM pirate while a $15,000 fine was issued to to an AM radio station for failing to maintain operational E-A-S equipment, and for failing to enclose the station's antenna tower within an effective locked fence. The whole story is in cyberspacve at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030204.ht (CGC Communicator)

**

RADIO POLITICS: ARRL TRYING AGAIN WITH SPECTRUM PROTECTION ACT

If at first you don’t succeed, try try again may be an old addage, but it applies in the case of te 2003 Amateur Radio Spectrum Protection Act. This is a bill that has been introduced in the US House of Representatives by Michael Bilirakis of Florida.

According to the ARRL. Bilirakis filed the latest version of the bill, HR 713, on February 12th. It has been referred to the House Committee on Energy and Commerce. Like its predecessor, HR 713 is aimed at ensuring the availability of spectrum to Amateur Radio operators. It would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides equivalent replacement spectrum elsewhere.

The previous version of the Spectrum Protection Act attracted more than 50 cosponsors. An effort will be made to encourage additional House members to sign onto HR 713 as cosponsors. Additional details are on the web at www.arrl.org. (ARRL)

**

RADIO LAW: HAM PETITIONS TO KEEP EQUIPMENT ASALES DATE ON FILE

Dale Reich, K8AD, of Seville Ohio, has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name, address, telephone number and any future information. This, when selling a radio that required licensing under the current FCC rules.

Accordiong to an ARRL bulletin, the information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that any retail vendor would be able to ask local police for an investigation if the retailer suspected the radios were not going to be used in compliance with the

law.

Included in the petition is a requirement for "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was a needed tool for local law enforcement.

The full text of Reich's petitions is available on the FCC Web site. Search for petition number RM-1064. Comments are due no later than February 28th. (K8AD, ARRL Letter)

**

HAM RADIO ENTERTAINMENT: WRTC 2002 VIDEO NOW AVAILABLE IN THE USA

The World Radiosport Team Championship 2002 video had its United States premiere on Wednesday, February 5th. This, before a standing-room-only crowd in Washington state hosted by the Western Washington DX Club.

With photography by James Brooks, 9V1YC, and Dave Bell, W6AQ, the video covers WRTC 2002 from the perspective of a professional sporting event. The show begins with the arrival of competitors from more than 30 countries. It then takes the viewer behind the scenes for the various pre-competition activities and into the actual competition.

The video is available on VHS tape and DVD with extra material on the DVD. You can place your order on-line at http://home1.pacific.net.sg/~jamesb (WRTC)

**

CONVENTIONS AND CONFERENCES: SEVHFS IN HUNTSVILLE IN APRIL

If you have been trying to register on-line for the upcoming Southeastern VHF Society conference and getting a reply of no such website, try again. It will work the way its supposed to.

The problem was caused by an Internet Service Provider outage at the most inoportune time. The repair: Everything was moved to different server but that took a few days to accomplish. And now that its all back up and collecting bits and bytes in cyberspace, you will want to visit www.sevhfs.org for the latest conference update. This includes word that Steve Kostro, N2CEI of Down East Microwave Incorporated will be hosdting a surface mount soldering class on the opening Friday morning of the gathering.

The when and the where? This is the 7th Annual Southeastern VHF Conference. It is slated for April 25th and 26th at the Huntsville Marriott in Huntsville, Alabama. For further information and to register, visit that now up and running website at www.sevhfs.org. (SEVHFS)

RESCUE RADIO: THIS IS HDSCS

Last week Amateur Radio Newsline’s Joe Moell, K0OV told you that members of the Hospital Disaster Support Communications System of Orange County, California had been included in a new documentary series on the Discovery Channel. The show is called "Critical Rescue" and it aired on Thursday February 20th and on Saturday February 22nd. But what is the the Hospital Disaster Support Communications System or HDSCS and how does it work? Back with the answers is Joe Moell, K0OV:

--

HDSCS is a specialty group of ARES. It was formed in 1979 with the specific mission of providing backup communications that are critical to patient care. Since then, HDSCS has responded in 75 communications emergencies, ranging from single-hospital telephone system failures to area-wide disasters.

For its service, HDSCS has received awards and commendations from many hospitals and agencies, including FEMA. The most recent is the National Certificate of Merit from ARRL, awarded at the Board of Directors meeting in January 2003.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

For more about the Hospital Disaster Support Communications System of Orange County, California and information about how hams can best support hospitals, point your Web browser to www.hdscs.org. (ARNewsline™)

EMERGING TECHNOLOGY: RC-110 REPEATER CONTROLLER GOES OPEN SOURCE

How would you like to be able to customize a repeater controller your way? Well, according to Ken Arck, AH6LE, There has been considerable interest from folks wanting to customize their RC-110 repeater controllers. So Arck, who is both president and CTO of Arcom Communications says that he has decided to make the source code available to any ham who wishes to take a stab at 'hacking' it for their own use.

Writing to the Repeater Owners Reflector, Arck says that as far as he knows, no other repeater controller offers this open source archecture. Of course there are certain conditions, but they're pretty straightforward.

If you are interested in getting the source code, Arck says that you simply need to join RC-110 mail list. To do this send an e-mail to

rc110-subscribe@yahoogroups.com. The source is available in the files section of the list. More information is at Ken’s website – www.ah6le.net (Repeter Owners Remailer)

**

INTERNATIONAL – UK: REPEATER STOLEN

A repeater in the United Kingdom is off the air due to theft. According to the RSGB, the GB3NC two meter repeater and its site companion the GB3MCB 1296 MHz beacon have not been heard since someone made off with the equipment. Both were co-located in Cornwall and the RSGB says that its not known if either will ever come back on the air. (RSGB)

**

INTERNATIONAL: YUGOSLAVIA: THE NEW NATION OF SERBIA-MONTENEGRO

Yugoslavia has become Serbia-Montenegro. This, after Yugoslavia's parliament voted to formally abolish that nation and replace it with a new country called Serbia-Montenegro.

According to the ARRL Letter, the new arrangement will have little immediate impact on Amateur Radio. For D-X-C-C purposes, Serbia and Montenegro will be considered a single entity, at least for the time being. Also, amateurs there are expected to continue using Y-U and Y-T prefixes. (ARRL)

**

CONTESTING:: UT5UDX ON THE MOVE

Ukrainian international football player Sergei Rebrov, UT5UDX, who moved to England in a multi-million-dollar deal in 2000, has moved again. This time to Turkish side Fenerbahçe.

Word is that Rebrov has signed an 18-month loan deal with the Turkish club on January 28th. The Turkish club now has the right to buy him at the end of the loan period.

Rebrov is a High Frequency contest operator. He and has been very active as M0SDX from his home in the U-K and from other locations in the British Isles over the last two years. He is reportedly now in the process of obtaining a Turkish callsign. (RSGB)

**

DX

In D-X, GB2RS says that a group of Swedish amateurs will be active as JW slash SM0BSO, JW slash SM0LQB and JW slash SM1TDE from Svalbard through the 23rd of March. Activity will be on 160 through 6 meters on CW, SSB, RTTY and other digital modes. Q-S-L this one as directed on the air. (GB2RS)

And F5PAC is returning to Panama from the 23rd of February until the 24th of March. He will also operate from several Islands on the Air groups including

from the 25th to 27th of February. You can fopllow his exploits on the web at www.qsl.net/f5pac (Via e-mail)

**

THAT FINAL ITEM: EXTENDING MORE THAN A WELCOME

And finally this week, the story of a ham radio dream thats about to come true. Its also the story of what Amateur Radio is all about. Bruce Tennant, K6PZW, has the details:

--
Audio story only. Hear it at http://www.arnewsline.org
--

And after that, what else is there to say? (K6PZW)

>
> I'm Les, Firebottle isn't.

Google (http://groups.google.com) can be a revealing database when used to check up on a poster's history. Take for example the three entities who call themselves "Ed Norton," "Firebottle," and "Les Locklear," and who have an obsession with trashing someone named Lloyd Davies.

They have the following things in common: (1) they claim to know one another (Firebottle even claimed that Ed Norton hangs out with Les on weekends); (2) they all have AOL accounts; (3) they all have Google accounts, and (4) they all post through Keesler AFB from time to time.

Here are a few of the message IDs which are archived on Google and which contain the supporting information. You can retrieve the message itself by putting the message ID into the form on the advanced search page at Google. Once you have the message, click on "original format", and then take a careful look at the NNTP-Posting-Host header. It identifies the computer which had connected to Google's machines in order to make the post.

Keesler AFB often uses Ft McPherson's proxy server, and so it arises as the NNTP-Posting-Host in those cases. Here are a few messages posted by "Ed Norton" via the McPherson route (IP address 198.26.120.13):

Message-ID: <999c58d3.0302050507.235363ea@posting.google.com>
Message-ID: <999c58d3.0301220427.5ac785b1@posting.google.com>
Message-ID: <999c58d3.0208140417.417b9d96@posting.google.com>

And here is a message that "Ed Norton" posted directly from Keesler via IP address 131.22.200.54:

Message-ID: <999c58d3.0301270810.218de3f1@posting.google.com>

"Firebottle" likes the McPherson route too, as can be seen in:

Message-ID: <edaa3c2a.0301130628.26862bd@posting.google.com>
Message-ID: <edaa3c2a.0301130622.35a242d5@posting.google.com>
Message-ID: <edaa3c2a.0301150542.56b0ab39@posting.google.com>

And Les Locklear also posts through Keesler, as recorded in
Message-ID: <cbf9555c.0301140634.421d12b5@posting.google.com>

Les also connects to Google through Ft McPherson, as indicated in
Message-ID: <cbf9555c.0301131014.ea9f7a5@posting.google.com>

-...-

So what does this mean? The simplest explanation for the great commonality among those three posters would be that they are all the same person. If not, and the sock puppet operator is, as he claimed, a friend of Les', then I'd say that with friends like that, Les doesn't need any enemies.

[...]

Indeed.

The smaller broadcasters, particularly the AMs, and the listeners,
would benefit _tremendously_ from a dedicated digital broadcast
band.

But the fact that it would make all of the signals in a given market
equal by making the reception of all of them essentially perfect is
the very fact that makes the big-money boys _hate_ the idea of a
dedicated digital band.

They want to keep their dominance.

"We paid $30 million to have the biggest signals in that hick town,
and that little local schmuck with the $100,000 AM daytimer is going
to have an equal signal to us on the digital band?! And there'd be
so many channels the locals could have perfect-fidelity community
access on dozens of channels?! This has gotta be stopped -- get on
the horn to my Washington lawyer NOW!"

They want to keep their competition stuck with daytime-only or
low-power night operations that cover only 1/10 of the market. They
want the smaller AM stations to continue to live with ionospheric
skip problems, high (and ever-higher) levels of man-made noise,
overallocation, and close channel spacing which makes in-band
on-channel (IBOC) digital implementation on AM a faint shadow of
what the FMs will get -- and a joke compared to what these stations

could achieve in a dedicated digital band. (And this is to say nothing of how IBOC will adversely impact listening to weak stations and DX listening by increasing adjacent channel noise.)

Yes, it is true that some of the big-money boys own a few AM stations, but they're willing to accept the distinctly inferior IBOC system for a fraction of their properties, because it will prevent their worst nightmare from coming true: the suddenly even playing field that a dedicated digital band would provide.

Meanwhile, _real_ digital radio is being offered by satellite providers, who provide superb quality and universal coverage, though without any chance for the small entrepreneur or free-speech advocate to get a voice in channel lineup.

With all good wishes,

--

Kevin Alfred Strom.

Very classy stuff from someone without the balls to identify himself.
Phony name and a forged header. I'm impressed. A racist, too. You've
got it all covered.

Rich

What is racist about that post? Gee...you Liberals...all somebody has to do
is use the word "black", "African" or a panoply of others that you dislike
and you call them a racist?
Gee, Rich. Wring your hands much these days?
By the way, it is Kevin who is the racist here....

Here is but one small quote taken from Strom's web site.

".....White resistance to non-White expansion into our race's living space: Ethnic Genetic Interests.
The conclusion is this: Every 11,000 Bantus immigrating to Britain, for example (results for other White nations are similar), is equivalent in its genetic effects to the killing of 10,000 White children."

And you whiners call a poster "racist" because he used the term African American? Go figure.

1617. High Priority Traffic - Marine Net - help

Newsgroup: rec.radio.amateur.misc

I would appreciate hearing from anyone that can pass some high priority traffic into the hf marine net. The boat is somewhere off Mexico, assuming Gulf of Mexico / Caribbean area.

Please contact me by return email if you can help or I can be reached by land line 972-567-1603.

Thank you,

Jack

1619. CATV Hardline Questions

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-23 21:09:44 UTC
From: Adam Adkins <no@way.com>
Message-ID: <MPG.18c2f495f8e8ae0c98968b@netnews.attbi.com>
Source record: 68764
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Recently I have been trying to use 1/2" CATV hardline to feed my vertical antenna. The cable is a little larger diameter as LMR-400 or any other .405 OD coax. It has a solid center conductor with foam dialectric that is glued to the center conductor. The jacket is aluminum, and there is no PVC outer jacket. The connector was crafted from a PL-259 and a brass double female 1/2" compression fitting. That experience has taught me a couple of things, and raised some questions. If anyone has any helpful comments about the following, I would really appreciate hearing them.

I discovered very quickly how a kink in the cable is a disaster. Thirty feet from the end of a 200 foot run, the cable kinked and the outer metal jacket ruptured. Bleah. How disappointing.
Can anyone tell me good, cheap and durable ways to splice the cable?

Talking to a friend, I mentioned that I didn't plan to bury the cable but for a short run to make sure it isn't run over with the tractor. He asked me, "Wouldn't that change the impedance?" I had to admit that I don't know, but didn't think it would since the jacket is ground anyway.
I could not find the answer to this question anywhere. Can anyone tell me whether buried / not buried will change the impedance of this feed line? Are there advantages to burying the entire run? Are there any wild aluminum eating creatures that nibble holes in hardline?

Finally, does anyone care to share any hard-won experience, or pointers to complete information, or whatever?

Thanks in advance for any help,

73,

Adam Adkins, KM5N

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2FRD, N3GXF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N5FG, K6IF, K8YC, K8YSE, 9A6AA, 9K2HN, DL1EK/DL7VOA & DX Newsletter, DL3APO, F5NQL & UFT, F6FVY, FJ5DX & La Gazette du DX, I1JQJ & IK1ADH - 425 DX NEWS, GM3YTS, JH6RTO, JI6KVR, LU4EJ, OM3JW, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PA5NT, PY7XC, VA3RJ & ICPO, VE2MBS, XE1BEF DX Bulletin and YV4GMG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th/February, through Sunday, 23rd/February there were 234 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T31, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8 OP UNSUCCESSFUL! Peter, DL3APO, informs OPDX, "We are back from Mauritius - frustrated and very disappointed!" The German team for the 3B8/DK7AO operation was unsuccessful in receiving permission to operate; even with the help of Jacky, 3B8CF. Peters states, "In the cirle of the

permission process, security must have played a main character."

6Y, JAMAICA. Kevin/WN9O and Mike/WO9Z will be active as 6Y5/homecall now through March 9th. They will participate in next weekend's ARRL DX SSB Contest as 6Y8Z. QSL via WO9Z.

8P, BARBADOS. Peter, W0SA, is now active as 8P9NX and is expected to be active until March 6th. Activity will be mainly on RTTY and CW. Over the past weekend, activity was spotted on/around 3517, 10107, 14014 and 14088 kHz after 2030z or 0100z. QSL via W0SA.

9S, DEMOCRATIC REPUBLIC OF THE CONGO. Look for Flo, F5CWU, to be active as 9S1X now through March 10th. He plans to participate in next weekend's ARRL International DX SSB Contest. QSL via F2YT.

A5, BHUTAN. Just a few more days to work Glen, W0GJ, as A51B. He will be going QRT at 0200z, Wednesday, February 26th. He has been very active on RTTY and 80 meters. QSL via W0GJ direct.

BY, CHINA. By special arrangement with the government of the People's Republic of China and the Chinese Radio Sports Association, Rick/AE3C and his 10-year old daughter Barbara/KB3HAS will be operating at various locations in Beijing and northern mainland China between February 23rd March 11th. AE3C will be active on HF, SSB and CW. Also, listen for KB3HAS on HF and CW. Callsigns were not mentioned, but look for them to sign possible BY*/homecall. QSL to their Pittsburgh QTH. ADDED NOTE: Rick states, "We will definitely CQ on the Live-Wire and HFPack freqs if they are available to us, 2300z-0100z. We will also try to set up an Echo-Link station if at all possible while there, especially if 440 is active."

C9, MOZAMBIQUE (IOTA Op). By the time you read ths Reinhard "Rei", DL6DQW, will be finishing up his activity as C98RF from Mocambique Island (AF-088); last day on that island is expect to be February 24th. Rei will move onto Quirimba Island (AF-061), and he will be active between February 25th and March 3rd. QSL via DL6DQW.

CDXA GATHERING. The Carolina DX Association (CDXA) invites all DXers and Contesters to visit their booth at the Charlotte, NC Hamfest, on March 8-9th. Some great forums are lined up for the event. Presenters will be:
* Riley Hollingsworth (K4ZDH), FCC Special Counsel for Amateur Radio Enforcement
* Dave Anderson (K4SV), 2002 ZL7C Chatham Island DXpeditioner
* Bob Heil (K9EID), Presenting a second chapter in "The Science of Audio" as a follow-on to 2002's presentation
* Doug Smith (KF6DX), Speaking on the Ten-Tec Orion , Editor of ARRL QEX/Comm. Quarterly
* Wayne Mills (N7NG), ARRL Membership Services Manager
* Get your QSL cards checked for DXCC and take them home with you. Representatives from ARRL will "check em while U wait".
Then join them for an evening of fellowship at Red Rocks Restaurant, Bar, and Bakery. This is a great opportunity to share stories with fellow DXers;

This is priceless! If you'd like to come, let Bob Burton, CDXA VP know by dropping him a line at: Bob.Burton@McKesson.com

CT3, MADEIRA. Operators Rosel/DL3KWR and Hardy/DL3KWF are to be active as CT3/homecall from Madeira (DIP MA-001), March 6-20th. Their activity will be mainly CW on the WARC bands. QSL via their home callsigns, direct or via the bureau. Bureau QSL requests are available via E-mail at: dl3kwr@darc.de

DXCC NEWS. Bill Moore, NC1L, DXCC Branch Manager, reports the following operations have recently been approved for DXCC credit:
VK0MQI - Macquairie Island, January 1, 2002 through March 15, 2003.
3C2MV - Equatorial Guinea, November 11, 2002 through December 12, 2002.

FY, FRENCH GUIANA. Operators Didier/FY5FY, Marc/F1HAR, Herve/F5HRY, Oliver/F5MZN and Larry/F6FVY will be active in the ARRL International DX SSB Contest (March 1-2nd) as a Multi-Single entry. QSL to FY5KE direct or via the bureau.

GMDX CONVENTION AND DINNER. The GM DX GROUP (Scotland's DX Association) invites you to attend their 6th annual convention/dinner on Saturday, April 26th, at King Robert Hotel, Whins of Milton, Stirling, Scotland. Activities start at 12:30 PM. Some of their programs include the following:
* Contest Station HC8N by Don G3XTT
* Antenna Computer Modelling by Alex G3ZBE
* 9L1AB Sierra Leone by Andy G3AB
* Convention wrap up and Raffle draw
The convention will end with an evening DX Dinner and a visit to the hotel bar. There will be special rates at the hotel, and they suggest you arrange your accommodations as early as possible to avoid disappointment. The King Robert Hotel's telephone number is: 01786 811666
More details can be found on the GMDX Group's Web at: http://www.gmdx.org.uk

IOTA NEWS.....
OOPPPSS DEPT. Two typos in last week's OPDX.599 bulletin. IOTA numbers listed as NA-052 and EU-177 were incorrect. Please change NA-052 to NA-82, and EU-177 to EU-171.

AS-047. (Update) Toru/JI5USJ and Makoto/JI5RPT will be active from Daito Island March 4-11th as JS6QVP and JS6QVQ, respectively, on CW/SSB only. The callsign JI5RPT/6 will be used on RTTY/PSK31 only. Activity will be on 160-6 meters (w/200 watts and 50 watts for RTTY/PK31). Their antennas are: 160-10m DP, 20/15/10m 2 element HB9CV and 17/12m 2 element HB9CV. QSL direct to their home callsign (address in OPDX.593) or via the bureau. QSL JS6QVP via JI5USJ and JS6QVQ via JI5RPT. More information is available at: http://www.aa.alpha-net.ne.jp/ji5rpt/as-047/

OC-092 Operators Ken/G3OCA, Gilbert/4F2KWT and possible other DU
OC-120. operators (Nicky/DU1JXP and Mike/DU1MHX were mentioned) will activate Cuyo Islands (OC-120), March 14-17th. From March 21-25th, they will activate Babuyan Island (OC-092). Two

different sources are reporting different callsigns. Their callsigns from OC-120 will be DX0C or 4D2C and from OC-092 it could be 4D2B. They plan to have two stations on the air. Activity will be on 40/20/15/10 meters CW/SSB and maybe some WARC activity. PLEASE NOTE: QSL via G3OCA, except for Russian stations, whose cards will be handled by UA4SKW. All direct cards received for the 2002 DXpedition were mailed out at the beginning of December 2002.

SA-055. Mariano, LU4EJ, informs OPDX that he will be active from Martin Garcia Island as LU4EJ/D, March 20-22nd. The island is located about 60 km east from Buenos Aires. The equipment will be a Kenwood TS-2000, vertical antenna AV3 with 9 ground planes for 20/15/10 meters and dipoles for 80 and 40 meters. Suggested SSB frequencies are: 3680, 7090, 14200, 21300,28460 and 50110 kHz. QSL via LU4EJ (see Qrz.com) direct or via the bureau.

SA-085. Members of the Atacama Desert DX Group (Operators include Mauricio/CA2WUI, Danilo/XQ1ZW, Nicolas/XQ1IDM, Patricio/CE1URH, Patricio/CE1VLY, Sergio/CE1RQB and Ricardo/CE1FLS) will be active as 3G1P from Pan de Azucar, March 14-17th. Activity will be on 160-6 meters CW/SSB/PSK31/RTTY and possibly SSTV. QSL via XQ1IDM: Nicolas Herrera G., P.O. Box 345, Antofagasta, Chile). A web page (currently under construction) will be available at: http://www.qsl.net/3g1p

J2, DJIBOUTI. Karsten, DL2LAH, is expected to be active from here between the end of February and the beginning of June. Currently his callsign is unknown. His activity will be on the HF bands and 6 meters. QSL via his home callsign. Cards will be answered after his return home.

J3, GRENADA. Look for Harry, AC8G, to be active in the CQWW WPX SSB Contest (March 29-30th) as a Single-Op entry. He has applied for a special callsign, possibly J37K or J3**. Activity outside of the contest will be on March 28th and the 31st between 1500-2300z, on 20/15/10 meters SSB. He will consider requests for 12/17 meters. QSL via AC8G.

MU2, GUERNSEY. Operator Marios/5B4WN (aka G0WWW) and Stavros/5B4AFM (aka M0BBB) will be active in the ARRL International DX SSB Contest (March 1-2nd) as a Multi-Single entry. Activity will be on all bands. QSL via G4EOF.

QSL INFO AND NEWS.....
3G5Q activity was from Quiriquina Island (SA-070 and valid as CHI-025 for the ARLHS Program). QSL via XQ5SM.

5B4/UA9MA was active in last weekend's CQ 160-Meter SSB Contest. The operators were Gena/UA9MA and Mike/RZ9UA. QSL via UA9MA.

9K9X QSLS. Hamad, 9K2HN, reports that more than 1300 9K9X QSL cards were sent out via the bureau and 100 direct requests have been answered during the weekend of February 15th (their "Eid Holiday").

IOCA CHECKPOINT. Emir, 9A6AA (IOCAGroup Manager/IOCA Manager), informs OPDX that the following operator has been appointed as an IOCA checkpoints (The Islands Of Croatia Award):
Eugene, RZ3EC, is appointed as the IOCA checkpoint for Russia.
His E-mail address is: rz3ec@rekom.ru

QSL Manager Jim, PY7XC, reports that all QSLs received up to February 20th for the PV7G operation were all replied to and sent out on February 21st.

PLEASE TAKE NOTICE. QSL Manager Vasil, RW6HS, states: "Every month I receive hundreds of QSLs via the QSL bureau. I will not answer cards sent to me via the bureau. I must pay for all cards coming to me via the QSL bureau. Send direct only. Please notify your DX clubs and your national society and tell your members to QSL to RW6HS direct only with SASE or SAE with postage. IRC must be stamped in the lower LEFT hand box by your post office to be any good for return postage. Russia post offices will not accept IRCs that already bare a stamp on them. They cannot be cashed in for postage in Russia. I shall help you with reception answer-back QSL from Russia and CIS. You much more reduce the post expenses. That your envelope was received by me 100 %. As far as possible send your envelope - registered mail. Send direct ONLY to RW6HS no bureau cards please."

Station signing SU9NC during the ARRL CW DX Contest last weekend was Tom, N9NC. QSL via OM2SA.

The Montreal Amateur Radio Club (VE2ARC) is not the QSL Manager for VC2A cards for the period June 15th to July 15th, 2001. You should have received your cards via the bureau already as they were sent out in August 2001. Contact Radio Amateurs du Quebec Inc. (RAQI) for more information at: RAQI, 4545 Pierre de Coubertin, Case Postale 1000, Succursale "M", Montreal, Quebec, Canada, H1V 3R2

"Family Goiciechea" were expected to be active in this past weekend's 160 Contest. QSL YV4GMB (Maria), YV4GMH (Hector) and YV4GMG (Dario) via their home callsign using the address on QRZ.com.

QSL Manager Steve, OM3JW, reports that the complete log of Mike's, OM2DX, activity as YI1BGD (Jan. 1, 2003 - Feb. 13, 2003) will be on Mike's Web site at: http://www.qsl.net/om2dx

ST, SUDAN. Gerben, PA5NT, states that there is a possibility that he will be active from the Sudan again after March 16th. The latest details and the final announcement will be available via his web site. ADDED NOTE: The ST2X story is now available on Dan's Web site and can also be downloaded in PDF format (as well as the JW0PK story). Dan's Web site is at: http://www.dx.to/

T8, PALAU. Seiji, JH6RTO, will be active as T88FS from March 13-17th. He will operate on 80-6 meters and on CW/SSB/RTTY. He points out that there is wrong QSL information on the Web clusters for both his 2001 and 2002 activities. The correct QSL route is via JH6RTO. His address can be found on the QRZ.com Web site or use: Seiji Fukushima, 1182-2506 Hase,

Atsugi-city 243-0036 Japan.

TI, COSTA RICA. Operators Harry/AC8G, Terry/KA8KUZ, Ron/WA8LOW, Ron/W8ILC, Anthony/VE3RZ and Ed/K1EP will be active as TI5N in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. Their activity will be near San Jose. QSL via W3HNK.

VE1, CANADA (A Contest Operation With A Different Twist!). Dan, K6IF, has announced that he was invited by Jim Fisher, VE1JF, to operate from his station for the upcoming CQWW WPX SSB Contest. The interesting twist about Dan's operation is that he plans to write about it and put it on the Web. He states, "This will be a major expedition for me, since I have never operated in a serious contest from outside California. I've decided to write up this effort in a similar way to my 2000 10 Meter effort - although the content will be quite different. While the 10 Meter story was mostly about planning and constructing the antennas and station; this story will be much more focused on my planning and strategizing for the operation of the contest. I will have the pleasure of operating a very well designed station that needs only a small amount of work to be competitive." If you would like to follow his saga, Dan has posted the first chapter (a short introduction) at: http://www.k6if.com/
He hopes you will enjoy it, and your comments/suggestions are valued.

VP5, TURKS AND CAICOS ISLANDS. David, KY1V, will be active as VP5/KY1V from March 11-18th. He states, "For the hams whom would like more than just a signal report, I will be actively pursuing short, meaningful QSOs from Whitby, North Caicos Island." QSL via KY1V. More information can be found at: http://www.ky1v.com

VP9, BERMUDA (VHF). Jon, N0JK, expects to be active June 13-16th from VP9GE's Tarrafal Apartments. He plans to operate mainly in the June VHF QSO Party as a Single-Op/Low Power entry. His station will be an IC-706 MII w/100 watts, a 5 element M2 on 6 meters and 9 element M2 on 2 meters. He hopes to be active on June 13th during the peak times for Europe and plans to be active during the entire contest period. Tear down will be Monday morning June 16th.

WRTC "FINLAND 2002" VIDEO. Review by Tedd, KB8NW: Let me first say I am not a contester, and from the start I was wondering whether or not I would really enjoy this video. However, as always, James Brooks's, 9Y1YC, videos are truly interesting and have excellent videography. There is only one way to describe this video on the "World Radiosport Team Championship (WRTC) Finland 2002" and that is:
"The world's top contesters battle it out in an Olympic style atmosphere using high tech for scoring and refereeing."
To shorten this, WOW! These guys are serious when it comes to contesting. As the camera moves from shack to shack and from operator to operator, you can see that this 24 hour event is stressful and very competitive. I highly recommend that you add this video to your collection, and I truly believe non-contesters (like myself) will enjoy this video. It is also available on DVD with special extras (rules, operators, scores). More details about the video can be found at:

http://home1.pacific.net.sg/~jamesb/

ZF, CAYMAN ISLAND. Peter, N3GXF, is expected to be active as ZF2HW now through February 28th. Bands of activity are unknown at this time because Peter has a Technician Plus license. QSL via home callsign.

Strom is a loser as are others of his bent.

Use Google, search for Kevin Alfred Strom -- or whatever it is. Read about
him and the crackpots he associates with -- loses all. Not one of them
matured emotionally beyond the sixth grade.

Can't help you there. I've only `slightly` kinked either the 1/2"
or the 3/4" stuff but once each -- and it did not burst and I'm
gonna live with it.

> Talking to a friend, I mentioned that I didn't plan to bury the

> tractor. He asked me, "Wouldn't that change the impedance?" I had to
> admit that I don't know, but didn't think it would since the jacket is
> ground anyway.

Mox nix -- being ground. What you'll get is a smashed tube - with
the outer wall much closer to the inner conductor - giving you
(perhaps many - depending on how active the tractor) impedance `bumps`.

[Oh, now that I've re-read the question: No, burying the hardline
directly, or in-directly will *not* alter the impedance. sri]

> I could not find the answer to this question anywhere. Can anyone
> tell me whether buried / not buried will change the impedance of this

> any wild aluminum eating creatures that nibble holes in hardline?

Without _any_ poly jacket, you need to worry about electrolysis and/or
the PH of the soil. If it were me: I'd bury it in some black poly pipe.
'Twould be a feat to stuff in a looooooong run of it...

> Finally, does anyone care to share any hard-won experience, or

Sounds more like Alternator noise to me Rudi,

You may try unpluging the modular plug on the side of the alternator (if it has one) the small guage wires, or otherwise disabling it (use a schematic) and see if that makes a difference.
Alternately loading the alternator with the heater, headlights, defroster or other accessories should change the sound in the receiver if the alternator is infact producing the hash.
Alternator noise is usually high in frequency fine random buzzing that follows the engine RPMs. Ignition noise is usually coarser in nature, also following the engine RPM.

Good luck.

==========
Suggest you use flexible 'alkathene' (polyethylene) water pipe
In Europe (incl Britain) it is available in 20 , 32 mm diameter and larger
sizes
;colour is blue.
I use this pipe also for coax cable with copper braid and black sheathing ,
ie for underground 75 Ohms coax to a TV satellite dish as well as for RG
316 ,50 Ohms coax to a vertical HF antenna.
It is important that the pipe at the outdoors end is properly sealed to
prevent
water running into it.
Alternatively (that's what I have done) where pipe with coax come above
ground outdoors there is a half circle bend resulting in the pipe opening
pointing downwards ,hence rain water can not enter and the circular opening
between pipe and coax cable is left open for breathing.
I realise the latter method might not be suitable for hardline coax because
of the bend's radius.

My opinion is based on experience. I was co-sysop of a BBS that was online from 1989 to 1996. It handled Fidonet, and later, Usenet message groups. Users posted with handles to remain (semi)anonymous, just like today. Two groups of users got into on the board, and threatened to sue. Now, how do you think a *reputable* lawyer is going react when a client asks about suing someone only known as "Malignant Boner" and all you have is an IP address?

I was also sysop of both a land-line and ham radio packet BBSes back between 1990 and 1995, and I had to deal with similar issues. One of the most famous issues had to deal with a ham in my area (WA3QNS) sending a message that denounced the gulf war (Actually it was a poll), and included a 1-900 number to call. Someone got the bright idea that this post facilitated business use of ham radio, and the FCC got involved. To make a long story short, the rules were subsequently changed so that BBS operators were not held responsible for the content of messages posted by their members. To view otherwise would've placed a great deal of pressure on sysops, to constantly monitor traffic. A daunting task, to say the least.

There have been some successful suits. The vast majority never make it to court though, as there are just too many obsticles in the way, and

it's generally not worth the effort. Plaintiffs, in libel cases, still have the burden of proof to show damages, and that is often not quantifiable. It's also hard to draw the line between statement of fact and the expression of an opinion, the latter being protected under the 1st amendment.

> Like I said, either post the link or shut up. I'm not doing your damn
> homework.

It's just hot air. Like the frivilous lawsuits where a criminal breaks into a house and injures himself in the process, and sues the homeowner. No one with any sense would even consider such a case.....

Ham radio "spirit" is alive and well here in the US of A Max !
In our case it is the "spirit" what usually comes out of a wine bottle...
Take a listen during USA daylight hours on 14.313 and 14.275
and you will understand.

The video was created to help hams EXPLAIN ham radio to NON-HAMS. The idea was to make it simple, Barney the Purple Dinosaur level. Most politicians (councilmen, mayors, police chiefs, etc...) don't really understand ham radio, or really care to either for that matter.

But, those are the folks that you have to convince in order to make ham radio part of the picture for emergency services. Like it or not, it is a necessary evil of doing business with the uninformed and ungrateful.

Just a-wondering, was this guy a swl of
a ham in the vicinity who operates on 20M
and used to "ack kooky" on 75 Meters at one time?

-------- cut ---------

Police shoot man during stand-off
Evansville Courier

Evansville, IN February 23 -- In the wee hours of Sunday morning, neighbors in Northwestern Vanderburgh County were awakened by gunshots. But they didn't come from hunters---the shots came from a nearby neighbor.

Hillview Road is a quiet neighborhood in the middle of the woods. When neighbors were awakened by gunshots that sounded too close for comfort, they knew something was wrong.

Jason Aulder has lived on Hillview Road his whole life.
"This is the country," Aulder said, "so it's not uncommon for you to hear gunshots from people hunting." Last night, gunshots woke him up. Something about those shots seemed odd. "It sounded like it was at the back window," Audler said.

He called 9-1-1, and when police arrived, the routine call turned ugly. "It just seemed like once (the police) car stopped and his lights stopped moving," Audler said, "I heard three consecutive shots, one right after another."

Sheriff's deputies investigated the shots they believed came from a lean-to. That's when Raymond Kissel, 45, fired on police, breaking the windows out of a squad car and putting bullet holes in another.

"It's pretty nerve-racking to get shot at," Chief Deputy Eric Williams said. "We never plan for something like this---we train for it."

Police returned fire, eventually got close to the lean-to, and found Kissel wounded. They took him into custody, ending a three-hour standoff that left this rural neighborhood shaken.

Nancy Sizemore, 52, was also in the lean-to during the stand-off, but she surrendered herself to police. Kissel is recovering in the intensive care unit at Deaconess Hospital.
Charges are pending against him.

In neither of these cases was there any mention of a precedent being set, or what the outcome of the case was. Anyone can sue for anything. Wining the suit is quite different. Even if a subpoena were obtained, all you have is the holder of the account. Do you have any idea how common it is for multiple users to post using one account?

Hey all, here is the latest and greatest list:

Prices are firm, do not include shipping, no trades, not breaking sets yet.

Motorola JT1000 handheld, UHF 403-470, FACTORY NEW: $510 (radio, ant, batt)
add rapid charger: $60
add programming key: $70
19 available, per above, lead time is about a week.

Motorola MTX838 VHF 136-174, B7 version, w/FCC ID, FACTORY NEW: $525,
(radio,batt, ant) email for details! (Same as MTS2000?)
24 available per above, lead time is about a week.

Motorola Spectra VHF 99CH, 50w unit, remote w/HHCH, Scan, brkt, spkr.
D43KXA7JA3BK $235, Very good cond.

Motorola GP2000 VHF radio COMPLETE PKG. Keypad or PC programmable
radio/chrgr/program cable, instruction etc.
$240/all, NEW IN BOX, (**THIS IS NOT FCC APPROVED FOR USA, Great for Latin America, Asia?? HAM?? Will ship Internat'l)

Motorola HT1000 VHF radio, spkr/mic, std. chrgr, fair battery.
H01KDC9AA3DN: $270, Exc. cond.

Motorola M120 VHF, 2ch, 40w. 16pin, RADIO ONLY
M43GMC20A2AA: $125, Showroom cond.!!

Motorola Radius VHF, 2ch, 40w, 5pin. RADIO ONLY
D43LRA73A5BK: $75, Good cond., faded, dirty, no cracks/breaks.

(**NOTE: A member wanted the two VHF 2ch. radios. I have not heard back in 2 emails and a week, so I am putting up for sale again.)

Motorola EXPO handhelds, 2ch. on 165.150, includes:
3 radios
3 leather swivel cases, mint cond.
2 swivel belt loops
3 rapid chargers, one has cord cut off w/4" left, other two exc. cond.
2 dead-ish batteries
Radios are in good shape, one missing M sticker on front, all missing Vol. knob rubber and accy cover. They are all assumed working but I will check for sure if interested.
H33XPU3120AN: $75 ALL.

iCOM commercial radios, FACTORY NEW. Low prices! Got a contact wanting a bunch moved out.....

HANDHELDS:
IC-3GT, VHF, 100ch., alpha display, 12.5/25kHz, rapid chgr, full keypad,
etc: $350
IC-4GT, UHF, 100ch, alpha display, 12.5/25kHz, rapid chgr, full keypad, etc:
$360

MOBILES, factory new.
IC-F320, 32ch, 45w, Alpha display, PL/DPL, $350 complete.
IC-F420, same as above, 35w, $360 complete.
IC-F521 VHF, 256ch, 50w, A/N disp., PL/DPL: $360 complete.
IC-F621, UHF, 256ch, 45w, A/N disp., PL / DPL: $380 complete.

LIMITED QUANTITIES OF ALL ABOVE, but at least 20 each radio...

AFTERMARKET iCOM PROGRAMMING HARDWARE/CABLES, $60
Lead time is about a week on iCOM radios...

That's pretty much it, thanks for the reading...

Have a great day!

Randy

Well, seems we do not only buy radios and antennas, but also specific vehicles for our addiction.

I am looking at a Toyota Tacoma TRD and was hoping I could get some opinions from everyone on:

Mounting radio/antenna
Electrical noise/interference
Grounding problems

I will be installing an Icom 706IIG, and no antenna choice yet.

Thanks everyone

1654. FYI: Read you 5 by 5 btypes of reports vs RST System

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-25 18:23:23 UTC
From: Aspiring Elmer <elmer@nowhere.com>
Message-ID: <vwO6a.2921$Nf.41441@news1.west.cox.net>
Source record: 68799

MaryAnne -mailed me about this -- lost her E-Mail address

Reports - 5 by 5 and Loud and Clear

From an old Military Radio Telephone Procedure Manual (Circa 1953). In all probability, these came from the Q-Signals of yore where QRK was -- What is the readability of my signals ? Answer: The readability of your signals is ... (1 to 5). And QSA -- What is the strength of my signals ? Answer was: The strength of your signals is ... (1 to 5).

For the ratings of 1 to 5 -- see URL http://ac6v.com/73.htm#55

Today Amateurs use the RST system [59(9)] or should --- URL: http://www.cebik.com/rst.html

For S-Meter stuff -- see URL: http://www.ac6v.com/sunit.htm

Contrary to popular use, S-meter readings are not the same as the RST system i.e., S-9 is not 59

And then there is a 59 or 5 by 5 report on FM repeaters (you just gave a report of the repeater - not the transmitting station) best give degree of quieting followed by audio quality and deviation.

All this should start a thread!!! So Caveat Lector - Ya All

I Doubt, Therefore I Might Be
73 From AC6V, who is QBF most of the time !!

Tain't all that bad. Just use a large enough pipe and don't forget to
get some "wire soap" which is available at most electrical supply
stores. The ugly looking yellow soap makes the cable slippery and
allows pulling far more through a pipe or conduit that seems possible.
You just slop the stuff on, don't use sparingly.
I had two 350 foot runs plus a smaller quasi air core cable and two
runs of 9913.

Then again, at one location where we had dry sandy soil I just buried
the stuff with no extra protection.

>================
>Suggest you use flexible 'alkathene' (polyethylene) water pipe
>In Europe (incl Britain) it is available in 20 , 32 mm diameter and larger
>sizes
>;colour is blue.

My favorite is either the larger sizes of plastic conduit (1/4 inch
wall for mechanical protection and sweep "L"s for corners.

I've also used 5 inch plastic sewer pipe with good results.

>I use this pipe also for coax cable with copper braid and black sheathing ,
>ie for underground 75 Ohms coax to a TV satellite dish as well as for RG

For my two C-band dishes I just bury the cable direct.

>316 ,50 Ohms coax to a vertical HF antenna.
>It is important that the pipe at the outdoors end is properly sealed to
>prevent
>water running into it.

Water was/is the least of my worries. I use a water trap/drain just
before the pipe goes through the basement wall.
The trap is a 45 degree fitting with a cap over the bottom. The cap
has a bunch of 1/8th inch holes drilled in it to allow the water to
drain. The 45 is on the bottom of the pipe and in the sandy backfill
for the basement.

>Alternatively (that's what I have done) where pipe with coax come above
>ground outdoors there is a half circle bend resulting in the pipe opening
>pointing downwards ,hence rain water can not enter and the circular opening
>between pipe and coax cable is left open for breathing.
You don't have problems with varmints, bees and bugs, do you? <:-))
I removed 14 Yellow Jacket nests from the one satellite dish alone
last summer. The things got into the vent for the kitchen range, under
the sewer pipe vent flange, in electrical boxes, In the eaves, in to
soffit, and under the siding near the peak of the roof on the south
end. That particular nest was so large it pulled the siding away from
the house and had to be renailed. I used 14 cans of Wasp and Hornet
killer. As I recall I removed over 40 nests...only got stung4 times.
Three by Yellow Jackest and one by a wasp.

I had a TV tower stacked in the back yard. They built nests in the
legs. The things even built nests in the vertical mast at the top of
my tower, making it more than a little difficult and hazardous to work
on the antennas.

I use a " 20 X 20 Hoffman box" at the end of the pipe.
http://www.rogerhalstead.com/cablebox.htm
The conduit fitting is mounted right on the bottom of the box. All
outside openings are *sealed* with the expanding insulating foam.

NOTE, I am no longer using the 3/4 inch hard line.

Cables come down the tower, form a loop and then enter the box through
a 8 inch long conduit stub. The Yellow Jackets went up the cables and
built a nest in the box., but due to the seal they couldn't get into
the house. Prior to sealing I even had mice crawl up the cables into
the box and then follow the 75 foot run of conduit into the house.

>I realise the latter method might not be suitable for hardline coax because
>of the bend's radius.

Use a Sweep L, or in the case of the flexible plastic pipe, just bend
the whole works over about a 1.5 foot radius. (half meter radius)
If the plastic pipe/tube is a relatively close fit it will help
prevent the aluminum jacket from collapsing. OTOH not much can be
done about the thin jacket on half inch hard line except a wide radius
bend and being very careful..

I'd still seal the outside end, but leave the inside end open. The
thing only needs one end open for breathing and I prefer it not breath
in high humidity and critters.

BTW, the Tower project and station are shown at
http://www.rogerhalstead.com/tower.htm . NOTE, this is a large page
with lots of photos and runs on the order of 2 to 3 megs so unless you
have a fast connection it will take forever to load.

You will not be on the ham bands much longer, colostomy bag! You made your big mistake Saturday, when you slandered Bob Sherin, W4ASX big time, by saying he was a porn star. That is not true. That makes it libel. Bob is gonna get you!

Don't worry about it Lloyd, this is the gasp and cry of a dying man. He sent me a e-mail begging for mercy. Screw this piece of human garbage. He has harassed me for 10 years.
Its time to pay the piper.

Anyone who has ever listened to that creep knows what his gain is. Anyone that thinks he is right is in need of a frontal lobatomy.

Two experienced contest operators, WI2N and WI2E are looking for a QTH to operate this weekends ARRL DX Contest. Unfortunately, we have both been living very nomadic lives of the last few years and our stations are packed away in storage. If anyone would be willing to rent their station out to us for the weekend and is within a reasonable distance of Manhattan, please contact Eric at eric@ericreiter.com.

1666. Repeaterlink.org

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-26 02:08:29 UTC
From: jim willmore <jimbo@willmores.orgt>
Message-ID: <v5o8d28u7jd7bc@corp.supernews.com>
Source record: 68811

I wanted to let you know about a great new site that lists linked repeater networks. It is unique in that there are many sites that list repeaters in certain geographic areas, but this site is specific to linked repeaters and repeater networks. This site allows you to search for repeater systems that connect two different cities together or repeater systems that have repeater in a city. Also, for those of you that own a repeater system, you can log in can upload and maintain own systems in real time.

Cruise over to www.RepeaterLink.org and check it out. We just went live last week and the database is quickly populating. We don't buy our data from the FCC or the ARRL, we rely on the architects and engineers who own the repeater networks to register their own devices and maintain the information. We see this as a value added service on an already free site. Each user who enters a repeater network is free to modify, add and delete as they see fit. Eventually we will expand with a discussion forum and newsletters, but that'll come in time...there are only 27 hours in a day!

If you have any questions about the site, email me at kc9bix@repeaterlink.org

73's,

jimbo (KC9BIX)

1668. Summits on the Air - An Award Scheme

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-26 10:10:42 UTC
From: g3cwi@tesco.net
Message-ID: <b8480e86.0302260210.3aba95f0@posting.google.com>
Source record: 68813
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.dx,alt.ham-radio.vhf-uhf

Newgroup members may be interested in hearing how SOTA has progressed over the last year. SOTA is an award that encourages portable amateur radio operation from mountain and hill summits. It started in March 2002 with just England and Wales. Since then there have been well over 500 summits expeditions in the UK from the 50+ activators. Nearly 300 people subscribe to the SOTA mailing list and the award has expanded to encompass Scotland, Isle of Man, Northern Ireland and South Africa. The Republic of Ireland will join on St Patrick's Day and launching SOTA is being explored in Greece, Italy and Germany. Overseas readers may like to consider launching SOTA in their country - we make it easy to do with a proven formula.

You might be forgiven for thinking that it is for mountaineers but in fact the careful choice of summits means anyone can make a start - a vital element of the scheme. Over the past year pretty much all bands and modes have been used for SOTA activations HF/VHF/UHF CW/SSB/FM. It has attracted a growing number of new licencees and has reactivated several older licencees.

From a modest start, here in the UK you can now hear SOTA stations every weekend on at least one band and usually on several. We use an innovative SMS alert system linked to our email reflector that allows activators to inform all the SOTA group members of their activation in near real-time - ensuring a handy mini pile-up as soon as you come on the air.

For the less active, there is a "chaser" section which is growing nicely so there is no excuse for not getting involved.

For the statisticians, here in England no less than 112 out of 178 qualifying summits have been activated - several many times. That's 63% of the total. In Wales about 30% of summits have been activated at least once. In the UK in total 223 unique summits have been activated for SOTA! Not bad for an award that has yet to celebrate its first birthday.

So, what achievement is there in making the QSO's? None whatsoever.

SOTA remains a facet of CB which is where it started.

In addition, it illustrates the continuing association between SOTA and
users of GSM phones; and as such, the irrelevance to Ham Radio
of SOTA (not to mention the irrelevance of CB types masquerading
with the callsigns of deceased persons)

1671. FCC: Mandates Narrowband VHF/UHF FM Public Safety Radio Systems

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-26 19:54:19 UTC
From: Kenn <sfrankes100@yahoo.com>
Message-ID: <3e5d1b9b@snipnews.snip.net>
Source record: 68816
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner

The Federal Communications Commission, today, in FCC 03-34, released a Compulsory narrowbanding date for public safety communications systems that operate between 150 - 174 MHz, and 421 - 512 MHz.

* We prohibit any applications for new operations using 25 kHz channels, beginning six months after publication of the 2nd R&O in the Federal Register. -

* We prohibit any modification applications that expand the authorized contour of an existing station if the bandwidth for transmissions specified in the modification application is greater than 12.5 kHz, beginning six months after publication of the 2nd R&O in the Federal Register. -

* We prohibit the certification of any equipment capable of operating at one voice path per 25 kHz of spectrum, i.e. equipment that includes a 25 kHz mode, beginning January 1, 2005.

* We prohibit the manufacture and importation of any 150-174 MHz and 421-512 MHz band equipment that can operate on a 25 kHz bandwidth beginning January 1, 2008.

* We impose deadlines for migration to 12.5 kHz technology for PLMRS systems operating in the 150-174 MHz and 421-512 MHz bands. The deadlines are January 1, 2013 for non-public safety systems and January 1, 2018 for public safety systems.

Full text of this FCC order is at:

1672. Total Outrage at Glenn Baxter!!!!

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-26 20:32:22 UTC
From: "Lloyd, N0VFP" <brother_lloyd_99@yahoo.com>
Message-ID: <3e5d20a8_2@corp-goliath.newsgroups.com>
Source record: 68817
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

I am totally pissed at K1MAN today! I came from work, with a chocate shake, in had to listen to my buddys on 14.275. I already have a major migrain headache, and now this stupid Glenn Baxter, is making it worse!

When will the FCC take him away! He can share a cell with Brother Stair and Hal Turner......

Lloyd, N0VFP

FOR IMMEDIATE RELEASE
de K1MAN - 26 February 2003

K1MAN has been sharing 14.275 MHz. with other Radio Amateurs daily for International Amateur Radio Network activities since the September 21, 1985 Mexico City earthquake.
In early February, 2003, and in accordance with FCC Rule 97.101(b), K1MAN made a temporary change from 14.275 MHz. to 14.272 MHz. to get away from allegedly intentional and malicious interference (a felony under Sections 333 and 501 of the 1934 Communications Act) from ND8V's American Amateur Ragchewers Network consisting of ND8V, K4RUB, WD4AWO, NK4D, W4NTI, K3VR, KE9RY, W4ASX, and others. On 25 February 2003, ND8V moved his group permanently from 14.275 MHz. to 14.274 MHz. and announced that that another change to 14.273 MHz. would come soon if QRM on 14.274 MHz. by unidentified stations continued. This ND8V announcement caused unidentified QRM to his group to intensify.
At 8:00 P.M. on 25 February 2003, K1MAN moved back to 14.275 MHz. to avoid ND8V and his group's interference which, again, appeared to be intentional and malicious and a felony under Sections 333 and 501 of the 1934 Communications Act.
It is hereby requested that the FCC (who sent the attached letter to ND8V on 25 November 2002) take regulatory action against ND8V modifying his license and barring him from returning to 14.275 MHz. and/or operating within 5 KHz. of 14.275 MHz

And you probably noticed that he cut and run after his second blapcast in a row. He should have learned THIS TIME that if the frequency is in use then WE AINT GOING TO MOVE. PERIOD.

He is now on 272 and best stay there if he has any brain cells left.

ok, here is the proper way to report apparently illegal radio sales straight
from the horses mouth:

FCC CONSUMER ALERT

Federal Communications Commission

Consumer and Governmental Affairs Bureau

445 12th Street, SW Washington, DC 20554

1-888-CALL-FCC (voice)

1-888-835-5322 (TTY)

www.fcc.gov/cgb

UNAUTHORIZED EQUIPMENT SOLD ON INTERNET AND IN PUBLICATIONS

The Federal Communications Commission receives hundreds of complaints about
alleged illegal (non-FCC certified) equipment being offered for sale on the
Internet or in publications. The Commission is monitoring this situation
carefully and requests your assistance. If you have any information about
illegal or uncertified equipment being offered for sale, please forward it
to the FCC. Useful information for the FCC includes:

* An original advertisement or Web address where the illegal equipment is

being advertised or offered for sale with the types of equipment about which

the allegations are being made, highlighted.

* If it is a Web-auction we will need the name of the auction site, the
exact

item number, and auction opening and closing dates.

* Name and address of the individual or business offering the item(s) for
sale.

* Complainant's name and telephone number in the event follow-up is
necessary.

This information can remain confidential, if requested.

* Specifically, why you think the equipment is not in compliance with FCC
rules.

* Number of pieces or types of equipment about which the allegations are being

made (one piece, five pieces, how many models, etc.).

Information can be mailed to the FCC at the address below or e-mailed to fccinfo@fcc.gov.

###

To receive information on this and other FCC consumer topics through the

Commission's electronic subscriber service, click on

I recorded most of it today Dan. I started recording after 2pm today. I should invest in making my R-75 remotely controlled over the web by either you, Mike or Brian. I normally record while I'm at work, and with all the QSY'ing, I'd miss alot of stuff.

Lloyd

Sure. Right after they revoke K1MAN's license for illegal broadcasting,
among other rule violations. I've listened to him a few times recently and
noticed that at the end of his transmissions, they would just abruptly end
in the middle of a sentence without ID'ing. It's a rule that all amateur
stations must ID at the end of a QSO as well as every 10 minutes (another
rule he constantly breaks, but we've all gone over 10 minutes a time or
two). Since his broadcasts end in the middle of a sentence & no ID at the
end, it shows that there is no control operator present during the
broadcast, another flagrant rule violation. And how willing is Riley
Hollingsworth going to listen to K1MAN after he called him a "corrupt
politician?" Doubtful, at best.

Dear fellow Amateurs;
Now i've seen it all, the Radio Clubb of JHS 22 that is run by Joe Fairclough, WB2JKJ is now auctioning off the Freebies that he was given by Yaesu to give away as free handouts & as promotional freebies.
If you don't believe it, go to his ebay site at>>
http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&include=0&userid=joeee1621@aol.com&sort=3&rows=25&since=-1&rd=1
And see for yourselves :-(
I suspect that even with the $20K worth of donations that he has sold on Ebay in the past 7 weeks is NOT enough?
How about everyone e-mailing him & telling him how you feel, especially since he actually contributes Nothing to the ham community except for Hot Air!

FRAUD ALERT:

Folks, I am STILL getting email about being scammed by this sorry sack of crap. I don't know anything beyond what I've posted and I apologize for not being able to assist any more than this.

Luis is a compulsive liar and a thief people, he plays the game well, is articulate and conversational as he rips you off. so again, I warn you:

Don't fall for it and DON'T send him your money, you won't see it again!

(I live in the middle of absolute nowhere and I (unbelievably) met a guy the other day who told me Luis stole over $200 from him a year ago.)

-----original message------

Do not deal with gadgetoyz@aol.com if you value your money.

View his ebay feedback (same user name/email) if you doubt me. I didn't think to check him out and got burned.

His info:
LUIS FERMAN
5432 Vancouver St.
El Paso, Texas 79924
Phone: 915-757-0823

If you want details of the scam, please email me directly. thanks, Randy

1695. RCI-5054- DX LCD BACKLIGHT ?

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-28 01:20:42 UTC
From: N1RZB <n1rzb@highstream.net>
Message-ID: <tHy7a.14932$Xa4.9875@fe01.atl2.webusenet.com>
Source record: 68690

I recently lost the dimmable backlight on my Range 5054-Dx LCD. The display is readable in a well lit room but would not be in the dark.All other features on the rig are working. I made one attempt to try and find out what went wrong but with very poor prints downloaded off the FCC ID pages.

Has anyone had this problem and if so what did you do to fix it? Rig is out off warranty.

Thanks
Dave

1702. New Award

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-28 16:13:33 UTC
From: terry <moves@dellepro.com>
Message-ID: <3e5f8acb_2@news1.prserv.net>
Source record: 68697
Cross-posted to: rec.radio.amateur.misc,triangle.radio

The Franklinton Amateur Radio Technical Society today announced a new award available to all amateurs worldwide for both HF and VHF enthusiasts. Devotees of the radio art can work the following:

FARTS Worked NC Counties

either SSB or CW or mixed ; 1 band or 5 band endorsement; QRO or QRP; contacts must be made with 100 feet of your shack or driveway for mobile ops; Specialty Awards (numbered separately) are available for OSCAR Satellite, SSTV, RTTY, 144 MHz, 432 MHz, 222 MHz, 50 MHz, 160 meters and Digital . YL, SWL, SWF, Left Foot and Club Officer endorsement;

You need to make a log contact in

F - Forsyth or Franklin County(contacts in Franklinton earn a gold star)
A- Alamance, Alexander, Allegany, Anson, Ashe or Avery
R- Randolph, Richmond,Robeson, Rockingham, Rowan, or Rutherford
T-Translvania or Ttrell
S- Sampson, Scotland, Stanley, Stokes, Surray or Swain

Disqualification. False statements on application or submission of forged or altered cards are encouraged. FARTS does not attempt to determine who has altered a submitted card; therefore do not submit any marked over cards, use white out. The decision of the FARTS Awards Committee in such cases is final, unless additional payment is made.

All applications sent to FARTS HQ must include the appropriate fee(s):

See NN4NN for more details

http://www.geocities.com/ncfarts/FARTS.html

1710. IC-W2A Handheld PowerUp Problem

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-01 04:10:11 UTC
From: Cliff <conklin@netapp.com>
Message-ID: <BA859CD3.74E9%conklin@netapp.com>
Source record: 68705
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

My Icom W2A will not power up. There was no event to cause this. Has anyone ran into this? I thought that maybe the internal backup battery may have become discharged so I left the radio plugged into the charger all weekend. Still no power up. I tried holding down the function key then sliding on the battery before powering up the radio. Icom says this is how you restart the cpu. But I'm sitting here with a dead W2A.

Thoughts?

Cliff, WA2LMC

The outer jacket is very thin on 1/2 inch.

>> Can anyone tell me good, cheap and durable ways to splice the
>> cable?

Two brass compression fittings and one UHF brass barrel connector.
You may (will) have to smooth down the threads to fit inside the
compression fittings. That's where having a lathe is nice, but a file
will do. Just make sure the finished surface is both smooth and
ROUND. You may have to add a bit of solder to the center conductors
of the 1/2 inch to get a tight fit inside the barell connector..

THEN, go down to your local electrical contracting store and pick up
some "flooded" heat shrink tubing. The stuff is a bit over one inch
inside diameter (unshrunk). It will shrink down tight on RG-8, so
it'll do the same with the connector and hard line.

The heat shrink tubing comes in four foot lengths at about $9 or so
"as I recall". Cut a piece long enough to extend about two to three
inches beyond the splice on each side. Slide this over one of the
pieces of coax *before* making the splice. After the splice is
completed, slide the heat shrink into place and then using a heat gun,
start at the middle and work out, shrinking the stuff tight enough to
see the shape of the connectors.

If done right you will see the flooding material (hot glue) squeeze
out both ends and all the way around. Just let it set...Don't stick
your finger in it as that stuff is *hot* and it won't let go. Please
don't ask how I know.<sigh>

>
>Can't help you there. I've only `slightly` kinked either the 1/2"
>or the 3/4" stuff but once each -- and it did not burst and I'm

>(perhaps many - depending on how active the tractor) impedance `bumps`.
>
>[Oh, now that I've re-read the question: No, burying the hardline
> directly, or in-directly will *not* alter the impedance. sri]

It will if he doesn't bury it deep enough <:-))
One Tractor tire, or even car can make a big difference, particularly
if it's spinning..

>
>> I could not find the answer to this question anywhere. Can anyone
>> tell me whether buried / not buried will change the impedance of this
>> feed line? Are there advantages to burying the entire run? Are there
>> any wild aluminum eating creatures that nibble holes in hardline?
>
>Without _any_ poly jacket, you need to worry about electrolysis and/or
>the PH of the soil. If it were me: I'd bury it in some black poly pipe.
>'Twould be a feat to stuff in a looooooong run of it...

It's actually not all that bad...Use lots of wire pulling soap..The
ugly yellow stuff that comes in a pressurized can...sliperier than
snot on a door knob.

One person can do it, but it's safer (for the coax) if you can get two
of three. You need to get the pipe out straight, so it might have to
spend a day or two in the warm sun getting straightened a bit at a
time.

You need to be careful getting the coax out of the roll and
straightened before going into the pipe. It's real easy to pull a bit
too much coax while forgetting to watch the roll. As you've found,
that stuff kinks easily. That's where the extra help comes in handy.

>
>> Finally, does anyone care to share any hard-won experience, or
>> pointers to complete information, or whatever?
>
> http://www.jonz.net/W3DHJ/catvhardline.html
>

The only thing I'd change with the 3/4 inch is using brass compression fittings and UHF barrel connectors.
http://www.rogerhalstead.com/conn.htm Moisture is not usually a problem in the 3/4 inch as it can't migrate even if it does get in at the connector, so a good weather proofing of the connection should do the job. You can use adapters for N connectors.

>...but, none of my CATV HardLine comes even close to the ground.

This is very funny, since WOR now has an absolute policy against
smoking. If you're caught smoking anywhere in the building you're
automatically, instantly fired with cause. No appeal.

It was instituted about 6 years ago. The building, itself, became
non-smoking and, soon, the city will add another level that will
forbid smoking in public buildings. I wouldn't be surprised if the
metal detectors in buildings are nodified to detect tobacco, too.

ABC also had a no smoking policy when I was there before WOR. I
remember sitting in my office smelling smoke. Only one person would
violate that rule. He's dead now, doing posthumous PSAs against
smoking. When I smelled smoke I always know Morton Downey, Jr. was in
the building. He smoked like a power plant.

I've seen pictures of that 1935 "streamlined" transmitter. They'd
probably refer to the new DX-50 as "miniaturized" by those standards.
I doubt the 1935 transmitter would even fit in the current building.

Rich

LW,

You are behind times. David is now KB1EVE because of a retest. He is only
ham in history to have a taken a retest and *downgraded*

Last Saturday, he got on 14.275 and was chastised by Big Mike, ND8V and
W4NTI. He then escalated the event, by slandering Bob Sherin, W4ASX. I
have the WHOLE episode on recording.

I predict that David Tolassi and Glenn Baxter are not long for the Ham Radio
world.

We OWN FAGGOT TWISTY <weowntwistyfag@yahoo.com>, who is really Douglas W. Adair N8WWM, a federal criminal from Toledo Ohio, was featured in the Rain Report recently for violating Federal Communications Law. This would normally be just another example of an unpleasant, obese social retard with a ham license, but Douglas W. Adair N8WWM had, for a number of years prior to his violations, harassed and forged others, complained about eBay auctions and abused usenet regularly to combat FCC rule violations as an "antikeyclown".

Details and audio at http://www.geocities.com/chiprshredr

Thus, Douglas W. Adair is a ridiculous hypocrite (with the tiniest, daintiest little hands ever seen on a grown man). Fortunately, he doesn't have the good sense to lay low and continues to post his uniquely imbecilic rants, somehow hoping his hypocrisy will be forgotten. This presents a great opportunity for those of us who enjoy verbally clubbing Douglas W. Adair N8WWM like a helpless, fag-laming baby seal.

With that in mind, here is evidence that not only is Douglas W. Adair N8WWM a federal criminal (see link above), but that he is also a homosexual and a pedophile due to his writing of a long and creepy song (deleted for brevity) featuring the following references to gay sex and children, specifically young boys :

suck

It was interesting...

Note that the only woman featured in the as was quoted as saying
"A long morning pent in a crowded department store...."

Would go over great today!

Mike

Great ads!
My grandpa smoked filterless Camels regularly and lived to 79.
Today there are better ways to get "pep", artificially-colored sports
drinks and ephredra caps, right?

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/February, through Sunday, 2nd/March there were 238 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T31, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

6W, SENEGAL. John, F5VHQ (ex-OE5TGL), will be active as 6W/F5VHQ between April 19th and May 1st. Activity will be on 40-10 meters SSB. QSL via

F5VHQ.

8P, BARBADOS. Winston Seeney, 8P9BX (VE3WFS), informs OPDX that he attended a meeting of the Radio Society of Barbados and was told a QRP DX team is scheduled to operate on the Atlantic coast, on March 15th, and is scheduled to go on the air at 1400z. They will operate on CW and SSB on the lower ends of the bands from 40-10 meters.

9N, NEPAL. Dov Gavish, 4Z4DX, will be active as 9N7DX starting April 22nd for 4 weeks. Activity is expected to be on 160-6 meters CW and the digital modes. QSL via 4Z4DX. His Web site is at: http://www.qsl.net/4z4dx

A4, OMAN. Alex, YO9HP, will once again be active as A45WD. He leaves for Oman today (Monday, March 3rd) and is expected to be active around the 5th or 6th of March. His length of stay is not known (possibly two weeks). Look for him on 80-10 meters including the WARC Bands on CW/SSB. QSL via bureau or YO9HP: Alex Panoiu, Pleasa - Prahova, RO-2038 ROMANIA ADDED NOTE: Alex would like to thank all stations who sent direct QSL (with SASE) or a bureau QSL. He has managed to reply to 99% of the direct cards before his trip back to Oman. Also, bureau QSLs are almost done, and he will drop the last batch via the A4 bureau. They normally send the cards out every 3-4 months.

BU2, TAIWAN. Mark Kawasaki, JJ1TBB, was happy to inform OPDX that he has received permission from the Taiwan Authority to operate as BU2/JJ1TBB from Taipei. He states "BU" is a very new prefix for Taiwan. His activity will be mainly CW/SSB on 40-10 meters. He was heard this past week on 21262 kHz around 0200z. Mark's work assignment is expected to keep him in Taiwan for 3-4 years. QSL via JL1ANP. ADDED NOTE: Mark may be known for his operations from Singapore as 9V1AN (1995-96), and Christmas Island as VK9XB (1996), Vietnam as XV2A (1991) and possibly from some others locations.

BW4, TAIWAN. Art, UA3VCS, states there is a minor change in his callsign for the upcoming Russian DX Contest (March 15-16th) and the CQ WPX SSB Contest (March 29-30th). He will not sign BW3/UA3VCS as first announced, but he will sign BW4/UA3VCS. Art also mentioned that he will be a Single-Op/ Single Band (10m)/Low Power entry for the CQ WPX SSB Contest (and also a Single-Op/All Band/Low Power entry for the WPX CW Contest). QSL via the CBA (preferred) or bureau (it may take more than a year and a half to reply for the QSLs received via bureau).

CB5, CHILE (Attention Prefix Hunters). Ferdi, XQ5SM (SCDXG member), will put the CB5 prefix on the air for the first time during the CQWW WPX SSB Contest (March 29-30th). Look for him to be active in the contest as CB5A as a Single-Op/All Band/Low Power entry. QSL via XQ5SM.

DAYTON HAMVENTION EVENT. Tim, K3LR, reports that the North Coast Contesters are pleased to announce: The 11th Annual Dayton Contest Dinner (Tickets are on sale NOW). Master of Ceremonies is Tim Duffy, K3LR. The 2003 Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director and CQ Contest Hall of Fame member, Bob Cox, K3EST. They

are honored to have Rich Strand, KL7RA, as their dinner speaker. The dinner will be held on Saturday night, May 17th, at 6:30 PM: Cash bar opens at 5:30 PM. The event will be located at the Crowne Plaza Hotel (Official Contest Hotel), 5th and Jefferson Streets (Next to the Convention Center), Dayton (Downtown), Ohio in the VAN CLEVE BALLROOM. Menu: Prime Rib of Beef, Potato, vegetables, rolls, chocolate fudge cake, choice of beverage, coffee, tea or iced tea (* Vegetarian menu available by request at the dinner). Price is 31.00 USD per person. SEATING IS LIMITED TO 300, SO ORDER YOUR TICKETS EARLY. Seating is random and is not reserved. Tables are set in rounds or 8. All dinner ticket orders are handled exclusively by Craig Clark, K1QX at: Radioware and Radio Bookstore, PO Box 209, Rindge, NH 03461
http://www.radio-ware.com
You can place your order by calling: Monday through Friday from 10 AM to 6 PM eastern USA time. 1-800-457-7373
1-603-899-6957 for International
or by FAX 1-603-899-6826 24 hours
You can also E-MAIL your orders to: jcclark@prexar.com
Visa, Mastercard, American Express. Sorry no COD orders. E-MAILs must include charge card + number, callsign and return address information. Tickets will be sent via First Class US Mail no later than May 7, 2003. Please allow plenty of time for your tickets to arrive before you leave for Dayton. Radioware and Radio Bookstore is not responsible for tickets lost in the mail. Special thanks to Craig Clark, K1QX and Radioware - Radio Bookstore for once again handling the tickets. Deadline for ticket orders is May 6, 2003. NO EXCEPTIONS There will be no tickets at the door. Many contest operators from around the world will attend this event. If you enjoy radio contesting, you do not want to miss this dinner. They expect a quick sell out. Order your tickets early!

IOTA NEWS.....
AS-084. Club members of Pyoungteak DX Club (PDXC) will be active from the Chuja Island Group between March 18th and March 24th.
The operators who will activate this Korean island, which has been silent for 5 years, are: Han/DS2GOO, Son/DS3HWS, Chae/DS5BSX and Choi/6K2CLF. The operators will sign as homecall/4 and use their club callsign D90HE/4. Activity will be on 80-10 meters (all bands) SSB/RTTY with 100w transceivers.
QSLs for DS2GOO/4 and D90HE/4 are via DS2GOO, and the others are via their homecall. More detailed information and their schedule will be available at:
http://myhome.naver.com/dxer2han/as084/
A log search and various pictures will be available after their return.

AS-079. Takeshi "Take", JI3DST, will be active as JI3DST/6 from Miyako Island (Miyako-jima Hirara-City Okinawa-ken) as follows:
March 20th (0700z) to March 23rd (0000z)
April 26th (0700z) to May 5th (0000z)
Activity will be on 40/17/15/12/10/6 meters SSB. He will listen for DX stations on 6 meters (especially AF and SA).
QSL only via the Bureau.

EU-004. Christian, DL6KAC, will be active as EA6/DL6KAC from Mallorca Island (DIE: E-021), starting March 11th through April 10th. This will be a holiday style operation with activity on 40-10 meters (maybe 80m) mainly on SSB, but with some RTTY and/or PSK31. Using 350 watts, his antennas will be dipoles, maybe an Inverted L for 80m. QSL via the DARC Bureau or direct (using the QRZ.com address).

NA-144. Tom, WA6WPG, is expected to be active next weekend (March 8-9th) from Anacapa Island (USI CA-002S) as WA6WPG/p. His operation will last for 26 hours with activity on 40-10 meters. QSL via his home callsign.

SA-085. UPDATE TO OPDX.600. Marco, CE6TBN, informs OPDX that he will be joining the 3G1P team on the Pan de Azucar Island DXpedition to take place March 14-17th. QSL via XQ1IDM.

JW, SVALBARD. Francois, F8DVD, will once again be active from Spitzbergen Island (EU-026, WAZ 40). He will stay from April 20-24th, in Longyearbyen (Grid JQ78TF), the main city of Spitzbergen. Look for him as JW/F8DVD on 80-10 meters SSB. QSL via his home callsign either via the bureau or direct (SASE+postage).

KH6, HAWAII. Csaba Gal, DH7KU (HA7XQ), will be active from here as KH6/DH7KU during his spare time between March 9-15th. His main purpose for being here is to install different types of equipment at Caltech Submillimeter Observatory (CSO) at Manua Kea, but he hopes to be active in the evenings enough to make a few contacts. He will be using a Kenwood TS-50 into a multiband dipole or a 3 band GP.

KH6, HAWAII. Marty, K2PLF, is now active as KH6/K2PLF until March 14th from Sea Q Maui (OC-019, USI HI-018S, Maui County, Hawaii). He was heard in this past weekend's contest, but plans to concentrate over the next two weeks on the WARC bands and the lower bands.

LIGHTHOUSE ACTIVITY (From Germany).....
Look for DL4OK/p to be active July 15-29th, which includes the IOTA Contest from Pellworm Island. Reference numbers are: IOTA EU-042, German Island Award N-023, German Lighthouse Nr. 40 and ARLHS-LH FED 187. Activity will be on all bands CW/SSB. QSL via their homecall/bureau.

Operators DH7AX, DH1LA and DL2VFR are going to Hiddensee Island from May 29th through June 1st. Activity will include the 1st German Island and Lighthouse Weekend. Island reference numbers are: IOTA EU-057 and German Island Award O-005. Two lighthouses will be activated:
Dornbusch - German Lighthouse Nr. 17 and ARLHS FED-026
Gellen - German Lighthouse Nr. 22 and ARLHS FED-088
Activity will be on 80-10 meters CW/SSB. QSL via their homecall/bureau.

MD4, ISLE OF MAN. Operators G0HSS, G3NKC, G4MJS, G4XUM and M0BEW will be active as MD4K in the CQWW WPX SSB Contest (March 29-30th) as a Multi-???? entry. QSL via G3NKC.

MJ, JERSEY. Pete/K8PT and Craig/K3PLV will be off to the Channel Island of Jersey (IOTA EU-013) again and will be operational from March 19-24th. Their callsigns will be MJ/K8PT and MJ/K3PLV. They will be operating SSB/CW/RTTY on all bands with concentration on the lower bands including 160 meters. Pete states, "Ham radio is our priority." QSL is via their home calls. Direct QSLs are preferred, but bureau cards will be answered as time permits.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about March 4th to April 3rd. His callsign will be MM0LEO, and he plans to be in the CQWPX SSB Contest. Leo will use an Icom 706 (100 watts), an R-5 vertical [10, 12, 15, 17, 20 meters], and a 40-meter dipole in a delta configuration. Leo provided us with the following reference numbers: CQ Zone 14, ITU Zone 27, Grid Square IO-74ku, IOTA EU-005 [Great Britain] and Worked All Britain [WAB] Square NW-95. QSL via W3LEO.

OY, FAROE ISLANDS. Rob, PA5ET, informed OPDX that he was pleased to announce that Ronald/PA3EWP, Dick/PA3FQA and himself (all members of the Low Land DX-pedition Team) will activate these islands between March 24th and April 3rd. Activity will be on all HF bands 160-10 meters CW, SSB, RTTY, PSK31 and some SSTV. (UPDATE: Just before going to print, Rob informs OPDX that Tom/GM4FDM and Bill/AK0A have decided to join the team, so now there are 5 operators. Since Mr. RTTY [AK0A] is joining the team, we can expect a lot of RTTY especially on the WARC bands.) They will have two stations on around the clock. Equipment will be: 2 FT-1000MPs with 2 Alpha Amplifiers, 2 Quads antennas for 30-10 meters, a vertical for 40 meters and the Titanex V80e and V160e for 80 and 160 meters. They have requested local callsigns, but currently have not been informed of them. So for now, they will use OY/homecall. The group would like to use the requested local callsigns for 80/160 meter and for the WPX SSB Contest (the last weekend in March in which they will participate). All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. It is not likely that they will have on-line logs unless it is easy to get an Internet account. However, they are currently investigating the uses of a InterNet Cafe or local hams to upload their information on a daily basis. For more update-to-date information, please the LLDXT Web site at: http://www.qsl.net/lldxt

QSL INFO AND NEWS.....
INTERESTING QSL TOOL. Bill, W9OL, in Chicago, has provided the DXers with an interesting chart/list on his Web page. This Web page contains info on the amount of IRCs or GSs (Greenstamps) needed to QSL to various countries. The URL is: http://files.billnjudy.com/
Bill states, "Hams in all countries are invited to send me data on the amount of IRCs or GSs needed to return QSL requests from their country." His E-mail address is: w9ol@billnjudy.com

Vitaly, VE6JO, reports that his 3C2MV DXpedition was approved for DXCC credit. QSL cards were designed and ordered mid-February with an estimated delivery of mid-March. He has started to prepare labels for the cards received direct and will proceed with mailing as soon

as he receives the QSLs from the print shop. There is a possibility of a delay at the beginning as he has to go to a construction site (no, not in 3C-land, local site in Alberta) around the end of March to beginning of May. Vitaly states, "DX clubs and individuals that supported this DXpedition and has made some donations will receive my QSLs first with couple of photos. Cards received direct but with not sufficient postage and/or with old and incorrectly stamped IRCs will be returned via the bureau."

Juan Pablo, CE4USW, 3G5Q Webmaster and Team Member, informs OPDX that he has uploaded the 3G5Q log to the Web page at: http://www.qsl.net/3g5q

Ferdi, XQ5SM, SCDXG Chairman, informs OPDX that the following Chilean stations were active during the ARRL DX Phone Contest this past weekend:
CE4Y (CE4FXY) --> 28 MHz - High Power
3G5A (XQ5SM) --> All Band - Low Power
CE3NR (CE3NR & CE4PBB) --> Multi-Single
Please QSL all via the route listed on QRZ.com.

Juan, CO8TW, was active in the ARRL SSB Contest over the past weekend as Single-Op/Single Band (10m)/Low Power 100 watts entry. QSL via IZ8CCW, and the log will be online after the contest at: http://www.qsl.net/co8tw/

EA8BH in the contest over the past weekend was Martti, OH2BH, in the Canary Islands. Martti's equipment for the ARRL SSB Contest was small and light (8.6 lbs!), the Yaesu FT-897. During these turbulent times it is advantageous to have all your equipment hand carried--such rigs are the FT-897 and the FinnFet FF-1001 solid-state kilowatt, all fitting into a small airline hand-carry bag. A special QSL will be available that shows/features this compact approach. QSL via OH2BH. ADDED NOTE: In the announcement for Martti's -EA8BH operation- the following was mentioned: "When returning from AH3D and on the Seattle-Copenhagen leg, all their Samsonite case's locking systems were broken by the actions of the Sea-Tac security people. The checking was done in a secure area at the Seattle airport, and with no access to the luggage keys, they broke into them, resulting in damage and messy re-packing."

FO0/N5XX QSL STATUS. Bob, K8BL, reports that Clark, N5XX (aka FO/N5XX, A35XX, ZK1XXX, ZK2XX, etc.), informed him he is sorry about the delay in sending out QSLs, and he (Clark) hasn't been back to the States yet, so, the QSLs are piling up. Clark understands that there are about 4000 QSLs waiting for him at home. He intends to answer all when he returns home in April. Clark also adds, "No need to send another if you have sent one already. Sorry this is taking so long. But, we're here for the Americas Cup and will do a tour of the South Island after it's over before we come home for the summer."

Operator Alfredo signed HC1HC/QRP in the ARRL PHONE Contest over the past weekend. QSL via NE8Z: Rick Dorsch, P.O. Box 616, Hamburg, MI 48139 USA.

LCRA TO BE DISSOLVED: "My old friend HK3DDD has just informed me that postal rates in Colombia were doubled as of January 1, 2003, and it now costs the equivalent of 2.00 USD to send a letter from Colombia to the USA", Fred, K3ZO reports. "It now costs HJ/HK hams the equivalent of 13 cents per QSL to send outgoing cards through the bureau, but anyway the bureau won't be available any longer because the Colombian IARU-member society LCRA is meeting this Saturday to dissolve itself, since with only 200 paid-up members and 8000.00 USD of debt it feels it can no longer stay in business. Beto says Colombian hams have stopped calling CQ and running stations because they can't afford to handle the consequences economically. Colombian DXers are simply searching and pouncing these days, looking for new countries for themselves".

ATTENTION HK HAMS! Alan, VK4AAR, informs OPDX, "I read with sadness of the imminent closure of the HK buro and the increased postage rates. If there are any HK or HJ amateurs who could use my service as a QSL Manager please ask them to E-mail me. There are no charges and I only need to get their log updates regularly (as E-mail attachments preferably)." His E-mail address is: almee@dodo.com.au
His postal address is: Alan Roocroft, VK4AAR, POB 421, Gatton 4343, Australia.

Bill Horner, VK4FW, reports that the FW8FP QSL cards finally arrived from the print shop on Monday, February 24th. He is currently busy sending QSLs out everyday until finished. However, he states that there were some cards received with no return or insufficent postage..... these will not be answered as Bill does not have any access to the bureau system. QSL via: Bill Horner, PO Box 1343, Maroochydore, 4558, Australia.

K1B QSL REPORT. Dave, K4SV, reports that he has had an overwhelming response to the new QSL SSB route for K1B. All the available K1B QSL cards have been sent out, but he expects a new shipment of cards to arrive any day that will fill the current backlog. He requests to PLEASE be patient. Dave has received "850 QSL requests with about 2500 Band/Mode QSOs". Please send your requests to: Stephen Grose, K4YL (ex W4SMG), P.O. Box 183, Flat Rock, NC 28731-0183. Dave states, "Our goal is to get everyone QSLed for K1B who has not received their cards. It is very unfortunate that some have never received their QSLs after several attempts and many dollars spent. We can not bring back the lost money but we can get you a K1B QSL card. Any small donations will be gratefully accepted towards printing cards, printing supplies and postage. PLEASE REMEMBER: USA send SASE; DX send SAE, with one Green Stamp preferred or one Large IRC accepted. Sorry, only direct QSL requests ONLY. Bureau cards for SSB to RZ3AA and CW/Digital to YT1AD."

QSL Manager Ron, AC7DX, reports that he is now the new manager for both LU1FKR and LT1F (an Argentine Contest station).

QSL LX7I, which was active in this past weekend's ARRL International DX SSB Contest, via LX2AJ.

QSL TO1A via IK2QEI. Operator was Stefano, IK2QEI, in this past weekend's ARRL International DX SSB Contest. He was also activate outside of the contest as FM/IK2QEI.

Vasilij, RW6HS, reports that he is now the QSL Manager for EX2F (ex-UM8FJ, UM8MF and UN7GZ).

The QSL Manager for the VC2A cards (for the period June 15th to July 15th, 2001) should go to Jacques, VE2QK, (also the VE2 incoming QSL Bureau Manager). He also responds to bureau cards. Send QSLs to:
VE2:
c/o J. Dube, VE2QK,
875 St. Severe St.,
Trois-Rivieres, PQ G9A 4G4
Canada

Ken Holdom, ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association, announces that all QSL requests for the highly successfull DXpedition to the Chatham Isalnds, ZL7C, in October 2002, which were received as of Wednesday, February 26th, were answered and despatched through the New Zeraland Post on Friday, February 28th. Please note that this does NOT include cards received via the different QSL Services. These will be mailed out at a later date when time permits. For those of you who did not include sufficient postage OR a return Self Addressed Envelope with your requests, these cards WILL go via the bureau. For those who included other DXpedition cards with your ZL7C requests, these will take a little longer to process and will be mailed out accordingly. Please if possible, avoid sending second requests until after the 1 May 2003. This gives them more time to spend on genuine 1st requests. PLEASE NOTE: OPDX InterNet Subscribers will receive Ken's complete press release as an additional bulletin. Also, Ken, ZL4HU, had arranged to have the ZL7C QSL card (double sided) to be viewed on the Web at: http://www.qsl.net/zl7c/

RARE RUSSIAN DISTRICT. Alex, RW3RN, informs OPDX to tell the readers to look for special station UE3RDA to be active March 8-15th from the rarest district for the Russian District Award (http://rdaward.org). QSL via RW3RN: Alex Kuznetsov, Box 57, Tambov-23, 392023 Russia.

RU9, ASIATIC RUSSIA. Alex, RW3TN, will be active as RU9G in the Russian DX Contest (March 15-16th) as a Single-Op/All Band/CW entry. RDA: KP-06 or KP-07. QSL via RW3TN.

SPECIAL EVENT. Look for special event station ZS03CWC to be active throughout the "Cricket World Cup" until March 23rd. Activity will be on 80-10 meters. QSL via ZS1AU.

SPECIAL WEEKEND EVENT. The GMDX Group (Scotland's DX Association) introduces "Celtic Connections" to encourage activity by all radio amateurs worldwide to contact areas with Celtic origins. This is purely an activity weekend and will enable participants to pursue the Celtic Knot Award Scheme and provide an interest in contacting Celtic areas of the world. The event is to be held on the third weekend in April each year. Reports on activity

are welcome and certificates of participation will be awarded to anyone who submits a report. If sufficient reports are received, the leading participants from the Celtic and the non-Celtic areas will be presented with an engraved commemorative Quaich (a small Scottish drinking cup). The 2003 Weekend will start at 0000z on Saturday, April 19th, and last until 2400z on Sunday, April 20th. For further details, please contact: Mr. Drew Givens, GM3YOR, 5 Langhouse Place, Inverkip, PA16 0EW, Scotland, U.K. or vist the GMDX Group's Web site at: http://www.gmdx.org.uk

TI, COSTA RICA (Correction to OPDX.600). Harry, AC8G, reports he gave out the wrong callsign for one of the operator's in the upcoming fall TI5N operation (during the CQWW DX SSB Contest). The callsign KA8KUZ should have been Brian, KA7KUZ.

TM5/TO5, MARTINIQUE. Al, F5VHJ (aka NH7A), who was active this past weekend as TM5A in the ARRL SSB Contest, will be active again in the CQ WPX Phone Contests (March 29-30th) as Single-Op/All Band entry. Also, Al will be active in the CQWW SSB Contest (October 25-26th) as a Single-Op/All Band entry, but using the callsign TO5A. QSL all three operations via F5VHJ.

VK9X, CHRISTMAS ISLAND (Update to OPDX.597). David, VK2CZ, reports that he has been allocated the callsign VK9XD for the CQWW SSB Contest (October 25-26th). QSL via VK2CZ direct only.

VP6/D, DUCIE ISLAND. Remember, the second DXpedition to Ducie Island will be active possibly next weekend on March 8th or 9th, depending upon seas and weather. The station callsign will be announced shortly before the operation begins (either from DXpedition organizer Kan, JA1BK, or the pilot stations JE2EHP, DJ8NK and WA2MOE). Activity is expected on CW, SSB and RTTY with operations on all HF bands and 6 meters. AO-40 was also mentioned. Please refer to OPDX.595 for more details. QSL via JR2KDN.

YA, AFGHANISTAN. YA1CQ was heard this past week and weekend on 17/12/10 meters. Check 18130 kHz around 1200z, around 24940/24950 kHz after 0630z and again after 0800z, and 28480 kHz after 0730z. QSL via JA1CQT. It has also been reported that Nick, G4KUX, is in the country until April 2004 and is active as YA4F. Most of his activity reported on the clusters has been on 40 and 6 meters. Watch around 7048 kHz after 1930z. QSL via G4KUX.

All in a day's work on parts of 20 and 75 meters !!

On a daily basis Ham radio in 2003 is like America
used to be in the South - circa 1950. Ain't it just grand?
We like it JUST the way it is...grin

I know a saxophone player who smoked. He's a incredible player who
blows a lot of jazz. He's not out of breath at the end of a long
tune, either.

There's always an exception to the rule. The normal distribution curve produces some people out on the skirts who don't follow the norm. Luck of the draw one would suppose.

If you're trying to convince people (yourself?) that smoking is GOOD FOR YOU you are sadly mistaken.

And you really learn about your station's capability and what areas you might want to consider improving. I really need better antennas for the lower bands (40, 80, and 160).

You also get a lot of experience in the vagaries of radio wave propagation, learning to deal with fading, static, and other conditions that can make operating a challenge.

I am on the band 5 days per week and I have found only one 10 m contest once
per month and almost every Tuesday evening there is V/U/sHF Contest. Not
vevery day at all.
All week ends I am at work and that is pity as I like contests.

Amateur Radio Newsline™ Report 1333 – February 28, 2003

Amateur Radio Newsline™ report number 1333 with a release date of Friday, February 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An amazing feat. Alaska to the United Kingdom using one watt on 136 Khz. Find out who did it and how on Amateur Radio Newsline™ report number 1333 coming your way right now.

(Billboard Cart Here)

**

RADIO RECORDS: UK TO ALASKA ON 136 KHZ

Reaching Alaska from the United Kingdom using just one watt ERP is quite a feat for any band, but Laurie Mayhead, G3AQC, has just achieved this on the 136 kHz band. And in doing so he has set a new record. RSGB Newsreader Jeramy Boot, G4NJH, has the story:

--
In the early hours of the 15th of February he transmitted to KL1X in Anchorage, and just before UK dawn at 0615 his callsign was clearly identified. G3AQC was using QRSS - very slow CW - with a 60-second dot period. The distance was 7278 kilometres, a record for one watt ERP on 136kHz.

Last year G3AQC became the first person to cross the Atlantic on the 73kHz band. KL1X is perhaps better known to UK amateurs as Laurence Howell, GM4DMA. Laurence said, "What is more surprising than the distance is that the path is notoriously poor between south-east Alaska, on the east coast of the Pacific, and Europe.

The signal would theoretically go on a great circle route to nearly 80 degrees north, over the northern Canadian Arctic, northern Greenland, east of Iceland, Glasgow, then over the UK to the South Coast - across and through the Auroral oval. There are some thoughts that the actual path might have gone round or even under the Auroral zone as no Auroral Doppler was seen on the received signal."
--

A lot of research and preparation work was carried out by G3NYK, G3LDO, W3EEE and W4DEX. This pre-planning is probably in good part responsible for helping to set this new work 136 kHz record. (GB2RS)

**

ON THE AIR: THE 5 MHZ EXPERIMENT - AN UPDATE

Also from the United Kingdom comes word that progress is being made with the analysis and future direction of the 5 MHz band experiment. This, following a meeting between members of the 5 MHz Working Group and experts from the Rutherford Appleton Laboratory. As a result, work is now under way to convert contact logs to a computer readable form with analysis results by April.

The meeting also looked a the fundamentals of the 5 MHZ experiment and came up with a number of suggestions of ways of improving how it should be conducted in the future. These ideas will require further development and consideration by the full 5 MHZ Experiment Working Group. It is hoped that this experiment and others conducted around the world could eventually lead to a new ham radio band. (RSGB)

**

RADIO RULES: ARRL CONCERNED ON PROPOSED 70CM CHANGES

Back on this side of the Atlantic the ARRL says that its concerned about two FCC proposed actions. Its says that both could negatively affect Amateur Radio and it has made its position known in comments filed to the FCC.

Of the two proposals, the one with greatest impact comes from the National Telecommunications and Information Administration. It would greatly increase the geographical area in New Mexico and western Texas where amateurs in the 70 cm band would be limited to 50 Watts peak envelope power to protect military radiolocation operations.

The ARRL says that there are 67 Amateur repeater in the proposed area. It says that most of these are far beyond line-of-sight paths to any military facilities. So the League has asked the FCC and NTIA to cooperatively evaluate the proposed restrictionton to determine whether it is overly broad. The ARRL adds that weak-signal operations in the region could also affected.

The other propsal comes from the National Weather Service. It wants to deploy wind-profiler radars in the 448 to 450 MHz segment of the 70 centimeter band. Here, the League says that it understands that the National Weather Service would notify ARRL of their locations as selected. The League notes that amateur repeaters are incumbent in the band at this time. It suggests that the National Weather Service select sites that minimize the effect on repeaters in that part of the band. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater system serving all of Eastern Kentucky.

ENFORCEMENT: HAM TURNS IN LICENSE FOR RUNNING UNLICENSED BROADCAST STATION

A Berkley Michigan ham radio operator has turned in his ticket after the FCC finds he has operated an unlicensed radio station. The Commission's Daryl Duckworth, NNZ0W, explains:

--
Duckworth: "The Enforcement Bureau has issued a Notice to Thomas Brothers KI8BE, acknowledging the cancellation of his amateur license as a result of a finding by the Detroit office that he operated an unlicensed FM station."
--

The action rescinding Brother's ham radio license is the result of monitoring and direction finding by the Detroit Field Office. It established that Brothers operated an unlicensed FM radio station from his home in 2001. In addition to canceling his current ham radio license the Commission is prohibiting Brothers from applying for a new one until December 5th, 2007. (FCC. RAIN)

**

ENFORCEMENT: STILL MORE FINES

Hams are not the only ones feeling the sting of Uncle Sam. In fact, the FCC is continuing its enforcement activities in all of the services it oversees. Roy Neal, K6DUE, has the details on what they are doing outside of the world of Amateur Radio:

--
The CGC Communicator reports that a$ 5,000 Notice of Apparent Liability -- better known as a fine -- has been issued to an AM radio station. This, for failing to maintain a record of the its efficiency factor that is used to determine its actual operating power. The station was also dinged for operating in excess of 105% of its authorized power,

Another A-M broadcast station has been socked for $10,000. This, for failing to register its antenna structure and failing to maintain a presence at its main studio during its normal business hours.

But the big one -- a fine of $20,000 went to a company for operation of radio transmission equipment without the required Commission authorization. It was also cited for use of a radio frequency device that failed to comply with Commission regulations.

This is just a sample of the non-ham radio enforcement the regulatory agency has been involved with. In all, its been a pretty busy time for the protecxtors of the airwaves at the FCC.

For the Amateur Radio Newsline™, I'm Roy Neal, K6DUE.
--

The details on all of these actions are on the FCC's website. You can read the details at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030206.html (CGC Communicator, FCC)

**

ENFORCEMENT: UK MAN CONVICTED OF SELLING ILLEGAL CCTV GEAR

Meantime, across the Atlantic a British electronics supplier has been convicted of selling Closed Circuit TV transmitters that operated illegally in an amateur radio band. According to Jim Merachen, ZL2BHF, the British might say what he did just isn’t cricket.

--
The United Kingdom’s Radiocommunications Agency says that David Burrows plead guilty on February 10th in Newark Magistrates' Court to two charges of selling non compliant radio apparatus. The prosecution by the Radiocommunications Agency followed a complaint about interference from a licensed U-K radio amateur in May 2002.

The source of the interference was identified as an illegal Closed Circuit TV transmitter installed at a farm in Lincolnshire. The Radiocommunications Agency says that the tranasmitters had been bought from David Burrows's company valled A-E-R-C.

Inspectors searched the company's premises last July. At that time they seized a number of television transmission modules capable of illegal operation on amateur frequencies. The company website had claimed the surveillance equipment was exempt from the need to obtain a U- K licence.

Burrows, of Newark England, was sentenced to serve 60 hours of community service and ordered to pay 300 Pounds in court costs. Also, the equipment seized from Burrows business was ordered forfeitted to the government.

For the Amateur Radio Newsline™, I’m Jim Meachen, ZL2BHF.
--

It appears as if the Radiocommunications Agency may be using the Burrows case to send a message to others thinking of selling similar equipment by calling it ham radio gear. (GB2RS)

**

RADIO LAW: NY STATE HAMS TRY AGAIN TO GET ANTENNA PREEMPTION

For the third year in a row, Amateur Radio antenna legislation has been introduced in the New York Legislature. If approved and signed by Governor George Pataki, it would prevent passage of any zoning ordinance that would prohibit or -- effectively prohibit -- the construction of an antenna support structure by a federally licensed Amateur Radio operator.

But theres more. The ARRL Letter says that municipal ordinances in New York State that impact the placement, screening or height of antenna support structures would have to reasonably accommodate amateur radio antennas and impose the minimum regulation necessary. It would also prohibit municipalities from passing laws or ordinances to restrict antenna support structure height to less than 95 feet above ground level or restrict the number of antenna support structures. The legislation also would require municipalities to adhere to the provisions of PRB-1.

Last year's bill passed in the State Senate but died in the Assembly's Rules Committee. (ARRL)

**

THE WAR AGASINST TERRORIOSM: FREE EMERGENCY NOTIFICATION ALERTS

Even though the government says that it may downgrade the national terrorism alert back to Code Yellow, the Emergency E-mail & Wireless Network says that it is increasing its efforts to encourage everyone to sign up for its free Homeland Security notices. This by e-mail and wireless device. You can sign up for the messaging notifications at www.emergencyemail.org

The Emergency E-mail & Wireless Network is the largest public service notification network and a provider of e-mail notification and wireless messaging services to government, the private sector and non-profit organizations. The organization serves over 3160 local areas in all 50 U. S. States. Its website is located in cyberspace at www.911message.com. (EEWN)

**

THE WAR ON TERROR: THE FIRST RESPONDER

The latest terror alert has law enforcement agencies on guard and preparing for the worst. And after September 11, 2001, emergency crews are better prepared for disasters, thanks to new technology. Amateur Radio Newsline’s Bruce Tennant, K6PZW, tells us about First Responder:

--
One major problem on September 11th 2001 was communications between emergency crews. Most could not talk to one another because they were all using different types of radios, in different services and on different frequencies. In fact, the only group with common communications channels in the days immediately following the 911 terror attacks were the ham radio operators who had their own gear and volunteered to assist.

But that all could soon change thanks to a a new mobile command center built into a Sports UtilityVehicle and dubbed First Responder by its designer Raytheon.

While the exact information on how it works has not been made public, First Responder is designed to allow emergency crews to communicate on the same radio channel anywhere, anytime - even if phone and power lines are down. In addition to normal two-way radios, the design includes satellite phones, a mapping system, hacker-proof computers and infrared cameras. Just about any type of communications you can imagine except for ham radio and C-B.

Raytheon says that it developed First Responder to improve homeland security. It will also soon be equipped to detect biological and chemical agents as well as providing inter-service communications.

For the Amateur Radio Newsline™, I’m bruce Tennant, K6PZW, reporting.
--

According to news reports, the first, First Responder is already in use in the Los Angeles California area, but more of these S-U-V's may soon be seen nationwide. This, thanks to new federal legislation that could release billions of dollars in Homeland Security funding. (Published news reports)

**

WITH THE HANDI HAMS: A-R-T FOR THE BLIND

A descriptive audio version of the new ARRL video "Amateur Radio Today" will soon be available for the visually impaired from the Handi Hams. According to Pat Tice, WA0TDA, the ARRL has agreed to let the Handi Hamd reproduce a special version of the show in audio for its members with disabilities who cannot use regular video.

Tice says that the audio only version will contain added dialogue to describe the action that would be on-screen in the original version. No date for when this special version of Amateur Radio Today will be available, but you will have to be a Handi Hams member to be eligable to receive a copy. You can join by calling the toll free Hamdi Ham membership line at 1-866-HANDIHAM. For those who perfer numbers, thats 1-866-426-3442. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

COLUMBIA DISASTER: NASA SEEKS HELP FROM SKY WATCHERS

NASA is still seeking help from the American public to supply video and still images of the Space Shuttle Columbia on its return flight to Earth. The agency says that while there has been a great public response, more material will help the investigation of the Columbia accident.

Anyone who may have video or stills of Columbia's entry path are encouraged to send it to investigators. You can mail videotapes to the NASA Johnson Space Center, Mail Code JA17, 2101 NASA Road 1, Houston, Texas 77058. Email digital images to columbiaimages@nasa.gov

NASA adds that videotapes and photos can be returned upon request and the materials will not be released to the media without the submitter's permission. For more information call the Johnson Space Center Emergency Operations Center at area code 281-483-3388. (NASA)

**

VOLUNTEER NEEDED: AMSAT SATELLITE REPORT NEEDS NEW EDITOR

AMSAT says that it s looking for a new Editor for its Weekly Satellite Report. If you are interested in volunteering to help your fellow satellite operators stay abreast of the latest status of the ham-sats, please e-mail n1jez@amsat.org (AMSAT-NA)

**

CONVENTIONS AND HAMFESTS: CHARLESTON W VA IN MARCH

Between 600 and 700 Amateur Radio Operators are expected to gather on Saturday, March 15th, for the 19th Annual Charleston Area Hamfest and Computer Show. The venue for this one is the Coonskin Armory, on Coonskin Drive in Charleston. The event is a giant flea market of new and used amateur radio, computer and related gear.

Representatives of Governor Bob Wise will be present, along with people the Board of Public Works. Also, the states Office of Emergency Services will have their Mobile Command Center on display. And for those want to get into the hobby or upgrade, ham radio testing will be availabe.

The Charleston Area Hamfest, which is open to the public draws attendees from West Virginia, Ohio, and Kentucky. It runs from 9 AM to 3 PM with an entry fee of only $5.00. For more information on the Charleston Hamfest, e-mail n8tmw@arrl.net or call 304-965-5349 during normal business hours Eastern time. (N8TMW)

**

INTERNATIONAL – BAHAMAS: 6 METER BEACON MOVED

On the international scene, Steve Rutlidge reports that his C6AFP beacon is back on the air from grid square FL16. The beacon, which operates on 50. 062 MHz was moved from Great Abaco Island to Green Turtle Cay. The distance is about five miles and the grid square in the same. The beacon is now operating from the home of C6AGN. (VHF Reflector)

**

INTERNATIONAL – FINLAND: BEACON STOLEN

Users of the five-band Northern California D-X Foundation beacon network may have noticed the absence in recent weeks of transmissions from the Finnish OH2B beacon. The reason? The transmitter hass been stolen. The good news -- the beacon is expected to resume transmissions in the European spring. No other transmitters in the word-wide NCDXF beacon string have been affected. (RSGB)

**

INTERNATIONAL - SINGAPORE: NEW FREQUENCIES FOR HAMS

And word that Singapore’s telecommunications regulators have approved several UHF spot frequencies for Amateurs to operate. They are 433.425 , 433.450 and 438.450 MHz, and a maximum of 5 watts effective radiated is permitted. (Q-News)

**

DX

In D-X, Q-News reports that the Air Force has closed down Johnston Island and demolition will start shortly on the remaining buildings. There will be probably DXpeditions to the island later but not under the call of KJ6BZ. The good news is that the history of the Johnston Island Amateur Radio Club will be held in the Air Force archives. (Q-News)

The ARRL DXCC Desk has announced that the VKZ0MQI Macquairie Island operation from January 1, 2002 through March 15, 2003 has been authorized for DXCC credit. Also approved the 3C2MV Equatorial Guinea DXpedition from November 11 through December 12, 2002. (ARRL)

**

THAT FINAL ITEM: HAPPY RETIREMENT TO N6AWE

Before we go, a word of congratulations to Amateur Radio Newsline's own Mert Garlick, N6AWE, on his retirement from Fox Television's KTTV in Los Angeles. Mert started with the station back in October of 1966 when it was still a part of Metromedia. Over the years he has done every job a broadcast engineer can perform at a television station. From manning the transmitter atop Mt. Wilson to microwaving signals back from the scene of a breaking news story to covering the annual Tournament of Roses Parade in Pasadena -- Mert Garlick, N6AWE, has done it all -- and a lot more.

Now its time for him to travel other roads and Mert tells us that retirement will not really slow him down. Instead it will give him a lot more time to pursue his other interests which include genealogy and of coarse Amateur Radio. And you will still be heraring him regularly, right here, on these weekly Amateur Radio Newsline reports.

So before we sign off, please join us in wishing one of the nicest people in ham radio -- Mert Garlick, N6AWE -- many happy and fulfilling years of retirement. And don't be surprised if you run into him more regularly on the air. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. I'm working on a Technician License, and plan to buy a hand-held as my first rig.
I am concerned about RF Exposure. I don't quite understand if it should be of conern or not with a hand-held. Some sources I've read seem to make it sound that a hand-held would not gererate enough RF to be of concern, while others seem to make it sound like hand-helds should be a reason of conern.
Could anyone help me straighten out this issue??

Thanks,
G

I wouldn't be (and am not, really), but still, professionals suggest that when using an HT you tilt the antenna away from you at a 45 degree angle. RF would tends to be more attracted to an object parallel to it and your head could become a parasitic element. I don't even bother to tilt it usually as I get a better signal with it straight up and down. Also, a general rule of thumb is, the lower the frequency, the less human tissue absorbs the RF. So assuming you're not looking at a 33cm or 23cm HT, you should be okay. Some really tend to get uptight about the subject, but when you come to think about it, everything causes cancer anyways. PCS phones at 1.9GHz transmitting a couple hundred milliwatts into your skull is a lot worse, and still no one has conclusive evidence that this will give you a cancerous tumor. Heck, diet cola, the air in cities, the sun's rays, high tension power lines will all supposedly give you cancer.

Anyways, IMO don't worry about it. Good luck on your exam. Don't forget to upgrade, too. HF is fun.

73,
Mark VO1ONE

Don't forget that you have an "exposure time" on that as well.

Not sure exactly what the numbers are....but, here in Canada anyhow, they're
something like 5mW/meter for a 6minute period.
I've no idea where the hell they get the 6minute thing from!!
But that 5mW is for the regular Joe.
For Technicians, it's 10mW (apparently we're superhuman eh!).....I believe
it's higher for us because we know how to protect ourselves...but again it's
over a 6minute period.

oh ya....that's meter^2 (squared!).

We had a break in at one of our radar sites and some tools were stolen.
They entered the dome at the top (dish still moving and radiating) and got
our goods.
The cops wanted to be sure these guys weren't "walking wounded" so the news
put out a clip that they may have damaged their eyes/testicles because of
the radiation.

The reason the eyes and testes are at risk is that they are soft tissues and
there isn't enough of a blood supply to both: heal and recirculate and cool
the area.

Something like that anyhow....

Dave Hall <nojunk_n3cvj@worldlynx.net> wrote:

> Why twisty, resorting to changing your nic now? No one else would defend
> you to that level.....

Dave, are you really that stupid, or are you just trying to help Douglas W. Adair N8WWM live down his own violations on the Rain Report so he can get back to crying about CB rule violations, posting gay porn binaries, pedophile fantasies, running BI>20 spew attacks on rec.radio.cb and forging Twistedhed to all groups in the rec.radio hierarchy with fellow net-abuser and outcast Leland C. Scott KC8LDO?

In any case, instead of defending Twistedhed, I merely pointed out that Douglas W. Adair N8WWM appears to enjoy writing original pieces featuring children, specifically boys, and gay sex. It's not like this is the first or even the second time Adair N8WWM has written original pedophilia songs.

Why are you, Dave Hall, so eager to defend Douglas W. Adair N8WWM from having his pedophile fantasies exposed and disseminated? Are you sympathetic to pedophile fantasy writers, assuming N8WWM hasn't -yet- raped children? Are you frightened that Adair will call you a "traitor to amateur radio", as he did the late Richard McCollum N BK, if you don't support his insane, abusive behavior? Does Twistedhed drive you crazy enough to support Doug Adair N8WWM who regularly uses the kind of "gutter language" you've spoken so vehemently against, Dave?

Your hypocrisy is positively shocking, Dave Hall N3CVJ.

The most likely explanation for your brainless follow-up is that you're just one anti-twistedhed k00k defending another. Appropriate groups added. When malicious clowns like you are involved, Dave N3CVJ, it's hard to tell, but I'm willing to explore it at length with you.

Regarding your baseless assertion that I am "twisty" under another "nic", one needs only to be able to read to realize that his posting style and mine are quite different. You obviously consider yourself quite intelligent, regardless of the fact that you're actually a blinkered, intellectually myopic hypocrite. Can't you at least read well enough to see the difference, Dave?

I've restored the post in question below my comments. Read it closely and decide whether your bitterness over being clobbered in debate after debate is worth defending a federal outlaw, homosexual stalker, racist and pedophile fantasy writer like Douglas W. Adair N8WWM just because he, too, is obsessed with "twisty".

Here are a few quotes from the ignorant, hypocritical racist pedophile fellow
no-code ham radio hobbyist you're backing, Dave:

14310-14350 is in use of VHF skeds. 3795 is not on ham band in Region I.
Need 9L on 160, 80,40 m CW and ssb and all bands on SSTV + some bands on
RTTY.
So 9L sked would be nice.

I think its soo damn funny when twistedhed disguises himself as Fatty
Arbuckle and puts up pages about people. Do it some more
twistedhed@webtv.net.

It just shows how effective the anti-boys are! twistedhed@webtv.net is
ENRAGED, but he is too big of a sissy to do anything except from
behind an anonymous post. That's cool though. The very virulence of
the attack shows how totally ENRAGED his pink muffin boy self is.

The anti boys own rec.radio.cb

Recipe For Pastor Gab's Ham Scam with Mixed Nuts, or; How to Earn a Meagre living from your Radio Hobby

-Combine equal parts of ARnewsline, RAIN, and ARRL News
-Add a stupid children's story
-Add one stolen voice ID
-Lie to interviewees about your own importance
-Add one conspiracy theory regarding spectrum theft
-Finely craft conspiracy theory to include FCC Corruption
-Add one hint that ARRL is becoming obsolete
-Add one or two PC causes (to attract liberal donors)
-Add phony concern about off-color language
-Pretend you did something worthwhile at one time
-Pretend you own the frequency you transmit on
-Season liberally with defamation and false accusations
-Garnish with oblique references to ARRL Directors

Variations:
-Paranoid Hate Speech
-Felony Affadavit Complaints
-Pyramid schemes involving membership sales

Combine ingredients. Set Radio Shack timer for 128 hours. Serve to naive listeners on 80 and 20 meters over a weak and distorted 30 year old transmitter.

Send leftovers to foreign militias (preferably brutal and anti-democratic) They need to eat too!

Probably delicious over Shortwave, but use caution as license revocation will result if served over Amateur Radio.

NB: Don't try this at home! Any resemblance to currently licensed Amateurs is entirely coincidental.

Satire:
1: a literary work holding up human vices and follies to ridicule or scorn
2: trenchant wit, irony, or sarcasm used to expose and discredit vice or folly

Hey - hope this is the appropriate ng for this. I'm looking to get in to some ham radio type stuff - another place to suck my money away, I suppose. It looks like fun, though, and very helpful in emergencies and the like. How would I go about getting involved in this? I'm 15, near Chicago. What type of 2-way radio (just ham, or what else is there out there?) kind of stuff could I get involved with? Thanks for any info!
Matt

Hey guys/gals, have in hand a number of P1225 UHF radios. Total of five.

3 units P94ZPC90C2AA, 1998 Datecode

1 unit P94ZRC90C2AA, 2002 Datecode

1 unit MISSING LABEL. Suspect it is 2002 as it came with other radio from
same source.

One radio has blue paint on front and I have a refurb kit on the way, which
will be included in the deal, free.
Other radios are excellent condition, no cracks, gouges or scrapes.
Chargers are also excellent. A couple of them appear as new.

7 batteries datecoded from '98 to '02 mixed.

3 rapid chargers

2 standard chargers

SOLD AS A SET: $1000

==========

ALSO:

2 units HT1225 LS version. Capable of 16 conventional UHF channels and
trunking. Includes 4 batteries, but NO charger.
I have not a clue what they will/won't do or even what they're worth.
They are in excellent condition and I expect to have them in hand Friday
when model numbers, etc will be available. I can have some conventional
channels programmed before shipment.
$275 each. Shipped CONUS.

Thanks and let me know via email!
Randy

Hey all, Have for sale 2 Kenwood radios.

They are TK-862 models, 2 channel, UHF and include brackets and microphones.

Both radios are in good to excellent cosmetic condition. There are no screws for the brackets. Microphones have some yellowing.

One radio is an "H" model, meaning High Power, 35w. This radio has a cut power cord, but there is about 5" of cable to splice. Radio works fine.

Second radio is standard model (25w). This radio has a blown power module but RX side is fine. Use for parts or fix. I believe the module is about $60-70.

$150 for both, plus shipping, or trade for motorola gear.

Thanks!
Randy

Dont for get about the Yaesu/Vertex WiRES II system. That system has been running in Japan for a year or so, and was just introduced in the USA about 6 months ago. Europe and a few other locations have also started WiRES II ops so it seems to be picking up a little bit of popularity.

Wes,

I took a trip this past August from NC to MT via MI, and WA - 2 different airlines. I had my HT in my laptop bag. Never a problem. I was asked a few times to "please turn it on". Same deal as a cellphone. Your mileage may vary.

73,

Message-ID: <ip6aa.2155$h9.1982@fe09.atl2.webusenet.com>
Source record: 68599

I have for sale an Icom IC-756 original model.The radio is in excellent condition,a solid 9 in
appearance and works 100%.The radio comes with the HM-36 mic,power cord,manual,original box and two
optional filters.The filters are:
FL-222 a 455 KHz IF, 1.8 KHz narrow SSB.
FL-223 a 9 MHz IF, 1.9 KHz narrow SSB.
The filters alone cost $300.00
The radio has been in a non-smoking environment and has no dents,scratches or evidence of wear.
Asking $1000.00 + about $20.00 shipping.I will ship to the lower 48 only.I accept USPS money
order,certified bank check or a personal check with a 7 day hold.

Regards
Bob Stamper N4KTS

1805. FS: sma-to-bnc custom fit antenna adapter

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-07 22:35:39 UTC
From: gulyas@earthlink.net
Message-ID: <12235960.0303071435.4e9a2337@posting.google.com>
Source record: 68600
Cross-posted to: rec.radio.swap,rec.radio.scanner,rec.radio.amateur.equipment,rec.radio.amateur.misc

Do you have a need for a high-quality SMA-to-BNC antenna adapter that
is custom made to fit and protect your H.T. or scanner radio?

Adapter allows you to:
Quickly change antennas to base, mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna
changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed
for moisture and dirt protection.
The base also provides an excellent support for any length of antenna
or application.
No need to remove adapter once installed to make a quick and safe
antenna change.

Sizes to fit radio models:
Yaesu: VX-5R, VX-7R, VX-1R, FT-50-R, VX-10, VX-150, VX-110,
VXA-100, VXA-120
Icom: IC-T90A, IC-T8A, IC-T81A, IC-Q7A, IC-R2, IC-R5
Kenwood: TH-D7, TH-G71, TH-F6A, TH-F7A
Alinco: DJ-V5, DJ-X3, DJ-S40
Standard: C508A, C510A
Radio Shack: HTX-420, HTX-400, HTX-245, HTX-200
Aor: AR-16

Previewed in the May 2000 Issue of CQ Magazine, and the Nov. 2000
Issue of QST Magazine.

$11.95 + $1.50 S+H(One to unlimited)
(Check or money order only in U.S.Funds)
(Specify-radio-model)

Down there in New Orleans, they brag about N5QXX as the longest echo linked repeater. The real truth is that it isn't.

Oh yes, if you take a look in the repeater section of Echolink, you'll find N5QXX all right, but you won't be able to link to it. Instead, you'll get an "access denied" message, because only a small number of people are allowed to use it.

So why is it on Echolink at all? Your guess is as good as mine, although I tend to lean toward the explanation that the club wants bragging rights without having to actually perform as do other linked repeaters.

What a bunch of morons. They should be cut off from Echolink.

I had mine (antenna separated) in a jacket pocket. You take off the coat and it goes through xray in a plastic basket. Passed right through the screening. The rig looks like a blob, the antenna looks like a pen I guess. (If possible you want to avoid having to answer questions about it, turn it on, explain it, etc.) They are more concerned about the belt buckle and the metal in the soles of your shoes, you know.

Happened on 3894.5 last night, and what is there?
Yup, just when you thought you heard the last of all
the BARF - Stumpjumper malcontents and misfits, they
still gather nightly on 3894.5 Looks like Big Al still
maintains control of the freq. though, which makes you
wonder if the Big Kahuna from the Virgin Islands will
check in? Herbie does not permit any sharing of center
stage and probably could not tolerate Big Al's being in
charge of the frequency. How much you want to bet
most of the unidentified jamming on 14300 still comes
from this group?

From: Shawn <gulfxray@yahoo.com>
Message-ID: <v6l5oje6sv4j59@corp.supernews.com>
Source record: 68616

Can someone remind me what the three buttons on the right side do and in what combination, please?

Battery died and I need to get it back up and going - just moved and can't find the instruction sheet...

Thanks in advance!

--

Thanks,
Shawn

Source record: 68617

The North American Center for Emergency Communications and its founder Edward Addy have falsely been accused of being a threat to military families and military members in widely circulating e-mails that originated with the Army, but have spread throughout the other services. I am letting you know so if you see one that you will help Ed out by refuting it to whoever sent it on to you. It has even made www.Snopes.com - MilitaryOps Urban Legends Reference Pages: Rumors of War (NACEC, but being placed on this list of confirmed false e-mail statements has not stopped the hailstorm of messaging falsely maligning this group. Other sources which are good for refuting these false accusations are the website www.nacec.org which has commendations from DoD for providing support during Desert Shield/Storm and a number of newspaper articles about its work in supporting disaster recovery around the world, www.emforum.org/varena/LC990224.HTM and http://www.mindspring.com/~cummings7/ncaec1.html which describes their rhombic antenna in Northern Minnesota.

Thanks.

Roger Helbig
just doing my part to right a wrong - learned about it by researching the message when I got it and have been fighting it for past week.

The top button is the HOUR button. The middle button is the SET button. The lowest button is the MINUTE button.

HOUR SET: Press the SET button and the HOUR button at the same time to set the desired hour.
MINUTE SET: Press the SET button and the MINUTE button at the same time to set the minutes. The seconds will reset to 00 each time the minute set is advanced.

The battery replacement is simple. Use a 1.5 volt button cell, such as a G12 or 386.

Hope this helps...

1824. WTB-3/8 X 24 STUDS

From: Jesse JJJJackass <DemoCat@Anon.com>
Message-ID: <b4eitp$bp8$0@pita.alt.net>
Source record: 68620

Lloyd Davies and David Tolassi are out in the woods hunting when Tolassi suddenly falls to the ground. He doesn't seem to be breathing and his eyes arerolled back in his head. Lloyd whips out his HT and calls 911.
He gasps to the operator, "David Tolassi is dead! What can I do?"

In a calm, soothing voice, the operator says, "Just take it easy, I can help. First, let's make sure he's dead."

There is a silence...then a gunshot is heard. Lloyd comes back on the line and says, "Ok, now what?"

1826. O'Brainless and Jesus?

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-09 05:41:43 UTC
From: Jesse JJJJackass <DemoCat@Anon.com>
Message-ID: <b4ek6c$f4v$0@pita.alt.net>
Source record: 68621
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

An Irishman in a wheel chair entered a restaurant one afternoon and asked the waitress for a cup of coffee. The Irishman looked across the restaurant and asked, "Is that Jesus sitting over there?" The waitress nodded "yes," so the Irishman told her to give Jesus a cup of coffee on him.

The next patron to come in was an Englishman with a hunched back. He shuffled over to a booth, painfully sat down, and asked the waitress for a cup of hot tea. He also
glanced across the restaurant and asked, "Is that Jesus over there?" The waitress nodded again, so the Englishman said to give Jesus a cup of hot tea, too.

The third patron to come into the restaurant was a Dimmy O'Brainless on crutches. He hobbled over to a booth, sat down and hollered, "Hey there sweet thang, how's about gettin' me a
cold glass of Old Milwaukee!" He, too, looked across the restaurant and asked, "Is that God's boy over there?"
The waitress nodded again, so O'Brainless said to give Jesus a cold glass of Old Milwaukee, too.

As Jesus got up to leave, he passed by the Irishman, touched him and said, "For your kindness, you are healed." The Irishman felt the strength come back into his legs, got up and danced a jig out the door.

Jesus also passed by the Englishman, touched him and said, "For your kindness, you are healed." The Englishman felt his back straightening up, and he raised up his hands, praised the Lord and did a series of back flips out the door.

Then Jesus walked towards O'Brainless. Dimmy jumped up and yelled, "Hey, man, don't touch me...I'm drawin' disability."

75 Meter SWL report:

Got back from Dinner late last night, had a fantastic Porterhouse Veal
w/garlic Mashed Potatoes, Onion Marmalade & Veal Sauce - yummy!
Plopped down in front of the TS-870. Hesitated...do I really want 2 do
this after such a meal at a Zagat Survey rated resturant? Sure, what the
hey?
Pushed the on switch, tooned to 3947.6 and as expected, a radio circus
was going on. It seems that a *long-gone* Libbynetter returned to the
air last night, a station from Florida that in the past wpuld make veeeery
looooong monologue transmissions and would also play commercial
broadcast originated tapes of the "Reed & Cliff Show". He was on
with a wi---de signal and power microphone so the boys from 3.945
go up and ask him to "turn it down". He does, to his credit, but someone
comes
in and claims that the 45 boys were "Qrm'ing the Libbynet" and thus sours
the milk or pees in the pool...take yer choice. From then on it was a
small time frequency war. Stations doubling all over the place, accusations
noisemakers, white-noise squelch qrm'ing etc... Switched it off after 1/2
hour. Same shit, different day. I hope RH was listening - although I suspect
he too came home from dinner, like us also last night, to find his answering
service
jammed with frantic calls about the "75 Meter kids" pissing in the
sandbox...
...yet again...yawn....

(...you could almost hear the Three Stooges them song folks - toon in next
week.
You know...someone should really make a 75 meter gossip page like
that guy does for 14.313 - it would be a real hoot!)

Yes the FCC site does provide this service but it is confusing to figure it
out. So I recommend going to www.arrl.org and printing out the directions
and have those right at your side as you work your way through it.

Before you can actually do the renewal, you have to register in CORES.
Again the directions at the ARRL site will explain how to do all this.

Is it appropriate to seek a standard for decency in public
life, in Ham Radio, and in this NG, or should one admit
defeat and accept that the foul-mouthed M3/CBer,
the ill-educated M3/CBer, and the immature
M3/CBer has won the day?

If so, then it is a sad day for Ham Radio. The mindless
operator will have defeated the genuine technical enthusiast.

Amateur Radio Newsline™ Report 1334 – March 7, 2003

Amateur Radio Newsline report number 1334 with a release date of Friday, March 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A national ham radio socierty on the brink of faiulure and how ham radio will survive in space while the shuttles are grounded. These stories are first on Amateur Radio Newsline report number 1334 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL: COLOMBIAS NATIONAL AMATEUR RADIO SOCIETY SAVED BY A MIRACLE

Colombia’s national Amateur Radio Society has received a reprieve from extinction. At least a temporary one. We have this in-depth look at what happened and whats being done to save the L-C-R-A.

--

Colombia’s national ham radio society remains on the brink of being dissolved and you may soon hear very few of that nations hams on the air. This, according to Fred Laun, K3ZO in a report that originally appeared in a number of D-X newsletters. The reason? The economy.

According to Laun, his old friend Beto Rojas, HK3DDD, in Bogota informed him that postal rates in Colombia were doubled as of January 1st. That it now costs the equivalent of $2.00 U-S to send a letter to the United States. And as a result Colombian hams would have to pay the equivalent of 13 cents per QSL to send outgoing cards through the bureau.

That 13 cent fee would not be to bad except for the fact that the bureau probably won't be available much longer. This, because the Colombian I-A-R-U member society -- the Liga Colombiana de Radioaficionados -- L-C-R-A -- was to meet on Saturday, March 1st to dissolve itself. The problem is that L-C-R-A membership is down. It now only has 200 paid members. It also had the equivalent of 8000 United States dollars in debt. It’s leaders felt that it could no longer stay in business.

But says Laun, a miracle actually happened. At the meeting one of the members donated $7000 to pay off most of the current debt. So, L-C-R-A will continue to operate as Colombia’s national society for at least the next three months. During that time the leadership will try to figure out what went wrong and see if they can get the organization back on an even keel.

In a note to Amateur Radio Newsline, Laun says that several Colombian hams were apparently moved by the messages they received from around the world and have vowed to try to rescue their almost 70 year old society from the brink of oblivion. Even so, HK3DDD tells Laun that many Colombian hams have stopped calling C-Q and some have even terminated all high frequency operations. This is because they can no longer afford to handle the economic consequences of the demand for QSL cards.

Also says HK3DDD, some Colombian DXers who are still on the air are simply listening, searching and pouncing on rare ones these days. Instead of being the DX, they are selectively looking for new countries for themselves.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP .

--

The bottom line to all of this? H-K prefix hams may soon become very rare on the H-F ands and those whom you work may never be able to QSL. (K3ZO)

**

RADIO RULES: WRC-03 GETS US POSITION

The U. S. Department of State has forwarded several agenda items to Geneva as being this nations opening position at the 2003 World Radiocommunictions Conference. The most important of these relate to International Radio Regulation s-25 and its sub-parts. Included in the initial United States position is rewording S 25 subpart 1 to give member nations more authority to determine the points of communication of the amateur stations it has licensed. The suggested modifuication reads that administrators shall verify the technical and operational qualifications of any person wishing to operate an Amateur station.

The United States is also proposing to eliminate regulation 25.5. This is the rule that mandates Morse Code peoficiency examinations for all candidates for an Amateur license with high frequency operating priveleges. The United States says that its time to remove the Morse testing requirement and leave the decision as whether or not to test for code up to individual I-T-U mermber nations. (W5YI)

**

HAM RADIO IN SPACE: CREW OF 2 TO THE ISS

It will be a two man crew rather than a three man crew on the International Space Station until the U-S Space Shuttle flies again. But ham radio will remain on the air from the I-S-S as the investigation in the Columbia tragedy continues. Amateur Radio Newsline's Roy Neal, K6DUE, has more:

--

NASA'S WORST NIGHTMARE BECAME REALITY WHEN AN ORBITTING SPACE SHUTTLE BLEW UP, KILLING ALL SEVEN ABOARD AND PUTTING UNITED STATES SPACE ACTIVITY OH HOLD FOR AN INDEFINITE FUTURE. NOW, OUT OF THE DEBRIS, INVESTIGATION AND SORROW, NASA HAS BEGUN TO REORGANIZE.

ADMINISTRATOR SEAN O'KEEFE HAS TOLD A CONGRESSIONAL PANEL THAT AN AGREEMENT HAS BEEN REACHED WITH THE INTERNATIONAL PARTNERS. THE INTERNATIONAL SPACE STATION WILL CONTINUE IN ORBIT FOR AT LEAST THE NEXT 18 MONTHS.

THE TWO ASTRONAUTS AND ONE COSMONAUT ON BOARD WILL BE BROUGHT BACK TO EARTH IN LATE APRIL OR EARLY MAY ABOARD THE SOYUZ SPACE SHIP THAT'S DOCKED AT THE STATION. THEY WILL BE REPLACED BY A NEW CREW OF ONLY 2 PEOPLE, ONE ASTRONAUT AND ONE COSMONAUT, PROBABLY ED LU AND YURI MALENCHENKO, WHO ARE NOW IN TRAINING AT RUSSIA'S STAR CITY. THEY WILL KEEP THE STATION OPERATIONAL, EVE N PLAN TO TALK TO ONE OR TWO SCHOOLS ON EARTH EVERY WEEK. FUTURE CREWS WILL COPNSIST OF TWO PEOPLE FOR THE TIME BEING.

RUSSIAN PROGRESS SPACECRAFT WILL BE USED TO FERRY SUPPLIES, SOYUZ WILL CARRY PASSENGERS. ONCE NASA HAS FIGURED OUT WHAT CAUSED THE SHUTTLE COLUMBIA TO DISINTIGRATE, THEY HOPE TO FIX AND FLY THE THREE REMAINING SPACE SHUTTLES. THE BOEING COMPANY HAS BEEN ASKED TO GO TO WORK ON A NEW CARRIER TO AUGMENT THE SHUTTLE FLEET.

RUSSIA HAS AGREED TO ACCELERATE THE DELIVERY OF 2 PROGRESS RE-SUPPLY VEHICLES FOR A TOTAL FLEET OF FOUR THIS YEAR AND FIVE IN 2004 AND THERE IS TALK OF AUGMENTING THE SOYUZ FLEET.

EXISTING HAM RADIO EQUIPMENT ON BOARD SHOULD KEEP THE STATION ON THE AIR. OTHER EQUIPMENT MAY BE SENT UP IF NEEDED. THE SPACE AGENCIES HAVE COMMITED TO STAYING IN SPACE WHILE THEY MAP A FUTURE AND HAM RADIO IS AN INTEGRAL PART OF THAT ORBITING STATION.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE.

--

NASA says that having only two people aboard the I-S-S will help extend supplies while the shuttle fleet remains grounded. (NASA, ARNewsline™)

RESCUE RADIO: METRO-COMM AND THE NORTH-EAST BLIZZARD

A follow-up to our recent coverage of the severe weather that has blanketed the North-East in recent weeks. Steve Bromhead, KB2TRZ, reports that the Metro-Comm linked repeater system did yomens duty during last months blizzard.

According to Steve, their Snow Watch Net was activated for 42 consecutive hours handling storm related traffic for 12 counties in New York, New Jersey, Pennsylvania and Delaware. This included 10 formal messages to the National Weather Service office in My. Holly New Jersey.

Steve says that Metro-Comm is a linked repeater system covering Binginghamton, New York to Ocean City, New Jersey. The system has machines on 144, 220, 432, and 1296 MHz as well as a packet BBS. (KB2TRZ)

THE VEC SYSTEM: QPC RELEASES DRAFT GENERAL CLASS SYLLABUS

You have the answers. They have the questions. So says the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

The Q-P-C has just released a draft syllabus for the new Element 3 General class Question Pool. This is the syllabus will be used when developing the new General class question pool that will become effective July 1, 2004.

This draft syllabus is available for download at www.arrl.org/arrlvec/pools.html. The public is invited to comment on this syllabus, as well as to suggest questions for consideration in the next General Pool.

The Question Pool Committe says that all responses must be received prior to July 15, 2003. Please direct your comments to the following people:
Scotty Neustadter, W4WW, Chair QPC email: W4WW@arrl.net
Bart Jahnke, W9JJ, Member QPC email: vec@arrl.org
Fred Maia, W5YI, Member QPC email: w5yi@w5yi.org
John Johnston, W3BE, Member QPC email: johnston.john1@worldnet.att.net (NCVEC)

ENFORCEMENT: NO RULES BROKEN

A ham accused of running a telephone call-in program on 75 meters has been cleared of any wrong doing. Amateur Radio Newsline’s Bruce Tennant, K6PZW has good news for one California ham:

--
Back on October 15, 2002, the FCC wrote to James S. Watkins, KI6GU, of Burbank California. This, regarding complaints that his station was involved in a telephone call-in like program on 3.830 MHz on August 16th and 24th.

The complaints alleged that Watkins had operated the call-in show using reverse phone patch. Copies were provided to him and the FCC requested additional information from Watkins in regard to that operation.

Watkins provided the requested information in a response dated last November 12th. Following a thorough review the FCC now says that that there were no violations of Commission rules since licensed operators were in control of the station during all transmissions. As a result the inquiry is closed and no enforcement action is deemed to be necessary.

For the Amateur Radio Newsline, I’m Bruce Tennant, K7PZW, in Los Angeles.

--

The FCC also thanked Watkins for what it termed as his quick reply and his cooperation. (FCC)

**

ENFORCEMENT: WARNING LERTTER FOR ALLEGED KEY-DOWN

A Michigan ham has recieved a Warning Notice from the FCC. This time the letter went to to George Albrecht, N8PGB, of Lansing , and says that the FCC is in posession of information alleging that Albrecht's station was the source of deliberate interference to the W8LCC repeater system on 442.025 Mhz.

The notice says that the interference took the form of unidentified transmissions and keying down to cause sound effects from a link to 52.525 Mhz. In its note the FCC warned all Albrecht of the possibility of fines and revocation proceedings against him if the alleged problems continue. (FCC)

**

ENFORCEMENT: NY CAR SERVICE FINED FOR UNLICENSED OPERATION

International Car Service, Inc. of Brooklyn, New York has been fined $10,000. This, for operating of unlicensed radio transmitters on 33.20 Mhz.

The original forfeiture order was issued on October 22, 2002 by the District Director of the Commission's New York Field Office. International Car Service never filed a response to the N-A-L. Based on the information before the Commission, the fine has been affirmed and International has been ordered to pay. (FCC)

**

ENFORCEMENT: HACKER SENTENCED

A federal judge has ruled that a California man who quit his job to work for a competitor and used his old computer password to snoop on his former employer must pay $21,600 and serve five years probation. The sentence comes after the San Dimas man pleaded guilty in September of 2002 to one count of illegally obtaining information from a protected computer

Until February of last year, the man reportedly worked for a contractor specializing in large retail buildings. After leaving that job to work for a competitor, the man admitted that he used a password to access its computer system more than 20 times. (Published reports)

**

FM AND REPEATERS: REPEATERLINK.ORG WANTS YOU

Hams and repeater owner operators interested in connecting their system to another cirty or another nation now have a new resource. Its in cyberspace at www.repeaterlink.org and once there you will find a growing list of who'se repeater is linked to where and how its being done.

repeaterlink.org is the work of Jim Willmore, KC9BIX. He says over several Internet remailers that his site is unique in that it lets you to search for

repeater systems that connect two different cities together or linked systems that have repeater in a specific city. It also allows hams who own a repeater system to log in and maintain your own system information in real time.

According to Willmore, repeaterLink.org is totally independant and supported by the ham radio community. It does not buy data from the FCC or the ARRL, but rather relies on the architects and engineers who own the repeater networks to register their own systems.

Again, that site is www.repeaterlink.org. If you have any questions about the site, email Jim at kc9bix@repeaterlink.org (KC9BIX)

**

HAM RADIO HONORS: NAB ENGINEERING ACHIEVEMENT AWARD WINNERS ANNOUNCED

The National Association of Broadcasters has honored a ham radio oprtator with one of its two, 2003 Engineering Achievement Awards for Radio and Television.

John Reiser, WQ4L, the retired Senior Broadcast Engineer of the FCC International Bureau, will receive the award for Radio. Robert Eckert, Branch Chief - Electromagnetic Compatibility Division, Technical Analysis Branch of the FCC's Office of Engineering and Technology, will receive the award for TV.

The Engineering Achievement Awards for Radio and Television will be presented at NAB's Technology Luncheon on April 9th. The NAB annual convention takes place April 5 - 10 at the Las Vegas Convention Center. The Amasteur Radio Reception is Wednesday April 9th from 6 to 8 P.M. right next door at the Las Vegas Hilton Hotel. The complete details are in cyberspace at www.nab.org/newsroom/pressrel/n2003/c2603.htm) (CGC)

**

CONVENTIONS AND HAMFESTS: THE ZL TECHNOLOGY CONVENTION

No plans for this springs Easter holiday? Well think down-under as in Hamilton New Zealand because that’s where this years Technology Convention will take place. The dates are April 19th and 20th at the Hamilton Astronomical Society meeting facility.

This years Technology Convention will be hosted by the Hamilton Amateur Radio Club. Plans for the event call for presentations on such subjects as microwave equipment construction, homebrew test equipment, APRS, 10 GHz ATV, plus others state of the art Amateur radio disciplines. And if the weather permits, some viewing of the Southern Hemisphere’s night sky from the facility’s optical telescope may be included.

Want to find out more? You can write to the New Zealand Technology Convention 2003, PO Box 606 Hamilton New Zealand. Or better yet send an e-mail to Gavin Petrie at gavinwp@ihug.co.nz. (NZART)

**

HAMFESTS AND CONVENTIONS: WEAK SIGNAL BANQUET IN DAYTON OHIO

Here in the United States tickets are now on sale for the 11th Weak Signal Banquet slated for on Friday night May 16th in Dayton Ohio. This is one of the largest gatherings of V-H-F weak signal enthusiasts held anywhere in the United States and is timed to coincide with the Dayton Hamvention. Cost is $35 per person and only 125 people can be accommodated. For information and reservation information take your web browser to www.wa8wzg.com and click on Dayton Banquet 2003. (WA8WZG)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

TRAVEL WARNING: DX'ERS ADVISED TO USE CARRY-ON LUGGAGE ONLY

If you are planning a D-Xpedition, you might want to think in terms of smaller being better. This following reports of vandalism to the luggage of a recent DXpedition by none other than those highly trained security folks at Seattle Washington's Sea-Tac Airport. Amateur Radio Newsline's Jim Meachen, ZL2BHF, in Auckland New Zealand reports on what happened to a bunch of DXpedition operators who were headed home:

--
When the D-Xpedition group returning from the recent AH3D operation reached Seattle for their connection to Copenhagen Denmark, all their Samsonite case's locks were been broken by the Sea-Tac Airport security people who just had to take a peek inside. The checking was done in a secure area of the Seattle airport. As most seasoned travelers know, security is supposed to find the passengers to get the keys to luggage that they want to inspect. In this case security simply broke into them, resulting in damage to the luggage and some rather messy repacking.

As a result of this experience, D-X'er Martti Laine, OH2BH, says he will be going hand carried from now on. When he operates the ARRL SSB Contest from the Canary Islands as EA8BH it will be using the new Yaesu FT-897. This is a radio that weighs in at only 8 and 1/2 pounds and can be toted along in the passanger cabin with him.

Laine says that EA8BH will be on the air on all bands using the new Yaesu radio. He adds that the QSL for this operation will feature information on this new, compact DXpedition, approach.

From down-under I'm Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

Several D-X publications quote Laine as saying that during these turbulent times it is advantageous to have all your equipment hand carried. He says that such rigs as the FT-897 and the FinnFet FF-1001 solid-state kilowatt will all fit into a small airline hand-carry bag. Laine adds that if you work him, QSL direct to OH2BH. (OPDX, others)

**

ON THE AIR: CELEBRATING THE FIRST NATIONAL WILDLIFE REFUGE

Meanwhile, closer to home, the Vero Beach Amateur Radio Club as announced a special evebt operation for March 15th and 16th. From 1400 to 2100 UTC both dats the club will operate station W4OT to celebrate the 100th Anniversary of the nation's first National Wildlife Refuge on Pelican Island. Suggested frequencies are 14.290, 21.360 and 28.390 Mhz. If you make contact QSL to P O Box 2082, Vero Beach Florida. The zipcode is 32961. (VBARC)

**

INTERNATIONAL - UK: THE RADIO COMMUNICATIONS FOUNDATION

The Radio Society of Great Britain has announced the launch of the Radio Communications Foundation. As envisioned. the new foundation will be used by the RSGB to channel all its work in the field of education and training. It will support the promotion of amateur radio to a wider audience in the U-K. The Foundation is being registered as a charity and will operate independently of the normal commercial activities of the RSGB. (GB2RS)

**

INTERNATIONAL - GERMANY: NOMINATIONS SOUGHT FOR THE HORKHEIMER PRIZE

The German national ham radio society -- the DARC -- is seeking nominations for the 3003 Horkheimer Prize. The award is named after Rudolf Horkheimer was one of the first radio amateurs in Germany. Its awarded annually by the DARC for contributions to amateur radio, its further development, and the goals of the society.

According to DARC, the prize can be awarded to one or more persons or institutions. Any member of an amateur radio society in the IARU is entitled to field a nomination and self-nominations are also allowed.

The 2003 prize will be awarded during the Ham Radio 2003 fair in Friedrichshafen. Nominations must be submitted by March 31st to DARC, Lindenallee 4, 34225 Baunatal, Germany. (GB2RS)

**

THE WORLD ABOVE 50 MHZ: QSOP PARTY HONOR ROLLS POSTED

Back here in the U-S-A, Tim Marek, K7XC, says over the W6YX VHF Reflector that the V-H-F Q-S-O Party Honor Rolls through September 2002 have been updated and posted to his website. The U-R-L is a bit complex to read, so look for them in the print edition of this week’s Amateur Radio Newsline report. You can find it http://k7xc.tripod.com/VHF_Records/index.html (K7XC)

**

DX

In D-X word that G3TBK, is returning to work in St. Vincent and will be active again as J88DR until the 10th of April. He will be on all bands from 80 through 10 meters. mostly CW. There may also be a possibility of some operation on 160 metres if he can find sufficient space for an antenna. All QSLs go to G3TBK, either via the bureau or direct. (RSGB)

And FO5RK reports that he is planning to be active again from Rapa Island through March 20th. Rapa Island is located in the Australs group, which counts as a separate DXCC entity from French Polynesia. QSL this one as directed on the air. (OPDX)

**

THAT FINAL ITEM: W2NSD ADVISES ON THE WAR ON TERRORISM

And finally this week a word on how to win the War on Terrorism without firing very many shots. It comes in some advice from 73 Magazine's Wayne Green, W2NSD. And as we hear from Blair Alper, KA9SEQ, Green has some rather interesting albeit offbeat ideas -- all using radio:

--

Writing in his March editorial, the prolific W-2-Never-Die quotes a rather strange idea he says comes from Newsmax.com. Its a story recommending that Israel set up narrow passages at every checkpoint with sandbags to absord any explosions. Then use UHF transmitters to detonate any explosives that a terrorist may be trying to sneak in. That says Green would get rid of a lot of suicide bombers in short order.

But Green takes it a lot futher. He suggests that the United States adopt a psychological approach to fighting terrorists. He says that we should set up a series of radio and television broadcasts in the Arabic language. He says that the programs would be made up of psychics supposedly interviewing dead suicide bombers who are screaming that they are roasting in hell and not enjoying the after-life that they were promised. The psychics would also claim that God is furious with them and has put a curse on their families.

Would it work? On this one we won't even venture a guess. But 73's Green does add this comment. He says that it is far better to outsmart enemies than to try to outfight them. It's cheaper, says W2NSD, and that it saves lives.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ.

--

Green also has some advice for the United States military on how not to fight a war with Iraq. That one you really have to read for yourself. You will find that information on page 4 of the March 2003 issue of 73. (73 Magazine)

Accept defeat. The reasons for doing so will be wrong, but WTF.

>If so, then it is a sad day for Ham Radio. The mindless
>operator will have defeated the genuine technical enthusiast.

Not at all, it will be a sad day only for you. You know full well that
technical investigations are a mere subset to self-training in
communications, i.e. operating.

Just a guess here, but maybe it's a reference to the UK version of a US trucker with a CB (with or without foot warmer). The M3 is a major highway in the UK.

As I said, just a guess.. if someone else knows for sure, I will stand corrected. :)

There is no such thing, other than in the minds of a few bigots in the NG.

The entry level amateur radio licence in the UK is now the Foundation
Licence, for which the prefix is M3.

The Foundation Licence was introduced in Jan 01 and has been a tremendous
success- bringing many newcomers of all ages into the hobby. A few of the
old guard don't like it- seeing the newcomers as a threat to their self
awarded superior status.

The Foundation Licence is part of the progressive licensing scheme being
introduced in the UK, the next licence 'up' is the Intermediate and, come
Jan 04 (or so) the scheme will be complete when the current RAE is replaced
by a new RAE. At that time to get a full, or as it will be known advanced,
licence, candidates will need to pass the FL and IL exams first.

That is good to know. As it is, I think I am going to drive the 920 miles since I am sure war will break out while I am traveling and being in an automobile beats being tied up in an airport.

A piece of advice for you, you Eastern Bloc moron who became a Australian citizen. All of the Western nations are in the crosshairs of the Islamicists whether you like it or not. So you better watch what you wish for moron. I suspect you were hiding under your rock as you wrote that and it wouldnt surprise me that you really are nothing more than a gutless cockroach

is it appropriate to seek a standard for decency in public
life,in ham radio,and in this NG,or should one admit
defeat and accept that the foul-mouthed G4SDW,
the ill-educated G4SDW,and the immature
G4SDW has won the day?

if so,then it is a sad day for Ham Radio. the mindless
operator will have defeated the genuine technical enthusiast.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd/March, through Sunday, 9th/March there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9Q, 9U, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T31, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP5, VP6, VP6/d, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

9N, NEPAL. Bjorn "Hugo" Ark, LA5YJ, is once again active as 9N7YJ after a two week break to his home QTH in Vestre-Toten Kommune (county), in a

town called Reinsvoll, located in western part of the area Oppland, South Eastern Norway. Hugo's length of stay in Kathmandu is unknown at this time (possibly through December). He is there on a mission for the U.N. Hugo has a better rig with him this time. He used a Kenwood TS-50 before and is now working with a Yaesu FT897 w/CW Collinsfilter, and 100 watts. He also has trap dipoles made by Rag, LA6FJA, for several bands now. This will allow him to be active on 160/80/40/30/20/17/12 meters. He plans to be active on 160 meters during the weekends. He will not be active on PSK31 or RTTY; however, someone has been active on the Digital modes and this is the work of a Pirate. QSNs show to look for him on 10103 kHz on various times throughout the day (betweeb 1230 and 1830z; even as late as 0030z), 7003 kHz at 1600z and 3503 kHz between 2300-0100z. Hugo will try to get access to a linear which may be availble later. No QSLs via the bureau. QSL only direct with 2 USD/2 Euro or valid IRCs to: Bjorn Hugo Ark, Rute 504- Paulsrud, NO-2840 Reinsvoll, NORWAY.
PLEASE NOTE: Hugo will not answer any QSL requests until he returns home. He has answered some QSL requests (for his activity between November 2002 and February 10th) when he was home during his 2 week break.

A35KB QRT!. Paul Kidd, A35RK, informs OPDX that he hasn't heard Father Kevin Burke, A35KB, on the air for some time, so last week Paul telephoned him. Father Kevin told Paul he is fine and in good health. However, Father Kevin states he is very very busy with his duties as parish priest on the Island of Eua, and is no longer able to operate on the radio. He has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon, and he can no longer respond to QSL requests. Paul states, "So, if you were hoping for a contact with Father Kevin, or if you were hoping to receive his QSL card, then I'm afraid that you are simply out of luck.....he's just too busy to deal with ham radio."

A3, TONGA. Janusz, SP9FIH, informs OPDX that he will be active from here March 19th through April 14th. He does have verbal permission to operate, and his license will be given to him after arrival on the island. Activity will be on 80-10 meters including the WARC Bands on SSB. He will use 100 watts into a HF9V antenna and wire verticals. Janusz states he plans to make 12000 to 15000 QSOs. QSL Manager will be SP9FIH: P.O. Box 480, 44-100 Gliwice, Poland.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation has been approved for DXCC credit:
TT8ZZ - Activity from Chad between September 24, 2002 to November 8, 2002

FM, MARTINIQUE. Joachim Gilbert, FM5FJ, states he will be active in the CQ WPX SSB Contest as a Single-Op/Single Band (15m) entry. QSL via KU9C.

FO/M, MARQUESAS ISLAND (Update to OPDX.597). Silvano, I2YSB, informs OPDX the dates for the DXpedition to the Marquesas are April 25th to May 9th. The details on their schedule can be found on the Web page at:
http://digilander.libero.it/i2ysb
There will be 3 stations active on HF and one on 50 MHz. The beacon on 50105 MHz band will be active every hour and every half hour for 5 minutes.

Their callsign at the moment is still not yet known.

FS & VP2E, SAINT MARTIN AND ANGUILLA. Nigel, G3TXF, is planning to be active from Anguilla (VP2E) using his old callsign of VP2EN from Thursday, March 6th through Wednesday, March 12th. He was expected to be active in this past weekend's RSGB's Commonwealth Contest (March 8-9th) using 100w to a vertical antenna. During the period of Thursday, March 13th through Tuesday, March 18th, Nigel hopes to operate on a number of occasions as FS/G3TXF/p from Tintamarre Island (NA-199). These are likely to be daytime only operations from about 1400-2200z. He will try to "stick to the zeroes" (i.e.: 14030 or 14040, 18080 or 18090, 21030 or 21040, 24900 or 24910 and 28030 or 28040). Both operations will be CW only. QSL via G3TXF. For more details, visit: http://www.G3TXF.com

HB0, LIECHTENSTEIN. Pascal, F5RZJ, will be active from here as HB0/F5RZJ/p, March 15-16th. Activity will be on 80-10 meters CW/SSB. Pascal will be using only 100 watts into a HF6V antenna. QSL via his home callsign. For direct QSLing, use the following address: Pascal Sotty, Grand Champ, F-71130 Chassy, FRANCE.

HH4, HAITI (Update). The HH4 Team Haiti 2003 plans to be active from the Northwest Haiti Christian Mission about 2300z on March 10th. K3VN had to drop from the team due to work commitments, but has been replaced by another Florida DXPedition Group (FDXPG) member, Bob, HH4/K9MDO. The rest of the team is the same: Jan, HH4/K4QD; Bill/W4WX, and William/N2WB. The team plans to try to upload the logs once or twice over the next two weeks. Look for the team as a Multi-Single entry in the BARTG Contest next weekend using HH4/K4QD. Check the Team Haiti website at: http://www.geocities.com/n2wb2003/

HI3, DOMINICAN REPUBLIC. Operators Rafael/HI8ROX, HI3HCE, Carlo/HI3CCP and Teodosio/HI3TEJ will be active as HI3CCP in the CQ WPX SSB Contest (March 29-30th) as a Multi-Op/Single entry. QSL via AD4Z.

IOTA NEWS.....
AF-073. Andy, DJ7IK, informs OPDX that the planned DXpedition (Callsign TS7N) to Kerkennah Island from March 21st to April 1st has been cancelled due to the insecure political situation. Their plans now are to try again at the end of November with participation in the CQWW DX Contest. They will update this information as soon as they receive their license.

AS-043. CANCELLED. Operators Eiji/JQ1SUO, Tatsuhiko/JF1CCH and JA2HMD were expected to sign homecall/1 from Hachijo Island, March 8-9th. However, due to the bad weather airplanes will not fly to the island, so the DXpedition had to be cancelled.

AS-049. Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara Kuchino-shima, starting around 0100z on May 3rd until around 0200z on May 4th. Activity will be on 40/20/17/15/12/10 meters CW only. QSL via the JARL Bureau or direct to his home call.

AS-079. Taka, JR3TVH, will be active once again as JR3TVH/6, from Miyako Island starting around 0900z on May 1st until around 1000z on May 5th. Look for activity on 6, 10, 12, 17 and 20 meters SSB and CW. QSL via home call or the JARL QSL Bureau.

EU-012. Stewart, GM4AFF, will be active as GZ7V from Shetland during the CQWW CW Contest later this year (November 29-30th). For updates, check the Web page at: http://www.gm7v.com

EU-125. Operators Karl/LA8DW (CW) and Lars/OZ1HPS (SSB) plan to activate two islands in the Jylland West Group in the late spring. Both islands are good for the Danish Island Award. Look for them to be active from Fano Island (NS-02) and Mando Island (NS-03) using the special callsign OZ4DI (OZ4 Danish Island).

EU-187. There will be a DXpedition to Gavdos Island from June 1-10th. There was no callsign mentioned or bands/modes of activity. QSL via SV2DGH.

OC-NEW. Tom Marlowe/VK3ZZ, Peter Forbes/VK3QI, Keith Proctor/VK3FT and Jack Bramham/VK3WWW with on-shore "pilot" David McCaulay/ VK3EW will activate Waldegrave Island East (part of the South Australia State West Centre Group) from April 17-22nd. They will be using the special callsign of VI5WCP to celebrate the historical naming of the island by Mathew Flinders during his coastal exploration of March 1802. A special bicentary commemorative QSL card will be prepared to celebrate this historical event. Activity will be on all bands except 160m, both Phone and CW. QSL will be direct to VK3ZZ: P.O. Box 368, Leongatha, Victoria 3953, Australia, with a self-addressed envelope plus sufficient return postage, or, via the bureau. Direct QSL cards notconforming to the above will be returned via the bureau.

OC-142. By the time you read this, Bill Horner, VK4FW, should be active from Fraser Island. He is there to work and fix a communicational link on the island. He will be on the island until Tuesday, March 11th. However, he will be extremely busy but hopes to get a little time in for some radio operations. His activity will be mostly CW. QSL direct only with a greenstamp/IRC to: Bill Horner, PO Box 1343, Maroochydore, 4558 Australia.

OC-242. Operators YB8CR, YB8BHV, YB0KLI, YC8CPV, YB0DPO, YB8HZ, YB8HGM, YB0ECT, YB0LBK and YB0AI will be active from Latondu Island, Takabonerate, South Sulawesi, Indonesia, between March 26-31st. The callsign will be YE8A, and the QSL Manager is YB8BRI. They planned to be active on all HF bands 80-10 meters CW, SSB, SSTV, RTTY, PSK31 and AO-40 Satellite. Also, look for them to participate in the CQ WPX SSB Contest. Please visit their Web site at: http://takabonerate.aerocity.net
If you would like to be a sponsor, please open their proposal

documents on: http://takabonerate.aerocity.net/pdf/english/
Should you have any questions, please do not hesitate to
contact them at: operators@takabonerate.aerocity.net

SA-042. Luc, PY8AZT, informs OPDX that the ZY8C operation had to be rescheduled suddenly from the ARRL SSB Contest week to the CQWW WPX SSB Contest. They had two reasons to reschedule the operation. First, some of the team members had last minute business commitments and their absence would have been missed (because of their modes and skills of importance) for a successful operation. Secondly, their initial schedule was to get there some days before the ARRL SSB Contest and stay a coupled days after to not only work stateside stations but also non-USA stations. However, this was not going to happen. With the new schedule, the team will now be active for 8 days between March 27th and April 3rd. Activity in the contest will be a Multi/Single effort.

OH0, ALAND ISLANDS. Operators Claus/DF8QJ Marvin/DL2VB, Mike/DK6QW, DG1YTF and Reinhard/DL6YFB will be active as OH0/DF8QJ, OH0/DL2VB, OH0/DK6QW, OH0/DG1YTF and OH0/DL6YFB from April 19-25th. Activity will be on 80-2 meters including the WARC bands on CW/SSB/RTTY. QSL via their homecalls.

OOPPPPSSS DEPARTMENT. OPDX forgot to mention under "TM5/TO5, MARTINIQUE." that Al, F5VHJ, who was active as TM5A in last week's ARRL SSB Contest and will also be active in the upcoming CQ WPX Phone Contest, is in France. Actually, the heading should have read: "TM5/TO5, FRANCE AND MARTINIQUE." (Sorry for the confusion.)

OY, FAROE ISLANDS (LLDXT DXpedition Update). Rob, PA5ET, informs OPDX that the team has received confirmation from the Faroer Telecom Department and that the following callsigns can use:
OY7ET operator PA5ET OY7WB operator AK0A
OY7QA operator PA3FQA OY7WP operator PA3EWP
OY7TW operator GM4FDM
OY8PA for 80/160 meters, digital modes and the WPX Contest.
Their activity will take place between March 24th and April 3rd. They will have 3 stations with amps active. One will be dedicated to the digital modes. During their dark periods, they will mainly be active on 80 and 160 meters. Rob states, "You can expect lots of digital mode activity on the WARC bands, so this is your change to fill the OY gaps on all bands and modes." All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. They are currently investigating if they can make use of an Internet Cafe or local Hams to upload the logs on a daily basis. The latest information can be found soon on the LLDXT Web site at: http://www.qsl.net/lldxt

PJ2, NETHERLANDS ANTILLIES. Steve/N8BJQ and Bob/N8NR will be active from Curacao during the CQWW WPX SSB Contest (March 29-30th), as PJ2T and PJ2C, respectively. Both will probably be a Single-Op/Single Band entry (one on 10 meters and the other on 15 meters, depending on the conditions). The

operators will be on vacation there and will arrive on the island late Tuesday, March 25th, so they don't know how much operating they will do outside of the contest. Steve told OPDX, "I hopes to get a little low band and WARC band CW stuff in before the contest. I'm sure Bob will also get on a bit and do likewise." QSL both contest operations via N9AG.

QSL INFO AND NEWS.....
Hamad, 9K2HN, reports that he has uploaded the 9K2USA log to the DX.QSL.NET Web site at: http://dx.qsl.net/cgi-bin/logform.cgi?9k2usa If you have any QSL problem, please let Hamad know. He has just taken over this QSLing job from the previous QSL Manager after getting a lot of complaints. His E-mail address is: dxer@qualitynet.net

Younis, A41MA/p, was active from Suwadi Island (AS-112) over the past week. QSL via the A41 bureau or direct to home callsign: P.O. Box 1470, CPO, 111 Oman. For more information, check the Web page at: http://www.geocities.com/suwadi_island/

CY0MM QSL STATUS. OPDX has been informed that Lali, VE3NE, states, "I have received the first 5,000 cards on March 3rd. Also, the picture and video CD have arrived a couple of days ago. I already mailed the CDs and cards to our sponsors like NCDXF and others. The rest follows very soon. On Sunday afternoon (March 9th), I am expecting Nick/VE3EY, Peter/VE3NWA (He was doing the online LOG), Geo/VE3NZ, Dragan/VE3FF, Yuri/VE3DZ and maybe a couple of others to prepare the return envelopes and cards. I am hoping to answer all the direct cards in a few weeks. Please pass along this info and I hope everybody will be satisfied."

5W0IR, KH8/VK2IR, 3D2IR, J6/VK2IR and 6Y5/VK2IR QSL STATUS. Mario, DJ2MX, informs OPDX that he has finally received all the cards that have been mailed directly to Tommy's address in Australia. Due to moving to Munich (see below), Mario will be replying to these cards in April. CHANGING ADDRESS: Mario states, "I'm currently in process of moving to Munich, which is about 500 km south from here. I hope you will understand that the QSL management has to be put on hold for a few weeks. The new mailing address will be announced as soon as I settle in Munich, but all the mail sent to current address will be forwarded for next 12 months (until April 2004)."

FW8FP QSL STATUS. Bill Horner, VK4FW, reports all QSL cards received as of February 28th are now processed and in the mail.

HJ-HK QSL VOLUNTEER. William, KV4DT, informs OPDX that he is available to be a QSL Manager for any HJ-HK station that needs one. His E-mail address is: kf4wru@arrl.net
His home address is: William Brooks, P.O. Box 309, Drummonds, TN 38023.

Taka, JR3TVH/6, was active from Miyako Island (AS-079) this past weekend (expected to go QRT around 1000z on March 10th). QSL via his home callsign or JARL QSL Bureau.

J7/VP2M QSL STATUS. Rob, PA5ET, reports that he has finally received the "Caribbean Tour 2002" J7/VP2M QSL cards from the printer over the

past weekend. They will do their best to get most of the direct QSLs
in the mail before they start their next OY DXpedition in March (see
OY above). They still need quit a bit of time for their preparations,
so please be patient if you don't get your QSL in the first round
while others got theirs already!

QSL MANAGER ADDRESS CHANGE. Long time QSL Manager Kash, WB2RAJ, has
a new QTH and a new mailing address. Send all QSL requests to:
Dick "KASH" Kashdin, 4591 West Overlook Drive, Williamsville, NY 14221.
WB2RAJ is QSL Manager for EM3W, FK5DX, FK8GM, J39BW, LZ2TU (1992 ONLY),
ST2/G4OJW, ST2AA (up to February 25, 1995), ST0K, UZ3AYR and WB2RAJ/VP9.

Lee, WA7OBH, is now the QSL Manager for the following stations:
MM5PSL, GB2ELH, EI9HQ and EJ9HQ. QSL via the Bureau or direct with
a SASE or SAE and 1.00 USD.

ZY7USA QSL STATUS. Ciro, PY7ZY, informs OPDX that all the cards for
the ZY7USA operation received direct have now been answered as of
March 6th. If you don't receive your QSL within the next 10 days,
please contact Ciro at: py7zy@ig.com.br
You can see a sample of ZY7USA QSL on the following Web site at:
http://www.qsl.net/py7zy/zy7usa.htm

RE-ELECTED OFFICERS FOR 2003. Members of the Northern Ohio DX Association
have re-elected the following individuals for May 2003 through May 2004:
President : Tedd Mirgliotta, KB8NW
Vice President : Dwaine Modock, K8ME
Secretary : Ron Borkey, K8VJG
Treasurer : Mary Michaelis, N8DMM

RSGB IOTA CONTEST 2002 (Results). Justin, G4TSH, reports that the results
listings for the RSGB 2002 IOTA Contest are now available for viewing at:
http://www.rsgbhfcc.org

S0, WESTERN SAHARA. Toni, EA5RM, URE Magazine's DX Editor and EADX Bulletin
Editor, informs OPDX that almost everything is ready for the upcoming
"Sahara 2003 Dxpedition". He states to look for the first press release
to be sent out at the end of the week.

SILENT KEY. It has been reported by the Russian Robinson Newsletter that
Vladimir Lukjanchuk, RX3DQU (RRC #629), has died in the plane crash on
March 1st. As a "Robinson" member, Vladimir may be well known for his
participation and activation of several Russian Robinson Award (RRA)
Islands. OPDX and its readers would like to send out their deepest
sympathy to Vladimir's family and friends.

SOUTH AMERICAN TRIP. Dr. Rick, NE8Z, informs OPDX that from March 14-30th,
that he will be operating from various locations in Argentina, Uruguay
and Brasil with the following callsigns:
LU/NE8Z - various locations in Argentina (LU0 for WPX)
CX/NE8Z - Colonia, Uruguay (CX0 for WPX)
PY5/NE8Z - Iguazu Falls, Brasil
No specific dates were provided, but Dr. Rick will use a TS-50s with an

Outbacker TriSplit antenna. Operations will be on 40-10 meters CW (with most of the activity on WARC bands). QSL via NE8Z: Dr. Rick Dorsch, P.O. Box 616, Hamburg, MI 48139 USA.

ST, SUDAN. Look for Claudio, IV3OWC, to operate as ST2CF (not ST1C as previously announced) from March 16-31st. His activity will include an entry in the CQ WPX SSB Contest. QSL direct only via home call.

SUDAN PIRATE. Reports indicate that the QSL Manager Claudio, IV3OWC, is stating that Nobili, ST1MN, operations at this point are those of a pirate. In fact, this callsign has indeed been issued and that activity is anticipated, but the real ST1MN has no time for radio now (per IV3OWC).

VP5, TURKS AND CAICOS ISLANDS. Mike/WA2VQW and Rob/WB2NVR, members of the W2RZS Radio Club, will be active from the Providenciales (NA-002) during the CQ WPX SSB Contest as VP5RZS (contest callsign), and will be active before and after the contest as VP5/W2RZS and VP5/homecalls. They are scheduled to be there from March 27th untill April 1st. They expect to be active on 160-10 meters and possibly on 6 meters as well. There will be WARC band activity before and after the contest. QSL via their home callsigns through the bureau or direct. All cards will be answered in the manner in which they are received. Please remember to use SASE, etc....if sending direct. WB2NVR collects stamps, so overseas direct mail bearing postage stamps will be an added plus for him.

VP5, TURKS AND CAICOS ISLANDS. Operators William/KX4WW, Bruce/W4OV and Charles/W4SAA will be active as VP5WW during the CQWW WPX SSB Contest (March 29-30th) as a Multi-Single entry. Bill, KX4WW, informs OPDX that he will be there from March 24th-April 2nd. The other operators will be down there for a shorter stay. Outside of the contest, look for activity on most HF bands both CW/SSB. QSL via KX4WW.

VP6/D, DUCIE ISLAND. It seems the Ducie Island DXpedition began a little before 0001z, Sunday March 9th. The callsign they are using is VP6DIA. It was announced late last week the following suggested frequencies will be used:
CW - 1826.5, 3507 and 7007 kHz (listen up per instructions)
10102 or 10124 kHz (listen up per instructions)
14020, 18070, 21020, 24900 and 28020 kHz (listen up 9 kHz on all)

Up 9 allows other DX to transmit in the DX edge.

SSB - 3793 and 7070 kHz (listen up per instructions)
14195 kHz listening up on 14215 kHz (+), allows U.S. Generals stations to call on 14225 and up
18130 kHz listening up on 18140 kHz
21295 kHz listening up on 21305 kHz
24950 kHz listening up on 24955 kHz
28445 kHz listening up on 28455 kHz(allows U.S. Technicians to call)
RTTY - 21080 kHz listening up on 21100-21120 kHz (as a primary band as long as there is demand)
14080 kHz listening up on 14085 kHz (as a second band)

50 MHz - 50110 kHz SSB/CW on operators instruction. A beacon will be there 24 hours.
Remember to QSL via JR2KDN: Yuichi Yoshida, 4F Kato Building, 529 Rokugaike, Kita-Ku, Nagoya 462-0002, Japan. The URL address for pilot station's bulletins are at: http://www.qsl.net/aa0mz/ducie2.htm
There is also a link there to the official web site which has, among other things,the log. The official web site is at:
http://www.qsl.net/wd4ngb/ducie.htm

WARD 2003 AWARD. The "World Amateur Radio Day (WARD) 2003 Award" is devoted to commemorate the World Amateur Radio Day celebrated by the IARU on April 18th each year. The theme for the 2003 WARD is "Amateur Radio Supporting Technology Education in the Classroom". It is issued by the MK QTC - Polish Amateur's Radio Journal with PZK (Polish Amateur Radio Union) support. The WARD Award is available for at least the following number of contacts:
10 QSOs on HF bands or 5 QSOs on VHF bands. All contacts must be made on April 18th between 0000 and 2400z. A standard application form including the list of QSOs should be sent before May 31, 2003 to: Redakcja MK QTC, ul. Wielmozy 5b, 82-337 Suchacz-Zamek, Poland. The price of the WARD Award is 5 USD or 5 Euro. This is a full color award, sized 210 x 297mm. The WARD Award is available also for the same amounts of SWL reports. Any questions can be sent to: qtc@post.pl

WEB SITE AND INVITATION. Stuart, VK8NSB, President of the Darwin Amateur Radio Club, announces that their club is now online with Web pages located at: http://www.vkham.com/vk8da
The Darwin Amateur Club welcomes all visitors to the Northern Territory Australia. Their meetings are on Wednesday nights starting at 1930 local time. For more infomation, please feel free to contact Stuie at:
vk8nsb@octa4.net.au

YU8, THE STATE UNION OF SERBIA AND MONTENEGRO. Andy, 9X0A, was heard this past week signing YU8/9X0A from Kosovo. The length of his activity is unknown. He was heard on 17/12 meters 1230 and 1630z. Watch 18130, 18144 and 24964 kHz. Also, watch 20 meters CW/SSB after 0600z. QSL via UA3DX.

ZP40, PARAGUAY (Attention Prefix Hunters). Tom/ZP5AZL/ZP6Y and Jorge/CX6VM will operate from Tom's station in the CQWPX SSB Contest as a Multi/Single/ High Power entry using the special callsign as ZP40Z. QSL via W3HNK.

There isn't any decency or respect in today's rush rush society. It
starts when you are a kid, most kids today begin watching foul mouthed
and just outright corrupt drug culture on MTV, and they grow up in
that culture to be foul mouthed and have no respect.

REALITY FOLKS!!!!!!

Way too broad a statement.

It would be more accurate to say there is a widening gap between people
who are well-mannered and those who are not.

I work in a library in a small town and I see both kinds every day. Some
people (especially kids) are so good you just have to smile; others are
so bad you wonder how they grew up without parents.

Fortunately, the good ones will prevail in life and hopefully will pass
it on.

I've seen "business radios" advertised as having a 6 mile range, with an output of 2 watts. Therefore, since HT's are around 5-7 watts can I expect a range of 15-20 miles optimally?
They both tend to have "rubber duck" antennae

Any ideas??

<bite hard>

if you call progressing DOWNWARDS progress then yes

if you call a minimum of 2800 vhf-only people grabbing the easy option
and pretending to be beginners all over again progress then yes.

until the FL arrived...at least 2800 vhf-only people werent that bothered
about hf... and now look

so much for the announce in last september 2001 about the license being
for NEW BLOOD + BEGINNERS what a joke.

hmmmm perhaps someone with a 20year vhf-only license is a beginner after
all !!!

Thanks, Brian. Folks may not be aware but I have heard stories of some hams that do not want to communicate with M3s. Just some more unfortunate snobbery. Heck, things changed so much in the USA that I had a mess of figuring out what is a valid call (what with A and N prefixes added plus the changes of many prefixes of various islands - Guam comes to mind).

73 from Rochester, NY
Jim

some of these M3's have had vhf-only licences for 20 years

the M3 licence was designed to bring NEW-BLOOD into the hobby.
It was intended to bring new people in because the hobby
is said to be dying !!!

since when is 20-year-old blood NEW ?

Some!

Equally, some are new license holders. Why tar all with the same brush?

You cannot blame the M3's for what you see as an undermining of your hard earned privileges. They are taking the options open to them. You have to look at how the FL scheme was implemented in the first place. Whilst the idea was sound, elements of the execution have left a lot to be desired - hopefully these problems will be addressed as the scheme matures.

I'm not quite as paranoid as Walt, but some of his ideas regarding hidden agenda have the eerie ring of truth about them.

Yours, hiding under the stairs

Age

Doug is a poor example of a human being, and an even poorer example of a ham. He's the real traitor to ham radio. Sad, but true.

1866. Re: License Renewal

As he said, it will walk you thru it. I just went thu the process online.
It took a while, including a download, but I made it thru. And no charge.
There are instructions when you get into the FCC area, although I'd like to
re-write some of them.
Also, I too received a notice from some outfit in Texas that will process my
renewal for a "NOMINAL FEE". The ARRL does it for free. It just irks me that
someone can send out a notice like that..... But then, some hams are just
stupid.
Sincerely,
Stupid Al

I have a power supply from an old pentium computer. Is there any way I can fix it to drive a ICOM 718 (needs 13.8V, 20A max)? Finally are the power supplies that drive the ICOM radios linear or switched power supplies?

A pleasure, Jim.

I wouldn't read too much into the "stories of some hams that do not want to communicate with M3s" it is not nearly so common as comments on here would suggest. We had a few (2 as I recall) in our club that were a bit wary of the scheme when it started- one is now joining our training team (another amateur and myself are the local equivalent of the 'VEs') and the other helps out on a more casual basis. Much of the 'problem' is mis-information and prejudice.

There must be something like 3500 to 4000 newcomers to the hobby in the last 12/15 months as a result of the Foundation scheme. I don't know the national figures but locally about 25 to 30% of these are youngsters (under 16). Schools and youth groups are showing an increasing interest.

Again, while I don't have national figures, but 30% or so of our local M3s have either 'moved up' already or are waiting on the exam results for the next step. More are waiting on our running the next course- a number are already studying using the material at www.amradioinfo.co.uk

Our club ships out CD training materail for both the FL and IL and most enquiries are for the IL material (although the CD contains both).

What really seems to annoy the 'antis' is just how wrong their predictions have been.

I must be a sorry state to be in- always negative.

More Claptrap from el Culo. Would you define the following
as mindless operating:

1/ moonbounce on VHF/UHF
2/ weak signal tropo DX on VHF/UHF
3/ satellite working on VHF/UHF
4/ DX work on low bands particularly from a small garden

..and one more for you if you think operating requires no
skill: depths of winter, early morning, peak of sunspot cycle.
Which band most likely to work ZL, and where do you point the beam
(long path/short path)?

It now appears that the person known as The Anus has cracked. His/Her latest CB handle is Superior Intelligence. One would judge from that this that he/she now thinks thay are some sort of deity or supreme being.

Quote from The Anus, September 1997 uk.radio.amateur.
"The only difference between me and God (non-existent, figment of imaginations) is that God doesn't think that he is Gareth Alun Evans!!"

Six years on from this statement, after saying that there was no God, apparently The Anus now believes that he/she is God.

bell-end
death sentences of ecclesiastic courts were carried out by a bell rope
around the neck and then push the big tenor bell, (a ton or so), off of the
stop.

Perhaps that is also the origin of "give him enough rope"

Now that is what I call being in communications early on.

It would now appear that The Anus has changed his CB handle again.
This time to Vastly Superior Intelligence. Once could observe from
this, is that The Anus could be on the verge of a mental breakdown, or
even Schizophrenia.

Here is another reminder of The Anus's true I.D.

change-ringers-digest Saturday, June 12 1999 Volume 01 :
Number 005

.....

Date: Fri, 11 Jun 1999 17:40:41 +0100
From: "Gareth Alun Evans" <gareth@cemetery.demon.co.uk>
Subject: Hypocrisy of NATO (for NATO read bellringers?)
So the hypocrites (NATO supporters?) begin to whine.
Those who complain about off-topic posts are creating
off-topic posts again.
I did not, and have not done so.
What, however, I put in my signature block is my
affair, and it goes out whether I contribute to
bell ringers, ham radio, Land Rovers, electronics,
computers or railways.
May God bless you all, particularly those innocent
victims of the devil''s work of NATO

.....

Why would the hypocrite, known as The Anus say such a thing as 'May God bless you all'?? When he has admitted on many occasions that he is an Atheist.

The world of religion is the world of make-believe. Anything you wish to be true IS true! It is inappropriate, for those of us who do not join in this mental masturbation, to use concepts and words from the culture of religion because we then promote the cause of religion... Gareth Alun Evans Sept. 1994

> all !!!

They're a beginner on HF though, which as we know is so much harder than
VHF that it needs an extra test (sarcasm). Argue with that one then -
a) needs extra test, so they are a beginner
b) doesn't need extra test
either way I'm happy... you're WRONG as usual

Reading his drivel over the past months leads me to believe he has
already had a mental breakdown. As for Schizophrenia, given the number
of 'personalities' (sic) that he uses on a daily basis in this group,
I think the question has already been answered.

He is a prime example of why Maggie T's "Care in the community"
policies were an abject failure :)

It's around the corner.....

http://users.adelphia.net/~k3vr/disc1_frm.htm

CERTIFIED MAIL 7001 2510 0004 8162 4980

Date: 8 March 2003

To: Vincent F. Kajunski, District Director,
Federal Communications Commission, Boston

cc: John Ashcroft, United States Attorney General
Department of Justice, Washington, D.C.

Subjects: o Freedom of Information Act Request

o Formal Request for Criminal Investigations
(via copy to the Department of Justice)

o Formal response to Commission letter dated
4 March 2003 (File EB-03-BS-004)

Dear Mr. Kajunski:

Your letter regarding amateur radio license K1MAN dated 4 March 2003 references another Commission letter to K1MAN dated 29 January 2002. Your 4 March 2003 letter states:

"Commission monitoring information and numerous complaints filed with the Commission indicate that the problems outlined in January 2002 have not been corrected......"

This is a formal Freedom of Information Act Request for all information, monitoring, and communications of any kind, both internal and external, regarding K1MAN and including but not limited to: all notes, all complaints, all letters, all E-mails, all information, notes and any transcripts or tapes of all telephone calls, all internal memos, and all other information whatsoever regarding K1MAN.

Secondly, please provide all information regarding the three FCC Notices of Apparent Liability issued to K1MAN, the status of each, and specifically, the status and action taken on the Appeal to the full Commission, sitting en banc, of the first Notice of Apparent Liability and Notice of Forfeiture issued to K1MAN.

Third, numerous Felony Complaint Affidavits have been filed with the

U.S. Attorney regarding criminal interference to K1MAN radio transmissions which were then forwarded to the Commission. Please supply all information, notes, internal memos, and other documents of every kind with regard to the status of these formal criminal charges so filed under the authority of the right to petition the government for a redress of grievances provision in the First Amendment to the United States Constitution which states:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or the press; or of the right of the people to peaceably assemble, AND TO PETITION THE GOVERNMENT FOR A REDRESS OF GRIEVANCES."

I remind you that failure to act on these formal criminal charges by any and all individuals of the Commission is, itself, a felony under Sections 333 and 501 of the 1934 Communications Act:

Section 333: "No person shall willfully or maliciously interfere with or cause interference to any radio communications or any station licensed or authorized by or under this Act operated by the United States Government."

Section 501: "Any person who willfully and knowingly does or causes or suffers to be done any act, matter or thing, in this Act prohibited or declared to be unlawful, or WHO WILLINGLY OR KNOWINGLY OMITS OR FAILS TO DO ANY ACT MATTER OR THING IN THIS ACT REQUIRED TO BE DONE, OR WILLINGLY OR KNOWINGLY CAUSES OR SUFFERS SUCH OMISSION OR FAILURE, shall, upon conviction thereof, be punished for such offense, for which no penalty (other than a forfeiture) is provided by this Act, by a fine of not more than $10,000 or by imprisonment for a term not exceeding two years, or both."

Also, Please advise me as to the status of my formal Complaint Affidavit sent to the Commission via Certified Mail 7099 3400 0015 4631 8444, addressed to Darryl E. Duckworth, NN0W, and dated 7 February 2003.

Fourth. Since 1991, I have experienced numerous similar and very serious irregularities with Certified Mail sent to the Commission both in Washington, D.C. and Gettysburg. I am now preparing a detailed complaint for the Postal Inspector with regard to requesting a

criminal investigation of this, and I am asking other radio amateurs experiencing similar examples of FCC failure to follow U.S. Postal Service procedures, via the K1MAN bulletin service, to come forward and join in this criminal complaint.

Again, I hereby give you fair WARNING, that this letter constitutes a formal Freedom of Information Act Request.

* * * * * * * * * * * * * * * *

Now, to your entitled request for information as specified in your letter of 4 March 2003, IT IS TOTALLY INACCURATE AND FATALLY FLAWED. Amateur Radio Station K1MAN has ALWAYS BEEN OPERATED IN TOTAL AND FULLCOMPLIANCE WITH ALL FCC RULES, FEDERAL LAWS, STATE LAWS, AND ALL OTHERAPPLICABLE LAWS AS WELL AS LEGAL AND CIVIL REQUIREMENTS:

5. There has always been a control operator at the control point.

6. To date, there has been no requirement for K1MAN to keep a log, and therefore, a response to a, b, and c of your letter cannot be made with the legal accuracy as required by Section 308(b).

7. All transmissions have been of direct interest to the Amateur radio Service.

8. No transmissions have ever been made to the general public.

9. No transmissions have EVER been made to cause deliberate interference to other radio signals or to prevent others from using a frequency.

10. All FCC rules, state laws, federal laws, and other legal and civil requirements have always been fully and completely complied with.

11. Regarding your references to my felony complaint affidavits regarding criminal interference to K1MAN transmissions, the First Amendment to the United States Constitution (see above) to petition the government guarantees my right to file such documents and the
right to freedom of speech and freedom of the press guarantees my rights to publish to anyone and everyone I desire anything I want

CERTIFIED MAIL 7001 2510 0004 8162 4980
Date: 8 March 2003
Page 4

regarding same.

12. I remind you that slander is defined in Webster's New Collegiate Dictionary as "A false report, maliciously uttered, and tending to injure the reputation of another." No slander has EVER been
transmitted over station K1MAN. Any alleged "slander" transmitted over K1MAN would be subject to civil litigation, of course, and is not in the jurisdiction of the Commission.

13. No references of a pecuniary interest have EVER been transmitted over K1MAN or directed to the www.K1MAN.com web site. You are reminded that FCC rules allow ordering of pizza via amateur radio as
well as "talk ins" to a ham fest where admission is charged, other than amateur radio equipment is sold, and yet not considered to be a pecuniary interest under FCC rules since such are considered to be "incidental" effects of routine amateur radio communications.

14. No donation requests of a pecuniary interest have ever been transmitted over K1MAN.

Finally, per your entitled request, weekly reports on d, e, f, g, h, i, j,
and k will be filed by E-mail with the Commission starting with
transmissions from K1MAN beginning 17 March 2003.

Thank you in advance for you full and complete compliance with this formal
Freedom of Information Request.

Sincerely,

(signed)

Glenn A. Baxter, P.P., K1MAN
Registered Professional Engineer

I PREDICT BAXTER is not long for the ham radio.....

My new tow vehicle ('03 Silverado 2500HD LT Duramax/Allison) came equipped with Bose XM Satellite radio. In the literature it makes some vague warning about damage from radio transmitters. I suspect this might just be some lawyers CYA boilerplate, but wonder if any of the gathered multitude have run XM radio and UHF/VHF ham radio in their vehicles?

K1MAN is COMPLETELY out of his tree.

He can get away with this kind of goofy ham radio crap
since he allegeded inherited a couple $$$ Millions
from his relatives and is an alleged shareholder in
Baxter Medical Instruments Corp - or so the rumors go.

He is, by all sense of the word, the classic archtype eccentric millionaire
with convoluted thought patterns having no basis whatsoever
in reality. He is Ham Radio's answer to Michael Jackson - complete
with his very own "Never-NeverLand" Compound, way up there in frozen
ice-bound-7-Months-out-of the-Year Belgrade Lakes Maine.

While we are on the topic of Maine, how would you like
to have some eye-opening fun...? Call up the toll-free
Maine State Dept of Tourism and ask em' for a free Maine
travel brochure package. When U get it you'll be amazed to see that
8 out of every 10 photos of the various Hotels and
Inns and Campgrounds features a photo of an in-ground
swimming pool, complete with cute (caucasian...grin) kids
in bathing suits running around, and mom & dad on the
lounge chairs poolside getting themselves a suntan...
Yeah right!! Perhaps for 8 weeks in the "Summer" before
Maine goes back into their normal "Little Ice Age" wx pattern!
I was up there once in June and it went down one
night to 38�F - Just what I needed in my bermuda shorts and
Harley Davidson of Indy cotton tee shirt. All kidding aside
we did have a great time, but Maine's Wx is just one step above
Nome AK !

Oh well, perhaps K1MAN should start a ham radio theme
parkjust like M.J. did too ?? Can you imagine for a
minute, ferris wheels with 6L6 vacuum tube shaped gondolas
and bumper-cars shaped like R-390A's! Then he can
run the place just like Michael Jackson does his.......nah!!
Better not give him any more kooky ideas....

:) :) :) :)

"The scientist. He will spend thirty years in building up
a mountain range of facts with the intent to prove a
certain theory; then he is so happy in his achievement
that as a rule he overlooks the main chief fact
of all--that his accumulation proves an entirely different thing..."

- Mark Twain

Why not have your local club send in your 610 Form and donate $5 to them instead.

hmmmmmm

would someone like to confirm that the speccy was a z80 ??

which was also 8bit like the 6502 and the 6800 ???

Yes. There was a later Sinclair machine (the QL I think) that was 68000 as I
recall.

Sinclair also did the MK14, based on the National Semi SC/MP

>
> which was also 8bit like the 6502 and the 6800 ???

Z80 was 8 bit- but more akin to the 8080

There was also the Z8000 which was 16 bit.

so MEFIX first of all says dont-knock-the-speccy

and then says he never cared much for z80's

but is a big fan of 8-bit machines

perhaps neverchucked would like to come up with logic to hold true for
the above ?

perhaps he also doesnt have any BSX-1 or BSX-2 tnc's ?
Tiny-2's ?? (they were/are z80 too ??)

Almost correct; the QL used a 68008, which was functionally identical to the
68000 but had an 8-bit data bus (presumably the CPU's A0 signal was made
available and the /UDS and /LDS signals were dumped, I dunno.)

There is more to the choice of a uP than whether it has 8, 16, 32 or
whatever accumulator.

Some 8 bit uPs have a 8 bit accummulator but other 16 bit useable registers.
Some have one a number of registers that can be used like accumulators
rather than using the accumalator and memory in operations (some times known
as 'register based archecture'- although I'm not sure that was an 'official'
name). The 1802 was (or is, it may well still be in production as it had
some other features of interest) like this- 16 x16bit resisters, most if not
all useable in 8 bit sections.)

So, not all 8 bit uPs are equal so he could be a fan of SOME 8 bit machines
but not the Z80.

Beyond 'the number of bits', different uPs have 'better' instruction sets
for, say, bit manipulation and this may be deemed 'better' for I/O
interfacing etc.

Stir in matters like assembler (or other software tools) features and you
can easily find people who swear by the z80, 6502, 6502, 6100 (a real rare
12 bit beast with a PDP instruction set). I've heard SW type argue over the
Z80 and the National N800 which, other than one instruction, were otherwise
identical instruction set wise, as I recall.

Often as not it is comes down to familarity.

The BSX 2 (been there, built that etc) & Tiny-2 certainly are but not sure
on the BSX1 but I suspect it is.

My experience with the Z80 and 6502 was that, despite the Z80 having a wider
range of instructions and more flexible addressing modes, I could almost
always write 6502 code which occupied less space and ran faster than the
equivalent Z80 code, despite the Z80 clock frequency being from two to three
times higher - hence my preference for the 65xx devices.
So, what's your view on 8-bit microprocessors? Do you resent these nasty
transistorised things, believing that a "_REAL_" CPU must be built using
valves, core memory and a Hollerith tape machine? ;O)

Sometime during Mon, 10 Mar 2003 22:14:15 -0000 Anno Domini. In article
<b4j2nr$20f7ar$1@ID-140397.news.dfncis.de>, Brian Reay just about
managed to type out using one finger, the following spiel into
uk.radio.amateur

>
> Yes. There was a later Sinclair machine (the QL I think) that was 68000 as I
> recall.

The QL was actually 68008. A sort of slower cut down 68000. Can run all
the 68000 code but it only has an 8 bit data bus, unlike the 16 bit bus
of the 68000.

Fair enough. I don't recall ever being involved with a 68000- sort jumped to
the 68020 which was the uP of choice for a certain aeroplane.

You a softy then Mefix?

The 68020 is a very nice processor but when it was released (and for many
years after) it was very expensive, so many people opted to stick with the
68000 which was becoming more and more affordable by that point (the 68010
never caught on.)
What sort of aeroplane utilised the 68020 (if you can't say, I'll settle for
knowing whether it was a military or civilian aircraft)? What was the role
of the CPU?
I believe that 680x0 microcontrollers are being used in things like washing
machines now, which seems like a waste of computing power to me. :o(

I remember the Acorn machines, my first introduction to the joys of assembly
language programming - cobbling together simple things like this:

LDX #0
.loop
LDA text,X
BEQ done
JSR &FFEE
```

```
INX
BNE loop
.done
RTS
.text
EQUS "A _REAL_ Radio Ham would build his own 6502 out of old Russian valves"
EQUB &A
EQUB &D
EQUB &0
```

Then I went on to the Amiga and learned 68000 code, which proved useful when I went to uni as I was able to do 68000 work for clueless computer science students in exchange for, let's call it "assistance", with my maths work. :) Ahh, things aren't the same now. :^(

1904. License Renewal

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-11 02:12:48 UTC
From: Christopher Schmitt <cschmitt@kc.rr.com>
Message-ID: <ACbba.858$Tk.44016@twister.rdc-kc.rr.com>
Source record: 68499

My tech license expires next month and I would like to renew. What is the process for doing this? Can I renew through the FCC ULS website? Do I have to take any exams?

I use my license for flying RC aircraft primarily and a little 2m HT action. If I have to take an exam I'll just bone up and get a general class ticket and maybe one day exlore HF a bit more.

Thanks,
Chris

Especially about a no-code novice test. No such thing. Novice is no longer available and they had to pass the same code test that the extras have to today ;) BTW, there are a number of truckers (I've talked to a few) that have their tickets. Glad to have 'em aboard! BTW, if you can locate one, the HTX-10 10 meter Rat Shack transceiver is on sale for $69.99. 25 watts ssb, 25 watts FM, and 7 watts am.

73 from Rochester, NY

W5YI, one of the major VECs, is the one in Texas that will do it for a fee.

ARRL will do it for free for members only. They will do it for non-members
for a fee.

You can do it yourself for free.

It's not necessarily stupid people who are willing to pay for a service that
they could perform themselves. To some people, it's worth paying someone
else to go to the time and effort to perform the service.

If you renew before it expires, you don't have to retest. There is also a two year grace period for renewal where you would not have to retest if it does happen to expire. However if you let it expire, you cannot operate until you get it renewed. If you wait longer than the grace period, then you must retest for the license.

!!You should know all this from studying for your original tech license!!

You can renew directly on line through the FCC website. Before you can process the renewal, you must register in CORES. For detailed directions go to www.arrl.org and print them out. Have those printed directions with you while you go through the renewal process.

I can't say anything specific about satellite radio, but the warning itself appears to be on most newer vehicles (regardless of the devices installed). For example, my Explorer had the same warning, with a recommendation to have radio equipment professionally installed. Of course, in this town, I don't know of anyone I would consider a professional when it comes to installing communications equipment in a vehicle - including those who installed the local police and fire departments' communications equipment. As a result, I do it myself (and I haven't killed anything on any vehicle yet).

> knowing whether it was a military or civilian aircraft)? What was the role
> of the CPU?

Don't really want to go into that- although I'm sure a look on the web would tell you. The example I was thinking of is military.

The thing to remember is that there is much more to uP choice that bits and clock speed. The availability of a decent SW tool set, suitable test hosts (so you can test SW without target hardware), expected availability of the part over the life of the product (a log time for an aircraft), availability of the uP (and specialist support chips) in suitable packaging, environmental spec, and the stability of the underlying designs (uP makers often 'tweak' the design of the dies and thus not all uPs of the same type are the same). In some applications- especailly where the software is subject to certification- this could require a repeat of the certification process (which is not cheap). That is just a few of the considerations.

Sometimes, the 'system intergrator' (generally the a/c maker) will specify a uP that must be used across the a/c systems (eg avionic and mission systems). This includes the choice, and even the configuration, of the SW tool set, inc configuration control tools, compiler version, ...even the version of the operating system on the machines that host the tool set.

Exceptions are made- but usually for existing 'Line Replaceable Units' that he doesn't expect to have to modify and that tend to have a fairly standard function. Examples might be the Inertial Nav system and, possibly, the Air Data Computer.

As regards where the 68020 (or other uP these days- esp a PowerPC) may be used, I am only prepared to talk generally.

As an example, consider a generic military a/c with flight control and mission systems.

The flight control system (assuming a 'fly by wire' a/c) will have 3 or 4 'lanes' that provide a level of redundancy and selfchecking. Each lane in the flight control computer would have a uP. The other items on the flight control system- like the AHRS (Attitude and Heading Reference System- which provides data on a/c body rates and accelerations) would also have a uP. Also, the IN system, airdata computer etc. In some some a/c have the lanes

are different in design- different uP, different SW, ... even
different teams- the aim being to minimise systematic design errors.

On the mission side, the main Mission Computer will have a least one uP,
possibly others if some high demand functions are added (usually for pilot
awareness- a digital map, collision avoidance systems etc.) Generally you
would expect a revisionary mission computer- sometimes combined with another
function such as a display management computer. Again this will have uPs
and, in the case of a display computer especially, will often have two
'lanes' so, in the event of failure, not all the mission displays are lost
(mission displays are those other than the primary flight instruments).

Assuming the a/c has a Head Up Display system, this will often have its over
electrioncs unit, again with a uP (or more). This function can be quite
demanding uP wise- needing a high through put (to update the HUD) and
'manage' the display with symbol queing etc.

If you also have a Helmet Mounted Display System, you can assume another box
of tricks similar to that used for the HUD.

You also have the 'Stores Management System'- which is a nice name for the
bit that controls anthing that leaves the a/c while in flight (aux. fuel
tanks, missiles, gun / cannon firing, bombs etc). As you would expect, a
SMS tends to have an archecture that offers redundancy and protection in the
event of a failure, so several uPs will often be employed.

They are the main areas where you might expect a common uP to be either
mandated or at least preferred.

Horses for courses- if the solution is cost effective them does it matter.
Many, if not all, mobile phones have a stripped done version of a real time
operating systems in them, like LynxOS or VxWorks.

The truckers that use ham rigs around here have them clipped, and run
down just below and above the legal CB band, and some run 24-25 MHZ.

The rigs of choice for them were:

Yaesu Ft-757
Kenwood 440
Icom 735,

Then it was

Kenwood ts450's
Kenwood TS 50's, but they complained about the "splash"!

Now it seems like the Icom 706X is the rig of choice. I get to hear
these guys in the background due to how close to the interstate I am.

So what! Truckers aren't bothering anyone running above
and below CB or even running on 24 & 25 mhz. Only you
hams work yourselves up into a dither over it. You hams think
you own the entire radio spectrum!

>
> Bobby Joe

I beg to differ. For example, USAF Auxiliary (CAP) operates on 26 MHZ.
Military and govern-
ment stations on both 25, 26, and 27 MHZ. Twenty four Megahertz from
24.930 (approx) to
24.990 is a ham band so designated by world agreement. Ten meters is also a
ham band (28-29.7
MHZ)--again by international agreement. I have to say this, but it is true:
Most CBers haven't
a clue when it comes to reasons WHY things are set up the way they are.
Except for a minority
with a bit of training, most CBers/truckers buy a rig, set up the thing to
"swang" as if that helps
anything, put in a trashy, splattering "leenyar" and start jabbering
away--completely clueless and
oblivious to the WHY the thing nor how their actions affect others. And
the BIG REDDIO boys
don't care--just as they can feel adequate or fool themselves into thinking
they are a BIG man be-
cause they can splatter over the next truck 100 yards away.

Like it or not, the regulations are set up just for this reason. To allow
everyone to just yap any one
pleases would render the spectrum useless. And the climate for enforcement
has changed (read
the rainreport for March 7th). One gentleman, and quite a few others, have
found that so-called
"freebanding" doesn't pay. Those other users that you *think* aren't being
hurt by your being out-
side frequencies allowed for CB, are complaining loudly. The enforcement
honcho at FCC has
made hams and others aware that FCC HAS received additional funding, and Mr
Hollingsworth
IS using the money to go after the truckers who are using those "export"
radios as well as users.
According to Mr. H. as recently as this last Saturday. you can count hearing

about some major
truck chains getting hit with some BIG fines. There may be some other
surprise visits by agents
at weight scales. I can't make anyone believe this, but these are just the
facts. The legitimate
users of licensed frequencies are just not going to put up with interference
from bandits.
If you have time to search the archives in the rainreport, you can the
steady increase in citations
over the last year. One driver got fired (Cheetah Transportation). This
last reporting period,
one gentleman got warned for operating on 25 MHZ. He was a ham, too. Now
he may get his
license pulled because he *thought* that he wouldn't hurt anything; after
all, those frequencies are
"empty", right? As far as the truckers operating on 10 Meters, it is not a
good idea to do that
either. Many hams, angry at the intrusions, are listening closely to trucks
and turning them in.
Usually what happens, a trucker sees an odd ham antenna and gives the ham
"ol' holler, thar".
The ham, who *may* be listening, uses a min-tape recorder, writes down the
tag numbers,
company name, and tractor info, and sends it to Mr. Hollingsworth. With the
correct info (
for which the FCC has asked hams to incliude), they WILL send a warning
letter. If you
continue to operate out-of-band, then it can get VERY expensive! Like $10,
000, seizure
of equipment, or prison time (Just ask "Rabbit Ears" in Florida who refused
to stop. In the
case of a trucker who gets such a letter, you will wonder how you got caught
because the
ham will likely not respond since voice operation is not legal below 28.300
MHZ.

As to wanting *all* the spectrum, well, we have quite bit of it. But have
you ever wondered
WHY that is and why CB has so little? Think about it. And besides, hams DO
"own" the
spectrum; they I N V E N T E D it!!

Time? 5 minutes (at most) every 10 years. Oh how precious!
Effort? Much less effort than having to re-test.

If someone could afford to go to the trouble of getting licensed in the first
place (testing and all that), they certain can make the time to renew. Anyone
who can't see that lacks common sense and probably deserves to have their
license expire anyway.

Is this thread meant to be a joke?

Not at all. We don't own all the spectrum and recognize that fact.
Unfortunately, you seem to think YOU own all the spectrum. You *don't*.
There are many avenues which are legitimate. Truckers can enjoy CB, they
can enjoy low-band VHF, high-band VHF, UHF, and amateur. Except for CB and
MURS, all require a license.

73 from Rochester, NY
Jim
(and here comes another 'ding' from frontiernet for multiple postings.)

Yeah, right, nobody else is using those bands, sure, uh-huh . . .

> hams work yourselves up into a dither over it. You hams think
> you own the entire radio spectrum!

You must own a CB shop (CB shop = lot lizard with a soldering iron).

Well, sure, otherwise nobody will listen to them.

I've always been curious about the echo radios. How much extra do they
pay so that they can sound like they're shouting into a toilet bowl?

Not really, just the band of frequencies that are assigned to ham radio.

I'll make ya a deal.....stay off of 10 meters until you get your ham
license, and you can do whatever you want......Deal?

No, it is idiots like you who think you own the entire radio spectrum and can purchase a radio and operate anywhere you please with total disregard for any rules or any other service you may be interfering with. The hams aren't the only ones in a dither over it, the FCC is too, as evident by the stepped up enforcement that is causing a lot of headaches for some of your trucking 10-4 gud buddies, and you are going to see more.

Don't lump some hams with all hams, the vast majority of us could care
less what you people do with your radios. If you're operating
illegally it's 100% between you and the FCC. UNTIL you jump into a ham
band. Then it is our business we will "get involved".

And THAT is exactly, Jim, as you know, why the regs are set up the way they
are.
Instead of it being the hams causing most of the interference to adjacent
bands, it is
usually the militant CBers who want everything, "'Far in the war'" (fire
in the wire).
Loud 'n Proud, Treetop Tall thar, mercy me thar, gre't day'. Thank goodness
some

> Is this thread meant to be a joke?

It takes more than 5 minutes if you've never done it before.

On line, the first time you have to register in CORES and then register in the ULS and only after that is done can you go about renewing your license. The FCC site is poorly laid out and what appears to be the right route to navigate to the necessary pages sometimes ends up going totally astray.

If people are willing to pay for convenience, it's their business.

Dee Flint, N8UZE.

<Look for V.I.S on the internet (Van Iderstein I think his name is) He used
to sell the texas bug-
catchers for Henry Allen. You should be able to find these things from the
"generic" dealers, too.
These are the guys you see at hamfests with the little plastic bins with
connectors, ferrules, and
the like. If you can't find any, or can't wait for a local hamfest, go to a
bolt dealer, get some
3/8 X 24" stainless machine bolts and cut the heads off. I've done this
before.

Jerry, I'll grant that the frequencies near 10 meters are not the most popular and are not heavily used. The rules exist for a reason - obviously, we drive on the right side of the road. Now and again we read in the paper of kids that were racing (or whatever) on what appeared to be a deserted road at night (no one is using it) and an accident happens. Of course this is different than 'borrowing' frequencies, but the rules exist so we can all enjoy sharing the spectrum. Folks forget that it is far more than CB, amateur, and a few frequencies between 25 and 30 MHz. Television, radio, cellphones, heart monitors, and much much more depend upon rational sharing of the spectrum. That is what it is truly about.

73 from Rochester, NY
Jim

I hope not. I have heard some of these turkeys on HF aviation
frequencies and even on Search and Rescue frequencies. So don't
encourage them to do whatever they want, one of these days someone will
die because of them.

Since I know you're reading this news group Roger, I'm letting you
know that the proof you claimed didn't exist is now on the Cobb County
Criminal Cases web site.

It is at

http://www.cobbgasupctclk.com/scripts/courtscr.dll/CriminalByName

and all you have to do is to type in "obrien" (without the quotes) and
go to the second page of the series. W4AMP and WA3SEX are *so*
important that they have two entries each on that page. W4AMP is
charged with aggravated stalking - a felony.

Maybe AMP and SEX will finally learn to leave the Arsics family alone
from now on.

Now aren't you glad that you helped AMP stalk, you fscking low life?
The wheels of justice grind slowly but they do keep turning.

I pray to God that you're next.

Jail would be too good for that low life piece of feces. Curtains boy should be
tried for stalking along with his cohorts.

I've run ham radios in my vehicles for many years and haven't "smoked" anything yet and don't expect I ever will. I've never run XM and there's another thing: I don't want/won't run XM!

I just have the lowly 2003 1500 2WD Silverado 5.3L LS extended cab with only the 3.42 rear gears and so far like it better than any pu I've ever owned.

Very interesting, but what does that have to do with anything but C-64?
Why the other items in the title when they are unrelated?

Thank,

I have a 5/25W 144Mhz ICOM transciever in our motorhome along with a Pioneer XM radio. When I key the mic the digital radio gets confused and stops playing Waiting a while or a power off/on cycle brings the XM radio back to life. Since it's difficult to listen to both at the same time I have not tried to find a cure. The two antennas are about three feet apart and the radios about a foot and a half apart. Both are on the same 12V source.

Bill, I am sure that MANY hazardous items are shipped
on a daily basis by people and business alike. I knew a
guy once who shipped mercury-containing items for
2 months and never got pinched. (He packed them to
withstand shock and they made it 100% intact to the customer)
He labeled the box as: "dishware china - handle with great care"

"If you want to hide a tree, put it in a forrest"
- unknown

Those dang ex Commies.....Can you believe it....a RU0 jumped right on top of the boy broadcaster and called CQ. Worked all kinds of stations. And when the MAN faded away I worked him too.

Do I go to jail along with Yuri? Or should I just call the MAN and ask him for mercy????

Dan/W4NTI

Except you didn't post WHERE you got your "info" from, of course,
trying to post that rather large FATASS of yours onto the newsgroups
would be rather impossible, Georgie Girl. Now get back to your two way
reach around with Whorass. You fucking IDIOT. You have NO CREDIBLITY.
But since your life has always been such a struggle out of the sewer,
you're almost down to your last flush and you're swirling around and
around. Do you still make that monkey faced wife of yours trick down at
the Marietta truckstops?

That's only because people can't read nor type. The last time I was there (for an address change - something as simple as a renewal), it took me less than 5 minutes.

On that I agree - if people want to pay for something that's otherwise free, let them.

P.T. Barnum was wrong: It's more like every second! :-)

Ok another question for you guys who have been around awhile:

When a net control station says to a check-in, "Break with you...."
and then goes on to the next station what does that mean?
Does it mean they are going to eat bread (as in "break bread") later?

Rick

> of you that DONT.

An "export" radio is not a CB radio, Dan. And there is often potential harm in it - these highly modified radios are notorious for causing interference to neighborhood televisions, telephones, other radio equipment, and other electronics. And every instance of interference has the potential to directly impact ham radio operators - it creates another person opposed to radios (all radios) in the neighborhood.

I certainly do not want people using unauthorized equipment in my neighborhood. In addition to the potential interference with items in my home, the use (or acceptance of use) of unauthorized equipment says a lot about the character of the individual - perhaps illustrated by the "outlaw" mentality so pervasive in the CB community today. Whatever the case, "bad boys" in one thing are likely to be "bad boys" in other aspects of life (work, social activities, relationships, the neighborhood, etc).

Further, these highly modified radios often interfere with other CB'ers on nearby frequencies (channels) - reducing the number of usable CB frequencies, which encourages still more to move their communications outside the allocated CB frequencies to frequencies perhaps assigned to other radio services.

Message-ID: <O11ca.6434$jZ1.354@news1.west.cox.net>
Source record: 68418

On the off chance you are serious!
Every discipline has its own jargon; truckers (granny lane), tennis (love), sailors (fid), cowboys (doggies). So to the "undisciplined" - "They talk funny".

However "check in" is to respond to a net control to affirm that one is present. Ham radio is for the most part half duplex -- I talk - you listen then vice versa., hence "Over". So special instructions are needed. So break with you means "I am finished with this station temporarily and will now communicate with another".

BTW full duplex - both talk and listen at same time -- a telephone, or cellphone, but not FRS or CB radio.
However Hams can do full duplex -- usually using different frequencies and multiband radios.

If you want to read more on Ham Jargon -- see URL:
http://ac6v.com/jargon.htm

Break with you

1979. Cost of using commercial repeater?

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-13 16:11:41 UTC
From: Toscano <toscano2@ix.netcom.com>
Message-ID: <b4q0f1$j1$1@slb1.atl.mindspring.net>
Source record: 68416

A non-ham neighbor of mine has asked me to look into "renting" space on a commercial repeater that is owned locally. He'd be using it very infrequently for a small tow business (one base, three mobiles) and is looking into a 461MHz business band repeater.
Anyone have an idea what it would cost to "rent" use of such a repeater? I will eventually be helping him with every step of the process but for now we are trying to prepare for the financial cost.

Source record: 68428

The closest store I can think of is Ham Radio Outlet in Salem, NH - about 40 miles North of Boston. Get out of Boston on I-93 heading north and take the second exit after entering NH (exit 2). Turn right at the bottom of the ramp, go to the center of town (rt. 28) and turn left. Go up Rt. 28 a couple of miles and HRO is in a plaza on the right. You can visit their webpage at http://www.hamradio.com

Disclaimer: I'm not affiliated with HRO, I am just a customer...

This is a good news - bad news situation. The good news is that he can spend all of his time he wants playing games. The people at the FCC and other places are being paid to answer any appropriate requests, so he isn't hasling them, just normal work. The bad news is the rest of us taxpayers pay for this crap. I looked on QRZ and his license has been looked up 6,792 times. I don't know what the record it, but this far excedes any I have seen.

1990. PA-SitRep - PA Amateurs Radio Volunteers Wanted

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-14 14:17:43 UTC
From: kb3fxi@yahoo.com
Message-ID: <3e71e444.998268937@news.verizon.net>
Source record: 68435
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (45)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 550 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists.

In addition to providing the situation reports for our
own emergency alert lists, the eventual long-term goal
of PA-SitRep is to provide rapid emergency situation
reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for the National
Weather Service.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-nospamsitrep.com
(remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

>a range of 15-20 miles optimally?
>They both tend to have "rubber duck" antennae
>
>

well, it depends on line of sight. i live at 600' average height above
terrain. with my HT i easily hit the W3FRC repeater about 35 miles
distant using 5W output. with the HT on my hip, i hit the local
repeater about 15 miles away. your mileage may vary.

Using a 6m ham stick? Hmmm .. probably *high*. Just a guess. :-)

Or he can borry an MFJ-259-type analyzer and guess a lot closer.

And then he can install a pair of 40m 'sticks and see even *more* improvement.
:-)

This is *exactly* what you said Dan.

Also...is it not just "so grand" when proof of your
prior statements is so cordially provided...?

:) :) :) :) :)

ps: What is Donnie doing for a living?
He is on 14.313 every single day. This boy ain't working.
I was home with a flu last week and set up an old IC-735 in the bedroom
with an extension cable to the antenna tap
downstairs to listen-in. I mean 14.313 anymore is
almost like going to an Agway Sales Presentation or
Seventh Day Adventist meeting anymore...
It's CULT-ISH ! sheesh, listenin to it gave me the heebie-jeebees!

Donnie is a piece of crap. But thats my opinion. He claims he has a lawn mowing biz. Reality is he lives with his mother and that started after he was busted for stealing Mary Jane from a federal reserve....Really.

He is a world class trouble maker and thats his total life. I may be wrong, but that is what he has said in the past.

YOU TO BUY IT

2002. N5QXX/R: The New Orleans linked repeater that isn't

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-15 14:00:53 UTC
From: sparkr@pavillage.net
Message-ID: <577654515751.135A729F38A@pavillage.net>
Source record: 68447
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,neworleans.general

Down there in New Orleans, they brag about N5QXX as the longest echo linked repeater. The real truth is that it isn't.

Oh yes, if you take a look in the repeater section of Echolink, you'll find N5QXX all right, but you won't be able to link to it. Instead, you'll get an "access denied" message, because only a small number of people are allowed to use it.

So why is it on Echolink at all? Your guess is as good as mine, although I tend to lean toward the explanation that the club wants bragging rights without having to actually perform as do other linked repeaters.

What a bunch of morons. They should be cut off from Echolink.

> Is there a faq repository for this newsgroup?

There used to be a FAQ for this news group, but it hasn't been
published in news.answers since 1995. Use the URL

http://groups.google.com/groups?q=g:thl2871930494d&dq=&hl=en&lr=&ie=UTF-8&selm=ham-radio-faq-3-793433522%40oes.amdahl.com

as a starting point (it should be entered all on one line), and then
take a look at the complete thread to get the old rec.radio.amateur
misc FAQ. Frankly, that particular FAQ is outdated and of little real
use. Usenet has changed a great deal since 1995 due to the large
influx of new Internet users, the growth of the web, and to the
commercialization of the Internet backbone. Even the news groups
news.answers and rec.answers have ceased publishing posting
guidelines, although you can still find some fairly recent FAQs at
ftp://rtfm.mit.edu:/pub/faqs/news/posting-rules.

During 2000, one group of amateur radio mentors declared itself to be
out of business because of the changed character of the Internet (see
ftp://rtfm.mit.edu:/pub/faqs/radio/ham-radio/elmers/README), and made
special mention of the increasing problem of email spam directed at
Usenet participants.

In short, you should look to the web for your answers these days.

If it's a U.S. ham license you are considering, the most useful FAQ I
have found is at http://www.arrl.org/hamradio.html. It is a friendly,
easily-understood FAQ, and will get you off to an excellent start.

Prospective U.K. licensees will find an equivalent set of pages at
http://www.rsgb.org.uk/beginners/index.htm

2005. Re: Equipment for Sale or Trade

Can't figure Angelfire out. It says that my page is using excessive bandwith, however out of the 1 gig I'm allowed they report that I'm using 67%. My apologies to those who attempted to access my page but couldn't get through. Here's some of what I offer for trade:

1. A Yaesu FTH-2070 dual band public safety HT and rapid charger, very good condition. $200.00

2. Motorola MPD 48 channel VHF HT, good condition, with battery and antenna, on ham and PS channels, $75.00

3. Pair of Radio Shack BTX-128 UHF HT's, new in boxes, $40.00

4. Pair of Motorola HT-440 HT's, UHF 2 channel, on a business repeater channel and simplex. Radios will talk to each other on simplex. Have one drop in charger, 2 extra batteries, and an HT-90 (same radio, different front cover) for parts. $50.00

5. GE "Scorpion" UHF HT, 16 channel, drop in charger and two extra batteries. On business and FRS channels. Good condition $100.00

6, Several volunteer fire lights, headlight flashers and strobes, misc radio gear, GMRS HT, frequency counter, ham/cb power, swr, mod meter.

Want ham equipment such as a dual band mobile or HT,
HF trans, general coverage HF receiver, or
Small VHF hi band HT, Low band (39 and 46 MHz) mobile or HT, or ????
Make me an offer.

>Usenet participants.

That would be me. More precisely, I decided to retire from maintaining the Amateur Radio Elmers Resource Directory. I presume that the Elmers themselves still wanted to continue. I thought (and still do think) that Elmering on the Internet is worthwhile, it's just that the Directory (and by extension, the web site supporting it) needed to be more automated and spam-proof. I did not feel at the time (nor do I now) that I would be able to have the time, energy, or even web site development skills, to get the Directory to that state.

However, I now have a third successor (yes, the first two didn't work out) who is working on just such an overhaul. I don't want to promise anything at this point, because I have been burned twice before. Let me not say anything more predictive than "watch this space soon."

Mr. Glenn Baxter was the recipient of yet another warning letter. The letter was issued by the Boston FCC office, and was issued on March 4th, 2003. But I want to see a copy of it. The ARRL webpage or Rainreport makes no mention of the letter. But my friend K3VR, e-mailed me a response the Baxter did issue, dated March 8th: (My comments are in parenthesis)

CERTIFIED MAIL 7001 2510 0004 8162 4980

Date: 8 March 2003

To: Vincent F. Kajunski, District Director,
Federal Communications Commission, Boston

cc: John Ashcroft, United States Attorney General (why shoudl Ashcroft care?)
Department of Justice, Washington, D.C.

Subjects: o Freedom of Information Act Request

o Formal Request for Criminal Investigations
(via copy to the Department of Justice)

o Formal response to Commission letter dated
4 March 2003 (File EB-03-BS-004)

Dear Mr. Kajunski:

Your letter regarding amateur radio license K1MAN dated 4 March 2003 references another Commission letter to K1MAN dated 29 January 2002. Your 4 March 2003 letter states:

"Commission monitoring information and numerous complaints filed with the Commission indicate that the problems outlined in January 2002 have not been corrected....."

This is a formal Freedom of Information Act Request for all information, monitoring, and communications of any kind, both internal and external, regarding K1MAN and including but not limited to: all notes, all complaints, all letters, all E-mails, all information, notes and any transcripts or tapes of all telephone calls, all internal memos, and all other information whatsoever regarding K1MAN.

Secondly, please provide all information regarding the three FCC Notices of Apparent Liability issued to K1MAN, the status of each, and specifically, the status and action taken on the Appeal to the full Commission, sitting en banc, of the first Notice of Apparent Liability and Notice of Forfeiture issued to K1MAN.

Third, numerous Felony Complaint Affidavits have been filed with the

CERTIFIED MAIL 7001 2510 0004 8162 4980
Date: 8 March 2003
Page 2

U.S. Attorney regarding criminal interference to K1MAN radio transmissions which were then forwarded to the Commission. Please supply all information, notes, internal memos, and other documents of every kind with regard to the status of these formal criminal charges
so filed under the authority of the right to petition the government for a redress of grievances provision in the First Amendment to the United States Constitution which states:

(Cry me a river, Glenn)

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or the press; or of the right of the people to peaceably assemble, AND TO PETITION THE GOVERNMENT FOR A REDRESS OF GRIEVANCES."

I remind you that failure to act on these formal criminal charges by any and all individuals of the Commission is, itself, a felony under Sections 333 and 501 of the 1934 Communications Act:

Section 333: "No person shall willfully or maliciously interfere with or cause interference to any radio communications or any station licensed or authorized by or under this Act operated by the United States Government."

Section 501: "Any person who willfully and knowingly does or causes or suffers to be done any act, matter or thing, in this Act prohibited or declared to be unlawful, or WHO WILLINGLY OR KNOWINGLY OMITS OR FAILS TO DO ANY ACT MATTER OR THING IN THIS ACT REQUIRED TO BE DONE, OR WILLINGLY OR KNOWINGLY CAUSES OR SUFFERS SUCH OMISSION OR FAILURE, shall, upon conviction thereof, be punished for such offense, for which no penalty (other than a forfeiture) is provided by this Act, by a fine of not more than $10,000 or by imprisonment for a term not exceeding two years, or both."

(Yeah, Yeah, Yeah)

Also, Please advise me as to the status of my formal Complaint Affidavit sent to the Commission via Certified Mail 7099 3400 0015 4631 8444, addressed to Darryl E. Duckworth, NN0W, and dated 7 February 2003.

Fourth. Since 1991, I have experienced numerous similar and very serious irregularities with Certified Mail sent to the Commission both in Washington, D.C. and Gettysburg. I am now preparing a detailed complaint for the Postal Inspector with regard to requesting a

CERTIFIED MAIL 7001 2510 0004 8162 4980
Date: 8 March 2003
Page 3

criminal investigation of this, and I am asking other radio amateurs experiencing similar examples of FCC failure to follow U.S. Postal Service

procedures, via the K1MAN bulletin service, to come forward and join in this criminal complaint.

Again, I hereby give you fair WARNING, that this letter constitutes a formal Freedom of Information Act Request.

* * * * * * * * * * * * * * * *

Now, to your entitled request for information as specified in your letter of 4 March 2003, IT IS TOTALLY INACCURATE AND FATALLY FLAWED. Amateur Radio Station K1MAN has ALWAYS BEEN OPERATED IN TOTAL AND FULLCOMPLIANCE WITH ALL FCC RULES, FEDERAL LAWS, STATE LAWS, AND ALL OTHERAPPLICABLE LAWS AS WELL AS LEGAL AND CIVIL REQUIREMENTS:

5. There has always been a control operator at the control point.

6. To date, there has been no requirement for K1MAN to keep a log, and therefore, a response to a, b, and c of your letter cannot be made with the legal accuracy as required by Section 308(b).

7. All transmissions have been of direct interest to the Amateur radio Service.

8. No transmissions have ever been made to the general public.

9. No transmissions have EVER been made to cause deliberate interference to other radio signals or to prevent others from using a frequency.

10. All FCC rules, state laws, federal laws, and other legal and civil requirements have always been fully and completely complied with.

11. Regarding your references to my felony complaint affidavits regarding criminal interference to K1MAN transmissions, the First Amendment to the United States Constitution (see above) to petition the government guarantees my right to file such documents and the
right to freedom of speech and freedom of the press guarantees my rights to publish to anyone and everyone I desire anything I want

CERTIFIED MAIL 7001 2510 0004 8162 4980
Date: 8 March 2003
Page 4

regarding same.

12. I remind you that slander is defined in Webster's New Collegiate Dictionary as "A false report, maliciously uttered, and tending to injure the reputation of another." No slander has EVER been
transmitted over station K1MAN. Any alleged "slander" transmitted over K1MAN would be subject to civil litigation, of course, and is not in the jurisdiction of the Commission.

13. No references of a pecuniary interest have EVER been transmitted over K1MAN or directed to the www.K1MAN.com web site. You are reminded that FCC rules allow ordering of pizza via amateur radio as
well as "talk ins" to a ham fest where admission is charged, other than

amateur radio equipment is sold, and yet not considered to be a pecuniary interest under FCC rules since such are considered to be "incidental" effects of routine amateur radio communications.

14. No donation requests of a pecuniary interest have ever been transmitted over K1MAN.

Finally, per your entitled request, weekly reports on d, e, f, g, h, i, j, and k will be filed by E-mail with the Commission starting with transmissions from K1MAN beginning 17 March 2003.

Thank you in advance for you full and complete compliance with this formal Freedom of Information Request.

Sincerely,

(signed)

Glenn A. Baxter, P.P., K1MAN (what's a P. P.??)
Registered Professional Engineer

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th/March, through Sunday, 16th/March there were 237 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T31, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP5, VP6, VP6/d, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4W, EAST TIMOR. ARNewsline reports that Peter McKay, G3WQU, who has been active for a couple of years as CN2PM and S07PM from Morocco and the Western

Sahara, will be moving to East Timor at the end of March. He operates almost exclusively CW. Look for him operating with a "4W" prefix from his next QTH.

5R8 PIRATE. Phil Whitchurch, G3SWH, informs OPDX:"I am sorry to report that Albert's, 5R8GZ, call is being pirated on 80 and 160 metres. Albert does not operate on these bands at all as he has no suitable antennas."

9M2, WEST MALAYSIA (IOTA Op). Dr. Keith Kerr, GM4YXI, is expected to be back in 9M2-land this week. As always, he will try to activate various islands. Firm plans thus far include AS-046, Pulau Tioman, with Rich, 9M2/G4ZFE. Keith will be active on SSB as 9M2/GM4YXI and Rich, 9M2/G4ZFE, will be on CW. Activity will be on 20/17/15/12/10 meters using verticals and 100 watts (possibly 400 watts on one station). Watch the usual IOTA frequencies (+/- QRM). QSL the 9M2/GM4YXI contacts via Steve, N3SL. Steve states it is possible/probable he will have those logs on an on-going basis. Keith will E-mails logs almost daily to Steve, N3SL, so QSLs should be available immediately. QSL the 9M2/G4ZFE contacts via Rick's home callsign. Also, they are planning on operating from the club station, 9M2RPN, during the CQ WPX Contest as a Multi-2 entry. Ian, G3TMA, will join them during their contest activity. QSL the contest operation via 9M2RPN.

A3, TONGA (Update to OPDX.599). By the time you read this, the German team should be active as A35XM. Operators are Irina/DL8DYL, Reinhard/DL8YRM, Thomas/DL5LYM, Wolfgang/DL4WG and Ralf/DL9DRA. They will be active on CW, SSB and RTTY. Also, their main focus will be on Europe, the WARC Bands and RTTY. QSL via DL8YRM, via the bureau or direct. E-mail requests for bureau cards can be sent to: dl8yrm@darc.de
They now have a Web page for this operation at: http://www.df3cb.com/a35xm

C9, MOZAMBIQUE. Max/IZ4DPV and Filippo/IK4ZHH, inform OPDX that they will be active from Maputo and Beira, April 20th through May 4th. Their C93 licenses have been obtained, but they will not release their callsigns until on the air or few days before starting. Activity will be on 80-10 meters including the WARC Bands on SSB, CW (RTTY ?). Their will probably be activity on 6 meters. They will use 100 watts into a TH7 antenna and wire verticals. QSL will be via direct CBA or bureau (no QSL via E-mail or eQSL). Further info later...

D2, ANGOLA. Joao, CT1BFL, is expected to be active as D2U until February 2004. There has been NO QSNs reported yet, but his planned activity will be on 160-10 meters CW/SSB. QSL via CT1BFL.

FM, MARTINIQUE. Bernard, F5LBG, will be active for one month starting on March 13th from Martinique Island (IOTA NA-107 and DIFO MN-001), as FM/F5LBG. Activity will be on 80-6 meters CW. QSL via his home callsign, bureau or direct (+postage) to: DAUVIER Bernard, 20 Chemin des Mottes, F26760 Beaumont les Valence, FRANCE.

HC8, GALAPAGOS ISLANDS. Diego, LU8ADX, will be active as HC8/LU8ADX from March 24-31st. Activity will be on SSB and possibly RTTY. He will join the team of N5KO, OH0XX, K5KA, XE1KK, KI7WX and NM5M to be active in the

CQ WPX Phone Contest as HC8N.

IOTA AND USI ACTIVATION. John, WA4JA, will activate Shell Island, IOTA NA-085 (now FL Group, Bay County) and USI FL401S for one day between April 7-11th. The day for the boat trip depends on the WX. Activity will be on 20-10 meters near the IOTA and USI frequencies. Also, he will try to operate from Okaloosa Island (NA-142 and FL003S) during the same week, mostly on 10 meters SSB. QSL to WA4JA, direct (PSE SASE). DX stations with Bureaus will be QSLed via the bureau automatically.

IOTA NEWS.....
AF-018. Operator Giuseppe/IT9BLB and an International team will activate Pantelleria Island as IH9P in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. QSL via KR7X.

AS-008. Look for members of the Kitagawa ARC (JH1ZHU) to be active from Izu Island. Possible callsigns to be used are JH1ZHU/1 or members homecall/1. Activity will take place between March 21-23rd, on 80-6 meters CW/SSB. QSL via JH1ZHU or to the participating operator's home call.

AS-017. Nobu, JQ1EYN, will be active as JQ1EYN/6 from Komaka Island from April 27-28th. He plans to be active on 80-6 meters SSB and CW. Visit the Web site for more details at: http://www.chinenmarine.co.jp/local/komaka.htm QSL via the JARL Bureau or direct to his home call.

AS-105. Members of the "Korea AnSung DX Club" will activate Chebu Island betweeb April 4-6th as D70HL/2. Activity will be on 80/40/30/20/17/15/12/10/2 meters CW/SSB/RTTY. They will have an arsenal of equipment and antennas as follows: Transceivers - TS-870S(100W), TS-570S(100W), 145BASE(50W) Antennas - 80m (DP/GP), 40m (LOOP/GP), 30m (DP/GP), 20m (LOOP/GP), 17m (DP/GP), 15m (3 ele. YAGI/GP), 12m (4 ele. YAGI/GP), 10m (3ELE YAGI/GP), 2m (GP), 3 ele. YAGI (40/17/15/10m), LOOP (40/20m home-made), 7000+ (HF all band), 4 ele. YAGI (12m homemade), and BRAVO.CO WARC+ (80/30/17/12m).

EU-170. Feco, 9A/HA8KW, will activate the Island of Prvic (CI-094) on July 24-31st. He will use an IC-745 radio with a vertical and wire antennas. He will participate in the IOTA Contest (in the limited, 12-hour section) as 9A/HA8KW.

EU-187. Giannis, SV2FPU/8, reports that the "Radio Amateur Union of Northern Greece DX Foundation Team" will be on the air from Gaydos Isle using the special callsign SX9G. Please visit the following Web page: http://www.qsl.net/sx9g

OC-201. You should still have a few days to work Steve, G4EDG, from Waiheke Island as ZL1/G4EDG. His operation started on March 14th and is expected to last for 4-5 days. Activity will be

on 20 meters QRP CW only (best time for EU is around 0600z).
QSL via his home call.

OC-237. Operators Rivai/YB2MTA and his friend Pri/YC2CJQ will activate Panjang Island from a lighthouse (LH 0479). They will be using the callsigns homecall/P from Friday through Sunday, March 28-30th. Activity is expected to only be on 15 meters. On Friday, they will try to work PSK31 and CW. Then on Saturday, they will enter the CQ WPX Contest. QSL both callsigns via EA7FTR: Francisco Lianez, Asturias 23, 21110 Huelva, SPAIN.

J5, GUINEA-BISSAU (IOTA Op). Simone, IV3NVN, is now active as J5UCW from a new IOTA, Pecixe Island (AF-093), until about March 22nd were he will return to the mainland. Once back on the mainland, he will be active as J5UDX again until April 2nd. He will try to be active on 160 meters. QSL J5UCW and J5UDX via IV3NVN: Simone Candotto, P.O. Box 4, 33050 Castions di Strada - UD, Italy.

JW, SVALBARD. Members of the LA8G-group (Radioamatorklubben P35) will be active from Longyearbyen, Svalbard, this spring. They will also be active as JW8G during the CQ WPX SSB Contest. Their callsigns used outside of the contest will be JW3JJA (Martin), JW9IY (Bjorn) and JW9GY (Morten). QSL to their home callsigns and QSL JW8G via LA9GY: Morten Antonsen, Hallsetreina 6, N-7027 Trondheim, Norway. Please notice that 1 USD will not cover the postage fee to countries outside of Europe. For more info, please check the following Web page at: http://www.qsl.net/la8g

KH3, JOHNSTON ISLAND. Bert, V73GOD, is once again going back to Johnston on a short term work assignment between March 18-20th. Look for him during his freetime hours. If the KJ6BZ club station building is still standing, he will operate as KJ6BZ. Otherwise, look for him to sign KH3/WH7USA.

P4, ARUBA. Andy, AE6Y, will be operating as P40Y from Aruba from March 22-30th. His activity will included an entry in the CQ WPX SSB Contest. QSL to AE6Y.

P4, ARUBA. John, KK9A, will be active from here between March 22nd and April 5th, from the Iguana Villa < http://www.iguanavilla.com >. He will be active as P40A in the CQWW WPX SSB Contest (March 29-30th). His operating class for the contest is not known. QSL via WD9DZV.

PHILIPPINES PIRATE. Sasi, 9V1SM, informs OPDX that there have been some pirate operations from the Phillipine. Be on the lookout for a station signing as DX1ABC claiming to be on IOTA OC-128. He has also tried to check into SEANET. Sasi states, "A few of us in this region including the SEANET net controllers Roy/DU9/G4UNL, Karl/3W2XK and myself (9V1SM) have been breaking into his QSOs and announcing that he is a pirate. It may be impossible for us to keep a constant watch and urge DX stations not to work anyone signing in with this callsign. More information about this operation can be looked up at QRZ.COM under the call sign DX1ABC. I thought it would be nice to warn the Dx community and discourage all

pirate operations on the amateur radio bands. It is really terrible in this part of the world."

PX5, BRAZIL (Attention Prefix Hunters!). Sergio, PP5JR, will be active as PX5E during the CQ WPX SSB Contest as a Single-Op/Single Band (15m)/ High Power entry.

QSL INFO AND NEWS.....
C53M/C56R QSL STATUS. Juha, OH9MM, reports that all C53M and C56R direct cards have now been mailed. The last bunch of cards will leave Finland on Monday 17th (today). Due to some problems, the orginal schelude was delayed for a couple of weeks. During the process, they had also changed their QSL Manager. Juha, OH9MM, will take care of all C53M and C56R QSLs. They state that they should have all the cards from OH3RM, so no need to resend your card! If you have any problems with your QSLs send an E-mail to: oh9mm@sral.fi
The C53M/C56R Web site will be activate in the future at: http://www.qsl.net/c53m
They will try to do their best with the QSLs! Already about 70% of the bureau QSLs have been done...

Mike, W2GR, informs OPDX that he is now the QSL Manager for Daniel, HK3AXY, for past and future QSOs. Mike will be accepting direct cards to his CBA with the usual SASE,SAE/GS/IRC for return. However, since the Bureau is working fine in Colombia....BUREAU cards should be sent to HK3AXY via the HK3 BUREAU. Daniel will answer these as they come in. Mike is taking on the direct cards only for him as his mail is usually pilfered, and he has no idea how much mail ends up missing, stolen etc... W2GR's address is: Mike Benjamin, 1064 99th Street, Niagara Falls, NY 14304 USA.

HK QSL BUREAU SAVE! During the Colombian IARU Society (the LCRA) meeting last Saturday, March 8th, the members agreed not to dissolve the association. So the HK Bureau service will still continue to operate 100%.

QSL STATUS OF THE CARIBBEAN TOUR 2002 - J7/VP2M. Rob, PA5ET reports that about 75% of all direct QSLs are mailed, the remaining 25% will be sent out in the coming week. Here are some QSL notes from Rob:
- As of today, only new type IRC's are accepted (and they need to have a stamp on it)
- Only U.S. Dollars or Euro's are excepted currencies
- QSLs without SASE will be treated as bureau cards
- SASE without address on it will be treated as bureau cards
- U.S. envelopes, put USA on the SASE, there are other countries in the world!
- Don't send Rob registered letters without prior e-mail, they will be returned because he doesn't collect them from the post office
- Inquiries about the status of all LLDXT DX-peditions can be found on the LLDXT web-site at: http://www.qsl.net/lldxt
- Use envelopes which don't fall in parts
- Please use RECENT stamps because Rob collects them

- If you send Dutch stamps don't stick them on the envelope but put them separate in the envelope

Ron, PJ7/ND5S, reports that over 5500 contacts were made during his recent stay on Dutch St.Maarten. He reports that all direct request QSLs have been answered. Any QSLs received without means for return will be sent via the BURO. QSL direct via homecall or BURO. A trip summary can be seen on < http://www.qsl.net/nd5s/index.html > then select St.Martin Update.

QSL Manager Vasilij, RW6HS, informs OPDX that he is now the manager for UK8GDW, UN8LA, UN8LWZ and UP9L.

Bill Horner, VK4FW, was active as VK4FW/p from Fraser Island (OC-142) for only a few days last week. He mentions that conditions to EU were poor, and he only worked just over 400 stations. QSL via direct ONLY to: Bill Horner, P.O. Box 1343, Maroochydore, 4558 Australia. He will QSL immediately.

R1, FRANZ JOSEF LAND. You still have a few more days to work operators Valery/RD3AF, Valery/RX3DU and Victor/UA3AKO as R1FJ. They are expected to go QRT on March 19th. Activity will be on 160-10 meters CW/SSB/RTTY. QSL via DL6ZFG using the information from QRZ.ru.
Also, visit the Web page at: http://qrz.ru/webnews/?id=1249

SPECIAL EVENT. ARNewsline reports that the Balkan Contest Club (LZ1KZA) will operate with the special event callsign LZ125O through March 31st. This is to commemorate the 125th anniversary of the liberation of Bulgaria. Activity will be on CW, SSB and RTTY on all the HF bands.

ST, SUDAN (Operation Cancelled!). Gerben, PA5NT, informs OPDX that his March 16th trip to the Sudan has been cancelled (no details provided); thus there will be no ST2X activity this time. He did mention; however, that the ST2X QSL cards (for his past operation) are expected to arrive soon from the printer.

T8, PALAU. Toshiyuki "Tosy" Moriyama, JA6VZB (T88JA and ex-KC6VW), states, "I am planning the KC6SZ 160m QRV 20m anniversary and honeymoon DXpedition." He also states he stopped operating on 160m from T8 during 1997, but now he wants to restart it again. Tosy hopes to be active from the beach of the Peleliu Island (OC-009) because there is less QRN compared with Koror, the main island of T8. His equipment will be an ICOM IC-756 Pro and a JRL-2000F running 1200W input. The antenna will be an inverted "L" on the beach. Tosy mentions, "To protect the peace of my home, the operation is limited to 160m only." Activity will take place between March 19-22nd. QSL information is as follows: Toshiyuki MORIYAMA, 10-101 Karaku-en, 5-53-62 Hanazono, Kumamoto-city 860-0072, Japan. All logs will be uploaded to: http://www.eqsl.cc
Also, all QSLs will be submitted to the bureau (A.S.A.P.).

TI5, COSTA RICA. Phil, N0KE, informs OPDX that he, William/N0ZA, William/ TI2WGO and Carlos/TI5KD will be active as TI5N in the CQ WPX SSB Contest as a Multi-Multi/High Power entry from TI5KD's station. Look for TI5/N0KE

and TI5/N0ZA before and after the contest. Some RTTY operation is anticipated. QSL TI5N via W3HNK. The other callsigns are via their home callsign.

V6 & V7, MICRONESIA AND MARSHALL ISLANDS (IOTA Ops). Jeffrey, KI0RO, informs OPDX that he will be active from Roi-Namur (IOTA OC-028) as V73/KI0RO from March 23-28th. Activity will be on 40-10 meters CW/SSB. From March 30th-April 2nd, Jeffrey will be active from Kosrae (IOTA OC-059) as V63JE. Activity will be on 40-10 meters CW/SSB. From April 4-7th, Jeffrey will be active from Pohnpei (IOTA OC-010) as V63JE. Activity will be on 40-10 meters CW/SSB. He will also operate on WARC bands from all locations too. This is NOT a DXpedition.... He will operate as time permits. All QSLs via KI0RO.

V7, MARSHALL ISLANDS. Neil, WD8CRT, is now active as WD8CRT/V73 on Kwajalein Atoll of the Marshall Islands until an unknown date. He is currently awaiting for the applied callsign of V73NS. Over the past week he was active on CW only. Look for his activty to take place after 1200z and around 0000z to 0300z. He will be around 14029 kHz and on the 10/15/30 meter bands when they are open (watch 10116, 21004 and 28021 kHz). Bob, WB8B, informs OPDX that if Neil is working split, he will be on the air for some time. However, if you hear him working stations on the same frequency, it's just a visit to the shack for a short period of time. Bob also mentions that there are some 80/160 meter antennas there that Neil has not tuned up yet, and he will be setting up a "flat top fed" antenna with ladder line. QSL via the address on QRZ.com: WD8CRT/V73, Box 8341, APO, AP 96557 (Or via the V73 Bureau).

VK9X, CHRISTMAS ISLAND (Update to OPDX.596). Steve, VK3OT (ex-VE3SIX), who will be active from Christmas Island (OC-002) as VK9XI between April 7-21st, informs OPDX that he will have on-line logs for his VK9XI operation. The log's URL address will be at: http://www.qsl.net/vk4cp/vk9xi/logbook.htm For more up-to-date details and information, please visit the Web page at: http://members.datafast.net.au/electronics/path.htm

VP2E, ANGUILLA. Sheila/N5HGB, Gordon/N5AU and Ray/KC5EA will be active as VP2E during the CQ WPX Contest as a Multi-Single entry. They will operate on SSB and CW, no digital modes or WARC bands. Also, Gordon, N5AU, informs OPDX that the VP2E contest station is a permanent station/house on the hilltop overlooking Shoal Bay East. The hill is about 200 feet above sea level. The VP2E station is equipped with radios for each band 160-10 meters and is designed for "Multi-Multi" contesting. VP2E radios are all Yaesu FT-1000MP MK5s with KW amps. Antennas are on 6 Rohn towers (mostly 55G) ranging from 90 feet to 200 feet:
10 meters is 7 over 7 stacked M2 yagis
15 meters is 5 over 5 over 5 stacked Telrex yagis
20 meters is a 4L M2 yagi and a 5L Telrex yagi
40 meters is a 3L M2 yagi (the full-size beast) and a
2L shorty Cushcraft yagi
80 meters is a rotary Force 12 dipole at 200 feet with assorted
wire antennas on TX and beverages on RX

160 meters is a full-size elevated GP vertical on TX with
beverages on RX.

VP6/D, DUCIE ISLAND. The second operation to Ducie is now history and in the books. Operators of VP6DIA left the island around 2100z on March 13th. Last report all of the operators are doing fine and should be on their way home. Remember to QSL VP6DIA to JR2KDN.

XY, MYANMAR (Possible New IOTA). Frank, DL4KQ, informs OPDX that he will stay again in Myanmar between April 1-15th. He will spend 2 days at Yangoon; possible operation times there are April 2-4th. From April 6-14th, he will stay at Chaungtha; coastside Bay of Bengal/Indian Ocean. During his stay at Chaungtha there will be a 4 day operation from the Yangon/Irrawaddy/Pegu Region Group (AS-NEW). The exact date will depend on the local situation. His activity will be SSB/CW with 400 watts into a G5RV`s, several verticals, on 80-10 meters including the WARC Bands, and perhaps he will monitor 6 meters with a 2nd rig. Callsign is currently still unknown. QSL via DL4KQ, direct or bureau. Look for updated information on the Web page at: http://www.dx-pedition.de

YK, SYRIA. Saad, N5FF, informs OPDX that he plans to visit and operate from Syria again next month. His current and tentative plan is to leave for Damascus on Friday, April 11th, and arrive there on Sunday, April 13th. Saad plans to have the same simple setup as last year, bare foot into a short G5RV. This setup worked surprisingly well last year, so he hopes to get similar results this time also. Saad expects to be active from April 15-27th, give or take a day or two, and possibly extend his stay for a few more days up to one week. His callsign will be YK1BA. QSL via N5FF, direct or Bureau is OK. The purpose of the trip is not ham radio, so his operating will be very spotty and not extensive at all. Like last year, Saad hopes to be able to operate at least 3-4 hours a day. He thinks he will limit his operating to 20 meters, unless the propagation is better on the other bands (40-10 meters) at the time. Saad will work the Americas and Pacific early mornings local time, that's between 0100-0400z. Europe and Africa will be in the late evenings, that's between 1900-2200z, and possibly some afternoons, that's 1100-1400z. Saad will try to be around 14195 kHz on SSB, and 14045 kHz on CW, split listening 5-10 kHz up.

YS & HU1, EL SALVADOR. Operators Holger/DL7IO, Birgit/DL7IQ and Cisco/YS1CF will be active from various mountains, lakes, beaches, and ruins of El Salvador between March 24th and April 15th. They will be using YS1/homecall from the San Salvador area. There will be an entry in the CQ WPX SSB Contest using the special call HU1M. Activity will be on all bands 80-10 meters CW, SSB, RTTY and SSTV. They will also be active from Meanguera Island (NA-190) as YS3/homecall and from El Tigre (NA-060) as HR4/homecall. QSLs for all activities go via DK7AO.

ZL1AMO AIR AMBUKANCE FUND. Judy, AA7UC, informs OPDX that INDEXA has reached its goal of collecting 20,000 USD (40,000 NZD) for the "ZL1AMO Air Ambulance Fund"! They are also pleased to announce that INDEXA absorbed all administrative costs so that 100% of each donation went directly to the Fund. Judy also states the following, "Please express the gratitude

of INDEXA, ZL1AMO, and the Wright family to your subscribers. As always, in a time of great need, they and so many others in the DX/amateur radio community rose to the occasion in order to provide humanitarian assistance to a colleague in need. The camaraderie and fellowship that goes beyond the nuts and bolts of the hobby is what makes amateur radio truly unique!"

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

2029. Ham Licencing.

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-16 23:50:14 UTC
From: dubhghall@aol.comOGT
Message-ID: <20030316185014.28866.00000076@mb-fz.aol.com>
Source record: 68474

I have heard, in recient months. that there have been some serious changes to the licencing laws, allowing just about anybody to use 2 meter, etc, without a licence.

Is this true, and have any objections been raised?

2030. Re: Ham Licencing.

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-17 00:40:30 UTC

Not on Amateur Radio 2 Meters. Perhaps you are thinking of FRS and GMRS
radio.

FRS - see http://wireless.fcc.gov/services/personal/family/

GMRS - see http://wireless.fcc.gov/services/personal/generalmobile/

The requirements for 2M Amateur Radio are at URL:
http://www.arrl.org/FandES/ead/classes.html
No Morse code required for some license classes, but written exams must be
taken.

Don't feel bad... the Wavehawk has to be in the top 5 of the hardest radios to operate of all time. Hard to believe Sony would even market such a beast...

Hopefully you'll get a good price. They are getting rather scarce.

THE NEW REVISED AMERICAN NATIONAL ANTHEM:
Sung to the tune of 'when your happy and you know it, clap your hands'

If You're Happy And You Know It - Bomb Iraq
If you cannot find bin laden, bomb Iraq.
If the terrorists are frisky,
Pakistan is looking shifty,
North Korea is too risky,
Bomb Iraq.

If we have no allies with us, bomb Iraq.
If we think that someone's dissed us, bomb Iraq.
So to hell with the inspections,
Let's look tough for the elections,
Close your mind and take directions,
Bomb Iraq.

It's pre-emptive non-aggression, bomb Iraq.
To prevent this mass destruction, bomb Iraq.
They've got weapons we can't see,
And that's all the proof we need,
If they're not there, they must be,
Bomb Iraq.

If you were lucky to be elected, bomb Iraq.
If your mood is quite dejected, bomb Iraq.
If you think Saddam's gone mad,
With the weapons that he had,
And he flicked the bird your dad,
Bomb Iraq.

Fall in line and follow orders, bomb Iraq.
For our might knows not our borders, bomb Iraq.
Disagree? We'll call it treason,
Let's make war not love this season,
Even if we have no reason,
Bomb Iraq.

The French have oil contracts galore - FROM IRAQ
The Russians are owed 8 billion dollars - FROM IRAQ
Tony Blair is quite a friend,
3000 Cruise Missiles we will send,
Saddams tyranny is about to end
Bomb Iraq

:)
IF THEY TAKE AWAY YOUR SCANNER BOMB SAUDIA ARABIA, NO WAIT..... WHO'S NEXT?

Yep. There are many interesting messages to read in these newsgroups, most from people who are a real pleasure to talk to. But, at the same time, there are messages which leave one wondering if the writer has the intelligence of a gecko. That message was the latter.

Everyone knows however that MAN is 2 cans short of a 6-pack.
Wonder if he'll send his famous "communications jump teams" to
Baghdad after GWB bombe's the shi+ out of it..? ;)

boy you are way off ....
now if I want my wife to shoot with me she *has* to buy a gun of her own.
And I can never sell the gun (unless they have a way to defeat the
fingerprint scan .... but that would sell better in the black market than it
would in a pawn shop.)
Basically this is bullsh#t for legal gun owners to put up with and criminals
to still break the law.
(by the way get me one of those AK47's in a 5.56 cal. the rest of the
country wants $1K for them legally .....)

Scenerio: Gun purchased for self-defense..

You have a burgler in your house... You go for the gun... He starts shooting at you... You try to to shoot him in self-defense... Oh, shit, it won't fire! Batteries are dead... It can't scan your finger print let alone activate the firing laser... Ain't that a bitch!

PH

P.S. It can be programed to recognise more than one person. I like the part about storing the owner(s)'s personal information in the chip, along with the micro camera that takes a picture every time the gun is fired... Sounds like a bunch of shit to me!

Hey if you don't like it - Bomb iraq.
If you can't find Osama bomb iraq.
If you can't find the weapons of mass destruction - bomb Iraq
If you can't find the Anthrax mailer bomb Iraq.
If you can't stop the hijackers in time, bomb Iraq.
If people get wise to you moving the "threat index" up and down like it
means something, bomb iraq!

But you were going to bomb Iraq all along anyway so nevermind!!!!!

I think george bush was going to bomb Iraq anyway even if 9-11 hadn't
happened. -
He hired all the old gulf war personnel! What did people expect was going
to happen???

DUH. DOH!!! DUH!!!

9-11 just helped him out, even if he can't actually make the case that
Sadaam has something to do with 9-11.
No one buys that argument.

SO he has to rely on calling people un-american!!!

I like the one where Colon says "We can't go on looking for Weopons of Mass
Desruction forever and not finding anything - therefore we need to bomb
iraq"!!!! hahahah what a joke!

DOH.

At least we're not listening to the SAME republicans go after clinton - what
an embarrassment they are!

Sort of? Well, I guess there is "sort of" intelligence in almost any
living thing. However, I doubt the gecko is right up there on the
intelligence ladder. But, I'll admit I've never given one an intelligence
test, so you're probably right - I should give the gecko the benefit of
doubt when comparing them to others the way I did.

(1) HP-7475A Pen Plotter, like new with all
documentation. Best offer.

(2) HP-5300A Measuring System w/5304A Plug-in
Timer/Counter. Frequency to 10MHz, Time
intervals to 500ns. Exc. Cond. with
manuals. $50.

(3) Kenwood TR-2500 2Meter FM HT. Exc. Cond.,but
needs new battery. With manual. $75.

(4) ICOM IC-2SAT, 2 Meter FM HT. Exc. Cond.,but
needs new battery. With manual. $90.

(5) Heathkit IM-5217 Solid State (Analog)
AC/DC volt/Ohm Meter with 4-1/2 inch meter.
Just like new, with manual. $25.

(6) ACDC Electronics Model 24N4.8 DC Power Supply.
120 vac input, 24VDC @ 4.8 amp. output. $25.

Call Bob at (425)392-9744 or email:
bobgellert2@attbi.com
I live near Seattle.

You liberals continue to amaze me. Dont confuse me with the facts, Ill just make up some and spin the rest. Is this your motto? Well it should be.

First off the job of the inspectors was not to find weapons. Its purpose was to determine if the Iraqi regiem was in compliance with the many UN demands over the years. They were not.

If you can not see a connection to terror from Iraq when they were found to be the source of the rissen found in England and there admitting to paying 20000bux per suicide / murder bomber that attacked the Israelies then I can see no need in discussing this much further.

Oh and I heard on the news a few minutes ago that SoDamInsane is moving chemical/biological weapons up to the Kuwait border. You know the ones he has denied he had.

Wake up and smell the roses. Whether you like it or not the USA is about to do its soveriegn duty and that is to defend itself.

If you dont like it....how about standing in front of a Isralie bulldozer and giving us all a break?

Have a nice day.

You sound like you have been listing to hannity for years - word for word -
recitiation of the party line. Heil Hitler!

You heard that "Our government fears that the Iraquis MAY use chemical
weapons" .
That is not a fact you idiot, because it hasn't happened yet. When you see
the actual chemical weapons then it will be a fact. Get it?
You even used the spin word and the liberal word.

Hahahaha just like the programmed you to. hahaah

You don't even know if I'm liberal or not - just that I disagree with having
a war. Republicans can disagree can't they? OR are they not following the
party line?
Your hannity programming is deep my friend.

yeah ... Thats why I love the old muzzle loaders, after the movie young guns
I checked and dimes do fit my muzzle loader "best doller fifty I every
spent" after splattering the sheriff. and no safty to screw with!

My oh My 'Harding'....bit touchy aint ya? I don't really watch "Hannity"
all that often. But I do pay attention to reality.

Oh and can you explain the reports on the boob tube that said our buddies
the Iraquees are moving CHem/Bio closer to our troops staging area? You
know the ones they dont have and said they destroyed even tho the didnt have
them??????

It don't much matter tho...we are gonna kick their raghead butts back to
Babylon.....trouble is were gonna have to clear all those 'front line'
troops out of the way ....you know the ones that tried to surrender couple
of days back when the Marines fired a few practice rounds?

You're too far gone, Dan. Let's try a new approach. Think of this whole scenario as a movie plot, and then ask yourself if you would believe something as far fetched. Can you sell tickets to it? Is it entertaining? Now ask yourself how many other folks (besides your circle of friends) are in agrement with you. And please stop calling everyone that can see this president for the idiot he really is, a "liberal".

This angry man has forgotten what America is all about. I suggest you
live with the same people as Hussain for a while to get a taste of
real one sided government. Upon your return, you'll be kissing the
shoes of a JFK statue, rather than kissing the ass of idiots because
they apparently think they're fooling everyone.

Not defending that towel-headed scum bag, but what would happen if
your government wanted to send policemen into your house to take your
precious guns? He can't cry to the NRA who will bribe elected
officials with pac money. This is not that far of an analogy. But
for the record, let's do him and take the oil so dubya's buddies can
get richer and we don't have to pay big dollars for gas!

the reports said the saw the troops miving rockets that are capable of
carying chem weapons.
They also said they are capable of carying anthrax.
They are also capable of carying M&Ms -
Your government is telling you that because it wants you to beleive it!

You made up the spin word and the liberal world and the rush limbaugh
rhetoric on your own?
I don't think so! HAHAH

Many of you make excellent cases for war. But when you call those opposed
to your point of view "unamerican", it just shows that you don't get it!

Calling those people opposed to your point of view "unamerican" is as
unamerican as you are capable of getting.

It makes people skeptical of you, your argument, and your argument for war
because people can sense that you arent; using good sense.

Are you SURE you want one? pretty sloppy, battery eating RCVR. nothing special about it really. Does nothing exceptionally well. Its kind of like a toaster/can opener/knife sharpener and compass all in one.
Seriously, look at other RCVR's for much better performance.......Eddie

Dan,

You can't reason with the unreasonable fools.. Perhaps they will finally get a clue after we've kicked the baby killing, civilan slaughtering, little hitler's butt. What doesn't register with Harding is the fact that SoDAM officially declared war on the US and any other country not in line with his tyrannical whims. This isn't a war we have declared, this is a war that we're finally responding to. Gee - do these people remind you of vietnam peace demonstrations? If they really want to do the world a service, then they need to make their peace case to the tyrant. I think twelve years is enough time for Iraq to disarm and stand down.. Instead, they have flexed their muscle in a motion of "I dare you", while fueling the Al-Qada machine to be the thugs and goons just like an enboldened street gang... We don;t tolerate street gangs, why do we need to tolerate and be subjected to the hostility of a street thug gang leader equivelant like SoDAM and bin-Laden the raghead. They have made clear their intentions to strike US and US friendly targets because they JUST PLAIN HATE US!... They proved their hate on 9/11!!! I am glad we are taking a stand and action against this kind of evil rather than just standby while they find more ways to infiltrate our shores and bomb civilan targets. If they want to believe that Iraq would just sit back and leave the US alone if we pulled our troops home, then I'm certain they also believe in the tooth-fairy.

Wayne

Holy shit I had no idea they were so advanced.
With technology like that we might just as well surrender right now and
get it over with .
I'm truly suprised the government would release such shocking info and
risk panicking the public.
Out the door I go for another case of duct tape ,then off to canada,whom
no one ever gets really pissed off at !

2082. Yaesu VXR repeater courtesy beep and hang time

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-18 04:19:31 UTC
From: cpanderson@adelphia.net
Message-ID: <4bcc482e.0303172019.35f42075@posting.google.com>
Source record: 68376

Thanks very much in advance to anyone who pauses to read, think & respond.

I have a friend who has a Yaesu VXR-7000 repeater he wants to use in a community service project. He's having trouble setting the repeater up the way he'd like, and thought there might be a software or firmware solution (which I could conceivably help with). I'm pre-newbie, just on the outside looking in here. But he described to me the idea of courtesy-beeps and hang times, which has to do with his problem.

The problem is this: at any given hang time setting, the beep occurs just before the end of the hang time, instead of the beginning i.e. when the transmitter becomes available. (Not very courteous if you ask me, to beep and then shut off). He could turn off the beep, but he'd like to use it. You can adjust the hang time, but regardless, the beep always occurs late. Has anybody else had similar experience? Any suggestions, ideas?

(I should mention that before I got involved, my friend spoke with several Yaesu dealers/vendors, they acknowledged the problem but had nothing to offer. In fact they indicated they hear this complaint often. Yet I get the impression that the problem is very low on the priority list, that it has existed through several models, and nobody has plans to do anything about it.)

I may be presuming too much, but I'm guessing this is a firmware flaw in the repeater. I'll explain.

We did obtain a dos-ish program that generates a configuration file and loads it to the repeater. Apparently this program has been around for quite a while (at least since a VXR-5000 model repeater, maybe earlier). Anyway my friend suggested that maybe this would be an avenue. For example, create various configurations and compare files to unscrew/decode it and tweak the file to do our bidding (or do it at source code level, I'm told the source code may be available).

Interesting idea on the surface maybe ("fixing" the config file), but I'm not so sure it is worth pursuing. That is, we'd be looking for some way to alter the timing (call it "Tx") between the courtesy beep and the hang time completion. If we find that the "Tx" is encoded in the file, then that might be the answer we're looking for. But I'm guessing that it the config file is an encoding of (only) the parameters that you can set directly in the dos program, and that the firmware determines the Tx. I need to take a closer look, but a quick look at some config files seemed to validate my assumption.

I'm really groping in the dark here (ahem). Perhaps someone knows of a way to configure this beast to work "right"? Whether the config file has some

combination of parameters that could get the results? Or maybe a firmware patch? Or maybe the firmware source is published (& what assembler/compiler it needs etc. to rebuild).

"In 1991 Saddam killed 500,000 people when they rose against him. Nobody demonstrated against him then. But now the United States wants to get rid of the dictator, people are demonstrating against it."
-one of the Iraqi liberation soldiers the U.S. is training at "Camp Freedom" in Hungary
"The Iraqi regime and its weapons of mass destruction represent a clear threat to world security. This danger has been explicitly recognized by the U.N."
-Letter by Eight European leaders in support of the United States
"At the end of all of the academic arguments is whether we are willing to pay the price to bring freedom to the people of Iraq. If we are, we will not regret it."
-Vietnam veteran and former Democratic Senator Bob Kerrey
"We are praying you will stick to your resolve to liberate our country from a dictatorial tyranny over 30 years which has caused the deaths of nearly 2 million men and women, sons and daughters." -Letter to UK Prime Minister Tony Blair from Iraqi Exiles
"If Saddam Hussein fails to comply and we fail to act or we take some ambiguous third route, which gives him yet more opportunities to develop his program of weapons of mass destruction and continue to press for the release of sanctions and ignore the commitments he's made? Well, he will conclude that the international community's lost its will. He will then conclude that he can go right on doing more to build an arsenal of devastating destruction. If we fail to respond today, Saddam and all those who would follow in his footsteps will be emboldened tomorrow. The stakes could not be higher. Some way, someday, I guarantee you he'll use the arsenal."
-President Bill Clinton in 1998

I've got a Realistic DX-440 shortwave receiver currently on Ebay for
sale # 3013876349. It's in excellent shape . Go check it out.

2093. Re: US Licensing

Newsgroup: rec.radio.amateur.misc

It looks like I'll need to get back to the books and key for some practice.
- Thanks for the info and the webpage has everything else I need to know.

Best Regards

Bingo...I I know. Im really looking forward to the wannabee hippies coming out and doing their demonstration thing. I missed my chance in the sixties, I was busy defending their right to act stupid in public. But now...Im here and looking forward to confronting these pukes.

Dan,

I remember the very same thing as you. Those long haired hippy type pinko fags. Back home, a bunch of us vets waded into them when they started burning the flag. What a bunch of pussies.....they ran like rabbits, kinda like when they were drafted.

Message-ID: <sZKda.41157$Rc7.598249@news2.e.nsc.no>
Source record: 68315

I mis-designed one intended for 7-Mhz band, and ended up with one for 6Mhz
instead, measurements should be correct however...
BUT, nevertheless, i believed that 12, 18 or 24Mhz should show the same swr,
in my case 1,2 at minimum ?
But it did not...
Senter is a balun, and angle down from 0 is apx 30dg.
Hight above ground is about 4 meters minimum, 8 max.

Any ideas ?

73-
Torbjorn.

> Have you tried SIN / TAN ?

There is no signal provided. On earlier versions of the radio (TM-201 and TM-211 series, including the 401/411), I was able to trace the "busy" signal strength display LED back to a COR/COS signal.

With UNSQUELCHED RX audio coming out of the microphone port (pin 6), perhaps some sort of white-noise ignoring VOX circuit external to the radio will work if you can't find a suitable place to tap the signal from inside.

2105. RFI & Home security systems....

Anyone have any experience with RFI and hone security systems? or any informatie links?

I seem to be able to set my neighbor system any time I transmit regardless of power level, band, or mode.

I have a ts570d and a cushcraft R5 up on a 15ft mast. From where the mast is to their home it is probably 40ft. My latest 'incident' involved only 25 watts.

I don't know what kind of system my neighbor has - I think they are out of town at the moment. I am hesitant to say anything to them until I have some information for them and I have done some due diligence on my end.

Thanks....

Guess what folks...it appears that the Belgrade bastard (read Webster's
for a definition), as he is affectionately known as here in the NE, has
again
screwed up. He states in his current broadcasts that the FCC hasn't
published the 3 page letter to him which likely outlines previously reported
serious violations of FCC rules and regulations by K1MAN. Well, if one is
even slightly observant, you will see that the FCC logs on the ARRL website
are behind by a few weeks. I suggest that we wait and see if this letter is
published on the next cycle. For K1MAN's previous rules violations see:
http://www.arrl.org/news/enforcement_logs/
for Feb, 9 2002

K1MAN claims in his current broadcast that the FCC will not publish it.
HA!!!

When they do publish it, consider this in determining K1MAN's credibility
with his
whining's, threats, conspiracy theories, and other BS in the future.

Check this site out in the next week or two.
http://www.arrl.org/news/enforcement_logs/

I used to set off my own fire alarm but only on 40m and 75m. Here's what fixed it:

1) Make certain that the radio AND antenna system is properly grounded, where appropriate.

2) Properly shield all wires interconnecting the alarm. Additionally, if the system's back-up battery is low or won't charge, it should be replaced. (My fire circuit is a "powered" circuit, and the backup battery was stealing current.)

Unfortunately, in your case, you only have responsibility over #1. #2 is your neighbor's problem.

Can you also set it off from a radio in your car? If so, then it is definently his problem and you need do NOTHING.

I also served my country in defense of liberty for all. However, when I got out, I didn't throw away the beliefs I held during my service - the right of all to participate in free political speech, to protest, and so on. I also didn't trash the oath I took back then - to protect and defend those rights. Perhaps that is why I find insults and ridicule directed at Americans exercising their rights so repulsive.

One more time,

A. K1MAN has been getting "correspondence" from the
Commission since the 1980s.

B. If K1MAN is taken off the air, W1AW will follow, immediately.

C. K1MAN has a well documented case against the FCC. The
commission will do anything to avoid metting K1MAN in a
federal courtroom.

D. If you don't understand A, B, C above, refer back to A,
then B, then C. Repeat as necessary.

Your reply means nothing since you have failed the first test of credibility
>> No identity.
You are a chicken shit. Reply if you have the testicular fortitude to use
your real name.

A) K1MAN, the NAL queen, has failed to pay fines, a FELONY!!!
"Correspondence"
yeah, right!!! Perhaps he will be in the cell next to yours.

B) W1AW is not anything like K1MAN. The other day I heard the control op of
W1AW
ask if the freq was in use before airing their bulletin. It was. They
waited. K1boy doesn't
do that because he is selfish and has yet to understand the rules. W1AW has
less than one
hour of weekly HF voice bulletins. K1MAN spews forth over 100 times that
amount in useless,
sickening, drivel while trying to earn a meager living at it, also a
FELONY!!! Can you
say "pecuniary interest"? And he doesn't care about any amateur using the
frequency when
he starts his jamming QRMcasts.

C) BULLSHIT. K1MAN fears the day that he, a fake and wannabe lawyer, faces
a
real one, in a real court. Just like Saddam H, he is another bully, but
exists as a radio terrorist.
(If you think about it on a far smaller scale, the parallels are amazing!!!)
Glen is a pathetic old MAN, a loud mouth bully with a 50 year old
transmitter, tape
loops, Radio Shack timers, and living on the edge of poverty....with nothing
to offer
than his fantasy world view of conspiracy. Just like those other wanna be
shortwave
kooks....Hey glen, get the idea? Get off the ham bands with your
commercialism and peddle
it elsewhere. The ham bands are for REAL hams, not wannabe broadcasters.
Call WBCQ,
perhaps they will air your crap, but I suspect you can't afford it.

D) Read the above again, and again, and again...

Chuck...K1KW

A Story with a Happy Ending...

Once upon a time there was this guy (let's call him Joe Ham) in a public bathroom at the park. He was sitting on the toilet relieving himself, when suddenly, a raving lunatic threw open the door without even bothering to knock, and the lunatic began cry like a little girl because Joe Ham was using HIS toilet. Yes, HIS toilet.

"Waah, you're using my toilet," the deranged Man whined, like a child.

Joe Ham was very startled, and a little angry, so he said, "It's not YOUR toilet, ya friggin' moron, now close the door and get lost ya loser!"

But the Man didn't leave... "It is too mine," the Man whined, "it's mine, it is too mine! It's a violation of sections 88 and 73 for you to even be in here right now! I use this stall at 8, 12, 4, 8, 12, 2 and 4 every day! You're an alleged criminal and I'm writing an alleged letter to an alleged someone who allegedly cares!

Seeing the tiny tears in the deranged old man's eyes, and beginning to feel sorry for the pathetic jack ass, Joe Ham said, "Now look MAN! I'm using this public toilet right now, OK? All you have to do is wait your turn. I won't be long, I promise, and then you can spend 12 hours in here if you want to."

But the Man wasn't satisfied, so he obtained Joe Ham's email address and he started sending Joe Ham an endless bunch of crazy garbage about s tuff Joe Ham didn't even give one teensy f*#^ about.

Then the Man stood in a corner of the park and started yelling at every one who passed by, that Joe Ham and all his friends were criminals; that they stole his stall; and that EVERYONE should know and WOULD know if they bothered to read his web page, that the stall they dared to use was RESERVED for him because he PUBLISHED A SCHEDULE!

So all the friends got together and called the
public works office because the Man was o
bviously crazier than a shite house rat. And the Park
Ranger who reads the reports said, "Yeah
we know this fruit. He's practically homeless,
but he thinks he's King of the park. We call him
Boo-Hoo. He's a known pest, just ignore him."

But, after enough people complained to the Ranger
that the Man was crashing stall doors on a regular
basis, the Ranger's office sent old Boo-Hoo a letter.
It was 3 pages long!

They said, "Man, we have evidence you've been
crashing into certain stalls uninvited. Why do you
think YOU own those stalls? YOU don't own t
hose stalls, they're PUBLIC stalls, and EVERYONE
with a park pass can use them. They're
first-come-first served-stalls, you silly wabbit, a
nd if you can't get that through your wittle numb-skull
we're gonna have to lock you out of the park, and
you won't be able to play there at all!"

But the Man wasn't satisfied (possibly because his
tiny brain didn't understand the concept of sharing)
so he tried to reply to the Ranger's letter using
certified mail, because in another part of his tiny
brain he fancied himself smarter than a Philadelphia
lawyer.

He didn't realize the Park Ranger's were much too
busy to care about returning certified mail cards,
or that they got about 50,000 pieces of mail a day,
delivered to a really big mail room, and in fact no
one at the park office had any time to deal with
silly crap like signing certified mail receipts from
crazy stall-crashers, because much more important
things were happening in the park just then.

Anyhow, to make a really long story a little shorter...

One day, the Park Rangers finally told old Boo-Hoo
that he could use the park no more...

And old Boo-Hoo, the crazy stall-crasher, took
them to court (again) and he lost (again) and he
became so frustrated, angry, depressed, and insane
from his complete failure to intimidate people, and
his inability to crash anyone's stall anymore, that
he took a slow boat to Bougainville and attempted
to start a new business selling shrunken heads to
cannibals on the beach.

Word has it he was delicious.

And all the people who used the park didn't miss
him one bit and they all lived happily ever after.

Well put Dan - being uniformed one cannot really retaliate against the scum when they trash you. You are lucky enough to be in a position to stop them - having said that, I doubt I could or would stop retaliation from my people if the scum had a go at them.

Depends on your computer, or rather on the installed software. It is
rather easy to write a simple LaTeX routine which allows the input
of the QSO data, and a little script around which sends the QSL card
file directly to your printer. I've done so myself, and I have also
written a C program which produces the LaTeX file and which with some
modifications can probably be included in a logbook program, too.
One may also include some PostScript graphics for club logos and the
like if one wants a fancier look of the card.

> when I drew the line. Screw them...and thats my
> right.

Actually, many of those "hippy trashing the troops" stories (hippies spitting on returning troops and so on) from the Vietnam war era are mostly false. For example, if you served overseas back then, you know that most soldiers flew in and out of secure military bases (on military aircraft) to and from overseas assignments - especially those in Vietnam (commercial planes don't generally fly in and out of war zones). Since those military bases were secure, there would have been no hippies standing on the runway tarmac to spit at the soldiers returning.

Further, to associate all hippies with Jane Fonda would be like associating all soldiers to those involved in the Mi Lai massacre. Such comparisons would be neither fair or accurate.

Again, I served during that period, and traveled throughout this country in uniform, and never experienced any resentment from the hippies (or anyone else for that matter). In fact, most Americans back then went out of the way to help a soldier. The hippies, and many other Americans, were opposed to the war, not the soldiers. Perhaps your experience is different, or perhaps you've been listening to too many barracks-rumors.

If your "people" involves military personnel, I recommend you find another career where "retaliation" against Americans is acceptable - it is not in the United States military (placing your doubts you "would stop retaliation" in direct opposition to policy).

Dan, my group came back on commercial air. We landed at Juneau for refueling and then on to San Francisco. I am sure I am not alone in that travel route. Departure to Nam did indeed take place from a military base, but again on commercial carriers under charter.

The flower children knew which flights were arriving and did indeed meet them. While any one spitting on me would have caused them some serious discomfort, I was indeed greeted with "Baby Killer" and other leftwing rhetoric.

Yeah thats right Dwight....all barrack roomers. I especially like your ignorance of military contract flights during nam.

Without getting into too many details...please invision this oh non-believer.

Braniff International, you know the Polka-dot painted airplanes. Uploaded on a stretch DC-8, Had to hit overdrive out of Bien Hoa AB, RVN to avoid ground fire...which we didnt.

Landed at Tokyo International to change aircraft. Ended up at Travis...which has a shared runway with the civilians. Nice anti-war demonstration just off the Tarmac.

Gunny sgt had to hold some of his 'troops' back.

Got inside and the orange robed goofballs layed in front of us to stop us and 'MAKE US TALK TO THEM'. Cops just turned their backs as the fisticuffs proceeded.

I don't believe you have any idea of what your talking about Dwight. At least not the war I was in anyway.

> 5. There has always been a control operator at the control point.

Except when there hasn't. Baxter's station has gone off the air many times in the middle of a sentence without identifying, which indicates that there isn't anyone there and the station automatically shuts off.

> 7. All transmissions have been of direct interest to the Amateur radio
> Service.

Except when they weren't. I've heard his programs talking about such things as computer viruses, which aren't directly related to amateur radio.

> 9. No transmissions have EVER been made to cause deliberate interference
to
> other radio signals or to prevent others from using a frequency.

Not deliberately, but he doesn't care if his signal interferes with ongoing QSO's on frequency and prevents others from using that frequency when his broadcasts are being transmitted.

> 10. All FCC rules, state laws, federal laws, and other legal and civil
> requirements have always been fully and completely complied with.

Except when they aren't. Failing to ID every 10 minutes and at the end of a transmission are two minor ones. The act of broadcasting itself is a major violation of FCC regulations.

> 14. No donation requests of a pecuniary interest have ever been
transmitted
> over K1MAN.

No, but daily advertisements for AARA and requests for "tax-deductible" donations of radio equipment have been transmitted over K1MAN.

> Glenn A. Baxter, P.P., K1MAN (what's a P. P.??)

A P.P. is what you do after drinking lots of beer.

****************** IMPOSTER ALERT! ************************

The message above came from a fake Lloyd. This is the same one who
destroyed a truce I made with W4NTI months back. I hold Glenn Baxter with
every bit of comtempt, knowing what he really is.

The imposter is probably a nut from 14.313 or 3.950

Just a pot stirrer, thats all.

Of course it is. And many of the 275 jammers are straight off of 313. Example, the two guys with deep gravely voices. Tripple Nickle and his sidekick. Then of course there is 'Cowboy', he is near Hammond LA.

And from time to time you hear a few of the real old timers....like that goof up in NY.....nothing ever gets done. No one gets off their ass and turns in their neighbors. Nothing changes.

Most of the Stumpjumper moorons have either died or gave up 'playing'. That is a good thing.

Well flash in the pan "L Rod Hubbard" I tell you what the reason is.

For the first time in his radio trashing life he ran into a group of folks
that ...

1. Didn't fall for his bluster and bullcrap.

2. Didn't fall for his 'felony affidavit' bullcrap.'

3. Could care less about his so called organization.

4. Had the gonads to stand up for what was right and finally...

5. Pursued via all means possible his removal from Amateur Radio.

See how simple it is?

Dan/W4NTI

Dan, please note that although the names are similar, that poster is
not me.

Among the other ways you can tell who I am is the fact that my
website, where you can really tell who I am, is listed on every post,
and I post from an AT&T newsserver.

Note also, if you remove the "removethispart" from his e-mail address
(much like the anti-spam insert I have in mine) you are left with an
invalid address (unlike mine). E-mail to my address will get to me.

Just so no one's fooled. It's fun to have a fan club, lightweight
though he is.

LRod

Master Woodbutcher and seasoned termite

You took off from a military base and landed at a military base. Whether you flew on military aircraft or on military chartered aircraft, you didn't travel on a commercial flight using commercial airports (which was my point).

> Got inside and the orange robed goofballs layed
> in front of us to stop us and 'MAKE US TALK TO
> THEM'. Cops just turned their backs as the
> fisticuffs proceeded.

The military facilities where soldiers got on and off flights at Travis were separate from the civilian facilities. And those facilities were protected by military police. Demonstrators would not have been allowed into those facilities and I seriously doubt police (military or otherwise) would have turned their backs to fighting.

> I don't believe you have any idea of what your
> talking about Dwight. At least not the war I
> was in anyway.

If your recollection of that war was fantasy fighting with "orange robed goofball" civilians at Travis, then you're absolutely right - I have no idea about the war you were in.

No backpedaling at all. I wrote...

"Actually, many of those "hippy trashing
the troops" stories (hippies spitting on
returning troops and so on) from the
Vietnam war era are mostly false. For
example, if you served overseas back then,
you know that most soldiers flew in and
out of secure military bases (on military
aircraft) to and from overseas assignments -
especially those in Vietnam (commercial
planes don't generally fly in and out of
war zones)."

If the only argument one can make against that paragraph is a fine distinction between military aircraft versus military chartered aircraft, I'll give you (and/or him) that point if you really want it. However, the key of that paragraph remains intact - stories of hippies spitting on returning troops and so on from the Vietnam war era are mostly false. He (Dan) has not denied that. Fred has not denied that. And you have not denied that.

But, you are right - the argument is over. I have no desire to get into a tit for tat argument with any of you. Good day, gentlemen.

Get your facts right Dwight - believe it or not, there are other countries
than the US that are currently involved. I don't give a shit if the
arsehole who takes a swing at me, or dumps a bucket of shit (literally) on
me is of my own country or not - he/she incurs no special rights to do that.

Sometimes people become very closed minded when they believe something
is true. Seems that this is happening with more than one belief in
the recent threads. Ignorance is bliss, thanks for showing that there
are some intelligent people out there that are willing to discuss,
debate and learn.

Dave,

Without going back to Stew's web site I did a couple of web searches. "Skull and Bones Society" turned up about 1300 hits with some variation. One came back as "The Order of Skull and Bones". Some interesting reads.

Searches of ["Satan Holiday" & "Spring Equinox"] turned up quite a few. It seems the "satanic holiday" he was referring to was the Spring Equinox which actually began on 3/20, though the first whole day of Spring is 3/21 which most calendars show.

One web page listed satanic holidays and for March 20 it listed the following:

Date = March 20 (date varies)
Celebration = Spring Equinox (Sabbat Festival) (Major fertility Sabbot)
Type Holiday = orgies
Usage = oral, anal, vaginal
Age = any age (male or female, human or animal)

That web site is: http://www.tehillah3.co.za/engsubj/02716.htm

A search for "Order of Skull and Bones" turned up 3160 hits.

One of them starts out this way:
Quote:

The Skull & Bones Society has been described as the most secretive organization in the world.

Some of the world's most famous and powerful men alive today are "bonesmen," including George Bush, Nicholas Brady, and William F. Buckley. Other bonesmen include Henry Luce (Time-Life), Harold Stanley (founder of Morgan Stanley), Henry P. Davison (senior partner Morgan Guaranty Trust), Artemus Gates (President of New York Trust Company, Union Pacific, TIME, Boeing Company), Senator John Chaffe, Russell W. Davenport (editor Fortune Magazine), and many others. All have taken a solemn vow of secrecy.

The Skull & Bones Society is a stepping stone into the Bilderbergs, Council on Foreign Relations, and Trilateral Commission.

End quote.

Just the introduction to:
http://www.geocities.com/CapitolHill/8425/BONES.HTM
is a very interesting read! It repeats part of what is above.

There is plenty of info on satanic holidays and The Order of Skull and Bones, of which George W. Bush is a member, as was his father, and apparently his grandfather.

A little reading will probably provide plenty of links between satanic holidays and George Bush. Oh, wasn't he also at Bohemian Grove? ... and a member there also? Might be another interesting search.

I did a couple of quick searches for "born again" and "reborn" -- within a couple of web pages and didn't find either. Not saying it isn't there as Dubya says he's "born again" and it is said that would represent his coming out of the casket (tomb) in which he took his solemn oaths.

Al

Hello,

Intresting to construct your BAL-UN.

And if so, take a look at: http://www.inter.nl.net/hcc/Shortwave

Best regards and good dx-ing.

Dutchmill

"With no name and no call?"

My name is Bond, James Bond......my call is 007

When are you going to grow up you obese hanger on? You are overdue to
switch sides again aren't you?

James

This is the same Stew Webb who is just like Al Martin of Al Martin Raw. Al Martin was a guy who stated that the whole U.S. would be under checkpoints and all people and vehicles were to be stopped. This statement he made in the fall of 2001. This was going to occur by August of 2002 according to the whackjob. However, it is now 2003 in March and still no checkpoints, police state.etc. Makes you wonder where these bozos get their info at.

Five places they get info/intel from:

1) Voices in their head....
2) UFO Space Brothers (aKa the "Tinfoil Hat" Syndrome)
3) Alex Jones on kook-Shortwave daily..
4) So-called "Patriot" ham radio kooks- nets (check out 3.860 at 8PM EST)
5) Whenever they forget to take their Prozac, Luvox or anti-PMS Pills.....

:) :) :)

Been listening in on these Militia type
groups on Ham radio. They use
3.860 LSB at 8:00 PM EST nightly.
Also check 7.180 during the daytime.

Also have heard Michigan Militia (as well
as one or two Ham Op's I've heard
on 75 Meters!) using 27.545 mHz and
adjacent USB freq's in the 10.5 Meter
"Freeband"! Seems they don't care if they
lose their ham licence. They're easy to spot
in the so-called "freeband" as their usually
the only english-speaking stations you'll hear
on these "ten-and-one-half meters" freq's .

Poor misguided paranoid souls.....all of em.

thats where youre WRONG again.

any licence changes affects everyone.

if you bothered to heck this you might just understand.

> > until the FL arrived...at least 2800 vhf-only people werent that bothered
> > about hf... and now look
>
> No, they weren't bothered about _Morse_, and that kept them unfairly off HF
so extending this arguement then the RAE unfairly keeps CBers of the
Amateur bands and should therefore be also scrapped.
so to level all playing pitches everywhere...lets give away Amateur radio
licenses to everyone...and the best way of doing this?
print them on the back of a corn-flakes pack.,..which is what i predicted
3 years ago

> They're a beginner on HF though, which as we know is so much harder than
> VHF that it needs an extra test (sarcasm). Argue with that one then -
> a) needs extra test, so they are a beginner
> b) doesn't need extra test
> either way I'm happy... you're WRONG as usual
poppycock...
any B-licence since the B-licence started has known that a morse test is
required to be passed to get a hf license.
only when the FL arrived did 2800 rush forward and do the easy way and
by doing so display that they were not preapred to do a test but were only
too happy to do an assessment - an assessment designed for BEGINNERS

thats the joke that has been allowed to persist.

and some of these 2800 have openly declared their out and out objection to
a morse test get the hf bands and still they line up to do a morse
assessment which as we all know 8 year olds can pass.

HAYNIE ISSUES ULTIMATUM TO BAXTER: GET OUT OF
HAM RADIO OR FACE THE CONSEQUENCES

By Willard Ratt - Staff Writer

(Newington Ct.) March 22, 2003: The leader of the American Radio Relay League has thrown down the gauntlet. ARRL President Jim Haynie, W5JBP, has told dissident ham operator Glenn Baxter, K1MAN, to disband his American Amateur Radio Association and turn his license back to the FCC within 48 hours or face action by the Military Affiliate Radio System (MARS).

One day after President Haynie set a deadline of 14:00 UTC on Tuesday, troops of the "First K1ZZ Expeditionary Force" stationed in the Maine highlands above Baxter's Belgrade Lakes "AARA World Headquarters" continued to erect their towers and install 30 element 20 meter beams in preparation for an initial on-the-air assault. At the same time ground units loaded their 2 meter HT's, battery packs, gain antennas and other combat gear into fighting vehicles, ready to invade on short notice.

"We are ready to go at a moments notice," said Field Commander Jennifer Hagie, N1TDY. "Everyone has charged batteries and a high quality gain antenna, so we can't loose. We stand for motherhood, apple pie and American built spark-gap transmitters. That's what its all about," Hagy said.

But in an edgy prelude to war, K1MAN mocked an ARRLultimatum to surrender power. He told the W5YI Report that he will never surrender. He then called on his world-traveling emissary Sam Voron, VK4BVS, to rally support among the leaders of France's Union Francaise des Radioamateurs and Germany's Deutscher Amateur Radio Club. Both have been critical of the ARRL's decision to use military R.F. energy to remove Baxter from the airwaves.

As the hours dwindle toward President Haynie's deadline, the ARRL worked to keep Baxter guessing. Presidential spokesman Steven Mendelson, W2ML, said that the administration would not rule out an attack before the 48-hour clock ran out. Another official, speaking on condition of anonymity, said that Haynie was leaving the door open in case Baxter calls for a pre-emptive attack on ARRL Official Bulletin Station W1AW or ARRL intelligence warns that one is likely.

Underscoring what Haynie intoned, Mendelson said MARS troops operating under ARRL control would enter Baxter's Belgrade Lakes compound either as an invading force or as part of an unmolested effort to locate weapons of "mass R.F. destruction" like linear amplifiers and echo-making power mics."

The ARRL claims public support from 30 national Amateur Radio societies including the Radio Society of the Gambia, the Associacao dos Radioamadores de Macau and Namibian Amateur Radio League for its international coalition

supporting Baxter's expulsion from Amateur Radio through military action.

Why did you believe that?
The antenna is no longer 1/2 wave at twice the frequency!
BTW: ballanced dipoles accept power at ODD harmonics well, not EVEN.
They do work at even harmonics, but it is VERY difficult to get them to
match.

Do you always see things in such extremes, "zpk?" Very little in this world is all or nothing - and this issue is obviously no exception. It is one thing to argue against, advocate against, a certain aspect of the licensing procedure (his position) and quite another to advocate the elimination of licensing entirely (your position). It is also one thing to discuss an issue and quite another to run around screaming useless hyperbole.

**

AMERICA AT WAR: HAM RADIO PREPARES

America's terror threat level has again been raised to "Code Orange." This in the wake of President Bush’s ultimatum to Iraqui dictator Saddam Hussein. And with our nation on high alert for terrorist attacks, Homeland Security Secretary Tom Ridge outlined a national plan Tuesday March 18th. One that he said would increase America's at-home defenses. Part of it is in the area of personal communications. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the latest on this and the way ham radio can be prepared:

--

The plan, which Homeland Security Secretary Tom Ridge has named Operation Liberty Shield heightens security at the nation's borders, airports, seaports and railways. It also provides additional security at nuclear and chemical plans along with protecting elements of the nation's food supply and distribution system.

As you have probably heard in other n ews reports, vehicles are again will be subject to random inspections on roads leading into and out of airports, sea-ports and similar facilities. Most of those who will making inspection stops are probably unaware of ham radio equipment and why hams have it in their cars. Akll they will sdee is a different kind of radio that they have never experienced before. So, for the forseeable future Amateur Radio operators would be well advised to carry a copy of their license with them if they are driving a vehicle equiped with an antenna array anyplace close to a high security area. Its much simpler to show you ham ticket to the inspector than to try to explain the hobby while a long line of cars behibd you are honking their horns.

Also suggested by Holeland Security is for every family put in place an emergency communication plan. This plan should be specific to a given family unit, understood by all of its members and practiced regularly.

Some experts have recommended that a family communications plan not be totally dependant on land based or cvellular telephones that can easily become overloaded in an emergency. Recommended are forms of personal radio including FRS and the new M.U.R.S. service. Families where all members are licensed radio amateurs have a definite advantage here. If your wife and kids are not yet hams, now might be a hood time to make getting them all tickets as a super high priority. Three places on the web you can find training information are www.arrl.org, www.w5yi.org and www.gordonwestradioschool.com. And gordonwestradioschool is one word.

Radio amateurs involved in civil defense and disaster preparedness should now be on high alert as well. Radio gear should be in tip-top shape, tested daily and H-T batteries should be maintained at full charge. Do the same spare battery sets. Also, have one or more sets of alkaline cells ready to go. If the power goes out you will have no way to quickly recharge your NiCad or NiMH packs.

If you belong to an emergency service group like ARES or RACES, make sure your leaders know how to contact you 24 hours a day, 7 days a week. Take part in regular any scheduled on-the-air drills so that you will be knife-edge sharp if your services are needed.

And if you have never had Emergency Communications training, don’t wait. The ARRL is the only national Amateur Radio group certified to provide you with the schooling you need and courses are available right now. As soon as this newscast is over we urge you to go to the League’s website at www.arrl.org and to sign up.

Meantime, the American Red Cross is urging families and individuals across the nation to make appropriate preparations. The relief agency suggests everyone follow the Red Cross Recommendations for the Homeland Security Advisory System. It’s on the web at www.redcross.org.

For the Amateur Radio Newsline, I’m Norm Seely, KI7UP, reporting.

--

We will have more on ham radio and its part in defending America against the threat of terrorism in future Amateur Radio Newsline reports. (ARNewsline™)

**

AMERICA AT WAR: PROTECTING THE NATIONS COMMUNICATIONS

With war now reality and the possibility of terrorism, leaders from the telecommunications, Internet Service Provider, satellite and cable industries have begun consideration of widespread recommendations to help restore communications services in the event of an attack on the nation’s communications infrastructure. Some of the recommendations were presented by members of the Network Reliability and Interoperability Council at its quarterly meeting March 14th at the FCC.

In developing what the group calls its best practices for service continuity and disaster recovery, the industry representatives identified and analyzed more than 200 such concepts. These cover a wide range of scenarios. And for the first time in the area of cyber security the communications industry has conducted a thorough assessment and analysis of its vulnerabilities.

The 56-member council vote on which recommendations to put in place will be completed on March 28th. (Published news reports)

HAM RADIO IN SPACE: ARISS TO CONTINUE WHILE SHUTTLES ARE GROUNDED

The grounding of America's Space Shuttles following the February 1st Columbia disaster has not had any major impact on Amateur Radio. Roy Neal, K6DUE, brings us up to date on whats happening in the shuttle program and with manned ham radio in space:

--

The announcements by NASA that its having Boeing build a new Orbital Space Plane and that it hopes to have the remaining Space Shuttles back in the sky by this fall signal a turning point for the space agency. It is telling the world that things are getting back on track.

But in there here and now there are still several months before full space operations resume. Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, says that ARISS is prepared for any eventuality.

According to Bauer, until the shuttles fly there will be less scientific work taking place on the International Space Station. This is because of the reduced on-orbit staffing of two member crews.

Bauer believes the most probable scenario for a crew change will be what we reported two weeks ago. That U-S Astronaut Ed Lu, KC5WKK and Russian Cosmonaut Yuri Malenchenko will fly to the I-S-S on a Soyuz rocket to become the Expedition 7 crew. But Bauer adds that Astronaut Mike Foale, KB5UAC, is a back-up for the crew -- also in training -- just in case he is needed. He also notes that Astronaut Pedro Duque, KC5RGG, who planned to use the ARISS equipment on the upcoming Soyuz transport flight, will now probably fly in the fall.

Baueer says that the only major setback for ham radio so far concerns upgrading the I-S-S ham station itself. According to KA3HDO, with the shuttles not flying, consumables like food and water are the highest priority items to be launched on the upcoming Progress re-supply missions. This means that the ARISS hardware that was planned to be flown this year will probably be delayed. The gear waiting for transport includes the Slow Scan Television equipment, plus Kenwood D700 and Yeasu FT-100 radios and the Naval Academy's P C Sat 2 ham satellite. Bauer says that this equipment will be kept ready for any upcoming transport flight opportunities to the I-S-S.

The good news: Bauer says that the opportunities for school contacts will remain at the same. Look for them at a rate of at least two a week. Maybe more if the Expedition 7 crew finds itself with extra free time.

Right now, it appears as if ARISS operation from the I-S-S will continue on as it has since operations resumed. This, as investigators on the ground work to determine what caused the Columbia to disintegrate as it attempted to land last month and get ready to return the rest of the shuttle fleet to service later this year.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE.

--

The only item not touched on by Bauer was open contacts with the ham radio public. These tend to occurr only when the crew has some unscheduled free time. (ARISS)

RESCUE RADIO: UK RADIO CLUB FIRE

Back on Earth, a radio club meeting is interupted by a fire. It happened in the U-K and Jeramy Boot, G4NJH, joins us from Nottingham Englanmd with the details:

--

The Bredhurst Receiving and Transmitting Society's quiz night on the 6th of March was interrupted by what all members present assumed to be a power cut. However, club member Terry Wheeler, G7MIM, went out to investigate and discovered that a fire had broken out in the room above the club. He calmly asked the members to leave the premises and the evacuation of the building took place in a swift, orderly and calm manner. Richard, G7PPE, tried to open the door of the flat above the club room where the fire had started as the occupant was still inside, but was unable to break down the door. Fire crews arrived in a matter of minutes and the occupant was rescued and taken to hospital. Jeramy Boot, G4NJH.

--

Jean Darley, G1DLL, the Secretary of the Bredhurst Receiving and Transmitting Society says -- and we quote: "It's never a dull moment if you're a member of our radio society." G1DLL is also now trying to find an alternative venue for the club to meet. (GB2RS)

**

RADIO LAW: ANTENNA PROTECTION - CALIFORNIA TRIES AGAIN

If at first you don’t succeed, try again. And that’s exactly what hams in California are doing as they try to convince the state legislature and the governor that its time to offer protection for their antennas and towers. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--
March 26th is the date for a legislative hearing on California's latest attempt to pass an Amateur Radio antenna protection bill. The ARRL Letter says that Assembly Bill 1228 was introduced February 21st by Assemblyman Bob Dutton. It has been referred to the Committee on Local Government for consideration.

ARRL Pacific Division Director Bob Vallio, W6RGG, and the League’s antenna expert Dean Straw, N6BV, are among those scheduled to testify on behalf of AB 1228. Several others also plan to attend.

Back in 2000, the California Legislature passed a bill incorporating the essence of PRB-1, but Governor Gray Davis vetoed the measure. At that time the Governor said his opposition stemmed from a lack of budgetary funds to complete the required studies and his personal belief that amateur antennas should be considered a local rather than a state issue. The earlier California measure had carried a price tag of between $70,000 and $100,000 to fund studies and a model ordinance that lawmakers required.

Organizers behind the current bill say the new measure, being called "The Emergency Communications Enhancement Act," will not carry any price tag. A copy of the current legislative proposal is available on-line the California State Legislature web site.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

So far, 16 states have incorporated the essence of PRB-1 into their laws or have approved Amateur Radio antenna legislation that includes minimum regulatory heights for antenna structures. (ARRL)

**

RADIO LAW: CALIFORNIA WORKING TO MOBILE CELL PHONE BAN

Still in the Golden State, a bill requiring cell phone users to use handsfree devices while driving has been adopted by a powerful California Assembly committee. Bill Pasternak, WA6ITF, has been following the story and has the latest developments:

--

The measure passed the California Assembly Transportation Committee on a 14 to 5 vote on Monday March 10th. This, after falling a single vote short of passage for the past two legislative sessions.

The bill's author is Assemblyman Joe Simitian, of Palo Alto. He has called the committee's approval the first step to saving lives on California roads and highways.

Under the Simitian's bill a first offense for using a cell phone while driving a motor vehicle would result in a mandatory $20 fine. Subsequent violations would carry a maximum fine of $50. Drivers could use handsfree cell phones without threat of a penalty.

The measure is exclusive to mobile cellular telephone use. It reportedly excludes all other forms of two-way radio communications. The bill now heads to the state Appropriations Committee for further hearings.

Reporting from near the city of Valencia California, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

If the measure eventually becomes law, California will become the second state to require handsfree use of cell phones by drivers. New York was the first back in 2001. (ARNewsline™ from various reports and sources.)

**

ENFORCEMENT: FCC ALLEGES NUMEROUS VIOLATIONS ONB MICHIGAN REPEATER

A pair of Michigan repeater operators have been told to cease operating their systems under automatic control. This, as the FCC launches an investigation into charges of several rules violations. The agency's Daryl Duckworth, NN0W, has more;

--

Duckworth: "The Detroit District Director issued an order to cease autonmatic control of Amateur repeater station K5YHA to Sheri Gilbert and an order to cease automatic control of Amateur repeater station K5EKP to William Gilbert, both of Lupton Michigan. Both stations are under review by the Enforcerment Bureau for apparent violations of the Commissions rules inccluding inadaquite station control and deliberate interference."

--

In a letter February 24th letter to the Gilberts, FCC Special Counsel Riley Hollingsworth alleges that numerous rule violations have taken place on the repeater. Also that the repeater is the source of interference to the K8GER system. He said that Violations on the repeater consisted of failure to identify by some users, use of false or misleading call signs by users and failure to have a control operator for the repeater. Hollingsworth alleges that back in January the Gilberts' apparently turned the operation of the repeater over to a car rally. During that time several of these type of rule violations occurred for more than 12 hours during a two-day period.

The letters warns the Gilberts' that that if they are unwilling or unable to prevent violations on their repeater, then their Amateur operator and station licenses will be subject to enforcement action by the Commission. This could include a fine, operator license suspension or station license revocation. The Gilbert's have since informed the FCC that the repeater has been taken off the air. (FCC)

**

AT THE FCC: NOW WE HAVE COALS

The acronym laden Federal Communications Commission has added COALS to its dictionary. This, as the regulatory agency begins implementation of the Cable Operations and Licensing System by Report and Order on March 13th.

With COALS the FCC has expanded its electronic filing capabilities to make it easier for multichannel video programming distributors to submit applications, reports, and other documents. The FCC says that COALS also makes license and cable operational information more accessible to FCC staff. This in turn makes for more efficiency in monitoring spectrum usage and competitive conditions in the cable and multichannel video marketplace. The FCC adds that the introduction of COALS represents more progress in the FCC’s own modernization initiative. (FCC)

**

RADIO RULES: MEDIA OWNERSHIP HEARINGS

It looks like there will be more public hearings on media ownership restrictions. A Democrat on the Federal Communications Commission plans to hold two more hearings, sidestepping the wishes of the agency's Republican chairman.

Commissioner Michael Copps says he will hold hearings at the University of Washington in Seattle and Duke University in Durham, North Carolina. Copps is seeking public input on the F-C-C's review of whether decades-old media ownership restrictions are appropriate in a market altered by the growth of the Internet, satellite boadcasting and cable television.

FCC chairman Michael Powell had previously said that the hearing he held in Richmond, Virginia, on February 27th is all that's needed. Powell said that the agency has received 13 thousand comments from the public, most filed electronically. (FCC)

**

HAM RADIO CUDOS: PAUL HARVEY HONORS HAMS

Radio commentator Paul Harvey dchose Wednesday, March 19th to honor ham radio. In his broadcast, Harvey described radio amateurs as America's quiet warriors. He said that there are 700,000 of them who are unpaid, uncelebrated, civilian, radio operators, who are there during and after floods, fires and tornadoes. And says Harvey, after the 911 attack hams were indispensable in reuniting families.

It was a very unexpected salute to the nations ham radio community. You can find it on the web at www.paulharvey.com. Look for the show dated March 19th. (W6RCL)

**

CHANGING OF THE GUARD: MARC TONNA, F9FT, - SK

A pioneer in antenna design has passed on. According to a notice on thew A.F.T. antenna wwebsite, company founder Marc Tonna, F9FT died on March 2nd at the age of 91.

Way back in 1946, Marc Tonna revisited the design described by the Japanese searchers Yagi and Uda in 1926. Tonna brought to the Yagi improvements that made his antennas famous among the radio-amateurs, as well as in the field of the then uprising commercial TV. He later went on to become the co-founder of the company Antennes Tonna which today is known as A.F.T.. (AFT)

**

NAMES IN THE NEWS: NEW ARKANSAS SM

Dennis Schaefer, W5RZ, has been appointed as the new Arkansas ARRL Section Manager. He succeeds Bob Ideker, WB5VUH, who first served as Section Manager from 1991 through 1995 and who returned to office in 2001.

And heres where it become rather uinteresting. Ideker had decided to not run for another term. Eldon Bryant, K7ZQR, was elected to replace him. But Bryant later decided not to assume the office and Schaefer was named as his replacement.

Schaefer’s term begins on April 1st. Arkansas ARRL members -- or anyone elser can contact him by e-mail to w5rz@arrl.org (ARRL)

EMERGING TECHNOLOGY: CALL IT MC INTERNET

Hungry? You may soon get a surprising bonus when you dine at the Golden Arches. This, with word that McDonald's restaurants in three U.S. cities will be offering one hour of free high-speed Internet access to anyone who buys a promotional meal.

Ten McDonald's in Manhattan New York began offering wireless WiFi, or 802.11b, Internet access on Wednesday, Matrch 12th. By the end of 2003 McDonald's plans to extend the access to 300 restaurant locations in New York City, Chicago and a yet to be announced California city. Window signs will alert customers to which restaurants have WiFi wireless access. After using the hour of free access that comes with a meal, customers can pay $3 for another hour online or get more time by purchasing another extra value meal

Besides McDonald's, Internet surfers will also be able to tote their laptops to 400 U.S. Borders book stores, hundreds of hotels and a pair of U.S. airports

where WiFi access will be available this summer. (Published news reports)

**

SPACE AND SCIENCE: MORE ON SETI@HOME

Last week Amater Radio Newsline’s Henry Feinberg, K2SSQ, brought you the latest news on a project called seti@home. Henry is back this week with some background on the project and how it got stasrted:

--
SETI@home first offered its screensaver to the world in May of 1999 as the first example of wide-scale distributed computing. Its aim was to link idle computers through the Internet to tackle large computational problem involved in searching for intelligent signals from space.

The key to its success was the collaboration between two people who would become the principal architects of the project. David Anderson is a computer scientist who was one of the principal developers of distributed computing. Dan Werthimer is a physicist with two decades of experience collecting radio data and parsing it in search of unusual signals from space. Together, they have drawn in not only the computer community, but many others as well. This includes thousands of ham radio operators interested in offering use of their spare computer time to benefit worthwhile projects.

Werthimer, who serves as chief scientist for SETI@home has conducted his own Search for Extraterrestrial Intelligence for the past 24 years. For 11 of those years he has been able to use the giant 1,000 foot diameter radiotelescope at Arecibo Puerto Rico to look again at promising locations and frequency ranges. This, to determine if a strong radio signal is more than random noise or a transmission from an orbiting satellite.

So far no luck but Werthimer is not disappointed. This is because SETI@home has mobilized so much more computing power than has ever before been thrown at signal analysis. Also, the team has been able to perform much more detailed and complicated computations on the radio data than now possible with Werthimer's own ongoing SETI project, called Search for Extraterrestrial Radio Emissions from Nearby Developed Intelligent Populations. Thats SERENDIP IV for short.

What is important is that SETI@home has performed the most sensitive and detailed SETI sky survey to date. It has also demonstrated the power of the Internet for doing scientific distributed computing, and has allowed the general public -- and the ham radio communuity to participate directly in an exciting research project.

And the success of SETI@home has also spawned numerous other distributed computing projects. These include Folding@home -- a distributed computing project to calculate the three-dimensional structure of proteins and climateprediction.net to improve scientific forecasts of 21st century climate. And scientists say that there is more to come.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

So far, 4,287,000-plus users have lent thir spare computing time to analyze radio data for the SETI@home team. You can become a part of the project by taking your web browser over to http://setiathome.ssl.berkeley.edu. And if you missed that U-R-L you will find it in the print edition of this weeks amateur Radio Newsline report. (W6RCL, Published Reports)

**

DX

In D-X, word that A35KB has gone QRT -- probably for good! Paul Kidd, A35RK, told the Ohio Penn D-X newsletter that he hasn't heard Father Kevin Burke, A35KB, on the air for some time. So, last week telephoned Father Kevin only to learn that he is very busy with his duties as parish priest on the Island of Eua. Because of this, he is no longer able to operate on the radio, has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon. Nor can he any longer respond to QSL requests. (OPDX)

On a brighter note for D-X’ers, the OPDX also reports that SP9FIH will be active from Tonga through April 14th. He already has verbal permission to operate and his license will be given to him after arrival on the island. Activity will be SSB on 80 through 10 meters including the WARC Bands. QSL to P.O. Box 480, 44-100 Gliwice, Poland. (OPDX)

And lastly word that Meanguera Island in the Fonseca Gulf will ba activated by DL7IQ, DL7IO and YS1CF from march 27th to the 28th as HU1M. Modes used will be SSB, CW, SSTV and RTTY. On the 29th and 30th the same call letters will be from San Diego Beach El Salvador. Full information is on the web at www.dl7io.de. (The’ Modern DX’er)

**

THAT FINAL ITEM: SWLFEST 2003

And finally this week, hams are not the only radio hobbiests who get together at conventions. Shortwave listeners recently had a major get-together in Pennsylvania that saw guests and presenters from around the world. Steve Coletti of WBCQ was among them and has this in-depth report on SWL Winterfest 2003:

--

The listening side of the radio hobby made its 16th pilgrimage through the snow to the little town of Kulpsville, PA., for the annual SWL Winterfest hosted by NASWA. Although SWL stands for short wave listeners, the fest activities cover DC to daylight as again there were the usual demonstrations of overseas TV via satellite, the activities of the group who we affectionately call the "Scanner Scum", and a demonstration of DRM, the European digital shortwave broadcast standard by Jan Peter Werkman of Radio Netherlands, James Briggs of Merlin Communications and Kim Elliot, KD9XB, of the Voice Of America with additional help of a PC loaned by attendee Eric Cottrell, WB1HBU, to decode the broadcasts beamed specifically to Kulpsville.

This year, Bill Whitacre of the International Broadcast Bureau, parent of the VOA and other US international broadcast ventures, was able to schedule it's annual meeting of radio monitors to coincide with the Winerfest and 26 professional listeners from around the world joined the crowd in Kulpsville to explain that their job was more than just making sure that the signal was heard in the target area.

Although the Fest has been a listener only event, over one third of the attendees every year are hams and this year new ground was broken as Skip Arey, N2EI, ran an introduction to Ham Radio forum. Not only the first time for this discussion, but it was also one of two first time evening forums held on Friday night.

The international broadcasters were represented this year by Adventist World Radio and Radio Free Asia in the forums as well as live broadcasts over WBCQ. In addition to some regularly scheduled programming that went remote on Friday night, WBCQ had a Saturday marathon broadcast by the station's engineering magician, "Tim Tron" Smith, WA1HLR.

Other forums featured reports on listening tips, a summation of a DXpedition to Australia, and a report on overseas SWL group, the European DX Council's annual meeting.

Last year, Bob Zenotti, HB9ASQ, co-host of the now gone Shortwave Merry-Go-Round on Swiss Radio International made his first appearance at the fest as a guest speaker. This year he came on his own as regular attendee.

--

Zenotti: “This is one of the best ones I can remember. Great bunch of people, fantastic discussions, and a lot of excitement here….and very little sleep.”

--

The fest was not without it's humor. The hotel has the Stockholm, Copenhagen, and Oslo meeting rooms. In honor of the delegation from Finland that attends every year, the hosts of the event, Richard Cuff and John Figliosi, unofficially named the fest's hospitality suite, the Helsinki room.

For the Amateur Radio Newsline, I’m Steve Colletti a-k-a Big Steve Cole of WBCQ Radio reporting fot the Amateur Radio Newsline.
--

The 2004 S-W-L Winterfest is slated a year vfrom now on March 12th to the 13th at the same venue. You will find lots more about it on the web at www.swlfest.com. (Strve Coletti for ARNewsline™)

Hi,

I'm looking where to find or to buy next items:

- Semi-rigid coax or rigid coax

- low impedance Teflon coax (to make broadband transformers)

- other good resources to make some FM amplifiers 50-100 MHz (300-600W)

- ferrite breads and cores

Thanks !

2178. Where to find small rigid coax and other items ?

> >
> Uhhhh .... was I supposed to ?

A VERY curious topic, as CF was, until
recently, working as a plumbing maintenance man
at a certain college nearby his home for
spare change.

I doubt you will ever hear him on the liberty net
anymore. Chicken Feathers was ejected by the
"Net Godfather" of 3.950 by Papal Edict on parchment
for the crimes of high blasphemy against "Pope
Pipe Wrench II" and "Cardinal Borshinski"
some time back...

Pope Pipe Wrench II is located in Southern Indiana
and has a penchant for calling into right wing talk
radio shows on WWCR, WHRI and WWFV in his
BVD's to discuss various sundry political topics
and visiting "Hot Kinky Plumper" type porno sites on the Internet...

Cardinal Borshinski is the creator of the famous
"Borshinski Antenna of Toledo - a.k.a. The Moonraker 6.5"
It's claim to fame is large copper spheres placed in particular places
along the antenna elements which allegedly give a 60+ dB gain
over a standard dipole. (Rumor has it that former radio
talk show host Art Bell has one of these antennas to talk to
and coordinate activities of the Space Aliens that are after
Eric Cartman from SouthPark.....

Since then CF has been the other 1/3rd of the
remnants of the Motley Crew which used to
meet on 3.860 (and was kicked off that freq.
for other Crimes against The Holy Inquisition"
and now meets at various spots between 3.848
and 3.875 - Unfortunately of late it has been found
that he has difficulty remaining up past 10:00 PM
and has been known to pass out fast asleep in his chair
in front of the Yaesu due to the 5+ minute long monologues
by Tommy Toobs and the subsequent replies of non-sequitor
pabulum by "Edith Bunker" the latest member of the

dying-on-the-vine Motley Crew.....

...as Paul Harvey says: "Now you know, the rest of the Story!"

>
Sad indeed. The good nets die young.

>I doubt you will ever hear him on the liberty net anymore.
>
Well maybe someday there will be an annual reunion of The Great Liberty Net.
Say maybe one night a year, netters, former netters, jammers, former jammers,
jammer wannabees, etc, can all check in.

Only problem is Alfa Alfa Eight Dr. Pepper is out of pocket for a while. But
maybe we could set up a special event station for him at Ky. State. I can
provide the antenna if someone else will provide the radio and amp.

> they need to make their peace case to the tyrant.

These stupid liberal anti-war demonstrator fools don't realize
that they are playing right into the hands of Saddam and aiding
his cause. Every time he sees them on television he is laughing
and applauding there efforts for helping his cause.
They also don't realize the jeopardy they are possibly placing
themselves and others. All these crowds of demonstrators marching
down a street could be a prime target for some terrorists. Our
police and other law enforcement agencies are stretched to the
limit trying to defend against any possible terrorist attack, and
the last thing they need to be doing is trying to protect these
misguided idiot demonstrators.
They keep yelling and screaming about all the lives that will be
lost because of the war, they haven't the brains to figure out
that if Saddam and his sadistic sons are taken from power that
tens of thousands of lives will be saved from his torture chambers.
I am in full agreement that anyone can be for or oppose to the
war, but these stupid demonstrations by these simple minded
dumbbells are doing much more harm than good and I am sure Saddam
thanks them for their contribution to his cause.

Gentlemen, after reading all of these messages I think you both have lost sight of what "America" really is. In the societies of North America we can all say whats on our minds and live to see another day. We have all lived our whole live with freedom of speak and movement. We all take the right of our "Freedom" for granit, but the Iraqi people have no such idea what "freedom" is. Living in the kind of terror these people live with every day is not something we can comprehend. Knowing that your life could come to a very horrific end at any moment is beyond the meaning of having a "stressfull day". While we all sit around perpetuating idile conversation of the pro's and con's on this war, such as the UN has done for the last 12 years, thousands of Iraqi people have died at the hands of this tyrant. The UN is nothing more than a bunch of politicains sitting around making excuses and threats against each others and their countries. Have you even know two politcians to agree on anything? Well, fill a room full of them and do you honestly thing you could get a decision on where you should have lunch let alone save a country and who knows how many lives.
This war is about lives and people, theirs (Iraqi's) and ours. We could site around and discuss this till the fires of hell freeze, but the bottom line here is "freedom" and for that we would all lay down our lives.
There is an old saying, "you can please some of the people some of the time, but not all of the people all of the time."

Have a good weekend gentlemen.
And yes, I'm a Canadian and I believe Canada should be supporting and participating. But then the whimpy ass liberals who are in power don't agree with me either.

heck or check? Can't be BOTHERED to check your own postings?!

NO, licence changes that allow more people to start off in the hobby
more easily don't really affect you. How could they? More crowded bands?
Just stick to your beeping - you won't be bothered there.

> > > until the FL arrived...at least 2800 vhf-only people werent that bothered
> > > about hf... and now look
> >

> 3 years ago

Do you have to be so ridiculous? The RAE is relevant to getting a licence,
Morse is not relevant to other modes on HF.

> > They're a beginner on HF though, which as we know is so much harder than

>
> thats the joke that has been allowed to persist.

NO, they did yet another 'test' to improve their licence arrangements - to
gain access to more bands. Sounds like progress to me.

You're having trouble with logic again. Which is it to be :
a) HF needs an extra test, so Class Bs are beginners on HF

b) HF doesn't need extra test, so Morse testing can be scrapped
either way I'm happy... you're WRONG as usual

Let's see. Every Liberal I've ever talked to only seems to repeat that what
he has been told. Original thoughts from a Liberal usually boil down to,
"What day is it?" and, "Who does Helen Thomas hate today?".

as has been demostrated on this newsgroup there are plenty of people who
want hf for nothing.

whilst others are working to get what everyone knows is required.

> one thing to argue against, advocate against, a certain aspect of the
> licensing procedure (his position) and quite another to advocate the
> elimination of licensing entirely (your position).
you OBVIOUSLY have no idea on what the main thrust of neverchucked wants.

please read plenty of other posts from the likes of MEGHERTZ NEVERCHECKED
and others who believe that HF is theirs and its only the likes of
old-coffin-dodgers who are holding them back from getting on hf for
absolutely no effort or achievement whatsoever.

> discuss an issue and quite another to run around screaming useless
> hyperbole.
i predicted over 6months ago that the howlers on this newsgroup would be
overtaken by comlete beginners who are willing and able to do a simple
5wpm morse test and last december a complete beginner succeeded where 2800
couldnt be bothered.

i further predicted that the behaviour towards elders on hf will go down
the pan once the morse test is done away with...
going by the attitude to being reminded of the current regulations on this
newsgroup is plenty of proof to what will happen next year.

3 years ago i remarked that if some people had their way, that amateur
radio licenses would be printed on the back of corn-flakes packets...
going by the latest howls on this newsgroup ...i might be proven right
again!

you obvoiusly havent been reading this newsgroup for very long and i
suggest you familiarise yourself with the lazy
wah-wah-mommy-i-want-hf-for-nothing brigade - you might learn something.

there are people on this newsgroup who want everything for nothing
and if you give them an inch they will take 2800 miles !!!

then i decised to lookup w5net on the fcc and other websites...

> Dwight Stewart (W5NET)

according to http://www.wm7d.net/perl/ulsquery.pl

Call: W5NET Class: Technician

STEWART, DWIGHT
PO BOX: 50053
MYRTLE BEACH, SC 29579

Issued: 08/03/1999

For the coax, try www.cablexperts.com . Amidon and Palomar would have cores,
but I don't know what the exact urls are. If nobody else comes up with it, I
can find out about the teflon coax.

Your right....especially when it means I have to like butt pirates and all that breeds. Oh and lets not forget about 'gun control'. Hey I tried to buy a gun on Sep 12, 2002....None to be found. Can you say Hypocrite?

The thing about conservatives is we know the difference between right and wrong. Decent and bad. Good and Evil. And yes we do tend to stick with what works. You should try it. Maybe you wont screw up the next generation if you do.

Dan/W4NTI

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th/March, through Sunday, 23rd/March there were 228 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V7, V8, VE, VK, VK9N, VP2V, VP5, VP6, VP8, VP8/h, VQ9, VR, VU, XE, XT, XU, XW, YB, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Leo, UT1WL (a member of Lviv Shortwave Club regional branch of UARL) is currently working for one of the companies in Conakry in the

Republic of Guinea. He obtained the license from the local authorities (as of March 16th) to operate as 3XY1L. He is expected to be active during the year 2003. This is not a DXpedition, and he will be active only during his spare time on the weekdays after 1800z and probably in the daytime during the weekends. Most of his activity will be on 20 and 15 meters. However, he will later try to activate 40 meters. Over the past week, he was mainly on 20 meters (watch 14195 and 14210 kHz) and activity took place between 2000-0000z. There were a few QSNs reported on 40 and 15 meters. Leo is using a TS-50S transceiver on battery power due to the hard situation with electricity. During his stay there, Leo will try to activate some local islands (including some new IOTAs - AF-NEW) but the exact dates will be announced later on. QSLs should be sent to UY5XE: George Chlijanc, P.O.Box 19, 79000, Lviv, Ukraine (either direct or via the bureau). A special thanks to Branko, YU1FW, for his consultations on the info about obtaining the license in Guinea.

4L, GEORGIA. Look for Shota, 4L6AM, to be active in the CQ WPX SSB Contest as a Single-Op/Single Band (band not mentioned)/High Power entry. QSL via the address on QRZ.com.

5Z4, KENYA. Tom/DL2RUM (5Z4BL) and Jan/DJ8NK (5Z4BK) will be on a vaction trip from here, March 30th to April 12th. Activity will be on CW/SSB/RTTY. No activity on 160/30/6 meters. QSL via their home callsigns.

9K, KUWAIT. Faisal, 9K2RR, is expected to use the new contest club callsign 9KCC next weekend. Activity for this new callsign is planned to be used on March 23rd on CW/SSB on 15 meters between 1200-1600z. More details about the new contest club can be found on the Web page: http://www.qsl.net/9kcc and http://www.9kcc.com

C5, THE GAMBIA. Andrius, LY2TA, will be active as C56TA from March 25th to April 7th. Activity will be on 160-10 meters SSB/CW/RTTY. QSL via LY2TA: Andrius Ignotas, P.O.Box 15, Kursenai, LT-5420, Lithuania.

C5, THE GAMBIA. An international group of operators LY2TA, RA4HTX, RZ4HF, YL1ZF, YL2KL and YL3CW will be active as C5P in the CQ WW WPX SSB Contest (March 29-30th) and EA RTTY Contest. Their operating class is unknown. QSL via YL2KL. The group will be there for 2 weeks from March 25th through April 7th and will use the following callsigns: YL2KL - C53KL, YL3CW - C53CW, YL1ZF - C53ZF, LY2TA - C56TA, RZ4HF - C56HF and RA4HTX - C56HTX. They will be active CW/SSB/RTTY on all HF bands.

C5, THE GAMBIA (Lighthouse Activity). Kas, YL1ZFI, one of the international operators from the operation above, plans to be active from Fort James Island and also activate the lighthouse there (reference GAM-002). To indicate that he is on the island, Kas will sign /p to his Gambian callsign C53ZF. If you hear him without the /p then he is located at the hotel in Banjul and not on the island.

CQ9, MADEIRA ISLAND. Operators CT3EE, CT3BD, CT3DL, CT3IA, CT3IQ, CT3EN, CT3KU, CT3KY and CT3HK will be active as CQ9K in the CQWW WPX SSB Contest (March 29-30th) as a Multi-Single entry. QSL via CT3EE or CT3BD or CT3DL.

The station is located in Santo da Serra- Madeira Island and is composed of 1 FT 1000D, 1 FT1000MP, 1 TS 870, 2 IC756PROII, 2 Ameritron AL1500, 1 Commander, 1 Heathkit 922 Antennas: 2x3 Elem. Tribander, 1x6 element for 20m, 1x2 element for 40m, 2 dipols for 40m, 2 dipols for 80m, and a Delta loop for 80m.

CS6, PORTUGAL. Look for CS6RPA to operate as a Multi-Single station during the CQ WPX SSB Contest from Mendro Mount in Alentejo, South Portugal. This is a TEAM PORTUGAL joint effort by ARPA (Associacao Radioamadores Planicie Alentejana) and CRCV (Club Radio Costa Verde). The club station of ARPA will be used, including two Cushcraft A4S and a 40/80 m dipole. TEAM PORTUGAL this year is: CT1EAT, CT1ERK, CT1ETE, CT1GQN and CT2IAF. QSL cards should be addressed to CT1EAT direct or via bureau.

DXCC (EARLY) LISTING AVAILABLE. The DXCC 2002 Annual Report is now available on the ARRL web site at:
http://www.arrl.org/awards/dxcc/listings/2002-annual-list.pdf
The report is in Adobe Acrobat format, and you will need Acrobat Reader 4.0 or later to read it.

EA8, CANARY ISLAND. Richard, EA8AJO, is expected to be active in the CQ WPX SSB Contest as a Single-Op/All Band entry. QSL via CBA.

EA9, CEUTA AND MELILLA. Jim, N6TJ, will be active as EA9LZ during the CQ WPX CW Contest as a Single-Op/All Band entry. QSL via VE3HO (this operation ONLY).

FO, FRENCH POLYNESIA. Jean-Baptiste, F8DQL, will be active as FO/F8DQL from Tahiti (IOTA OC-046 and DIFO FO002) between May 3-25th. This will be a CW ONLY activity. Jean-Baptiste has also planned a several day trip to Moorea (IOTA OC-046 and DIFO FO010) whose dates will be provided later on. Suggested frequencies are: 14030, 21030 and 28030 kHz (+/- QRM). QSL via F8DQL to the French REF Bureau or direct to: Jean-Baptiste JACQUEMARD, 241, Boulevard Voltaire, F-75011 Paris, FRANCE. Direct QSLs without sufficient postage will be answered by the bureau.

FY, FRENCH GUIANA. Didier, FY5FY, will be active in the CQ WW WPX SSB Contest (March 29-30th) as a Single-Op/All Band/High Power entry. QSL via FY5FY.

HC8, GALAPAGOS ISLANDS. HC8N will be active during the CQ WPX SSB Contest in the Multi-Multi category with the following operators: N5KO, XE1KK, NM5M, KI7WX, OH0XX, K5KA and LU8ADX. Pre-contest activity will begin on Monday, March 24th on all bands from 160-6 meters plus FM Sats. QSL via W5UE.

HU, EL SALVADOR (Update to OPDX.603). Holger, DL7IO, informed OPDX that he and Birgit/DL7IQ will use the callsign HU1M for the whole time they are there (March 24th-April 11th and not only for the contest). Their contest effort is planned for a Multi-Single entry or possibly a Multi-2 entry if they get help from some local HAMs. On the weekend of April 5-6th, they will be active from Meanguera Island (NA-060) as HU1M/3. The schedules for the HR4 Island (Amapala Island) is not confirmed yet. Also, the callsign is not sure yet. Holger asked for HQ4M and the decision was expected last

Wednesday, however, nothing was heard as of print time. If the callsign is denied, they will use HR4/homecall. They will have two radios (FT890) and 1x PA (500 W). Antennas will be: a beam for 20-10m, a HF9V vertical (80-10m) and dipoles (160/80m). They will be active on 160-10 meters on CW, SSB and RTTY. Holger cannot promise SSTV. The QSL route will be DK7AO. A log search will be available after their return. ADDED NOTE (from Holger): Germany had a change in their postal rates. For small letters (to outside Europe destinations) there is no difference between airmail or surface mail charges. Every letter costs 1.50 Euro. So it needs 2 green stamps or better one IRC. Letters mailed inside Europe are cheaper now and cost 51 Eurocent.

IOTA (XE) OPERATIONS. Look for a group of operators from Radio Club Cancun (RCC) to activate a few Mexican IOTAs using the callsign XF3RCC during the first part of April. All activity will be on 160-10 meters CW/SSB/RTTY. Their expected schedule is as follows:
Cozumel (NA-090) - April 3-6th Mujeres (NA-045) - April 8-11th
Holbox (NA-045) - April 6-8th Contoy (NA-045) - April 11-13th
Their operations are to celebrate the first anniversary of the RCC. QSL via XE3RCC: P.O. Box 1883, Cancun, Quintana Roo 77500, Mexico

IOTA NEWS.....
AF-018. (UPDATE) Operator Giuseppe "Joe", IT9BLB, informs OPDX that he and the International team will activate Pantelleria Island (CQ Zone 33, IIA TP-01 and WAIP TP) as IH9P during the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. Joe states that it will be the 6th time to be active from there (IH9P M/M since 1998). The team usually stays on the island for about 8 days before the SSB contest, operating during their free times. Pre-contest testing times will be on all WARC/HF bands, on CW and RTTY. QSL via KR7X. More details will be forthcoming closer to contest time. Please visit the Web page at: http://www.ih9p.com/

AF-064. (Update to OPDX.596) Robben Island is listed amongst the top 500 most wanted IOTA groups in the latest IOTA Directory. There have been several fairly low-key operations in recent years, mainly on SSB only. The team, consisting of Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, has been allocated the special callsign ZS1RBN. Additionally, the lighthouse on the island counts as SAF023 for the Amateur Radio Lighthouse Service (ARLHS). The team plans to activate the island between April 4-7th, and, propagation permitting, have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 40-10 meters. QSLs will be handled by G3SWH, either direct to his CBA with SAE and return postage or via the RSGB bureau.

AS-017. (Update) Look for Nobu, JQ1EYN/6, to be active from the uninhabited island of Komaka Island (next to Okinawa, which takes about 15 minutes to get there by the express ship). If

the WX is bad, he will not be able to reach the island. His activity will take place April 27-28th (possibly the 29th) on CW/SSB on all bands including 6 meters. Main frequencies will be: 21260 kHz (SSB) and 7030 (CW). He will use a FT-817 with a 50w PWR AMP and portable generator. Antenna will be a Delta loop (wire)+ATU(icom AH-4). QSL via the bureau or direct to: Nobuhiko Hiruma, Engel Kawasaki Glandia 1405 higasida-chou, Kawasaki-ku KAWASAKI city KANAGAWA, 210-0005 JAPAN.

AS-125. Winit, HS1CKC (HSDXA's preasident), has announced a mini DXpedtion to Chang Island in the southeast part of Thailand during April 5-7th. The callsigns to be used are as follows:
HS0GBI/P 80m and 40m CW QSL via CBA/Bureau
HS1CKC/P High band SSB QSL via CBA/Bureau
E20HHK/P High band CW QSL via E21EIC
Operating frequencies will be on the IOTA frequencies. The operators will include: HS0GBI, HS1CKC, E20HHK, HS9IFG, E20NTS, E20RRW, HS0NNU, HS6MYW, HS6TIM and E21LSE.

EU-025. Giuseppe "Joe", IT9BLB, will be active from Sicily Island as IU9S during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/Single Band (20m)/High Power entry. QSL via IT9BLB.

EU-051. Members of the "Project DX Team" (Ari Lomazzo), which includes operators Andrea/IK2XDE, Giovanni/IK2JYT, Antonio/IK2ZJR, Dario/IK4MED and Angelo/I2ADN will activate Ustica Islands (IE9, IIA PA-001 and WW. Loc. JN68OR) between March 26th and April 1st. Activity will be on all HF bands 80-10 meters plus 50 MHz and Satellite, on SSB, CW, RTTY, PSK31 and some SSTV. The callsigns used during their activity will be IE9/homecall (this also includes their activity in the CQ WPX SSB Contest). During the week they will concentrate their activity on the WARC bands and also on the digital modes. So, this is your chance to work the IE9 prefix on all bands and modes. All QSLs will be via their home callsign for sure via the BUREAU.

EU-124. The North Wales Radio Rally Club, Bardsey Island Lighthouse DXpedition 2003, will take place from August 17-23rd. They will be using the callsign GW0NWR/p. Operation will be on 80-6 meters SSB and CW. The Lighthouse references numbers are LH-0685 for the World Lighthouse Award and WAL-001. QSL via GW0DSJ: E. Shipton, 34 Argoed, Kinmel Bay, Rhyl, Conwy, LL18 5LN, Wales, UK (w/ IRCs or return envelope with postage paid).

OC-242. A group of YB operators will be active from Rajuni Island, as YE8A. QSL via YB8BRI. They hope they will be active during next weekend's WPX SSB Contest. More information will be available during the operation. Frequency Band plan can be found on Web at:
http://www.ok1jr.com/ye8a/ye8a-rajuni-island-oc-242.htm

KH2, GUAM. Yoshi, JE2EHP, will be active from here as K1HP/KH2 between April 11-14th. Activity will be on 80-6 meters CW/SSB. QSL is via the Bureau to JE2EHP.

KH3, JOHNSTON ISLAND. John, KT6E, will be here for the next several months. Reports indicate that he is using just 100 watts with a long wire and has been worked on 20 SSB. QSNs show him signing KH3/KT3E and active on 14185 kHz around 0615z. John is there working, so his operating time will depend on his work schedule. "The Daily DX" is reporting the QSL address of: John Lee, PO Box 153, APO AP 96558 Johnston Atoll.

MU, GUERNSEY. Members of the Scouts Radio Club SP5ZCC (Operators SP5UAF, SP5LCC, SP5MBQ and SP5ULC/M0ULC) will be active from Guernsey Island from April 2-8th. This operation is organized to celebrate 23 years of the Scouts Radio Club SP5ZCC and also 70th Anniversary of the SP DX Contest. The callsigns to be used: MU/SP5UAF, MU/SP5LCC, MU/SP5MBQ and MU0ULC. The callsign MU0ULC will be used during the SP DX Contest. SPDXC is a single-country contest (SP HAMs work stations outside Poland), but all callsigns will be answered. Before and after the contest, operators will be active on all possible bands and modes. All QSL cards (for all callsigns) go via SP5ZCC (the best via the bureau).

OY, FAROE ISLAND (DXpedition Update). Rob, PA5ET, reports that thanks to a strike at SMYRIL LINE (the ferry line between Denmark-Shetland Islands-Faroe Islands) they had to change their planned OY activity. They are currently planning to go one week later which means they will arrive in the early morning of Monday, March 31st and stay until April 10th. Unfortunately, they will miss the CQ WPX Contest. The published callsigns will remain the same: OY7ET operator PA5ET, OY7QA operator PA3FQA, OY7TW operator GM4FDM, OY7WB operator AK0A, OY7WP operator PA3EWP and OY8PA for 160 meters and probably digital modes. On 80 meters they will be using their individual callsigns in contradiction to earlier announcements. They will have 3 stations with amps with one to be dedicated to digital modes. During the dark periods, they will mainly be active on 80 and 160 meters. You can expect lots of digital mode activity on the WARC bands, so this is your chance to fill the OY gaps on all bands and modes. All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. They hope to upload logs on daily basis using cellular phones. The latest developments can be found on the LLDXT web-site: http://www.qsl.net/lldxt Currently, they are working on a back-out plan if the strike is still on next week, and will go to the Isle of Man.

P3, CYPRUS. Operators RA9JX, RZ9UA, UA9UR, RW9UP, RW4WR, RA0AM, RZ9OA and UA9OTM will be active as P3A during the CQWW WPX SSB Contest (March 29-30th) as a Multi/??? entry. QSL via W3HNK.

QSL INFO AND NEWS.....
DO NOT QSL VIA THE BUREAU. Floyd, N5FG, informs OPDX that N5AU will not answer Bureau cards..

QSL H44H via Kazuo Miyamura, P.O. Box 321, Port Moresby, PAPUA NEW GUINEA.

Oscar, HK6DOS, informs OPDX that the QSL Manager for HK6DOS, HK6KKK, HK6ISX and HJ3ISB is Pepe, EA5KB. Also, the QSL Manager for HK6PSG is Paco, EA5OL.

QSLs for the Caribbean Tour 2002 J7/VP2M have been mailed this past weekend per Rob, PA5ET.

Online logs are now available for JS6QVP and JS6QVQ from the IOTA AS-047 Daito Island operation at:
http://www.aa.alpha-net.ne.jp/ji5rpt/as-047/search-j.html

K1B QSL REMINDER. Dave, K4SV, K1B North America QSL Administrator, K1B Team member (as KW4DA), wants to remind everyone that K1B QSLs can be sent to Stephen, K4YL (direct ONLY, NO BUREAU QSLS). They have put about 2000 QSL requests in the mail so far, and they receive an average of 25 QSLs daily from all over the world. Please keep them coming, it's working! Please contact Stephen, K4YL, the new K1B QSL manager, (if you have any special requests) at: K4YL@highstream.com
Stephen will do all he can to help you in obtaining all K1B QSL cards. Send your direct requests to: Stephen Grose, K4YL (ex W4SMG), PO Box 183, Flat Rock, NC 28731-0183, Their goal is to get everyone QSLed for K1B who has not received their cards. Please remember:
USA - send SASE.
DX - send SAE, one Green Stamp preferred or one Large IRC accepted.

NOT THE QSL MANAGER. Chuck, N1NA, reports that he has been receiving QSL Cards for PJ5NA, and he is NOT the QSL Manager nor the operator of PJ5NA. The correct QSL Manager is K1NA.

PS7AHR is the official station of "The Brazilian Amateur Radio Historical Archive", the only organization in Brazil that is devoted to documenting and preserving the history of amateur radio in Brazil. QSL via the Bureau, or P.O. Box 2021, Natal/RN, 59094-970, Brazil.

QSL SO6A via SP6IHE. Jan, SP6IHE, states this is a special contest callsign.

Activity as TG0AA in the 2003 ARRL International DX CW Contest was done by operator Dennis, K7BV. QSL direct to: Club de Radioaficionados de Guatem ala (CRAG), P.O. BOX 115, CORREO CENTRAL, GUATEMALA CITY 01011, GUATEMALA. Their Web page is at: http://www.iaru.org/iaru-soc.html

Vasilij, RW6HS, reports that he is now the QSL Manager for: UN7MM, UK8CAD and UK8CWA.

It was announced (by Kan, JA1BK) last week that the VP6DIA logs will be available on-line sometime after March 22nd, when QSL Manager Yuichi, JR2KDN, has returned to Japan from Ducie.

S05, WESTERN SAHARA. Operators Marq/CT1BWW, Fernando/EA1BT, Juan/EA2RC, Julio/EA5XX, Max/I8NHJ, Jordan/KD7RCD, Doug/N6TQS, Hrane/YT1AD and Miki/YU1AU will be active as S05X from April 16-21st. Activity will be on 160-6 meters. QSL via EA4URE. Toni, EA5RM, URE Magazine DX Editor, will act as pilot station. Any questions or comments can be sent to him

at: ea5rm@ure.es Log will be posted at after the team returns
back home at: http://www.ure.es

SPECIAL EVENT. Look for the special callsign, EW5HST, to be active during the "5th World High Speed Telegraphy Championship", which is to take place in Minsk, Belarus, on May 4-8th. For the moment, the callsign, EW5HST, will be used by the Championship's organizers. The "CW ONLY" station will be active around 1800z on the weekdays and at random (but longer times) on the weekends. The expected frequencies are to be around 30 kHz from any band edge; 14030 kHz will be used mostly. Any question regarding the Championship can be asked during any QSO. QSL via EU1SA. Details of the Championship can be found on: http://hst2003.osto.by/

SPECIAL EVENT. Sam, VE3XAP, informs OPDX that the Industry Canada has authorized the use of the following "Special Event Prefixes" to celebrate 50th Anniversary of the National Library of Canada between May 24th and July 27th. Look for Canadian operators to change their prefixes as follows:
CK for all VE's CY for all VO's
CJ for all VA's CZ for all VY's

ST2, SUDAN. Claudio, IV3OWC, has been very active as ST2CF over the past week and will continue until March 31st. Activity over the past week has been on 40/20/17/15/12 meters. Watch 24945, 21295, 18145, 14195 and 7048 kHz. Look for him to be active in the CQ WPX Contest. Also, check out the following Web page for more details at: http://www.irae2.com

ST0, SUDAN. The ST0RY team continues to be active. Activity has been heavy on the lower bands and the WARC bands, mainly CW with some RTTY and very little SSB. Three of the five operators are CW operators. They expect to leave the evening of April 2nd. For updates, watch the Web page at: http://www.qsl.net/st0ry

TO3, MARTINIQUE. Danny, T93M, will be active from March 25-31st from the QTH of Laurent, FM5BH, on Martinique (IOTA NA-107) as FM/T93M. Activity will include an entry in CQ WPX SSB Contest in the Single-Op/All Band/ High Power category using the special callsign TO3M. Outside of the contest, you can expect him on the WARC and Low Bands. QSL for both callsigns goes to DJ2MX who recently moved to this new address: Mario Lovric, Kampenwandstrasse 13, D-81671 Muenchen, Germany. Mail sent to the old address (Mario Lovric, Am Oelberg 11, D-61231 Bad Nauheim, Germany) will be forwarded until April 2004.

V3, BELIZE. Jay, K0BCN, will be active from Caye Caulker (IOTA NA-073) as V31MX during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/ Single Band (15m)/Low power entry. QSL via K0BCN.

V6 & V7, MICRONESIA AND MARSHALL ISLAND (Update/Delay). Jeffrey, KI0RO, reports, "Due to inclement weather, my departure from Denver, Colorado, has been delayed. As a result, I will be arriving in each location a few days late. However, due to airline availability, I will be staying a few days longer in both Kosrae and Pohnpei." Here are the new dates for Jeffrey's IOTA operations:

Roi-Namur (OC-028) - March 26-31st as V73/KI0RO
Kosrae (OC-059) - April 2-7th as V63JE
Pohnpei (OC-010) - April 9-14th as V63JE
All the other information in OPDX.603 is still valid.

VK9X, CHRISTMAS ISLAND. Four members of Yamato ARC (JA1ZEK) will be active from here between April 26th and May 2nd. They will be on all HF band from 160-6 meters CW/SSB/RTTY. They will have two 400 watts amplifiers with four rigs. Operators and their callsigns are: VK9XC - Karl/JA3MCA, VK9XE - Kuni/JA8VE, VK9XK - Sasi/JA1KJW and VK9XY - Mat/JA1JQY. Their suggested frequencies are:
CW - 1822, 3507, 7007, 10007, 14007, 18077, 21007, 24897, 28007 and 50110
SSB - 3799, 7080, 14170, 18130, 21270, 24940, 28470 and 50110
RTTY - 14080 and 21080
6m beacon will be on 50.110MHz
QSL via each operator's home callsign as follows:
JA3MCA - Tachibana Kaoru, 1-7-5-403 Tsukimino, Yamato, 242-0002 JAPAN
JA8VE - Saito Kunio, 2-26-5-554 Nishitsuruma, Yamato, 242-0005 JAPAN
JA1KJW - Nakayama Hisashi, 1-17-8 Shibuya, Yamato, 242-0023 JAPAN
JA1JQY - Matsui Shigeo, 2-31-10 Shimoseya, Seya, Yokohama, 246-0035 JAPAN

ZW2, BRAZIL. Sergio "CRIS", PY2TV, will be active in the CQ WPX SSB Contest using the special callsign/prefix ZW2TV from Sao Paulo, Brazil. He will be Single-Op/Single Band (10m)/ Low Power entry. QSL via the bureau or direct to PY2TV (SASE+postage).

ZW90, BRAZIL (Special Event/Callsign). Paul, PY3DX, Club Director of the "Associacao De Radiomadores", reports that their club station, PY3ARD (AR SOGIPA, from southern Brazil), has obtained from the Brazilian Telecom the special callsign ZW90S throughout the year. The callsign is to celebrate the 90th anniversary of the 001RS - Gerge Black Scout Group that was created back in 1913 and is consider to be the oldest Scout Group in Brazil with uninterrupted activities ever since. The club will take part in the upcoming CQ WPX SSB Contest and will use the callsign for the very first time. QSL both callsigns, PY3ARD and ZW90S, via the bureau or direct to:
Associacao De Radiomadores da SOGIPA, Rua Barao do Cotegipe, 400,
90540-020 - Porto Alegre, RS BRAZIL.

The difference between good and evil? So then if you truly think you know that difference, why is it that your people don't support a war with Iraq? Saddam is evil, right?

>yes we do tend to stick with
> what works. You should try it. Maybe you wont screw up the next
generation
> if you do.

Think about what the world would be like if everyone thought that way. There would be no America (except for natives). Back in that time most people thought there was no America. But they changed their ideas. You don't want the world to have the same ideas and technology as today in 50 years, do you?

Thousands of the Iraqi people are dying this week - and it is not "the
tyrant" killing them.

Hello all,

My PA-SitRep website features a PA County Map whereby visitors may click on an particular County in the Commonwealth to get basic emergency communications information for each County.

Here's the address for the clickable map:
http://www.pa-sitrep.com/#MAP

I've made great progress over the last several years with this project but I still need a lot of fills.

If you think you may be able to provide emergency communications information for a particular County in PA (i.e. ARES/RACES repeaters, County EMA freqs and or web addresses, etc.), please take a moment to check out the map and see if you have any information to add to any of my PA County pages.

I'm also always looking for more PA-SitRep Contacts (Amateur Radio Operators and scanner enthusiasts are a perfect fit). Here's where you can learn more about the PA-SitRep Contact project:
http://www.pa-sitrep.com/contact.htm

PA-SitRep is a Pennsylvania Emergency Communications information website and is a 100% volunteer/non-commercial project.

tnx es 73

I'd like to start in with ham radio, and intend to start studying for a license test. But can someone answer these questions to help me decide what license to apply for and what transciever I should be thinking about?

1. Does technicial level (lowest level) limit the direct range over which you can transmit? What is the general range in best and worst conditions?

2. Can this range be extended through a repeater? (I kind of thought this was an external station that gets my signal and then broadcasts it further: is this right?) If this is right, what type of range is possible with this mode?

3. Can a portable type transceiver be used indoors without an external antenna?

I guess that's all for now, though I have plenty more questions. I'm reading a book, but can't quite understand it all.

Thanks.

I'm currently studing for the license too, and what I found most helpful was getting some study guides from my local library. The ARRL's "Now You're Talking" is great. (Just watch out for some outdated versions ;)) I found this more helpful than studying via the internet.

Good Luck!!

Greg

Looking for an inexpensive, 800MHz radio (HT or small mobile), at least 5 channels, for simplex use. Any leads would be appreciated (I always check eBay but not much to offer there).

Thx and 73s de KB1ILS

Repost from like a month ago, but here we go again....
[!! crossposted in
rec.radio.amateur.equipment, rec.radio.amateur.homebrew,
rec.radio.amateur.misc]

Hi,

I'm thinking about changing my NiCd cells in the battery for my Yaesu FT-50 Handheld to NiMh type instead. Mainly for 2 reasons:
1) larger capacity and 2) the old ones cannot hold their capacity for longer periods of time anymore.

The battery is of the type FNB-41, 9.6 Volts and 600 mAh. I don't know about the number of cells, their size or voltage, but i bet it is 8x1.2 Volts.....

Does anyone have any experience in opening the battery case for this particular type of battery? I have an idea about the casing being welded (melted?) together rather than glued, and i don't want to break it if i can avoid it or it is a waste of time to try.

Ideas, anyone?

Also, if anyone have any comments on the internal charging circuitry of the FT-50 (if it can charge NiMh or not)... i would be grateful.

73 de OZ2BRN

The Radio Shop

Is now open in Odessa,TX

We Specialise in repair of tube type R.F. Amplifiers.

We Work on most brands of solid state R.F. Amplifiers.

We Also buy, sell and trade R.F. Amplifiers!

We Do minor repair of ham equipment, like the light repair on the icom 746.

We have "Ham" equipment for sale and trade.

We Do work on C.B. Sets also, modulation upgrades, mic wiring, realignement

We can also find a lot of what you want to special order on equipment, and have good prices on top of all this!

Just let us know what you would like for us to do for you today, leave us a message at k5kdi@cableone.net

I changed my battery to the NiMH FNB-41 recently and I love it. And I
had the same ideas about cracking open the case and such. But before I
did I did a search the web and purchased one for less than 1/2 the price
(including shipping!) than I could get it from our local ham store.
Check out www.pandacomm.org.

At that price it was not worth the hassle for me.

Best Regards and 73's,
H Johnson

Haven't tried it myself, but I've heard that putting the battery pack in a
freezer for an hour or so weakens the joints, enabling it to be easily
opened.

And your point is? By stating that the 'West' forces its ideas on the rest
of the world by force of arms means nothing. That is the history of the
world. It is what we humans are best at.

Im just glad I live in the country that has the biggest and the best. And
for once in a LONG TIME is willing to use it.

We didnt start this little war. The ragheads did. Now its time for a
little payback.

And that is why the "non-Westerners" have been beating a path to
our door for the last 100+ years. All of them looking for that
"freedom" that other countries seem to lack.

Hello,

I am looking for a 6 Meter, 2 Meter, and 70 Centimeter amplifier to go with this great hand held I have. I don't need a lot of power but I do need a little more then 5 watts. The best would be around 50 watts for each band. Can you point me in the right direction I can't seem to find one that does all three much less one that does 6 Meters?

Thanks for the help,
Robert

And you suppose that 30 more years of his reign over those people is
actually going to be one of peace, love, and understanding. Hardly the fact
when you consider the past 30 years of his bloody rule. Actually longer than
that considering that he first gained prominence in the coup of Al-Bakr back
in 1968.

Religion itself *never* won a war, even if there are those who think it did.

"superiority in applying organized violence"? Of course! But did you honestly think that we "won the
world" with UNorganized violence?

And what do you mean by "won the world"? The world is a very large place and does not belong to any
one country (or person).

Before you go tossing around words, like "Westerners", I suggest you try studying American history and
finding out all you can about it, instead of the propaganda you have obviously been reading. I live
in the GREAT! country of the United States of America, and if you want to include me in your label of
"Westerners", that's up to you - BUT DON'T! - because you are wrong to assume that "Westerners" means
all of us from the 'west'. Personally, I have never tried to win the world through any means. And
what one "Westerner" thinks may not be what another "Westerner" thinks. That's what "America" is all
about - the freedom to choose, or not choose, or choose whatever way you desire (within reason).

Steve

Will someone please tell old Baghdad Bob that his constant grumbings and moaning about President Bush will not change a thing?
Next time I am on the air when Bagless Bob starts up I am going to make it a point to rebut him and posit my thoughts. Somebody should stand up and shut him up.

I've done it several times to FNB-4A packs. Freezing helps,
but in the newest of my packs, Yaesu used a *lot* more
glue, making it very difficult to open without slight damage.
Maybe they want to discourage replacement of the pack?

My experience with the NiMH cells is that they self-discharge
much faster than NiCd batteries. Also, it seems that they
are a bit more fussy about charging. Maxim makes several
chips specifically for NiMH batteries, and I may build up a
charger using one.

Hi, G1HSM,
Thanks for the tip. I think i'll try it out soon.... because by now the battery seems to have died completely. I haven't tryed to boost-charge the NiCd-cells yet or anything fancy, mainly because i still want to improve the capacity of the battery anyway.....

no actually..... havent wandered back up the list this far in a few days.

you STILL pretending to be a beginner

meanwhile real beginners get on with it and pass you by, leaving you
behind them as they further their knowledge.

someone said referred to you as dipstick once --- i think she/he was right

ST CROIX, VI (AP)

In what has been described as a case for the record books, doctors at St Croix General Hospital surgically removed a missing Alabama man from the rectum of a well-known local resident this past weekend.

Herbert Schoenbohm presented to the hospital emergency room on Saturday, complaining of abdominal discomfort and extreme constipation. After performing a CAT scan, physicians were flabbergasted when the images showed a full-grown 250 lb adult male lodged completely within Schoenbohm's lower colon.

Schoenbohm revealed that the intestinal blockage was none other than Lloyd Davies, reported as missing from Athens, Alabama last week after failing to show up for work at Papa John's Pizzaria and Catfish Emporium.

Mr. Schoenbohm, who formerly held the amateur radio callsign KV4FZ, recently lost a long court battle with the Federal Communications Commission which resulted in the permanent revocation of his amateur radio operating privileges. He revealed that Mr. Davies, who has been a long-time friend and supporter during the litigation, made a special trip to the Islands to cheer up his mentor by engaging in a protracted session of ass-kissing.

According to Schoenbohm, the analingus got somewhat out of hand. Mr. Davies apparently performed his duties with such enthusiasm that he was sucked bodily into Schoenbohm's lower intestinal tract by the involuntary muscular contractions associated with orgasm.

Neither Davies nor Schoenbohm appear to have suffered any permanent injury from this unusual incident. Doctors successfully removed Davies using copious quantities of canola oil, and with the assistance of plumbers from a local septic tank cleaning service.

Davies, who explained that he is quite used to eating excrement, evidently found more than enough nourishment to survive his 3-day stint in Schoenbohm's rectal cavity.

After a thorough hosing-off, Davies was put on an airline flight back to the mainland.

2253. TH-D7 inverse video problem

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-27 07:40:14 UTC
From: Jack Twilley <jmt+usenet@twilley.org>
Message-ID: <86el4t9s0x.fsf@duchess.twilley.org>
Source record: 68198

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I've posted about this problem on eham and on the Yahoo group for the
TH-D7 but it can't hurt to bring it up here and see if anyone has any
useful input.

I have a TH-D7 and I really like it. The only problem I've had with
it is that every once in a while, the video goes screwy. The display
shows everything on that should be off and everything off that should
be on. For example, when I'm on high power and using the internal
TNC, the E and L will be illuminated, and the STA, CON, and PACKET
will be illuminated, as well as everything at the top except H and
TNC. The dot-matrix portion of the display is not only inverse but
also displays text upside-down and corrupted. When I say corrupted, I
mean that the letters aren't perfectly formed, but have aberrations.

It usually just goes back to normal a few days later, but it's been
this way for a week now and I'm running out of options. I've taken
the radio apart and reseated the ribbon cable, so it's not that. I
don't have the spare cash to send it in to Kenwood, so I'm hoping I
can find another solution.

Jack.

Hi,

My FT-50 is an early model, and the battery is probably just as old.... so I hope that they haven't glued it too much...
In detail - how do you open it ? I thought about running a knife or so along the assembly edge all the way around and then try to get a screwdriver or similar inside.... is that the procedure ?

I did a bit of surfing around to find alternatives to replacing the cells..... take a look at this:

http://www.mahaenergy.com/products/radios/nimhbp/yaesu/index.htm

One question comes into my mind: These battery packs - the cells inside - are they type AA or type AAA ? -it seems to me that the slim outline of the pack might not be wide enough for a type AA cell ?

If they really are AA, it seems that I can build a new battery pack on just about the same capacity for somewhere around 2/3rd of the price, at least when I convert it into Danish currency and account for overseas shipping...
-But as you mentioned, Leon, I might need to add a new charger circuit to make really good.

Once frozen, just a sharp rap on the kitchen counter/workbench will open
them. The cells are 2/3 AA cells, oddball size.. but readily available.

Great ! Thanks for the good news. I was a bit worried about having to cut it... not so much as my fingers being in danger but more of destroying the casing :-)

You are a dumb one aren't you? My actual name is James R. Bond. If you had a clue to where I reside, you could see my name in the telephone book.

After searching the archives, it appears to me that you are a sheep/follower. You attach yourself to any kind of club etc., that you think will listen to you and or let you join.

Most everyone here has you pegged correctly.

The funniest one was where you claimed to be the Chief of Communications for some organization called B.A.R.F., after perusing those archives, it would appear that you appointed yourself to that "position", a fellow named Herb who was the head of the B.A.R.F. said that you were nothing more than a lacky.

Cheerio,

James

I don't think I've seen anyone here mention the differences in charging requirements for NiCd and NiMH batteries. The chief difference is that NiCds can tolerate relatively long periods of overcharge, provided that the current is limited to about C/10 (e.g., 80 mA for an 800 mAh cell). While it's not good practice to leave them charging indefinitely, they aren't appreciably harmed by overcharge for fairly long periods. This makes NiCd cells convenient for appliances like, say, a battery operated vacuum cleaner, where a very simple and inexpensive charger can be plugged in for extended periods without worry about the battery's state of charge.

NiMH cells don't have this tolerance. Overcharging NiMH cells shortens their life considerably. In my one encounter with engineers from a manufacturer, the exact amount of life reduction wasn't clear -- apparently it depends a lot on the overcharge regimen. But all manufacturers of NiMH cells specifically recommend against overcharging them. If your rig comes with a simple-minded charger with no overcharge control, you're likely to see shortened battery life if you consistently allow the batteries to overcharge. Ideally, you should use a modern charger which detects when the battery reaches full charge, then terminates or drops back to a very low trickle charge rate (C/30 to C/50). Many brands and varieties are available now -- the ones made by Maha can accommodate the varying number of cells you'll find in HT battery packs, and I'm sure others have this capability.

My own experience with self discharge seems to agree with what the manufacturers say -- it's approximately the same as for NiCds. You can find good detailed information at the manufacturers' web sites.

Oh, one other difference is that in general, NiCds retain their capacity better than NiMHs at extremely high discharge rates. This would probably include the current consumed by an HT when transmitting at maximum power. However, people I've talked to who've used NiMH batteries in an HT tell me that the increased nominal capacity of the NiMH cells more than makes up the difference. Even if you might not get quite a proportional advantage when transmitting, you still come out ahead. And you should get the full capacity difference advantage when receiving, which is where most HTs spend most of their time.

Amateur Radio Newsline™ Report 1337 March 28, 2003

Amateur Radio Newsline report number 1337 with a release date of Friday, March 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Keeping a repeater on the air in New Zealand could become very expensive and Australia considers complete restructuring of its Amateur Radio service. Find out the details on Amateur Radio Newsline report number 1337 coming your way right now

(Billboard Cart Here)

**

RADIO REGULATIONS: NEW ZEALAND MAY START REPEATER LICENSE FEES

Ham radio operators could soon be paying a lot of money to keep a repeater on the air in New Zealand. This as government regulators down-under look at instituting a new license fees that could make keeping a system on-the-air prohibitive for many clubs that sponsor multiple machines. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland New Zealand with the rest of this breaking story:

--
NZART stands for The New Zealand Association of Radio Transmitters and it is the official national ham radio society here in New Zealand. It also functions much the same as the ARRL in the United States and is a member of the International Amateur Radio Union.

NZART has received proposals from government telecommunications regulators that could cost hams in this nation a lot of money just to stay on the air. What the New Zealand regulators want to do is go to lifetime licensing with a one off license payment, That's the good idea. But there is more.

Regulators have also proposed fees for repeater and beacon licenses that are just plain unacceptable to NZART or the New Zealand ham radio community. Right now there is no repeater or beacon license fee. Under the proposed revision, there would a NZ$250 initial fee to put a one on the air and an on-going annual NZ $200 charge per system to keep it on the air. Currently the NZ to US Dollar exchange at just under 2 for 1.

The current no fee for beacons and repeaters was introduced some years ago for good reason. This proposal is a very significant policy change with what NZART says are serious and unacceptable implications. This is because, by definition and by international agreement, the Amateur Service is non-pecuniary and by international agreement cannot be used for money-making. Unlike other services

that can pass on costs to others, in the world of Amateur Radio, there are no "others". As a result, the NZART
intends to oppose this one, all the way.

Reporting from below the Southern Cross in Auckland New Zealand, I’m Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

An example of what Jim was talking about? Since each repeater would pay the $200 license fee, a club with 5 systems -- which is quite common -- would be paying $1000 New Zealand dollars every 12 months. (NZART)

**

RESTRUCTURING: WILL AUSTRALIA CHANGE ALL?

The debate in Australia about the need for a new Entry Level license has now been expanded into a call for the review of the entire amateur licensing system. Q-News Graham Kemp, VK4BB, in Brisbane is here with the details:

--

A research report entitled "Amateur radio and the challenge of change" has been co-authored by Jim Linton VK3PC and Roger Harrison VK2ZRH. Here is Jim Linton VK3PC giving a summary report of the Linton-Harrison Paper 2003.

--

(Note: This is an expanded version of what is found in the audio newscast)

VK3PC: “Amateur radio is at the crossroads, it can continue straight ahead down hill and virtually disappear, or set its own path by changing the amateur licensing system.

The time to act is now. When the UK Foundation License was introduced at the beginning of last year, there was not instant support for Australia to take a similar approach. However, some 15 months later there is majority support for a new license in Australia.

What the Linton-Harrison Paper 2003 does is to refocus the debate on the entire licensing system in Australia, the types of licenses, the syllabuses and examinations. We must not be tempted to simply copy the UK Foundation License. It does not meet Australian conditions and needs, and will not provide the necessary sustained growth for amateur radio here.

Australia's new Entry Level License should not be strictly an "operators' license" - a simple permit to use a type-approved transceiver. Entry Level Licensees should be able to enjoy the thrill and satisfaction of operating a radiocommunication system under as many circumstances and conditions and on a wide variety of bands across the RF spectrum as they wish to explore. This should be in keeping with long-standing amateur radio tradition and in line with the ITU definition, which says amateur radio exists for the purpose of self-training, intercommunication and technical investigations.

There will be changes to the licensing system as a direct result of the World Radiocommunications Conference in Geneva later this year where the mandatory Morse code testing requirement is to end.
The amateur radio community and the Wireless Institute of Australia must be ready to take action to revitalize the amateur radio licensing system at the earliest opportunity.

If the right action is not taken, the decline of amateur radio that the Linton-Harrison Paper identifies as being in now its 6th year, will lead to its ultimate demise.

Again, sustainable growth is absolutely essential. It is important to encourage people into the hobby who retain their license and their interest in amateur radio. A hobby that continues to interest, challenge or reward them.

Linton-Harrison advocates a two license system. An Entry Level with a syllabus set at a basic standard, along the lines of the original intention of the Australian Novice license. An Unrestricted License with a syllabus that is revised to comply with the ITU Recommendations for amateur licensing.

The Linton-Harrison Paper describes the current Novice and AOCP syllabuses as being "bloated" and beyond what is expected internationally. The WIA Federal Council agrees.

The current Novice license standard is recognized as being too high. It should not take 40 weeks study to get an amateur license. The Novice license is equivalent to the United States Technician License.

The current AOCP examination is also not relevant to the needs of today, and is at least two decades behind the times. The Linton-Harrison Paper calls for the whole licensing structure, the examination system and syllabuses to undergo a fundamental rethink. In its 8-pages the Paper covers much more than I can in this audio report.

--

Linton and Harrison wrote a similar paper in 1985 that is still being referred to today. (Q-News)

RESCUE RADIO: THE PARTNERSHIP FOR PUBLIC WARNINGS DRAFT IS NOW AVAILABLE

Here in the United States as well as around the world, letting the public know that an emergency situation is taking place can save lives. Because of this government agencies as well as the private sector are always trying to find betters methods of issuing alerts.

Now, comes word of a draft document for a new United States national emergency warning strategy from a group called the Partnership For Public Warning. A plan that some say holds the potential to truly modernize the way the public is informed.

For those not aware, the Partnership for Public Warning is a national organization formed in November of 2001. Its Board of Trustee’s include

representatives from every area of public warning communications including at least one radio amateur. The stated goal of the Partnership for Public Warning is to promote and enhance efficient, effective, and integrated dissemination of public warnings and related information so as to save lives, reduce disaster losses and speed recovery.

This document they have released is said to represent the first time anyone has proposed an overall emergency warning strategy for the United States. The concepts outlined help to look ahead to more advanced warning systems than the current E-A-S, weather service products, and other offerings. After reading it, the Partnership for Public Warning invites your participation and comments. You will find it in cyberspace at:
http://www.ppw.us/ppw/docs/nationalstrategy.pdf (GCC, PPW))

**

RESCUE RADIO: S.DAKOTA EMERGENCY COMMS LOOSE TOWER

The town of Mitchell South Dakota has last its 180 foot communications tower used for public safety and public radio. According to Jeff Pierce of the South Dakota Bureau of Information and Telecommunications, the tower fell Tuesday, March 18th after a ground anchor rotted and gave way.

Pierce said it knocked out State Radio communications used by law enforcement and other agencies, though nearby towers picked up that radio traffic. South Dakota Public Radio in the area was off the air until a portable tower was put up the next day but reception of weather alerts will not be possible until the fallen tower is replaced. Also, Mitchell police have not been able to use handheld radios and instead must rely on radios in their cars. A replacement tower should be installed and operational the week of April 1st. (CGC)

RESCUE RADIO: NJ HAMS RESPOND FOLLOWING PROPANE BLAST

New Jersey radio amateurs were called up following a large propane explosion in the city of Newton the weekend of March 8th. Amateur Radio Newsline’s Ken Locke, N8PJN, has the rest of the story:

--

It was Robert Stepanek, N2TTT who put out the call for more assistance. Stepanek is the ARES District Emergency Coordinator of Susan County who requested assistance in the form of additional operators after a propane tank exploded in the town on Newton New Jersey on March 14th. Hams from several

other New Jersey counties responded.

Amateur radios' primary role was to provide back-up relief shelter communications. Many of the evacuated residents were sheltered by the Susan County Chapter of the American Red Cross.

Pat Day is the Executive Director of that Red Cross chapter. According to Day, about 1000 residents who were forced out of their homes. Those who did not have other places to stay went to nearby shelters operated by the relief agency where some stayed until March 16th. Hams from Somerset, Union, Morris and Hudson
counties volunteered during the emergency.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting

--

Rich Krajewski, WB2CRD is the Public Information Coordinator for the ARRL's Northern New Jersey Section and provided most of the information for this story. (WB2CRD)

**

RESCUE RADIO: KILLER TORNADO HITS GEORGIA

Amateur Radio operators in southwestern Georgia have been helping in the wake of tornadoes that hit the region on March 20th. The storms left six people dead and over 200 injured. Georgia's Governor has declared a state of emergency in two of the hardest hit areas.

According to an ARRL Bulletin, ARES was activated in Mitchell, Worth, Lee and Dougherty counties. There, hams have been assisting various relief agencies including the American Red Cross, the Salvation Army and Georgia Baptist Disaster Relief.

ARES members of the Albany Amateur Radio Club also responded. Most of them are Red Cross volunteers. They took emergency response vehicles to the affected areas to feed victims and provide communications.

The ARRL Lee County Georgia Emergency Coordinator is Bob Smith, K4PHE. He says that several ARES members have been volunteering continuously since the tornadoes hit. (ARRL)

**

ENFORCEMENT: NY HAM WARNED ABOUT INTERFERENCE

A Patchogue New York ham has been told that he could face a fine of up to $7500 if he continues to violate the Amateur Service Rules. The FCC's Daryl Duckworth, NN0W, tells us who and why:

--

Duckworth: "Anthony Satornino, N2QPY, was issued a Warning Notice concerning deliberate interference with other licensees' on the 2 meter Amateur band and

engaging in unlicensed operation in the 10 meter band.”

--

Satornino was also asked to clarify his actual address for FCC records and to do so within 20 days. (FCC)

**

ENFORCEMENT: THE FCC VS. K1MAN - AGAIN

The FCC has again written to Maine radio amateur Glenn Baxter, K1MAN, regarding he operates his Amateur Radio station. Amateur Radio Newsline’s Paul Courson, WA3VJB, is in Washington with the details:

--

In its latest letter to Glenn Baxter, K1MAN, the Commission says he has not corrected problems that prompted their letter in January, which was based on monitored information and numerous
complaints to the FCC.

The FCC claims that Baxter’s Amateur Radio station is apparently being used for broadcasting non-ham radio matter including programs, talk shows, and children’s shows. The agency also alleges transmissions from his station are being used for deliberate interference and for communications where Baxter apparently's trying to make money.

The FCC also notes that some of the transmissions start and stop erratically, and leave the air with no identification as required by Commission rules. An enforcement official who wrote the letter said such operation indicates the transmissions are not under the control of a licensed operator.

The FCC goes on to say that the transmissions from Baxter’s station are tape recordings, which themselves wouldn't be illegal, but that in some cases it sounds to the FCC as if the recordings may have been questionably taken from an answering machine and off the telephone and broadcast without full compliance with the law. Enforcement authorities also wrote some of the transmissions are repetitive, apparently for weeks, of the same telephone calls.

Baxter has raised controversy for years with what he portrays as a daily bulletin service on 14.272, 3.972 and 3.890 MHz, prompting interference complaints from sideband and AM communities alike.

Baxter has patterned his program to the style of commercial talk radio, right down to having a toll free telephone number for listeners to call in and chat. The FCC wants Baxter to respond to its latest letter to decide what if anything to do next.

For the Amateur Radio Newsline, I'm Paul Courson, WA3VJB, near FCC headquarters in Washington.

--

This latest letter to Baxter came from Vincent F. Kajunski who is the FCC’s District Director in Boston Massachusetts. Kajunski also directed K1MAN to submit weekly reports detailing certain aspects of his stations on air operations. (FCC)

**

ENFORCEMENT: ALASKA BROADCASTER FACES FINES $137,000

A Christian broadcaster is facing up to $137,500 in fines for alleged wetlands damage on Alaska’s Kenai Peninsula. Fred Vobbe, W8HDU, of the National Radio Club’s D-X Audio Service has more:

--

The Anchorage Daily News reported on March 13th that Alexander Kozned of Ninilchik poured gravel and other fill into about three and a half acres of protected wetlands, as well as a stream and intertidal zone that drains into Cook Inlet.

The charges against Kozned come in a complaint filed this month by attorneys for the United States Environmental Protection Agency. The alleged violations are reported to have taken place during the summer of 2002 on Kozned's property a few miles north of Ninilchik. That’s a location where he reportedly wants to install a broadcast antenna array to broadcast religious programming to Russia and China.

An attorney for Kozned said the area affected is less than a tenth of an acre and that volunteers, not knowing about the wetlands, made an honest mistake. He also claims that the EPA's reaction amounts to overkill.

But officials at the federal agency said Kozned knew of the wetlands and filled them without a permit, despite a 1998 warning. The E-P-A and the U.S. Army Corps of Engineers issued cease-and-desist orders at that time after discovering that Kozned used earth-moving and road building equipment on wetlands to build antenna pads. The E-P-A ordered Kozned to restore and revegetate the wetlands he harmed. Kozned complied and was not fined in that case.

For the Amateur Radio Newsline, I’m Fred Vobbe, W8HDU.

--

The charge marks his second run-in with federal environmental regulators. (Anchorage Daily News)

EMERGING TECHNOLOGY: A NEW KIND OF POP UP SPAM

As if junk e-mail and pop-up ads weren't annoying enough on their own, now there's pop-up junk e-mail. This, as the result of a developer of bulk-mail software has figuring out how to blast
computers with pop-up spam over the Internet through a messaging function on many Windows operating systems. Amateur Radio Newslie’s Bruce Tennant, K6PZW, is here with more on how it works:

--
The software is called DirectAdvertiser. The company that developed it is reportedly based in Romania. In recent weeks, Internet users have reported receiving pop-up messages such as one touting university degrees without classes or books.

DirectAdvertiser does not hack into computers. Rather, it
uses a part of the Windows operating system called Messenger. It comes turned on by default with many Windows systems including 2000 and XP. Its meant for system administrators to broadcast service notices and should not to be confused with the various other instant messaging programs.

DirectAdvertiser was first reported by Wired.com, and appears to represent the latest attempt to bypass the increasingly sophisticated e-mail spam filters employed by leading Internet service providers and individual users. It also appears to circumvent federal and state laws designed to curb junk e-mail.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting

--

There is one major fault to DirectAdvertiser that makes it easy to beat. To receive the pop-ups Windows Messanger must be turned on. If you don’t want to get them -- just turn Messanger off. (OnLine Technology)

**

HAM RADIO IN SPACE: AMSAT SPACE SYMPOSIUM SEEKS PAPERS

The 2003 AMSAT-NA Annual Symposium, scheduled for October 17 to the 19th in Toronto Canada has put out its first call for papers to be presented at the event. The subject matter should be of general interest to amateur radio operators involved in satellite communications.

Papers may be presented by the author during the Symposium or simply offered for inclusion in the Symposium Proceedings publication. A brief abstract of the proposed paper should be submitted as soon as possible. The final date for abstracts is June 15th with copy ready papers must be received no later than August 15th. Electronic submittal is preferred in Microsoft Word format. E-mail electronic submittals to Wayne Chandler at ve3whc@amsat.org (AMSAT)

**

INTERNATIONAL - AFGHANISTAN: NEW KANDAHAR RADIO STATION TO BE LAUNCHED

On the international scene, the Boston-based N-G-O Afghans for Civil Society has announced that former BBC producer Akhtar Kohestani will serve as station manager for Afghan Independent Radio or A-I-R. This is a new station which is to be launched this spring.

A-I-R will be the first independent radio station to be based in the former Taliban stronghold of Kandahar in southern Afghanistan. Plans are under development for program sharing with the BBC, Radio Free Europe, Radio Liberty, the Voice of America and Radio Afghanistan. (Stewart McKenzie)

**

INTERNATIONAL - POLAND: NEW BANDS FOR SP HAMS

Also, SP5HS reports that Poland’s new national frequency allocation table came into effect on February 27th and its pretty good news for that nations hams. The new rules allows S P amateurs to use the 136 kHz band, while the 50 MHz band is now allocated to amateurs in Poland on a secondary basis. 6 meters is still shared with government services. (GB2RS)

**

BEACONS: 2 METER K7XC/B ON THE AIR FROM NEVADA

A new 2 meter propagation beacon is on the air from the state of Nevada. Amateur Radio Newsline’s Don Wilbanks, AD5DW, tells us who put it on and where to find it:

--

Tim Mareck, K7XC reports that the 2 Meter beacon operating under is call sign is now installed at it's new mountain top home here in grid square DM-09. Tim says that its on 144.288 MHz and operating from 4900 feet atop Lahotan Peak. This is above the Lahotan Reservoir near Silver Springs Nevada. Currently, the beacon consists of a 10 watt C-W transmitter into a single K-Q Loop at the 30' level on the tower. If you hear it, you can be pretty sure that 2 meters is open to Nevada from where ever you are.

Tike adds that the next project is a 6 meter beacon from the same site. It will use a Yaesu FT-620B running at 10 watts into a old style KB6KQ loop. This antenna will be placed 2' above the 2 meter loop on the same mast. Tim's target date to complete this phase of the project? He says hopefully sometime in June.

--

Again, the frequency of the K7XC beacon is 144.288 MHz. If you hear it you can send Q-S-N reports to Tim by e-mail at timm@cccomm.net (VHF Reflector)

**

DX

In D-X, six German operators will be active as A-35-X-M from Tonga to the 4th of April. They will concentrate on working Europe. More information is at www.df3cb.com/a35xm (OPDX)

And Tim Totten, N4GN, reports that all Oh-J-one thru Oh-J-8 QSL cards for W-R-T-C 2002 have been printed and ready for release. If you want to obtain your QSL cards directly, send an S-A-S-E before April 15th to Toni Linden, OH2JTE, Ohratie 16E218, 01370 Vantaa, Finland. Tim also says that plaque and T-shirt and Early Bird submission winners can be viewed at the following site. Its out there in cyberspace -- at www.n4gn.com/wrtc. (N4GN)

**

THAT FINAL ITEM: YHOTY 2003 NOMINATIONS SOUGHT

And finally this week, the nominating season for the 2003 Young Ham of the Year Award is now open. Our producer, Bill Pasternak, WA6ITF, is here with the details:

--

Each year, we at the Amateur Radio Newsline join forces with Vertex-Standard and C-Q Magazine to honor the accomplishments of a young radio amateur who has contributed in some special way to the hobby or to society through the hobby.

The rules are still the same. A nominee must be age 18 or younger, hold any class of Amateur Radio license issued by the FCC and live in the contiguous 48 states. And this year, thanks to Kevin Boudreaux, N5XMH, its easier than ever to file a nomination.

Kevin was the 1993 Young Ham of the Year award winner. He has now created a new on-line home for the award that has all the information, rules and downloadable forms needed to submit a nomination. And Kevin has taken it a step further. He has also created our first-ever fill in the blank on-line nomination form. Just provide the information on-line, click at the bottom of the page and your nomination is on its way to us.

After you finish filing your nomination, please click on some of the other pages and take a look around. You will find it in cyberspace at www.yhoty.org/2003.htm . There is also a link to it from our website at www.arnewsline.org . Printed forms are available for an SASE to the Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California 91350.

--

Our thanks to Kevin Boudreaux, N5XMH, of Dynamic Marketing for taking the time to create this new website. He is one Young Ham of the Year who is still an important part of the award. (ARNewsline™)

**

NEWSCAST CLOSE

> playing Waiting a while or a power off/on cycle brings the XM radio back to
> life.

Hmmm...In my 2002 Ford Ranger, I am using a 2M/440 Larsen through-the-glass antenna on the rear window left side, and a 220mHz Larsen through-the-glass antenna on the right side of the rear window. The mag-mount Delphi satellite antenna cabling was routed through the third brake light hole above and to the middle - inbetween these two antennas.

Keying up to 45W on either 2M, 220, or 440 has no detrimental affect on the Delphi's reception.

Clint Bradford, K6LCS / KAF3359

2271. Suggestions for switched mode power supplies?

Newsgroup: rec.radio.amateur.misc
Date: 2003-03-29 01:33:32 UTC
From: Jack Twilley <jmt+usenet@twilley.org>
Message-ID: <868yuzot1v.fsf@duchess.twilley.org>
Source record: 68216

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I'm building out my home station and I've decided to run everything
off of continuously-charged deep cycle batteries. I have about 100AH
of battery capacity but I need a large (30-40A) power supply to match
the maximum projected power consumption for my station. A bit of
googling has led me to believe that the best candidate for this task
is the B+K Precision 1692, but it's a bit pricey at three hundred
dollars. I'm trying to avoid buying a small power supply that will
meet my current needs only to outgrow it and have to buy a large power
supply soon, but if all the decent large power supplies are in this
price range, I'll have to seriously consider that approach.

Are there any good large power supplies that aren't this expensive?

Jack.

KC1ZQ announced (many months ago) that "there is no PorkButt". Even Mr. Schoenbaum wouldn't acknowledge the former WB2OTK by that nickname, but rather referred to him as "The Gentleman from South Carolina".

Therefore, you might want to refer to the former WB2OTK as "the gentleman from South Carolina who builds really huge amps".

>He build nice amplifiers for Allah's Jihad mobile.
>
Bogus. The Gentleman from South Carolina might build an amp for the IDF, but not for the Allah crowd. Building amps for the Allah crowd would be a disgrace to our mutual friend Radiosigs. It ain't gonna happen.

Make sure your license is still current before you transmit. However, a great site is www.arrl.org for the ARRL. Even if your license is current, get a copies of the latest manuals for your license class as reference books. Things have changed in 20 years. The ARRL ones make excellent reference material.

These days the FCC only issues 3 different classes of licenses: Technician, General, and Extra. Holders of Novice and Advanced classes are grandfathered in at their current licenses and privileges and can renew idefinitely but no new Novice or Advanced licenses are being issued.

The Morse code requirement for General and Extra is now only 5 wpm. So if you are still a Novice, you might want to look at upgrading to General. To do so, you would need to take only the Tech and General written.

I have an Icom 2100 using a Larsen 5/8 wave mag mount about 4 inches
from my Delphi SKYFI antenna in the center of the roof. The SKYFI is
mounted in the car about two inches from the Icom, and plugs into the
aux cigar plug. The Icom is direct wired to the battery. I've had
lengthy 2 meter QSO's at 25W with the SKYFI on and have noticed no ill
affect on either unit. I haven't upped the power to 50W yet to try it,
but I rarely use full power.

By the way, I drive a 2001 Isuzu Rodeo.

Dee, thanks for the reply.

Actually I did upgrade to extra a few years back and I have played a little with APRS so I have not been completly inactive as a ham, just away from HF. I am mostly looking for fun things to do on HF and basic practices. Things like new modes (FSK) and which freqs are used for what. Not band privlages, I have that info, just where in the bands certain modes tend to condrigate. I remember there was a group called the "AMers", they would stick to one freq. Is HF packet active, if so, where? What about RTTY? Stuff like that.

My rig is an Icom 720A, it was top of the line when I bought it, my antenna is a home built half sized G5RV. With that setup and no amp I don't expect I can do much ssb and AM is really out of the question. ;) My CW ear and fist are horrible, but I hear that FSK can get out better then CW.

I am currently jobless, so my goal is to do this without spending a dime. This is why I am looking for information on the web, rather then just buying books, like the ARRL operators handbook. I have a TNC2, but if I need something for FSK, I will have to pass or build/trade it for stuff I have.

I know the ARRL is a great source of information. However, I have found that the website generally lleads you to which book to buy to get it rather then give the information. I was mostly hoping to find other websites.

The ARRL puts out a book on digital HF that should have this info. I
personally prefer SSB or CW so haven't done anything with the digital stuff
in recent years.

Well every mode has it's advantages and disadvantages. It just depends on
circumstances which is better at any given time. I don't happen to know the
power output of the Icom 720A but I only run 100 watts and a G5RV and have
no trouble making world wide contacts on SSB. I hear quite a few QRP SSB
stations out there too. So don't rule it out. Amplifiers are nice but not
essential if conditions are even halfway decent.

Message-ID: <MPG.18f0f475f26f26b89896df@trialnews.peoplepc.com>
Source record: 68232

I have a complete Yaesu FT-50R package For Sale. Asking $200.00 for the following items (AES pricing shown below):

FT-50R Dual Band HT
FNB-40 Ni-Cd Battery Pack (6V 650 mAh)

$14.99 NC-60B Ni-Cd Battery Charger
$19.99 FBA-15 Battery Case ("AA" size)
$26.99 E-DC-5B Cigarette Lighter Cord with Noise Filter
$21.99 SPM-100 Premier Speaker Mike
$10.99 CT-30 Microphone "Y" Adapter
$39.99 ADMS-1C Software and Cable (FT-11/41/51R , FT-10/40/50R)
$58.99 FNB-41H Ni-MH replacement battery pack (9.6V 1000 mAh)-Kendoo
$58.99 FNB-41H Ni-MH replacement battery pack (9.6V 1000 mAh)-Kendoo
$59.99 MH-C888 MAHA Rapid Charger & Conditioner
$7.99 MHS-C801 MAHA Charging Cup for MH-C888 Charger

$320.90 Total Accessories

The Yaesu FT-50R operates with no problems, is in good condition, and the batteries are good (Kendoo batteries are new). The MARS wideband TX modification has been performed. I have the original boxes for the HT and most accessories. The selling price of $200.00 includes shipping costs within the continental United States.

Will sell the package above less the MAHA MHS-C888 charger & cup for $175.00.

Please email me direct if you are interested. Do not reply to this message.
My email address is: rbird2@peoplepc.com

Thank you,

Rodger

has "embedded journalists" in Iraq...now THAT's phuckin scary folks!

-------- cut ---------

http://cbn.org/CBNNews/News/030326c.asp

AT THE FRONT (with CBN.com)
Possible Chemical Weapons
By Paul Strand
CBN News War Correspondent

March 26, 2003

PAT ROBERTSON: The Third Infantry Division has captured evidence of chemical
weapons as they are fighting Iraq's Republican Guard just 60 miles south of
Baghdad. The evidence has yet to be confirmed, but CBN News War
Correspondent Paul Strand delivered this exclusive information by satellite
phone early Wednesday.

PAT ROBERTSON: We are going to our CBN News War Correspondent Paul Strand,
embedded with the Army's Third Infantry Division. That's the spearhead of
the attack against Baghdad. Paul, we understand you have some shocking news
about chemical warheads. Tell us about it.

PAUL STRAND: Yes, Pat, I do. First of all, I hope you can hear me because I am out in that raging sandstorm and it's hard to hear you. I hope you hear me okay. What I just heard from a highly placed source here is that they've discovered, they've captured chemical warheads, they're Russian, they have Russian writing all over them and they are chemical warheads. Of course, they can't get into them and find out if there's chemicals because once they open them they'd all die right there on the spot. But they're gonna ship them off for testing.

They also captured a launcher that was able to shoot these very munitions that they've captured. And they've captured a man who mixes the chemicals, that was his job with the Medina Division which is the division we're facing right now near the city of Karbala. So all these things leading the military here to believe we might have been hit by chemical shells any time now, and we're not sure we've got them all. So those are the developments here near Karbala about 60 miles south of Baghdad.

ROBERTSON: Paul, I can hear you loud and clear, so don't worry about that. Let me ask you this, are these the type of weapons of mass destruction that has been talked about so much by President Bush?

STRAND: I'm not sure, Pat. I've told you just everything I heard. It happened just a few minutes ago. I would think this is definitely the smoking gun. It's so strange, because the joke before this war was that Saddam says, "I have no chemical weapons, and if you invade I will use them on you." And now we find out they're right out there with the frontline troops.
And another disturbing thing I heard a few days ago, was that he has pushed the level of authority for using these weapons down to the commander level. Not up around him, but the very commanders out on the line, they can use these things, they can choose to use them. So that means young officers have the orders now that they can go ahead and use these things if they feel like they are about to be overtaken. So that's another disturbing development. Not only have we found the warheads, but officers out on the frontline can use them.

ROBERTSON: Paul, are you protected against this kind of thing? Will your suits do it and do you have some kind of an injection that can be used to counteract the effects of VX or whatever?

STRAND: Yes, Pat. We already, from the day we entered Iraq, we have had the suits on, the trousers and the pants, and boots, and gloves, and then we put the masks on. The mask fully protects us and the hood wraps around it tightly. And then we have in our backpacks, we have atropine we can shoot into our legs against nerve agents, we have pills to take against things like anthrax. So we're pretty well covered. And the soldiers I have talked to seem very comfortable about getting hit with this stuff. The only thing is nobody wants to live in those masks for weeks.

ROBERTSON: Paul, I am told that the sandstorm may be the worst in recent memory, you know, in the last 17 or 18 years. Can you tell us about the sandstorm? Is it growing in intensity?

STRAND: It is about the worst weather I have ever felt in my life. Last night I was sleeping outdoors like usual, and it was so bad I jumped into a Humvee. There, with all of the windows closed and everything, the Humvee just filled with sand, there was so much sand it just came in through the little air holes or whatever. And the wind was so strong, it felt like the Humvee would get picked up and thrown over - and you know, Humvees are big, strong, giant vehicles. Stuff was flying through the air, smashing into the side of the vehicle all night long. And the air is completely yellow. You can't see any normal light, you can't see the sky. It got dark like an hour before it was supposed to. It's just truly an amazing sandstorm.

ROBERTSON: The Iraqis are saying it's the judgment of Allah upon the attackers. Are we finding any bright spots in it for the American troops?

STRAND: We are. The soldiers have so much gear that can operate in this kind of thing that they say actually some obscuring factors like this can help them. Now the thing is, the battle has been raging in Karbala, back and forth, so both sides seem to be still operating in this environment. But I understand if it does go away here in the next day or two, that we will just really smash ahead as hard as we can. You know, I must admit, the first thing I said when the sandstorm came in, a lieutenant and I were sitting in the Humvee with it roaring all around us, and I said, "It's at a moment like this that a theologian asks, 'What is God trying to tell us?'"

ROBERTSON: [laughter] Paul, I think a lot of people are going to be asking that. This is kind of a trite statement, but as they say, stay safe.

(yes folks.....stay safe! Wear a desert-cammo NCB certified condom...)

>Sounds like the ole youthful
>jig-a-boo loving profit
>
Yep, the profit is on his way out .. and down. Out of the radio business, down to the big-house .. and into the loving arms of LeRoy and Ty-Rone.

I don't think the white boys at CCI will get much of a chance to do the profit much harm. The bro's no doubt have the profit's days (and nights) planned out to perfection.

Hopefully they've already been told he's coming aboard so they can save up lotsa lovin' for him.

I *predict* that the profit will have no shortage of snuggle partners at CCI. On the banks of the snake-infested Congaree River.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1BV, K1XN & GoList, N2OO, NG3K, W3UR & The Daily DX, K4QD, N4AA & QRZ DX, N4GN, K5LBU, W5UE, K8YSE, W9DX, DJ8FW, DL1EK/DL7VOA & DX Newsletter, EA5RM, F5NQL & UFT, F6CYV, FJ5DX & La Gazette du DX, G3SWH, I1JQJ & IK1ADH - 425 DX NEWS, IK5CBE, JI6KVR & JA-IOTA Islands News, LU7DW, OE1GZA, OK1JR, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PY2YU, S05X Team, T93Y, VA3RJ & ICPO, VE7DP, VK5GN, Z35M and ZC4DW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/March, through Sunday, 30th/March there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Remember to look for Brian, N6IZ, to be active as 3D2IZ from Namotu Island (OC-121) through April 6th. His activity will be mainly on CW on 80-10 meters. He was heard over the weekend on 14023 kHz between

0430-0730z and 7005 kHz between 1000-1345z.

4Z8, ISRAEL. Guenter, OE1GZA, informs OPDX that he will be active once again from here on April 4th and most probably also on April 5th. He will activate the rare 4Z8-prefix using the callsign 4Z8GZ. The operation will take place in Tel Aviv. Activity will be on 20-10 meters. QSL to OE1GZA. Guenter's Web page is at: http://www.qsl.net/oe1gza

7P, LESOTHO. Frosty, K5LBU, reports that they have lost one of the operators for their July trip to Lesotho. Operators now aboard are: Frosty/K5LBU (7P8CF), Tom/WW5L (7P8TA) and Madison/W5MJ (7P8MJ). Reportedly, all the equipment is already in Lesotho, and the operators will not have to carry any heavy radio equipment. If interested in joining the operation, please contact Frosty/K5LBU at: frosty1@pdq.net
Frosty states more details on this operation will be forthcoming.

8Q, MALDIVES. Look for Riccardo/IZ5EBL and Rossella/IZ5BRO to be active from April 13-21st as 8Q7RL and 8Q7RC. Activity will be on 40-10 meters SSB with some CW and PSK31. QSL via their home callsigns.

CT3, MADEIRA ISLAND. Ben, DJ8FW, will be active as CT3AS, from April 9-21st. Activity will be on CW/RTTY/PSK31 on 80-15 meters as time permits. QSL via DJ8FW.

CY9, ST. PAUL ISLAND. A group of 5-6 operators will be going here between July 24th and August 2nd. Their activity will include an entry in the July IOTA Contest. St. Paul Island's IOTA number is NA-094.

DU, PHILIPPINES (IOTA Ops). Frank, VE7DP, informs OPDX that he will be making a short visit to the Philippines during April. Some of his partners/ operators from his 2001 activations (which includes 4I1P, 4H2B and DU1/VE7DP) will be joining him again. This trip's destinations of interest are Semirara Islands (OC-125), also Calagua Islands (OC-202) or Cagayan Islands (OC-207). Most of their activity will take place April 6-18th. More info/details are forthcoming.

IOTA NEWS.....
AF-064. (Update). Operators Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, will be active at the end of the week from Robben Island (as well as the lighthouse SAF023) using the special callsign ZS1RBN. Activity will take place between April 4-7th, and propagation permitting, they will have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 80-10 meters. Suggested operating frequencies will be:
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
CW - 3530, 7026, 10115, 14040, 18098, 21040, 24920 and 28040 kHz.
Nevertheless, small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM.
QSLs will be handled by G3SWH, either direct to his CBA:

21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, U.K.
(with SAE and return postage) or via the RSGB bureau.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and
7L4PVR will be active as homecall/1 from Hachijo Island from
June 6-9th. Look for activity on 80-10 meters SSB, CW and
PSK31. QSL direct to their home callsign or via the JARL
QSL bureau.

AS-049. (Update) Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara
Kuchino-shima starting around 0100z on May 3rd. The length of
his stay has been increased to one day due to the schedule
change of the ferry. He will now stay until around 0000z on
May 5th. Toshi's activity will be on 10/12/15/17/20/40 meters
CW only. QSL via JARL or direct to his home call.

NA-082. Randy, W5UE, wants to remind everyone that several members
of the Magnolia DX Association will be active from Cat Island,
Mississippi (USI MS002S), from April 4-6th. Cat Island is a
barrier island located about 6 miles south of Gulfport, MS,
in the Mississippi Sound. They will be active on 80-10 meters
(including the WARC bands) on CW and SSB. They will be using
the special event callsign K5C from multiple stations. Team
organizers are Bill/K5YG, Glenn/K2FF, Darryl/KD5CQT, and
Randy/W5UE. QSL via K2FF. Their Web page is at: http://mdxa.org
Read the article of their September 2002 trip to NA-082 in
the March/Arpil 2003 issue of The DX Magazine.

IP1, ITALIAN ISLAND. Giuseppe "Beppe", IK5CBE, informs OPDX that he,
Alberto/IK5FTV and possibly others will activate Palmaria Island using
the special callsign IP1A from April 4-7th. Palmaria Island does not
have an IOTA number, but is valid "only" for the Italian Islands Award
with the reference number IIA SP-001. Activity will be on 160-6 meters.
A Web page has been set up for this operation at:
http://space.virgilio.it/gmiross@tin.it

KH6, HAWAII. Philip, KA0PGQ, announced that he will be active from here
in October. Activity will include an entry in the CQWW SSB Contest as
QRP. He is looking for advice on his operation, and his E-mail address is:
pschweit@mninter.net

NEW OFFICERS FOR 2003. The Association des Radioamateurs Senegalais has
elected the following officers for 2003:
President - Malick M'Bengue, 6W1FJ
1st Vice President - Mustafa Diop, 6W1KI
2nd Vice President - Jean Georges Imbo, 6W1OO
Secretary - Monique Imbo (XYL), 6W1OM
Assistant Secretary - Bilal Youssef, 6W1RD
Treasurer - Roger Zogbi, 6W1BR
Assistant Treasurer - Geoges Farrage, 6W1PQ
IARU Liaison Officer- Monique Imbo (XYL), 6W1OM
DX Manager - Jean Louis Pipien, 6W6JX

Jean-Louis, 6W6JX, asks the French speaking Hams to have a look on the Association des Radioamateurs Senegalais Web site at the following address: http://www.radio6w.org/
Some pages on this web are still under construction, but it's a good over-all view of the 6W ham activities. The ARAS and QSL bureau addresses are: Association des Radio-Amateurs du Senegal, Box 971, Dakar, Senegal. ADDED NOTE: If you are journeying to Dakar on weekends, you can meet the 6W hams at their Radio Club at the following address: Immeuble des Colis Postaux, Avenue El-Hadj Malick Sy, Dakar. The Radio Club is open every Saturday at 1700z.

QSL INFO AND NEWS.....
Ted Melinosky, K1BV, Awards Editor CQ Magazine and K1BV DX Awards Directory, informs OPDX that 4L5A and EY8MM has asked him to handle cards for these operations. Ted is "OK" in all the online lookups. He has the Feb/Mar 2003 logs for D44TT and is awaiting the logs for D4B. He doesn't have cards yet, but hopes to get them shortly. Bureau cards are accepted as well.

AP2AUM QSLS. Boris, T93Y, informs OPDX that he has received information that Willy, 9A4NA/T98N, was expected to be active during the CQ WPX SSB Contest using the callsign of Asad, AP2AUM. Also, please note that QSL information for AP2AUM QSOs made in the year 2003 will be via 9A4NA: Zeljko Curkovic, Vukovarska 125, HR-21000 Split, Croatia.

The logs are now on-line for the D90HE operation from Chu-Ja Island (AS-084). Visit the Web page: http://myhome.naver.com/dxer2han/as084/

TEAM HAITI 2003 WRAP-UP. Jan Heise, K4QD, reports: "The HH4 team from the Florida DXpedition Group (FDXPG) has returned safely home. It was a hot, dry and dusty two weeks at the Northwest Haiti Christian Mission. The supply ship had still not arrived when we left, so we ate a lot of beans and rice. It also somewhat impacted our low band and six meter operations because of antennas and coax that were on the ship. The team made over 18,000 contacts on 160 through 10 meters on SSB, CW, RTTY, PSK-31 and 10M FM. The logs have been uploaded, and log checking can be accessed from the Team Haiti web site at:
http://www.geocities.com/n2wb2003/
If you have questions about a QSO, contact that operator directly. QSL HH4/K4QD, HH4/W4WX and HH4/K9MDO direct to home calls. QSL HH4/N2WB via N2OO. The team wants to thank our pilot station, Roger K9RB. We also want to thank Jim, KC4HW, for processing and uploading the logs to the Internet."

Samy, JR8KJR/8, was active from Rishiri Island (AS-147) over the past weekend. QSL direct to JR8KJR or via the JARL QSL bureau.

Activity by L71F during last weekend's contest was from the "Bad Power Station" (LT1F). Operators were: LU1AEE, LU1FGE, LU1FKR, LU1FMO, LU2DKT, LU2FT, LU2NI, LU3FP, LU4DX, LU5DX, LU5HM, LU6ETB, LU6FQD, LU7DW and LU9HS. QSL via AC7DX.

There has been a QSL route update for P41P during the CQ WPX SSB Contest last weekend. Please QSL via I2MQP.

Ton, PY2YU, was active as PX2W during the 2003 CQ WPX SSB Contest, on 10 meters. QSL via PY2YU to the bureau or direct to: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.

If you heard R9/N5XZ during the CQ WPX Contest this past weekend it was Allan/N5XZ with RA9JP and RW9QW/9 at the mike. QSL via his home callsign.

Paco, EA4AHK, the QSL Manager for Francisco Cortadellas, TT8FC, reports he has been receiving a lot of QSLs for CW contacts. Paco states that TT8FC does not work CW, does not work the American Band and does not work 40m band.

"In a state of panic!", says Martin, VK5GN. The 2003 CQ WPX SSB Contest was Martin's last operation as VK5GN. His XYL (VK5QP) has been offered a new job as University Librarian at the University of Tasmania (VK7), so they are moving interstate. Martin states, "Down come all the towers (8) and pack all the beams etc and off we go. Don't have any idea when I will have a new contest station up and running. Both Bureau and direct QSLs will continue to work for at least 12 months."

VP6DIA log is now available on-line at the following URL address: http://www.qsl.net/wd4ngb/ducie.htm

WRTC2002 QSL CARDS, T-SHIRTS AND PLAQUES. The WRTC2002 Organizing Committee announced that all OJ1 thru OJ8 QSL cards are printed and ready for release. If you still would like to obtain your QSL cards directly, you have a chance until April 15th. Send your SASE so that it would reach Toni, OH2JTE, by that date: Toni Linden, Ohratie 16E218, 01370 Vantaa, FINLAND. The plaque and T-shirt winners as well as the Early Bird submission winners can be viewed at the following site: http://www.n4gn.com/wrtc/
There are a total of 71 T-shirt winners, and they kindly ask you to select your size and inform Ari, OH5DX, directly via E-mail at: oh5dx@sral.fi
If no further information is received by April 1st, an XL-size T-shirt will be mailed. If your postal address has been changed over the past 12 months, you may wish to inform OH5DX accordingly.

Yves, F6CYV, reports that F5JRY is not the QSL Manager for XU7ABN. The only QSL valid address for Claude, F9LC (aka XU7ABN), is: Laget Claude, Po Box 1373, General Post Office, Phnom Penh, Kampuchea. For many QSL routes see: http://f6cyv.free.fr/f6cyvqsl.php

Vladimir Kovaceski, Z35M, informs OPDX that all direct QSL requests for ZA/Z35M and Z35M received as of March 22, 2003, have been also answered direct. His address is: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

S0, WESTERN SAHARA. A bulletin from the "S05X Team" announced this past week the biggest INTERNATIONAL team ever seen in the desert will be on air from Western Sahara next April 15th. Operators Hrane/YT1AD, Miki/YU1AU, Max/I8NHJ, Doug/N6TQS, Jordan/KD7RCD, Marq/CT1BWW, Juanca/EA2RC, Fernand/EA1BT, Toni/EA5RM, Julio/EA5XX and Mahafud/S01MZ (all 11 are first class operators) will be doing their best and represent six different countries: Yugoslavia, USA, Italy, Portugal, Spain and Western Sahara. They will be working from the very heart of the desert as S05X. All of them are very well known DXers and DXpeditioners, and their plans include a 24 hours, all band, all mode, operation from S0-land. Using 1KW output power, they are going to transmit especially on the low bands, CW and SSB, as well as PSK31, RTTY and 6 meters. They will take a special interest/care to listen for USA's West Coast openings. Their antenna farm will include a few yagis, so they expect to have worldwide coverage. Their pilot stations will be the two main editors of the 425 DX News:
Mauro/I1JQJ (i1jqj@interlink.it) and Maurizio (i121171@tin.it)
The QSL Manager is EA4URE, the Spanish Bureau, and S05X is going to be on the air until April 20th. The "S05X Team" now has a Web page active with a SURVEY to fill out for your "S05X" needs/wants (bands/modes). Go to:
http://www.pagus.it/S05X
On-line log search shows 32,906 QSSOs as of Friday, March 28th. The log was not updated during the CQ WPX Contest.

ST, SUDAN. You have until April 2nd to work ST0RY. They continue to be very active, especially during last weekend's contest. All the operators are in good spirits and the equipment is holding up. Pictures, log and updates can be found on the Web page at: http://www.df3cb.com/st0ry

T30, WESTERN KIRIBATI. Tusti, W4WET, is now active as T30ONM from Tarawa. His orginal plans were to head to Nauru (C21) and then go to Tarawa. Nauru said he could get a visa upon arrival, but the airline bumped him because he had no visa. It looks like Tusti will be here through the rest of the week and maybe longer as Nauru does not look possible. Anyway, Tusti has been very active on 20 meters RTTY (some 10/15 meters). QSL via W4WET.

TU, COTE D'IVOIRE. David, F5THR, should be active as TU5CD now through July 1st. As this was being written, no QSNs were reported as of yet. QSL via F8BON.

V6, MICRONESIA (New IOTA Activated). You have a couple of more days to work Joe/I2YDX and Robert/IK2WXZ from Nukuoro Island (OC-259) as V60A and V60Z, respectively. They plan to leave this new IOTA on April 1st (they have been there since March 28th). After their operation on Nukuoro Island and they head back to Pohnpei, another source reports that the two operators will make a several hour stop on Oroluk Island (OC-NEW). They are expected to activate this new IOTA possibly between 0000-0600z (maybe as late as 0800). After this activity, they will then go to Mokwil Island (OC-226) and be active from April 6-7th as V63DT and V63ZR. Most of their activity has been on 40/20/15 meters, mainly SSB very little CW.

XY, MYANMAR (Update to OPDX.603). Frank, DL4KQ, will use the callsign XY4KQ during his operation from April 1-15th. For updated information, please watch the Web page at: http://www.dx-pedition.de

YB0, INDONESIA. Stan Matejicek, OK1JR, informs OPDX that he has just
received his Indonesian Radio Amateur Licence, and his callsign is YB0AJR.
He will stay in Indonesia another few months at the Czech Embassy. Stan
plans to be active on 160-6 meters from not only from Jakarta (YB0),
but also from other Indonesian Islands. QSL via OK1JN (his dad). You can
find more details on the Web page at: http://www.ok1jr.com
LAST MINUTE NOTE: If you worked Stan during the CQ WPX Contest, he was
on West Jawa Island.

ZC4, UK SOV. BASE AREA ON CYPRUS. Bill, G4EHT, will be visiting his son
Dez, ZC4DW, between April 14-28th. Bill will be on a family holiday but
hopes to schedule in some time on HF CW. He will be operating from the
Eastern Sovereign Base using their club callsign ZC4ESB. Please be patient
with Bill as he hasn't worked pile-ups for many years. QSL via G4EHT:
Bill Watson, 7 Darwin Close, Lichfield, Staffordshire, WS13 7ET, ENGLAND.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/March, through Sunday, 30th/March there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Remember to look for Brian, N6IZ, to be active as 3D2IZ from Namotu Island (OC-121) through April 6th. His activity will be mainly on CW on 80-10 meters. He was heard over the weekend on 14023 kHz between

0430-0730z and 7005 kHz between 1000-1345z.

4Z8, ISRAEL. Guenter, OE1GZA, informs OPDX that he will be active once again from here on April 4th and most probably also on April 5th. He will activate the rare 4Z8-prefix using the callsign 4Z8GZ. The operation will take place in Tel Aviv. Activity will be on 20-10 meters. QSL to OE1GZA. Guenter's Web page is at: http://www.qsl.net/oe1gza

7P, LESOTHO. Frosty, K5LBU, reports that they have lost one of the operators for their July trip to Lesotho. Operators now aboard are: Frosty/K5LBU (7P8CF), Tom/WW5L (7P8TA) and Madison/W5MJ (7P8MJ). Reportedly, all the equipment is already in Lesotho, and the operators will not have to carry any heavy radio equipment. If interested in joining the operation, please contact Frosty/K5LBU at: frosty1@pdq.net
Frosty states more details on this operation will be forthcoming.

8Q, MALDIVES. Look for Riccardo/IZ5EBL and Rossella/IZ5BRO to be active from April 13-21st as 8Q7RL and 8Q7RC. Activity will be on 40-10 meters SSB with some CW and PSK31. QSL via their home callsigns.

CT3, MADEIRA ISLAND. Ben, DJ8FW, will be active as CT3AS, from April 9-21st. Activity will be on CW/RTTY/PSK31 on 80-15 meters as time permits. QSL via DJ8FW.

CY9, ST. PAUL ISLAND. A group of 5-6 operators will be going here between July 24th and August 2nd. Their activity will include an entry in the July IOTA Contest. St. Paul Island's IOTA number is NA-094.

DU, PHILIPPINES (IOTA Ops). Frank, VE7DP, informs OPDX that he will be making a short visit to the Philippines during April. Some of his partners/ operators from his 2001 activations (which includes 4I1P, 4H2B and DU1/VE7DP) will be joining him again. This trip's destinations of interest are Semirara Islands (OC-125), also Calagua Islands (OC-202) or Cagayan Islands (OC-207). Most of their activity will take place April 6-18th. More info/details are forthcoming.

IOTA NEWS.....
AF-064. (Update). Operators Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, will be active at the end of the week from Robben Island (as well as the lighthouse SAF023) using the special callsign ZS1RBN. Activity will take place between April 4-7th, and propagation permitting, they will have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 80-10 meters. Suggested operating frequencies will be:
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
CW - 3530, 7026, 10115, 14040, 18098, 21040, 24920 and 28040 kHz.
Nevertheless, small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM.
QSLs will be handled by G3SWH, either direct to his CBA:

21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, U.K.
(with SAE and return postage) or via the RSGB bureau.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and
7L4PVR will be active as homecall/1 from Hachijo Island from
June 6-9th. Look for activity on 80-10 meters SSB, CW and
PSK31. QSL direct to their home callsign or via the JARL
QSL bureau.

AS-049. (Update) Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara
Kuchino-shima starting around 0100z on May 3rd. The length of
his stay has been increased to one day due to the schedule
change of the ferry. He will now stay until around 0000z on
May 5th. Toshi's activity will be on 10/12/15/17/20/40 meters
CW only. QSL via JARL or direct to his home call.

NA-082. Randy, W5UE, wants to remind everyone that several members
of the Magnolia DX Association will be active from Cat Island,
Mississippi (USI MS002S), from April 4-6th. Cat Island is a
barrier island located about 6 miles south of Gulfport, MS,
in the Mississippi Sound. They will be active on 80-10 meters
(including the WARC bands) on CW and SSB. They will be using
the special event callsign K5C from multiple stations. Team
organizers are Bill/K5YG, Glenn/K2FF, Darryl/KD5CQT, and
Randy/W5UE. QSL via K2FF. Their Web page is at: http://mdxa.org
Read the article of their September 2002 trip to NA-082 in
the March/Arpil 2003 issue of The DX Magazine.

IP1, ITALIAN ISLAND. Giuseppe "Beppe", IK5CBE, informs OPDX that he,
Alberto/IK5FTV and possibly others will activate Palmaria Island using
the special callsign IP1A from April 4-7th. Palmaria Island does not
have an IOTA number, but is valid "only" for the Italian Islands Award
with the reference number IIA SP-001. Activity will be on 160-6 meters.
A Web page has been set up for this operation at:
http://space.virgilio.it/gmiross@tin.it

KH6, HAWAII. Philip, KA0PGQ, announced that he will be active from here
in October. Activity will include an entry in the CQWW SSB Contest as
QRP. He is looking for advice on his operation, and his E-mail address is:
pschweit@mninter.net

NEW OFFICERS FOR 2003. The Association des Radioamateurs Senegalais has
elected the following officers for 2003:
President - Malick M'Bengue, 6W1FJ
1st Vice President - Mustafa Diop, 6W1KI
2nd Vice President - Jean Georges Imbo, 6W1OO
Secretary - Monique Imbo (XYL), 6W1OM
Assistant Secretary - Bilal Youssef, 6W1RD
Treasurer - Roger Zogbi, 6W1BR
Assistant Treasurer - Geoges Farrage, 6W1PQ
IARU Liaison Officer- Monique Imbo (XYL), 6W1OM
DX Manager - Jean Louis Pipien, 6W6JX

Jean-Louis, 6W6JX, asks the French speaking Hams to have a look on the Association des Radioamateurs Senegalais Web site at the following address: http://www.radio6w.org/
Some pages on this web are still under construction, but it's a good over-all view of the 6W ham activities. The ARAS and QSL bureau addresses are: Association des Radio-Amateurs du Senegal, Box 971, Dakar, Senegal. ADDED NOTE: If you are journeying to Dakar on weekends, you can meet the 6W hams at their Radio Club at the following address: Immeuble des Colis Postaux, Avenue El-Hadj Malick Sy, Dakar. The Radio Club is open every Saturday at 1700z.

QSL INFO AND NEWS.....
Ted Melinosky, K1BV, Awards Editor CQ Magazine and K1BV DX Awards Directory, informs OPDX that 4L5A and EY8MM has asked him to handle cards for these operations. Ted is "OK" in all the online lookups. He has the Feb/Mar 2003 logs for D44TT and is awaiting the logs for D4B. He doesn't have cards yet, but hopes to get them shortly. Bureau cards are accepted as well.

AP2AUM QSLS. Boris, T93Y, informs OPDX that he has received information that Willy, 9A4NA/T98N, was expected to be active during the CQ WPX SSB Contest using the callsign of Asad, AP2AUM. Also, please note that QSL information for AP2AUM QSOs made in the year 2003 will be via 9A4NA: Zeljko Curkovic, Vukovarska 125, HR-21000 Split, Croatia.

The logs are now on-line for the D90HE operation from Chu-Ja Island (AS-084). Visit the Web page: http://myhome.naver.com/dxer2han/as084/

TEAM HAITI 2003 WRAP-UP. Jan Heise, K4QD, reports: "The HH4 team from the Florida DXpedition Group (FDXPG) has returned safely home. It was a hot, dry and dusty two weeks at the Northwest Haiti Christian Mission. The supply ship had still not arrived when we left, so we ate a lot of beans and rice. It also somewhat impacted our low band and six meter operations because of antennas and coax that were on the ship. The team made over 18,000 contacts on 160 through 10 meters on SSB, CW, RTTY, PSK-31 and 10M FM. The logs have been uploaded, and log checking can be accessed from the Team Haiti web site at:
http://www.geocities.com/n2wb2003/
If you have questions about a QSO, contact that operator directly. QSL HH4/K4QD, HH4/W4WX and HH4/K9MDO direct to home calls. QSL HH4/N2WB via N2OO. The team wants to thank our pilot station, Roger K9RB. We also want to thank Jim, KC4HW, for processing and uploading the logs to the Internet."

Samy, JR8KJR/8, was active from Rishiri Island (AS-147) over the past weekend. QSL direct to JR8KJR or via the JARL QSL bureau.

Activity by L71F during last weekend's contest was from the "Bad Power Station" (LT1F). Operators were: LU1AEE, LU1FGE, LU1FKR, LU1FMO, LU2DKT, LU2FT, LU2NI, LU3FP, LU4DX, LU5DX, LU5HM, LU6ETB, LU6FQD, LU7DW and LU9HS. QSL via AC7DX.

There has been a QSL route update for P41P during the CQ WPX SSB Contest last weekend. Please QSL via I2MQP.

Ton, PY2YU, was active as PX2W during the 2003 CQ WPX SSB Contest, on 10 meters. QSL via PY2YU to the bureau or direct to: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.

If you heard R9/N5XZ during the CQ WPX Contest this past weekend it was Allan/N5XZ with RA9JP and RW9QW/9 at the mike. QSL via his home callsign.

Paco, EA4AHK, the QSL Manager for Francisco Cortadellas, TT8FC, reports he has been receiving a lot of QSLs for CW contacts. Paco states that TT8FC does not work CW, does not work the American Band and does not work 40m band.

"In a state of panic!", says Martin, VK5GN. The 2003 CQ WPX SSB Contest was Martin's last operation as VK5GN. His XYL (VK5QP) has been offered a new job as University Librarian at the University of Tasmania (VK7), so they are moving interstate. Martin states, "Down come all the towers (8) and pack all the beams etc and off we go. Don't have any idea when I will have a new contest station up and running. Both Bureau and direct QSLs will continue to work for at least 12 months."

VP6DIA log is now available on-line at the following URL address: http://www.qsl.net/wd4ngb/ducie.htm

WRTC2002 QSL CARDS, T-SHIRTS AND PLAQUES. The WRTC2002 Organizing Committee announced that all OJ1 thru OJ8 QSL cards are printed and ready for release. If you still would like to obtain your QSL cards directly, you have a chance until April 15th. Send your SASE so that it would reach Toni, OH2JTE, by that date: Toni Linden, Ohratie 16E218, 01370 Vantaa, FINLAND. The plaque and T-shirt winners as well as the Early Bird submission winners can be viewed at the following site: http://www.n4gn.com/wrtc/
There are a total of 71 T-shirt winners, and they kindly ask you to select your size and inform Ari, OH5DX, directly via E-mail at: oh5dx@sral.fi
If no further information is received by April 1st, an XL-size T-shirt will be mailed. If your postal address has been changed over the past 12 months, you may wish to inform OH5DX accordingly.

Yves, F6CYV, reports that F5JRY is not the QSL Manager for XU7ABN. The only QSL valid address for Claude, F9LC (aka XU7ABN), is: Laget Claude, Po Box 1373, General Post Office, Phnom Penh, Kampuchea. For many QSL routes see: http://f6cyv.free.fr/f6cyvqsl.php

Vladimir Kovaceski, Z35M, informs OPDX that all direct QSL requests for ZA/Z35M and Z35M received as of March 22, 2003, have been also answered direct. His address is: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

S0, WESTERN SAHARA. A bulletin from the "S05X Team" announced this past week the biggest INTERNATIONAL team ever seen in the desert will be on air from Western Sahara next April 15th. Operators Hrane/YT1AD, Miki/YU1AU, Max/I8NHJ, Doug/N6TQS, Jordan/KD7RCD, Marq/CT1BWW, Juanca/EA2RC, Fernand/ EA1BT, Toni/EA5RM, Julio/EA5XX and Mahafud/S01MZ (all 11 are first class operators) will be doing their best and represent six different countries: Yugoslavia, USA, Italy, Portugal, Spain and Western Sahara. They will be working from the very heart of the desert as S05X. All of them are very well known DXers and DXpeditioners, and their plans include a 24 hours, all band, all mode, operation from S0-land. Using 1KW output power, they are going to transmit especially on the low bands, CW and SSB, as well as PSK31, RTTY and 6 meters. They will take a special interest/care to listen for USA's West Coast openings. Their antenna farm will include a few yagis, so they expect to have worldwide coverage. Their pilot stations will be the two main editors of the 425 DX News:
Mauro/I1JQJ (i1jqj@interlink.it) and Maurizio (i121171@tin.it)
The QSL Manager is EA4URE, the Spanish Bureau, and S05X is going to be on the air until April 20th. The "S05X Team" now has a Web page active with a SURVEY to fill out for your "S05X" needs/wants (bands/modes). Go to:
http://www.pagus.it/S05X
On-line log search shows 32,906 QSSOs as of Friday, March 28th. The log was not updated during the CQ WPX Contest.

ST, SUDAN. You have until April 2nd to work ST0RY. They continue to be very active, especially during last weekend's contest. All the operators are in good spirits and the equipment is holding up. Pictures, log and updates can be found on the Web page at: http://www.df3cb.com/st0ry

T30, WESTERN KIRIBATI. Tusti, W4WET, is now active as T30ONM from Tarawa. His orginal plans were to head to Nauru (C21) and then go to Tarawa. Nauru said he could get a visa upon arrival, but the airline bumped him because he had no visa. It looks like Tusti will be here through the rest of the week and maybe longer as Nauru does not look possible. Anyway, Tusti has been very active on 20 meters RTTY (some 10/15 meters). QSL via W4WET.

TU, COTE D'IVOIRE. David, F5THR, should be active as TU5CD now through July 1st. As this was being written, no QSNs were reported as of yet. QSL via F8BON.

V6, MICRONESIA (New IOTA Activated). You have a couple of more days to work Joe/I2YDX and Robert/IK2WXZ from Nukuoro Island (OC-259) as V60A and V60Z, respectively. They plan to leave this new IOTA on April 1st (they have been there since March 28th). After their operation on Nukuoro Island and they head back to Pohnpei, another source reports that the two operators will make a several hour stop on Oroluk Island (OC-NEW). They are expected to activate this new IOTA possibly between 0000-0600z (maybe as late as 0800). After this activity, they will then go to Mokwil Island (OC-226) and be active from April 6-7th as V63DT and V63ZR. Most of their activity has been on 40/20/15 meters, mainly SSB very little CW.

XY, MYANMAR (Update to OPDX.603). Frank, DL4KQ, will use the callsign XY4KQ during his operation from April 1-15th. For updated information, please watch the Web page at: http://www.dx-pedition.de

YB0, INDONESIA. Stan Matejicek, OK1JR, informs OPDX that he has just
received his Indonesian Radio Amateur Licence, and his callsign is YB0AJR.
He will stay in Indonesia another few months at the Czech Embassy. Stan
plans to be active on 160-6 meters from not only from Jakarta (YB0),
but also from other Indonesian Islands. QSL via OK1JN (his dad). You can
find more details on the Web page at: http://www.ok1jr.com
LAST MINUTE NOTE: If you worked Stan during the CQ WPX Contest, he was
on West Jawa Island.

ZC4, UK SOV. BASE AREA ON CYPRUS. Bill, G4EHT, will be visiting his son
Dez, ZC4DW, between April 14-28th. Bill will be on a family holiday but
hopes to schedule in some time on HF CW. He will be operating from the
Eastern Sovereign Base using their club callsign ZC4ESB. Please be patient
with Bill as he hasn't worked pile-ups for many years. QSL via G4EHT:
Bill Watson, 7 Darwin Close, Lichfield, Staffordshire, WS13 7ET, ENGLAND.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Actually, I thought the site was pretty funny, but after visiting a 'link'
from
that site, I had 4 warnings from my protection software for attempted
'hijacking of my browser' with registry entries. They were easy to
clean out, but I won't go back there.

Mike

Doubt it with a 20 yr old radio. Need lots of stability for PSK. But its worth a try I guess.

Go to the ARRL web and search for the ARRL Bandplans. That will give you the info you seek. Or try 'Considerate operaters guide'. It may be there too.

That's why I read news with an old version of Netscape with java/javascripts
turned off.

If you have a Pentium with a sound card you can do all kinds of fun things with your radio and the new digital modes. Aside from what has already been mentioned, groups.yahoo.com/group/digitalradio is a good place to look. I build all my own interfaces between radio and computer for about $10 worth of parts. I did one just recently for a friend who has an ICOM 720A.

Have radios changed that much? The IC-720A is one of Icom's first solid state HF transievers, but it IS solid state. I am going to give PSK31 a try, I have the radio and the computer and that seems like all I need.

Rob

There's nothing funny about that. Or do you find humor in organizations like the KKK as well?
This is deplorable, and only a spamhaus like valueweb would allow such a thing to exist.

Hi All..

I've got 75 MHz transmitters, VHF linear power amps/modulators, mounting racks, ATV, etc items for sale.

Please visit http://members.rogers.com/wiecek6010/sale.htm to view the items I'm selling.
All items are located just west of Toronto, Ontario.

Thanks to all

You would not believe the quantam leap in technology from then to now. Your major problem will be stability. Although if you get a program, like 'Digipan' you can let it do all the work. Meaning it will track a signal, send and receive, and you can see a large portion of the band with this program and then select which station you want to see.

The DSP (digital signal processing) of the program will allow you all the selectivity you need that can not be provided in your rig due to the use of SSB mode and the wide filters involved. PSK is only 31 cycles...thats right CYCLES wide.

Interfacing is not all that much of a problem. You don't need to spend a hundred bux for a 'gadget box'. I did it with a resistor, a capacitor and shielded wire and plugs at both ends. You may need to do something different. My rig is the FT1000MP and has all those goodies out the back end.

IF you need some help...send me a email. Always willing to help a new digital fella out.

Dan/W4NTI

Spring cleaning - SHACK SALE!

March 31, 2003

ORIGINAL POST - Watch For Updates & Additions

*** Communication Specialists TP-154 Repeater Controller ***

Encodes / Decodes PL, DPL and I think inverted PL

Has a courtesy tone

Has an ID'er

Programmable time limits for system and for each tone/code

Lots of other features

Manual with programming, operation and hook up data included

Programmable over the air or via programming jack - uses a touchtone phone.

A great controller for starter / basic systems

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-027S.JPG

*** Asking $165 Shipped - OR OFFER ***

-------- ------------- ----------- -------------- ----------------- --------
-------- -------------

*** Radio Shack PRO-2067 Base / Mobile Scanner ***

500 Channels
Trunk Tracking - Motorola type I, II. I/II Hybrid, LTR, EDACS
SAME Technology for Weather alerting
PC Programmable
Direct keypad frequency input
CTCSS / DPL decode
4 line Alpha display
BNC antenna connector
Plus much much more features

*** Comes with the following: ***
Mounting bracket
Original user manual
Wall wart power pack - for base use
Serial programming cable

Programming software

This scanner has been tested and works just beautifully. Condition is Very good - non-smoker, never mobile. I bought 2 of them, I just need one now... so
one has to go.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-018S.JPG

*** I'm asking $180 Shipped - OR OFFER for the whole setup ready to plug and play... sent 2-3 day priority mail ***

-------- ------------ ----------- -------------- ----------------- --------
-------- -------------

*** Motorola P200 UHF 2 Channel Handheld Radio***

Only problem .. the antenna has some shrink tubing on it because the plastic on the antenna is cracking.

Has been tested - is in good working condition

Physical condition is VERY GOOD with exception to the antenna.

Battery condition is EXCELLENT!

Currently programmed in the 460Mhz area

Easily converts to 6 channel

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-019S.JPG

*** Asking $60.00 or offer - shipped ***

-------- ------------ ----------- -------------- ----------------- --------
-------- -------------

*** Palm IIIx PDA ***

Just your basic Palm PDA

WORKS GREAT!

Maybe it could find a use on APRS or used with a GPS unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-021S.JPG

*** $40.00 shipped - or offer ***

-------- ------------ ----------- -------------- ----------------- --------
-------- -------------

*** Kenwood TM-742A Multi Bander Mobile Radio ***

This radio has a problem. I only can get a little blip of the backlight when the power button is pressed. I have not worked on it, I just do not have the time and I do not have a service manual .so I have no clue what the problem is.

Comes with a Kenwood DTMF mic, 2M module and 440 module.

These radios typically go for over $500 when working

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-023S.JPG

*** Asking $250 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TS-700SP 2 Meter ALL MODE ***

Built in digital display along with analog dial

10W output - perfect for feeding amplifiers

Comes with the 120V AC cord, manual and the original hand mic.

Works good, however the display flickers once in a while when tuning.
Rocking the tuning dial up and down in freqs clears the problem.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-024S.JPG

*** Asking $150.00 Shipped - Or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Scott Air Pack SCBA unit (Fire Fighters air pack) ***

Comes with carry / storage case, mask, regulator, tank frame and tank . the whole complete unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-025S.JPG

*** Asking $135.00 Shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Setcom 7-PR4SB Headset with Boom Mic ***

I'm not sure what radio it is wired for, but it was used with an HT for auto racing (Pit Crew)

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-030S.JPG

*** Asking $45.00 shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** TX-RX 900MHz Vari-Notch Cavity filters / (Duplexer?) ***

Quantity - 4

Filter Type - Vari-Notch

Model - 15-88-01

Freq - 890 - 960MHz

There is 4 of these filters on a rack mount frame. No interconnecting cables. I was going to send these to TX-RX to have them convert 2 of them to Pass High and make the interconnecting cables - But I went with a different duplexer.

PICTURES AT:

http://www.kmcnet.net/Auction_Stuff/MVC-028S.JPG

http://www.kmcnet.net/Auction_Stuff/MVC-029S.JPG

*** Asking $175 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

There's more to be listed... Keep an eye open for my posts.

I accept Paypal online payments, US Postal Money Orders and TRADES. I don't have any specific list of what I'm looking for in trade.so if you want to offer a trade, send me your "trade list" for what item(s).

Please note, included shipping is for continental US addresses ONLY, Hawaii, Alaska and international addresses, I will calculate the additional shipping needed.

Thanks

Dave Schmidt

Jon's page has grown stale, not what it was at one time.
He's been sent major news items, backed up by factual
sources he can verify, but he refuses to put them on his
page. He must be afraid of offending some people?

> anyway!!

How about people who claim they are from other planets? What's wrong with
"rednecks"? I'm a pizza delevery boy too. You should have been reading
this group about 3 years ago. I really lit the fires then. All sorts of
racist posts, posts about the Tiny-Tenna (hint, hint) and all sorts of
off-topic stuff. Not to even mention the flame wars too.

We cover the 14.313 wars, the K1MAN saga, and did you know that K5BLB was on
75 meters last night?

>

2315. Any ham computer programs needed?

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-01 23:00:18 UTC
From: "Bruce W.1" <bw@NOSPAMdidah.com>
Message-ID: <3E8A19FF.DA48CD0C@NOSPAMdidah.com>
Source record: 68110

I've got the itch to write a computer program for ham radio. Only I'm not sure what to write. It could be a Windows program or a website.

So I'm soliciting for suggestions. Can anyone think of a program that's needed?

Thanks for your help.

Bruce AF8F

2316. Best Dualband HT for high RF area ?????

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-01 23:35:28 UTC
From: radioguy <radioactiveham@yahoo.com>
Message-ID: <v8k8ig9fep2s63@corp.supernews.com>
Source record: 68111
Cross-posted to: rec.radio.swap,rec.radio.amateur.misc,alt.ham-radio.vhf-uhf

Does anyone know the best dualband HT (144/440mhz) for a high
(very) rf area??

I've have used the Yaesu VX-5 , the Yaesu Ft-530 and the RS
245 and none of these units will cut it where i live.

Any info or opinions on other units would be helpful.

Thanks

Tom

2318. (UPDATE, SHORT) Auto-FAQ Sent to Over 30,000 rec.radio.amateur.* Posters

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-02 00:03:11 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <3e8a285b$0$3646$45beb828@newscene.com>
Source record: 68113

For the previous (SHORT) update, see:

http://groups.google.com/groups?selm=3dead0eb%240%24202%2445beb828%40newscene.com

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a message once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup.

The project was expanded on June 19, 2002 to cover all rec.radio.amateur.* newsgroups, but with the same previous-poster database (as I stated my intention to do in previous updates). This means that if you have already received the message to a given E-mail address, you won't receive it again to that same E-mail address. This expansion increased the average number of recipients each day from about 7 to about 25. Feedback statistics remain about the same for the additional 2,500 recipients (see previous updates via the link above for more details). Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):
0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250
22,500 April 3, 2002 220
25,000 August 8, 2002 625
27,500 December 1, 2002 670
30,000 April 1, 2003 625

For those who are curious, here is the current version of the message, modified in response to feedback as the project progressed.

>Subject: WELCOME to rec.radio.amateur.*
>X-Loop: rec.radio.amateur-auto-faq@oasis.novia.net

Hello,

The following message is automatically sent to every new poster or cross-poster (as of June 19, 2002) to any of the rec.radio.amateur.* newsgroups. It should be sent once, and only once, to each unique address. This is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.*, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to enable you to get the most out of these newsgroups. I hope you will consider the message in that spirit.

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also access them from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. Original newsgroup voting and charter information for the rec.radio.amateur.* hierarchy, as well as for rec.radio.info and rec.radio.swap, may be accessed from:

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

3. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the Usenet newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

4. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the Usenet newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate newsgroup in the rec.radio.* hierarchy for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

5. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may

access their comprehensive and informative home page at:

http://www.arrl.org/

(They also have information about amateur radio organizations in other countries.)

6. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going all the way back to 1981) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired at your local news server. Services like Google allow Usenet a much longer "institutional memory," greatly benefiting both new and experienced users.

7. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. A recommended practice is to ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (2 or 3 at most), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

8. Remember, Usenet newsgroups are based on the idea of mutual aid. Usenet only works if we put as much into it as we get out of it.

73, Paul W. Schleck, K3FU

The author welcomes any and all constructive feedback. Please direct all such feedback to pschleck@novia.net and retain the original subject (e.g., "Re: WELCOME to rec.radio.amateur.*") in your reply.

2319. Re: Best Dualband HT for high RF area ?????

Well, you can count out the Icom W-32A as well. I think the problem is that HT's are themselves not very selective. You would do much better going with a mobile radio.

At my house, I could barely even talk on the local 2M repeaters, because I had so much intermod, that the receiver was useless. I bought a dual band mobile, and attached it to the same antenna, and can talk on any local repeater, plus ones 60+ miles away.

>
I think it's more of a "run the front end wide open" type problem
rather than inherent poor selectivity. With the very hot front ends
most of them are easily subject to overload and the resulting
intermod.

>At my house, I could barely even talk on the local 2M repeaters, because I
>had so much intermod, that the receiver was useless. I bought a dual band

I have two 2-meter antennas. One side mounted on the tower fairly low
and then a stacked array at 130 feet. Even with the lower antenna and
a hill between me and the next nearest repeater I still hear them most
of the time, or would if I and our repeater didn't run PL on the
output.

If I switched to the top antennas AND our repeater were down AND I had
the PL in for the other repeater, I think I could work it any day of
the week.

There is a paging system a mile and a half south of me that has a few
problems and occasionally comes in on the repeater input. It, not
being FM, only keys the repeater momentarily, but sure can be a
nuisance.

There is no way I can hook an HT to either of those outside antennas
without hearing multiple stations in addition to all the spurs that
seem to be out there.

I am trying to locate information on a Sinclair
4 cavity model R-203C duplexer, but I have
come up dry as far as information or specs.
I was hoping someone here in the ng could share
the specs of this duplexer with me. According to
the faceplate it is currently on 151.175mhz and
I am looking to re-tune it to 147mhz. Thanks for
any info.

For Keyers -- Lots to chose from -- but I like the Logikey K3 Keyer
http://www.idiompress.com/keyers.html

For keys all I can say is borrow every one you can and try them, all depends on how heavy fisted you are and a lot of personal preferences including price. You can use single paddle or Iambic -- but most recommend learning Iambic keying. http://www.morsecode.dutch.nl/iambic.PDF

I use a Bencher single paddle type, but would recommend the Iambic paddles. Also have used Kent keys, Shurr (great but pricey), Hensley, Jones and others. If I could afford it -- Shurr for sure, but your dit-dahs may vary.

2325. Measurements 59LF grid dip

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-02 15:13:30 UTC
From: Henry Kolesnik <wd5jfr@oklahoma.net>
Message-ID: <v8lvh1doh47r98@corp.supernews.com>
Source record: 68120

For my Measurements Model 59LF grid dip meter I'm still trying to find a manual or copy and hopefully a 50kc to 100kc coil or an old orphaned LF coil form with the ferrite. The form was made by American Phenolic Corp, Chicago, Part No. 24-5P. The base is like an old 5 pin tube and is a clear cylinder about 1 1/4" diameter and 2 1/4" long, "pill bottle". The coil form, a ferrite cylinder about 1 inch diameter and 3/4" long is inside the "pill bottle" . I'd guess there's several hundred turns of litz wire wound pancake fashion with 5 leads coming out. The .1 - .25 MC coil wire uses about 3/4 ths of the ferrite length and the turns stack up to about an 1/8" thick. It's well designed and well made and has some weight to it. The unit has 3 additional coils, .25 -.55 MC, .55MC - 1.5 MC, and 1.5 - 4.5 MC. All use the same form but with less turns, the highest freq. coil has about 1/20th of the turns. I'd rather find one covering .05 - .1 MC or an orphaned LF form for another frequency if I can because I think it would be a major endeavor to try make one as good as Measurements!.
tnx.

Spring cleaning - SHACK SALE!

April 2, 2003

UPDATE - Watch For Updates & Additions

Everything has to go ASAP! Make me offers!!!

*** Communication Specialists TP-154 Repeater Controller ***

Encodes / Decodes PL, DPL and I think inverted PL

Has a courtesy tone

Has a programmable ID'er

Programmable time limits for system and for each tone/code

Lots of other features

Manual with programming, operation and hook up data included

Programmable over the air or via programming jack - uses a touchtone phone.

A great controller for starter / basic systems

TESTED - was used on my system.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-027S.JPG

PRICE LOWERED!

*** Asking $125 Shipped - OR OFFER ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Radio Shack PRO-2067 Base / Mobile Scanner ***

500 Channels
Trunk Tracking - Motorola type I, II. I/II Hybrid, LTR, EDACS
SAME Technology for Weather alerting
PC Programmable
Direct keypad frequency input
CTCSS / DPL decode
4 line Alpha display
BNC antenna connector
Plus much much more features

*** Comes with the following: ***
Mounting bracket
Original user manual
Wall wart power pack - for base use
Serial programming cable
Programming software

This scanner has been tested and works just beautifully. Condition is Very
good - non-smoker, never mobile. I bought 2 of them, I just need one now...
so
one has to go.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-018S.JPG

PRICE LOWERED!
*** I'm asking $175 Shipped - OR OFFER for the whole setup ready to plug and
play... sent 2-3 day priority mail ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Motorola P200 UHF 2 Channel Handheld Radio***

SOLD

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Palm IIIx PDA ***

Just your basic Palm PDA

WORKS GREAT!

Maybe it could find a use on APRS or used with a GPS unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-021S.JPG

*** $40.00 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TM-742A Multi Bander Mobile Radio ***

SOLD!

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TS-700SP 2 Meter ALL MODE ***

Built in digital display along with analog dial

10W output - perfect for feeding amplifiers

Comes with the 120V AC cord, manual and the original hand mic.

Works good, however the display flickers once in a while when tuning.
Rocking the tuning dial up and down in freqs clears the problem.

PICTURE AT:

*** Scott Air Pack SCBA unit (Fire Fighters air pack) ***

Comes with carry / storage case, mask, regulator, tank frame and tank . the
whole complete unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-025S.JPG

PRICE LOWERED!

*** Asking $100.00 ***

LARGE item - please send city & zip for shipping calculation

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Setcom 7-PR4SB Headset with Boom Mic ***

I'm not sure what radio it is wired for, but it was used with an HT for auto
racing (Pit Crew)

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-030S.JPG

PRICE LOWERED!

*** Asking $35.00 shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** TX-RX 900MHz Vari-Notch Cavity filters / (Duplexer?) ***

Quantity - 4

Filter Type - Vari-Notch

Model - 15-88-01

Freq - 890 - 960MHz

There is 4 of these filters on a rack mount frame. No interconnecting cables. I was going to send these to TX-RX to have them convert 2 of them to Pass High and make the interconnecting cables - But I went with a different duplexer. GREAT FOR 900MHz HAM SYSTEMS!

PICTURES AT:

http://www.kmcnet.net/Auction_Stuff/MVC-028S.JPG

http://www.kmcnet.net/Auction_Stuff/MVC-029S.JPG

PRICE LOWERED!

*** Asking $140 shipped - or offer ***

-------- ------------ ----------- -------------- ----------------- --------
-------- -------------

There's more to be listed... Keep an eye open for my posts.

I accept Paypal online payments, US Postal Money Orders and TRADES. I don't have any specific list of what I'm looking for in trade.so if you want to offer a trade, send me your "trade list" for what item(s).

Please note, included shipping is for continental US addresses ONLY, Hawaii, Alaska and international addresses, I will calculate the additional shipping needed.

Thanks

Dave Schmidt

2327. Who is this Shortwave Fruitkake ??

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-02 18:58:44 UTC
From: Saddam's Teddy Bear <4fhwxcaree@juno.com>
Message-ID: <3e8b336f@snipnews.snip.net>
Source record: 68122
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

I was given an old shortwave Hallicrafters SX-115
that was owned by my uncle a few months ago after
he passed away.
.
(It was in pristine shape, even had the original cardboard
crate it came in in his attic! Uncle ---- never tossed anything away in the
trash)

Been listening in and alot of good stuff from the foreign
sources but the USA shortwave is like TV's Jerry
Springer show and wall-to wall of dozens of goofy
preachers who sound like they need Zoloft!

The worst one is this guy called Alex Jones. This guy
is a complete BASKET CASE! Does he broadcast
from a rubber room in the Texas State Mental Hospital?
I'm amazed he ain't had a stroke yet with his way out
from the motherships conspiracy theories.....WHEW!!!

If this is what shortwave is goint to, expect to see this
radio at my next Yard Sale in June. First $100 takes it
and I use that cash to a new DVD player

You will have no problem selling this reciever for "just" 100 dollar
Maybe you should do some research before selling this radio

Yea the workl is full of loos nuts.
But Zoloft is for depression, not psychosis.
Alex and the rest need something a tad stronger.

There are lots of interesting things on SW other then
the nut brigade.
If you like different musiic, try RCI on Saturday morning
at 10:00EST, 13.650 AM.

And if you do decide to sell it, try Ebay. It will go for
a lot more then you will get locally.

Good luck on the DVD player, I would check out the $60.00 Apex
at Wallmart. It will play almost any thing you cram in. I am trying
to convert older VHS home "movies" to VCD and the Apex beats
the more expensive units.

Hi Bramski.
I made a typo in the original. The correct
model no should be SX-112.

It looks like the one here: http://www.rigpix.com/hallicrafter/sx112.htm

Got it for free along with a bunch of other radio
stuff from my uncle who was a ham and a incurable
junk-collecting pack rat. I'm still finding crap squirrel
away like acorns in closets and his basement at his house.
Perhaps I'll get an e-Bay account and sell it there
as it seems this stuff is pricey. (He also had a HUGE
radio set called a BC610 that some guy carted away
yesterday. Thing was big as a washing machine and
3x as heavy. Took 4 guys and a pickup truck to cart
it away. I'll probably end up keeping the 112 as there
are some good things on shortwave. Oh well.

I have had several and have found that the most sensitive
while also rejecting intermod well is the 5 watt IC W32A

What I'm looking for is all the data from the ARRL TravelPlus for Repeaters CD-ROM to load into Microsoft Access or SQL Server, to play around with some ideas I have.

I don't know if TravelPlus will let you export the entire database, or how big it might be. But if so then I wish someone would send it to me, don't forget to remove the NOSPAM from my email address.

My email inbox size limit is 2 MB. If it's bigger than this then we can transfer it via FTP server, yours or mine.

Thanks for your help.

http://205.156.54.206/nwr/nwrwarn.htm

Has all you need to know. I did a simple Google search and found the
answer in less than 5 seconds.

" NWR alarm features normally run tests each Wednesday between 10 a.m. and
noon local time. Tests may occur at other days and times when there is a
threat of severe weather in the listening area or for other reasons.
Immediately after sounding the test alarm, the following message is read:

"This is the National Weather Service Office in ...city.... The preceding
signal was a test of the Weather Radio Station ...call sign...'s public
warning system. During potentially dangerous weather situations, specially
built receivers can be automatically activated by this signal to warn
of the impending hazard. Tests of this signal and receivers' performance
are normally conducted by the National Weather Service at ...time... each
Wednesday. If there is a threat of severe weather, the test will be
postponed to the next available good-weather day. Reception of this
broadcast, and especially the warning alarm, will vary at any given
location. This variability, normally more noticeable at greater distances
from the transmitter, can occur even though you are using a good quality
receiver in good working order. To provide the most consistent and
dependable warning service possible, the warning alarm will be activated
for hazardous watches and warnings for the following counties...
(list of counties)..."

Where more than one state is involved, the state name will always precede
the names of the counties in that state. If the test was missed during
the scheduled time frame, then the test normally takes place between
10 a.m. to noon on the next available good-weather day. If you have any
questions regarding alarm tests or to verify if a test was conducted,
contact the programming office of the NOAA Weather Radio station."

==========

Yes I could buy a copy, but I wouln't. I'm considering creating a
website that uses this data and will benefit all radio amateurs. It
would have online interactive mapping which showed all repeaters.

This will require over 100 hours of my time and more than $100 for web
hosting, which I am willing to give.

This is just an initial investigation. Otherwise I have no use for this
data.

If you reflect the attitude of most radio amateurs then I think I'll
just skip the whole idea. It's you loss, not mine.

Hi,

I have some commercial end fed dipole antennas. I trimmed them to length from the supplier trimming chart for 152 MHz.

When I sweep one with the RF sig gen and return loss bridge, I see the resonant dip at 152 MHz but it is only about 8 dB return loss.

If I may a simple dipole from some hook-up wire and sweep it, I get around 20-25 dB return loss.

Would someone mind explaining what is happening, is there a PI match or something required between my sig gen and RG58 Coax to improve the retrun loss.

Also, what is optimal length of coax (is it multiple of 1/2 wavelength or (1/2 wavelength x Vp) ?)

Thanks for any assistance.

Yes, please go ahead and skip the project. You do not have the character nesessary for that kind of work, and those who do have their character intact do not want software built on stolen or pirated data. Most hams are persons with well developed personalities. I'm sorry to hear that you are not.

In addition to not doing this project, I'm sure that most hams would appreciate it if you would mail your ham ticket back to the FCC. We try to maintain a certain level of decency going in the ham community, that you do not measure up to.

For your own sake as much as anybody else's, its probably best that you leave the hobby, never to return.

Goodbye!

Charles, N5PVL

Absolutely no loss either way - I am in VK and as such I am highly unlikely to make any use of it - and there is already a website here in VK that does that already for VK.
It is good that you are willing to spend time and your own finances to provide a resource, but what I was objecting to was your willingness to pirate software that is provided by an organisation that uses the profits to further amateur radio - if the software is not pirated that is. I am no angel and am not overly concerned with software piracy as most of the big companies are making obscene profits from badly overpriced products, but this one annoys me irrespective of your good intentions.
Maybe you should try contacting the ARRL and putting forward your proposal to them - you never know, they may well give you permission to go ahead and use a free copy of their product - or they could well tell you that someone else has already done what you seek to do.

Matt

David:

A center fed dipole is usually a pretty good match for coax (50 or 70 ohm coax). But an end fed dipole requires some kind of matching device because of the higher impedance (several thousand ohms) involved.

The antenna you have appears to be intended for end feed so it must have some kind of matching device incorporated into it. I wonder if it has to be adjusted, just as the length has to be adjusted according to the cutting chart. You might look in the instructions for information about adjusting any matching device. If that fails, look at the parts near the feed point for anything that looks adjustable.

If this is a mobile type antenna, the matching device could be a screwdriver adjustable capacitor inside the base of the antenna. If it is a base station antenna, it could be a capacitor or maybe a sliding section of transmission line to make the match adjustable.

Good luck,

Roger K6XQ

As Roger pointed out, an end fed dipole will have quite a high impedance. This has another effect as well. If there is any coax between your bridge and the antenna, there will be significant loss in the coax at 152 MHz, and that loss will be exaggerated if there is a mismatch between the antenna and the feedline.

In any situation, the "ideal" feedline length is zero, since this will result in minimum loss. If your antenna is mismatched, some feedline lengths can hide the mismatch at the transmitter, but the exaggerated feedline losses will still be there. This masking of the antenna can help transfer power from the transmitter into the feedline, but may not help the end result. Certainly, when everything is matched you have the best situation, and in this case, increasing feedline length increases the losses, but changes nothing else.

When things are not matched, then different feedline lengths will give you different measurements, but in most cases, those measurements will be somewhat misleading since the feedline losses can get quite astonishingly high, and the measurements you get will be correct, or indicate a lower than actual mismatch (and consequently lower than actual feedline losses), depending on the length.

..

I was a little surprised to see that. Your first post showed a call that came up Ohio, and I was going to suggest that the author was likely to be at Findlay, and quite possibly Dayton, so perhaps you could get together with him.

In any event, I would suggest you contact the author, N8DHF. I know he doesn't make anything significant off this, by the time you get the CD made, packaged, advertised, distributed, you're coming in pretty close to the selling price. He is a heck of a nice guy, and perhaps you two could get together to make something happen.

..

2369. Ohio/Penn DX DX Bulletin #606

Ohio/Penn DX Bulletin No. 606

The Ohio/Penn DX PacketCluster
DX Bulletin No. 606
BID: $OPDX.606
April 7, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1K, K1XN & GoList, NC1L, KA2AEV, NG3K, W3UR & The Daily DX, K4WLS, N4AA & QRZ DX, W4WX, N5VL, W6AWO, K8YSE, 9A6AA, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, DL6KVA, EA7FTR, F5NQL & UFT, FJ5DX & La Gazette du DX, G3SWH, HB9EAA, I1JQJ & IK1ADH - 425 DX NEWS, I2YSB, IZ4COT, JI6KVR & JA-IOTA Islands News, JR3TVH, LU6EF, LU7DR, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PA1AW, PA5NT, S05X Team, UU2JQ, VA3RJ & ICPO, VE7DP, and VK3OT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th/March, through Sunday, 6th/April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8/o, VQ9, VR, VU, XE, XT, XU, XW, XX9, XZ, YA, YB, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

5J0, SAN ANDRES ISLAND. Members of the Florida DXPedition Group have entered the CQWW SSB Contests from many DX locations starting in 1996 as WP2AHW. In 1997, they were C6AJT, 1998 as WP2Z, 1999 as J6J, 2000 as FG5BG, 2001 as

J75J, and 2002 HI9X. In addition to the CQWW Contests, their members have operated from Guantanamo Bay, Cuba, Antigua, Montserrat, Haiti, Crete, Wake Island, Spratly Island, Chatham Island, East Malaysia and New Zealand. This year eight members will be operating from San Andres Island (IOTA NA-033) during the period of October 20-28th. They plan to run 4-5 stations before and after the contest. They have also requested the contest callsign 5J0X. In the past they have never asked for any assistance. This year they are asking for donations to help offset the cost. If you are interested in helping them out, please send your donations to: Bill Gallier, FDXPG, 2694 North Camel Ave., Middleburg, FL 32068. Visit their two web pages at:
http://www.geocities.com/hk02003
http://www.geocities.com/w4wx1/upcoming

8P, BARBADOS. Richard, G3RWL, is expected to be active from here until April 20th (No callsign was provided). Activity will be on 40-10 meters, plus 80 and 6 meters if he can arrange the antennas. QSL via his home callsign, direct or to the bureau.

9N, NEPAL. Dov, 4Z4DX, is expected to be active as 9N7DX from April 22nd to May 13th. He will be looking for Israeli stations everyday on 14195 kHz starting around 1500z. His activity will be on all bands and modes, but mostly on PSK31/RTTY/CW.

A4, OMAN (Pirate Activity). Axel, DL6KVA, has been in contact with Alex, A45WD (YO9HP), and has confirmed that a station using Alex's callsign operating on 30 meters (March 29th, 2000-2100z on 10107.6 kHz) was a PIRATE. Alex states he is NOT licensed to operate on 30 meters (yet). All QSLs for this band activity will be returned. He is trying very hard to get approval to operate on 30 meters, but it is going very slow.

CY9, ST. PAUL ISLAND (Update). OPDX was informed that the 5-6 operators (who will be named later) going to CY9-land July 24th-August 2nd, should be active on 160-2 meters SSB/CW/RTTY. The group is trying to get a CY9 callsign which will be put out after their arrival.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Branch Manager, announced this past week that the following is approved for DXCC credit:
VP6DIA - Ducie Island - March 8-13th, 2003

GACW DX CONTEST. Raul, LU6EF, GACW Coordinator, wants to remind everyone that the GACW World Wide DX Contest will be held during the third weekend of April (April 19-20th). For details and rules on the contest, please visit their Web site at: http://gacw.no-ip.org

IN SEARCH OF BY YOUR EDITOR! I know this has nothing to do with DX, but your editor's second love (other than DXing) is MUSIC. I have been searching for a music CD (not LP) called the "Young and Rich" by the group "The Tubes". The CD is now out of print. Please look at your local record/CD store to see if they have a copy. I am interested in buying a copy (or even a backup version) at a reasonable price......Thanks Tedd, KB8NW

IOTA NEWS.....
AF-045. Members of the Association des Radioamateur Senegalais (ARAS)

6W Radio Club will be active as 6V1A from Goree Island, June
7-9th. Activity will be on HF bands mainly on SSB with some
CW. QSL via ARAS QSL bureau to Jean Louis, 6W6JX.

AS-079. Taka, JR3TVH, informs OPDX that he will be active as homecall/6
from Hirara City (near or around), on the Island of Miyako
(Ryukyu Islands, Okinawa-ken) between April 11th (0700z) until
around April 13th (0100z). He will be on the HF band from 40-6
meters on CW, SSB and RTTY. His specific aim on this visit is
to provide QSOs on 6 meters overseas (especially to African and
European stations). Look for his beacon on 50.138 MHz (JR3TVH/b)
to call him on the frequency, or contact him by an E-mail at:
jr3tvh@arrl.net
QSL to his home callsign, via the bureau or direct (QRZ.com).

AS-117. Opertaors JA1KJW, JJ1JGI, JK1EBA and JN1IKT will be active as
homecall/0 from Sado Island, April 10-13th. Activity will be
on 160-6 meters CW/SSB. QSL via the bureau or direct to their
home callsign.

EU-038. Peter, DL4FCH, will be active as PA/DL4FCH from Texel Island,
April 11-17th. Activity will be only CW on 10/15/20/40/80
meters. QSL via his home callsign. An online log will be
available on his home page at: http://www.niksch.de/dl4fch

EU-045. Members of the Mediterrano DX Club (MDXC); Antonio/IZ8CCW,
Antonio/IK8VRH and Gianni/IZ8CGS will be active as IB0DX
from Ventotene Island, April 25-27th. Activity will be on
80-10 meters CW/SSB/RTTY. QSL via home callsign, direct or
via the bureau. Their Web page is at:
http://www.mdxc.org/ib0dx

EU-170. Ron/9A5JR (OE3REB) and Emir/9A6AA will activate the Island
of Dugi Otok (CI-018, CRO-183, not WLH) from April 7th
(afternoon) to April 9th (before noon). They will operate
from the lighthouse of Veli Rat. Look for for them on SSB
on 15, 20 and 40 meters.

EU-171. Ela/DL3YMK and Torsten/DH3YMG will be active as OZ/homecall
from Vendsyssel-Thy/Nordjylland Island (aka Jutland Island).
This island also counts as DIA NJ-001 for the Danish Islands
Award. Activity will take place between now and April 17th.
Operations will be on 40/20/15 meters. QSL via their home
callsign, direct or by the bureau.

SA-056. Members of the HCDX group will be active from April 8-11th
from Muisne Island in the Esmeraldas Province Group. Their
callsign is currently not known yet. Activity will be on
10, 15, 20 and 40 meters. QSL via EA7FTR:
Francisco Lianez Suero, Asturias 23, 21110 - HUELVA - SPAIN.

IR4, ITALY. Igor, IZ4COT, informs OPDX that the IR4A contest team, which
consists of operators IK4MSV, IK4SWX, IK4IDS, IK4HLU, IZ4COT, IZ4DIW and

IZ4AGI, will be active during the ARI International Contest May 3-4th. QSL via the bureau (preferred) or via direct to: ARI, P.O. Box 178, 42100 Reggio Emilia, Itlay.

J5, GUINEA-BISSAU. Miguel, EA5IK, hopes to be active during his spare time from here, April 12-15th. No callsign or bands/modes of activity were provided. QSL via EA5BY.

J7, DOMINICA. Jon/AA1K and Jeanie/AB1P are now active through April 12th as J79K and J79P, respectively. This is a vacation and casual DXpedition. They will have a pair of IC-706's and wire antennas. Jon hopes to be active a little on all of the bands 160-6 meters, but he will focus mainly on CW, especially on the WARC bands. Jeanie will do some phone operating. The second radio will be monitoring 50.110 MHz or CQing on 50.102 MHz CW. Activity began late on April 5th and is expected to end early on April 12th. The only QSNs to report as of print time are Jon was heard on 10107 kHz around 2255z and on 18073/18080 after 1900z. QSL via their home callsign.

OH, ALAND ISLAND. Ben, SM6CCO, will be active as OH0CO from April 10-16TH. Activity will be mainly on the WARC bands and CW. QSL via SM6CCO, bureau or direct.

OY, FAROE ISLAND. Plently of activity by the LLDXT group continues until April 10th. Remember ALL QSLs will be handled by LLDXT's QSL Manager PA5ET. Pictures and an online log search are now available on the LLDXT Web page at: http://www.qsl.net/lldxt/oy_2003/

QSL INFO AND NEWS.....
Activity by 4G6A was by Frank/VE7DP and Rey/4F1FZ on Semirara Island (OC-125). Operation to end April 7th. QSL via VE7DP (QRZ.com).

Phil Whitchurch, G3SWH, is pleased to announce that the 8Q7ZZ QSL cards have been delivered from the printers on April 1st. He states, "Needless to say, I am very embarrassed about the delay in sending out the cards. I have not been responsible for the design or printing of them, as the expedition operators wanted to do this themselves. I will get on with the job as fast as I can now they are to hand, but please do NOT send second applications, as they will not be answered. As you will imagine, there is quite a large backlog of requests to answer, which will take many weeks (if not months) to work through, so please have patience."

According to "The Weekly DX", the AH3D cards will not be back from the printers until May. The QSL is expected to be a great aerial photo of Johnston Atoll. QSL AH3D to: 2003 Johnston Atoll DXpedition, P.O. Box 73, 02380 Espoo, Finland.

QSL AY9H via LU9HO. Use the address on QRZ.com. OPDX was informed to please remind the readers to QSL as follows:
1 SASE with one IRC is ok for reply for the whole world.
1 USD for the bordering countries.
1.50 USD to the rest of Americas.
2 USD to the rest of the world.

Gerben, PA5NT, reports that all direct cards for ST2X have been answered and are in the mail right now. Those who worked ST2X on all 7 bands that were activated will receive a special award.

ST0RY QSL INFO. Chris, DL5NAM, DXpedition Team Leader/QSL Manager, has requested that only one QSL card with all QSO info listed on the card be sent to expedite processing. Chris said that he really did not care if you did not send a card, and a piece of paper would do as long as all info for all your QSOs were on one peice of paper. A system will shortly be in place on the ST0RY Web page to request a bureau card via E-mail. For direct QSL returns for US stations, please enclose 2.00 USD (the German cost of return airmail postage) and a pre-addressed return envelope. For European stations, please enclose one Euro Dollar and a pre-addressed envelope. Direct cards go to Chris, DL5NAM, at: Chris Sauvageot, Guttenburg 19, D-91322 Graefenberg, Germany. Chris also said that individual donations would be greatly appreciated to help defray the great cost of putting #18 of the 100 Most Wanted List on the air for a lot of DXers.

Rustam "Rusty", UU2JQ, informs OPDX that his QSL Manager Andy, KZ1L, passed away in 2001. QSLs for UU2JQ should now be sent to the Ukraine via direct or bureau.

QSL XF3RCC via XE3RCC: P.O. Box 1883, Cancun, Quintana Roo 77500, Mexico. Activity was by members of "Radio Club Cancun" from a few Mexican islands and lighthouses over the past week.

Nik, HB9EAA, informs OPDX that he has been receiving a lot of direct cards for his ZK1EAA DXpedition without sufficinet postage. Nik states to please remember the cost of an airmail-letter for outside of EUROPE is more than 1 USD (approx. 1.35 USD). So all cards without enough postage will answer via the QSL bureau. Also, Nik can't use stamps from USA or JAPAN. These cards will also be answered via the QSL bureau. Detailed information about his activity can be seen on the Web page: http://www.qsl.net/hb9eaa/dxped03/
The ZK1EAA activity on 40m or 30m was not operated by Nik. (This was a Pirate). An ONLINE log of ZK1EAA will be available soon.

S0, WESTERN SAHARA (Update). The S05X Team keeps preparing the next "BIGGEST DXPedition" ever seen in the Sahara Desert. They will have 11 operators from 6 different countries. The S05X Team will be active from April 16-21st, and be on air from Tifariti, Western Sahara, operating 24 hours, on all bands, all modes. The list of equipment includes: Kenwood TS2000, a few Icom 706s, Icom 756PRO and a BRAND NEW ICOM 7400 (Icom 746PRO) to test in this really hard environment. They have this special Icom IC7400 thanks to one of their supporters, the major Icom reseller in Italy: Giorgio Mossino's "D.A.E. Telecomunicazioni" who is always ready to support RADIO ACTIVITIES. Other kind supporters have supplied the team with 4 brand news laptops to use during their DXpedition. "Hewlett Packard of Italy" will let them use their fast new XE4000 for their logging and digitals transmission. From the first day of operation, S05X will be on CW, SSB, RTTY and PSK, and is expected to provide you with a 59(9) signal from an exceptional locator for the very first time.

The S05X Team will be on 6 meters from a very new LOCATOR: IL46RD
They are going to use a 6 meters 3 element yagi (Cushcraft A30S) during
the operation. They will try to be on air as much as propagation allows
because they know this is the very first time this locator is activated.
QSL Manager is URE, the Spanish National Asociation and Bureau, and the
cards will go VIA EA4URE. Any comments or ideas can be sent to their
specials pilot stations: Mauro I1JQJ (i1jqj@interlink.it)
Maurizio (i121171@tin.it)

SPECIAL EVENT. The Maritime Radio Historical Society is pleased to announce
that K6KPH will be on the air on April 26th, to participate in the annual
International Marconi Day commemorative event. International Marconi Day
takes place each year on a weekend close to the birthday of the great
radio pioneer Guglielmo Marconi. The event is organized by the Cornish
Amateur Radio Club which offers awards to stations in various classes.
See their Web site for details at: http://www.gb4imd.co.uk/
Station K6KPH's transmitting frequencies will be 7050, 14050 and 21050
kHz (3545 kHz may also be activated if conditions warrant). Also, K6KPH
will begin operations on April 26th at 1700z (1000 PDT). The actual
International Marconi Day event runs from 0000-2359z on April 26th. QSLs
for K6KPH and reception reports may be sent to: Ms. DA Stoops, P.O. Box 381,
Bolinas CA 94924-0381, USA. Visit the Maritime Radio Historical Society
Web page at: http://www.radiomarine.org

TX4, MARQUESAS ISLAND (Update to OPDX.597 and OPDX.602). Silvano, I2YSB,
informs OPDX that his callsign for his April 25th-May 9th operation will
be TX4PG. Updates and all other information is available on his Web page
at: http://digilander.libero.it/i2ysb

V2, ANTIGUA AND BARBUDA. A group of amateurs from the recently formed
Antigua and Barbuda Radio Club (callsign V21ARC) will be going on DXpedition
to the sister island of Barbuda over the Easter weekend (April 18-21st).
Their callsign for this operation will be V21BBQ (BBQ is the Airport
designator for Barbuda Airport!). They plan to operate on 160-10 meters
plus localized 2 meter contacts. The plan is to have three stations on HF
and one on 2 meters. To their knowledge, there has never been any ham
activity from Barbuda. With their activity and presence on the island,
they hope to expose the residents to ham radio and secondly, to familiarize
the ham community with Barbuda. QSL to: Antigua & Barbuda Radio Club,
P.O. Box 965, St.John's, Antigua, West Indies.

VK9X, CHRISTMAS ISLAND (Update). Steve, VK3OT (ex-VE3SIX), reported before
he left Victoria on April 4th, that he has changed his operating schedule
for his VK9XI operation between April 7-21st. His priority is now the 6
meters band and HF CW when 6 meters is closed. The following operating
times are subject to change due to propagation and solar activity.
Time Band - Frequency Mode
---- --------------- -----
0200z 10m - 28040 kHz (Up 5) CW Primary
0400z 15m - 21040 kHz (Up 5) CW Primary
0600z 20m - 14040 kHz (Up 5) CW Primary

0800z 30m - 10114 kHz (Up 1) CW Only
0900z 40m - 7030/7055 (Up 5) CW Priority
1000z 80m - 3530 (Up 5)/ 3797.5 CW Priority
1100z 160m - 1827/1822 (Dn 5) CW Only
0000-1500z 6m - 50115 (Up 5) (QSX 50110 and 28885)

Steve may make possible appearances on the "IOTA Net", Saturday on 14260 kHz at 1300z and Sunday on 21260 at 1300z. Also, watch on the weekends for him to possibly show on the ALARA Net, 14222 kHz at 0600z and on the daily ANZA Net, 21205 kHz at 0500z. QSL via VK3OT (Direct ONLY) to: Steve Gregory, Post Office Box 622 Hamilton, Victoria 3300, Australia. For a printout of the frequency schedule, visit the Web page at: http://members.datafast.net.au/electronics/path.htm

VP5, TURKS AND CAICOS ISLAND. By the time you read this, Rodger/GM3JOB and Willie/GM4ZNC should be active once again as VP5/homecalls from North Caicos (NA-002) between now anf April 19th. No QSNs have been reported yet as of print time, but they plan to be active on most bands CW/SSB. QSL via their home callsigns, either direct or through the bureau.

XY, MYANMAR. Franks, DL4KQ, is now active as XY4KQ until April 15th. He was heard this past weekend on 20 and 15 meters. Watch 14150 kHz between 1800 and 2045z. Also, watch 21307 kHz after 1630z. Remember, his activity is expected to be on all bands including the WARC bands, and he will try to activate a new IOTA (refer OPDX.603). For more info and updates, go to the Web page at: http://www.dx-pedition.de

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not

have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Yes, please go ahead and skip the project. You do not have the character
nesessary for that kind of work, and those who do have their character
intact do not want software built on stolen or pirated data. Most hams are
persons with well developed personalities. I'm sorry to hear that you are
not.

In addition to not doing this project, I'm sure that most hams would
appreciate it if you would mail your ham ticket back to the FCC. We try to
maintain a certain level of decency going in the ham community, that you do
not measure up to.

For your own sake as much as anybody else's, its probably best that you
leave the hobby, never to return.

Goodbye!

Charles, N5PVL

Gawd, Charlie. You're such a whining sort....is it that time of the month?

2371. Remote Weather Station Licensing

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-07 04:36:42 UTC
From: Fritz Wuehler <fritz@rodent.frell.eu.org>
Message-ID: <151ef060b2a8d5a8a559d7b25fc3c158@remailer.frell.eu.org>
Source record: 68066
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Greetings - I'm a new Tech. licensee interested in building a remote weather station for use on the coast to monitor wind conditions. The technology is not a problem for me (MSEE with 10 years experience in UHF wireless), but I can't figure out the regulatory end of it (IANAL).

What I want: an autonomous weather station that broadcasts wind data at least every three minutes. Just to give you an idea of how much data I'm talking about, a few 1200 baud APRS (e.g. with the TAPR APRS PIC-E system) packets would be plenty - it's not much data.

My concerns: this is not a backyard affair attached to my personal station - it would be a standalone broadcast unit (or perhaps an autoresponder?). I don't think my personal callsign is legal for use here. It seems like a lot of people do what I'm talking about via APRS, but I'm not so sure about the autonomous station issue. Repeaters get their own licenses - what about weather stations?

I've thought about going to Part 18 ISM rules instead with a 902 MHz line-of-sight link, but that's not a clear regulatory option, either. Neither is Part 15 (I don't want to have to certify compliance). I think it really is a HAM-related activity, but I don't understand the operations portion.

Does anyone have an idea of the basis on which I might license such a station?

Thanks!

Bill Alexander

==========

I don't see any great moral conflict here. I've bought a half dozen
repeater handbooks, now I just want it in computer form. I have no

interest in any software on this CD, just the data. How many times do I have to buy the same data?

I'm really surprised at the responses here. They lead me to believe that radio amateurs wouldn't give a dime to support a website that they could really use. Nothing like what I have in mind exists today. It's beginning to look like it would be a waste of my time.

Another thing which kinda sucks is that this data does not have the exact longitude and latitude location of the repeaters, just the city, which is a very imprecise metric. I had more precision in mind.

A repeater on the north side of Chicago might not work on the south side.

This website could generate maps that showed locations of remote inputs and main transmitters, but not if I can't get this information.

If you guys ever want to see a website that shows an accurate map of repeater coverage then the ARRL needs to get know exactly where they are located.

Write the ARRL and ask them to request the precise GPS location of all the antennas. Knowing just the city doesn't cut it anymore.

RADIO HONORS: WORLD AMATEUR RADIO DAY

Amateur Radio Supporting Education' is theme for World Amateur Radio Day. Its coming up real soon. RSGB newsreader Jeramy Boot, G4NJH, is here with the details:

--

The theme of this year's IARU World Amateur Radio Day is to be 'Amateur Radio supporting technology education in the classroom'.

World Amateur Radio Day is marked on the 18th of April each year to commemorate the anniversary of the founding of the International Amateur Radio Union on that date in 1925.

Ole Garpestad, LA2RR, the Chairman of IARU Region 1 writes: "There is no doubt that the future of amateur radio belongs to those that are now in the classroom. In keeping with this theme, I would like to encourage every society in the Region to let our young people know that amateur radio is a unique hobby - simultaneously sport, scientific study, personal pleasure and collective activity. And that radio amateurs today are voluntary and selfless researchers in the technological field of amateur radio, an important resource to every country, and something to be proud of."

"But the 18th of April is not only a day to think about our future, it is our day, a day for celebration. All of us, societies and individuals, can celebrate in our various ways - organizing presentations, club meetings, parties, honoring senior radio amateurs who go back to the early years of IARU, or just putting our equipment on the air and making just a single QSO on this day, so realizing how large our ham community is."

Jeramy Boot, G4NJH

--

Again, the date for this years World Amateur Radio Day is Friday, April 18th. (GB2RS)

**

HAM RADIO IN SPACE: PROJECT EAGLE ON HOLD

Plans to launch one of two new ham radio satellites have been put on hold. The reason for the setback can be traced to one word: Funding.

The bird in question is named Project Eagle. It, along with the Project Echo ham-sat is one of two birds that AMSAT had previously announced for development.

According to AMSAT North America President Robin Haighton, VE3FRH, the current levels of contributions to the amateur satellite organization are not enough to pay for building and launching both future satellites. One of two projects has to be put on hold and furloughing Eagle has been the decision.

Up until now AMSAT North America had been working on both new satellites simultaneously. While ECHO is still on schedule for possible launch later this year, the launch of Eagle has been delayed indefinitely. (AMSAT)

**

HAM RADIO IN SPACE: TWO-HAM CREW HEADED TO THE ISS

Just as ARISS Chaiman Frank Bauer, KA3HDO, predicted a few weeks ago, two ham radio operators will be replacing the current three man crew on board the International Space Station. A NASA announcement identifies the latest space adventures as U-S astronaut Ed Lu and Russian cosmonaut Yuri Malenchenko.

Lu holds the call sign KC5WKJ while Malenchenko is RK3DUP. They will comprise the Expedition 7 crew, replacing Expedition 6 astronauts and Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Russian cosmonaut Nikolai Budarin.

NASA and its partners decided on manning the ISS with two space explorers instead of three as an interim measure until the U-S space shuttles are flying again. A two man crew conserves on the amount of vital supplies needed for on-orbit life.

Three person crews will resume when the Columbia disaster investigation is concluded and the space shuttles take to the sky again. The three remaining Shuttles in NASA's fleet Endeavour, Atlantis, and Discovery have been grounded until the cause of the Columbia accident can be determined and safety changes implemented.

NASA's Return to Flight team has been told to complete their initial tasks in time to support the earliest possible launch date, which would be this fall. But officials of the space agency say that it could take

months longer to prepare the shuttles to fly again. (From published news reports)

HAM RADIO AT WAR: DOING BATTLE WITHIN

Ham radio is supposed to transcend international politics, but you would never know this by the on-air antics of one unnamed Ukrainian radio amateur and a few stateside hams.

Lets start with a post on the QCWA remailer by Bob Harvey, K2PI. Harvey says that he heard the Ukrainian operating a contest on March 30th. Thats not news in itself except that the Ukrainian was refusing to work United States or U-K amateurs because of the war in Iraq.

Harvey writes that the Ukrainian said to call him only if you supported his view that the United States was conducting an illegal and evil war. Needless to he had no QSO's with any American or British hams.

But theres another side to it. John Sielke, W2AGN comments over the same QCWA remailer on the plight of a French ham friend of his. W2AGN says that the guy was harassed off of another ham radio remailer only because he was French and the other hams did not agree with France's anti-war stand. Sielke says that the unidentified French ham was truly vilified even though he had made no comments concerning Iraq or politics. He was just attacked purely because he was French. (QCWA Reflector)

**

RADIO RULES: FCC CONSIDERS INTERFERENCE IMMUNITY FOR RECIEVERS

We predicted a month ago that it would happen. Now comes word that the FCC has issued a Notice of Inquiry, seeking comments on possibly requiring receiver manufacturers to build in a certain level of interference immunity. Bill Pasternak, WA6ITF, has more:

--
As noted on the CQ Magazine website and elsewhere in cyberspace, amateurs have been frustrated for years by trying to explain to neighbors that interference problems were really the result of poor design. Bad engineering in their TVs, stereos, cordless phones and other receivers.

Now, because of the need to protect Digital Television transmissions, the FCC is seeking comments on the current immunity performance and interference tolerance of existing receivers. Its also looking at the possibilities for improving receiver immunity in the not to distant future.

The FCC says that it is soliciting input from the public on possible approaches to achieving desired levels of receiver immunity. This runs the gammit from better product warning labels to the possibility of implementing mandatory standards governing the manufacture, import and sale of consumer electronics reception gear.

It is all in FCC E-T Docket 03-65. You will find it on the web by using the document search engine at www.fcc.gov.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

Again the inquirtey into interference immunity standards can be found in FCC E-T Docket 03-65. (CQ Website, FCC)

**

FCC: VANITY FEES MAY BE GOING UP

If you are planning to go for a vanity call sign, do it now or be prepared to pay a few cents more. The proposed hike to $16.30 for a vanity call comes in an FCC Notice of Proposed Rule Making dealing with fee collection matters released on March 26th. Its all in M-D Docket No. 03-83 and comments on it are due no later than April 25th. (From FCC release)

**

ENFORCEMENT: FCC - YOU SOLVE THE PROBLEM

The FCC has told the operators of two competing repeaters that its not going to solve the dispute between them. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has written to Grearal Gogue of Conway Arkansas, David Stone of Morrelton, Arkansas and Tom Lee of Jerusalem, Arkansas, regarding repeaters AC5RU and KD5CYA. In the letter it was stated after reviewing the submissions of all relevant information, we declined to intervene in this dispute. It is our position, that in this case, both parties are responsible for solving the interference and we urged them to so in the best interests of Amateur Radio."

--

In this case, two repeaters sharing the same frequency claim mutual interference. On May 24, 2000, the FCC opened an inquiry about

allegations that Lee's AC5RU system was causing harmful interference to coordinated repeater KD5CYA, licensed to Gerald Hogue. The allegations stated that Lee's repeater was uncoordinated because the coordination had been forfeited by numerous changes in location.

On August 14, 2000, the FCC notified Lee that it was his responsibility to prevent interference to KD5CYA inasmuch as it appeared to be the coordinated repeater. On September 14, 2000, after reviewing Lee's lengthy response, the FCC rescinded its requirement that Lee solve the interference to the KD5CYA repeater. This is because it was unclear to the FCC as to which repeater was properly coordinated. The Commission said that it was not an appropriate matter for enforcement action. It also urged the parties to take advantage of the mediation and dispute resolution program of the ARRL but one declined.

Lee submitted additional information on January 5, 2001. On February 8, 2001, after receiving additional documents from all parties, the FCC stated that although it failed to see why mediation or arbitration would not be a viable option, we nevertheless agreed to review the matter once again. In response to allegations of deliberate interference, we cautioned everyone involved to cooperate in the resolution of this matter.

Now, almost two years later the FCC has again said its not going to act. It says that after reviewing the submissions and all relevant information, that it will not intervene in this dispute. The agency says that in this case, both parties are responsible for solving the interference and it urges them to do so in the best interests of Amateur Radio. (FCC, RAIN)

**

AT THE FCC: MULETA NEW WTB CHIEF

John Muleta is the new Chief of the FCC's Wireless Telecommunications Bureau, which regulates amateur radio along with other two-way radio services. According to the ARRL, Muleta worked for the FCC from 1994 to 1998 and his positions included Chief of the Enforcement Division. He has also worked in the private sector since 1998. Muleta succeeds Thomas Sugrue, who headed the bureau the last four years. (ARRL)

**

RADIO LAW: CONGRESS APPROVES DIFFERENT AMBER ALERT MEASURES

The United States House of Representatives has approved creation of a nationwide Amber Alert network. The action came on Thursday, March 27th after politicians on both sides of the aisle attached several additional child protection measures to the bill.

The bill, approved by a 410 to 14 vote, now goes to the Senate, which earlier approved legislation authorizing only the nationwide child kidnapping alert network. President Bush has commended the House on

acting on legislation to help expand an Amber Alert system across the nation. He says that he looks forward to signing a reconciled version of the bill. (Published news reports)

**

RESCUE RADIO: UK POLICE ASK HAMS TO HELP SOLVE ROAD MURDER

Police in Surrey are asking U-K hams and C-B operators to help solve a case of murder by road-rage. Just after midnight UTC, on Friday the 21st of March, a truck driver on the M3 motorway was driving northbound when someone threw an object at the cab of his vehicle. It smashed the windshield and hit the driver and fatally injuring him. He was able to bring the truck to a safe halt before loosing conciousness. He died at the scene.

Investigators belive that the object was thrown from a footbridge over the highway. They are asking any ham or C-B operator who was driving in the area that night to call in and let them know if they saw anything. Surrey Police say that any leads would be appreciated. (GB2RS)

**

RESCUE RADIO: HAMS HELP SAVE YOUNG BURN VICTIM IN HONDURAS

The ARRL Letter says that quick action on the part of a group of ham radio operators may have saved the life of an young burn victim in Honduras. The 8 year old girl was seriously burned late last month. Amateur Radio operators and volunteers at the International Health Service clinic in a remote village in southeastern Honduras and stateside hams worked together on the air to bring needed treatment to the child. With ham radio to coordinate the move, the youngster was evacuated by air to the nearest town with a hospital. From there she was taken to the capital city of Tegucigalpa, where the University of Honduras Medical Center has a burn trauma unit. (ARRL)

**

WELCOMING THE YOUNG: W9SM AT THE WAUSAU CHILDRENS FESTIVAL

The Wisconsin Valley Radio Association will be sponsoring a special event station W9SM, at the 30th Annual Children's Festival in Wausau, Wisconsin.

The date is Saturday April 5th. The Children's Festival features hands-on activities at numerous booths run by various community groups.

The special event station will operate between 1600 UTC and 2200 UTC on April 5th. This, in the General portions of the 10, 15, 20 or 40 meter bands both SSB and CW.

While in operation the station will demonstrate several aspects of amateur radio to the children attending, including APRS and High Frequecy operations. The kids who stop by will also have the

opportunity to get on the air.

The Festival is sponsored by the Children's Festival Committee and the Wausau and Marathon County Parks and the Recreation and Forestry Department. QSL via WB2TLQ at his callbook address. (WB2TLQ)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION - APRIL 9

On the convention scene, the annual Amateur Radio Reception at the National Association of Broadcasters Convention is slated for 6 to 8 p.m. on Wednesday April 9th. The venue is the Hilton Hotel in Las Vegas Nevada, right next door to the famed Las Vegas Convention Center.

This years hosts are again CQ Magazine and Kenwood Communications. Publisher Dick Ross, K2MGA and Editor Rich Moseson, W2VU will be there representing CQ. Paul Middleton, K4NUH, will be on hand for Kenwood.

Between 800 to 1000 hams in the broadcast industry attend this yearly ham radio social get together. Among them will be top ARRL officials and some of the folks from Amateur Radio Newsline.

The National Association of Broadcasters Convention is one of the largest held each year in Las Vegas. It typically draws over 100,000 attendees. More information is on the web at www.nab.org/conventions/nab2003 (ARNewsline™)

HAMFESTS AND CONVENTIONS: GO SEE THE TV COMMERCIAL

Ever see a television commercial for a ham radio convention? Well the Rochester Hamfest has one and its now on-line so that you can see and hear it.

The commercial comes courtesy of the Rochester Hamfest. That show is slated for May 30th through June 1st at the Monroe County Fairgrounds in Rocheter New York.

To view or download the T-V spot go to www.rochesterhamfest.org. Then scroll down to the words "click here to see our new TV commerrcial."

And oh yes. A high speed connection is recommended. This is because it is a 5.9 Mega Byte file that opens in most recent media players

including Apple Quicktime and Real Player One. (Rochester Hamfest)

**

HAM RADIO IN SPACE: THE 2003 AMSAT-UK SPACE COLLOQUIUM

And the 18th AMSAT U-K Space Colloquium will be held from July 25th to the 27th at Surrey University, Guildford in Surrey England. This year speakers are a bit hard to find. So planners have relaxed the requirement for a printed paper to accompany the talk. AMSAT says that in 2003 this will not be mandatory.

Other changes this year include "Beginners' Sessions" on both Friday and Saturday afternoons and an earlier start of talks. These will begin right after lunch on Friday but alternate planned tours will be available all day.

Full information about the 2003 Colloquium is on the AMSAT-UK web site. You will find it in cyberspace at www.uk.amsat.org/colloquium.htm. (AMSAT-UK)

**

INTERNATIONAL - UK: CB RULES AND FREQUUENCIES TO CHANGE

On the international freont, look for some major changes to happen to 11 meter Citizens Radio in the United Kingdom over the next several years. This, as the result of the British equivlant of our Notice of Inquirey being issued by their Radiocommunications Agency on March 25th.

The Consultation Document -- as it is known -- contains a proposal to deregulate Citizens' Band radio in the United Kingdom and withdraw the 40 U-K only CB channels by 2010. It also proposes removing the need for individual licensing in 2004.

Not changed would be the current technical equipment requirements and the current operating rules. The deleted U-K only channels would be replaced by the 40 pan-European C-B channels. A press release from the U-K Radiocommunications Agency says that this deregulatory move is intended to provide easier access to C-B and to enhance enjoyment of the hobby. (GB2RS)

**

INTERNATIONAL - INDONESIA: WORLD-WIDE CB DIRECTORY

The Indonesian DX Club is inviting Citizen's Band operators around the world to register their callsigns for the IDXC's C-B Radio Callsign Directory. IDXC is the only one DX listeners club located in Indonesia, and regularly listed in the World Radio TV Handbook. To learn more about the club and register take your web browser www.idxc.org/callsign and explore a rather interesting spot in cyberspace. (IDXC)

**

AWARDS: GET YOUR SWL CERTIFICATE

Duane Fischer, W8DBF, says that the beautiful Hallicrafters Ccollectors International Short-Wave Achievement Certificate is still available. You get it for verified reception of 25, 50, 75, 100 or more countries. Proof of reception is not required as the award runs on the honor system. You can see a low resolution copy and get more information on line at the Hallicrafters Ccollectors International website. Irts in cyberspace at www.w9wze.org (W8DBF)

**

DX

In DX, word from KA2AEV that a group from the recently formed Antigua & Barbuda Radio Club will be traveling to their sister island of Barbuda April 18th to the 21st. Plans call for stations on 160 through 10 mters plus a 2 meter station for local contacts using the call sign V21BBQ. Organizers say that to their knowledge, there has never been any ham activity from Barbuda. In addition to racking up contacts the operators hope to expose the islands residents to the magic of the hobby while familiarizing the worlds ham community with Barbuda. QSL to the Antigua & Barbuda Radio Club, P.O. Box 965, St.John's, Antigua, West Indies. (KA2AEV)

Also, PS7AHR is the official station of The Brazilian Amateur Radio Historical Archive . According to Ronaldo Reis, PS7AB, this is an organization devoted to documenting and preserving the history of amateur radio in Brazil. If you happen to contact it, please QSL via the bureau or direct to P.O. Box 2021, Natal/RN, 59094-970, Brazil. More information, in Spanish and English, can be found on the web at www.ps7ab.com.br (PS7AB)

**

THAT FINAL "APRIL 1ST" ITEM: RADIO THAT CAN MAKE YOU SICK

And finally this week, it appears that some hams may be facing a new health threat ... especially if they eat while operating the radio. Roving correspondent Pierre Pullinmyleg is back from his self imposed exile and filed this report on Tuesday, April 1st:

--

For decades, wives of radio amateurs have said that ham radio makes them sick to their stomachs. Now, it seems that ham radio may actually DO that.

The French Office of Oohs and Lalas, or FOOL, has been studying reports of amateurs falling ill after eating while operating during certain band openings on 6 and 10 meters. Officials at FOOL have determined that the problem occurs only during periods of sporadic-E propagation and believe that the radio waves carry with them into the shack of ham some of the ionization from the E-layer of the ionosphere.

If food is present at the amateur's operating position, then the ions apparently interact with bacteria present in the food to cause food poisoning. The scientists have determined that this is a type of E-Coli contamination which they have named Sporadic-E-Coli, both because it occurs only sporadically and because it appears to be caused by sporadic-E radio signals. They recommend using audio filtration in order to "cleanse" the signals before they reach the speaker, which appears to be the major medium of transmission.

Reporting from the E-layer, this is Pierre Pullinmyleg for Newsline.

--

Pierre says that another option, of course, is to eat in the shack only during periods of F-layer propagation -- and then -- to only munch on chocolate F2 layer cake. (A Pierre Pullinmyleg Annual April 1st Exclusive Report)

Many repeater and node SYSOPs do not want precise location data to be published, as a way of protecting tower sites from vandalism and theft. In many caes, the owner of the tower will frown on publishing location info for the same reasons, taking the decision out of the hands of any ham who wants space on that tower.

It may be that you can dig up this information; It may also be that you will lose many Hams their tower space if you are irresponsible enough to publish it on a web-site. Others will suffer from theft and vandalism brought on by your "concern for your fellow Ham".

If your project requires precise GPS location data for all US repeaters, this would be a great time to start looking around for another project.

Certainly I would not expect the same feedpoint impedance for an
end-fed half wave as for a center-fed half wave. Also, the end-fed
MUST be fed "agains" something. Whatever current you have in the
antenna must have a return path. Typically, it would be a ground
plane, but it might be another half-wave: a center fed full wave
doublet. In fact, with an ideal infinite ground plane, the feedpoint
impedance will be exactly half that of a symmetrical doublet in
freespace. I assume you know that the feedpoint impedance of a full
wave doublet is rather high (and quite dependent on wire diameter).
Expect to have some sort of matching device at the antenna to get a
decent match to coax, or else provide a matching network at the other
end of the line.
>
> Also, what is optimal length of coax (is it multiple of 1/2 wavelength or
> (1/2 wavelength x Vp) ?)

It depends on the mismatch at the antenna, what the line impedance is,
and what sort of network you have to work with for matching at the
other end of the line. If the feedpoint of the antenna is, say, 500
ohms resistive, then 50 ohm line can transform that to 5 ohms or to
500 ohms (actually a bit more than 5 or less than 500 because of loss
in the line), or something with the same SWR (return loss magnitude)
but with reactance. _IF_ you are operating at a fixed frequency, you
might find a line length that makes matching relatively easy. For
example, if you had that 500 ohm resistive load and 75 ohm coax, you

could adjust the length to n*180+27 electrical degrees and get a match to 50 ohms with a simple series inductance of about 140nH...or you could adjust the length to n*180+153 degrees and get a match with about 8pF series capacitance. But if your line is several wavelengths long and you want it to operate over a range of frequencies, things will be far easier if you match at the antenna end, because the impedance seen at the other end as you change frequency changes rapidly if the antenna end is mismatched. Also, line loss is higher for a mismatched line than for a matched line, and that can be a problem, especially for small (high-loss) lines run some distance.

(You can use any of a number of programs to work out numbers like I did above; I prefer the visulization I get from a Smith chart program, and you can even use just a paper Smith chart. But some people prefer to just use a numerical calculation program. In any event, it takes only a couple minutes to work things like that out, well worth the time saved mucking around with coils and capacitors trying to get something working by luck and experimentation.)

Cheers,
Tom

I think you are describing an "automatically controlled digital
station". This is covered by 97.221. You are free to do this
at VHF and higher frequencies, as well as in selected portions of
the HF bands.

Your personal callsign is fine. Callsigns no longer identify the
locations of stations or anything like that, but rather just tell
the FCC who to talk to if the station screws up. I suspect an arrangement
where you polled the data out of the station via an autoresponder
might be slightly better than broadcasting, all other things being equal.
You are responsible for having a way to shut down the station in a hurry
if it bothers someone, and having the station stay silent until polled
is an effective way to do that under normal circumstances.

>I've thought about going to Part 18 ISM rules instead with a 902 MHz

>operations portion.

Part 18 really isn't applicable, but Part 15 would probably work okay
if its constraints were compatible with your applicaton. Section 15.23
says:

15.23 Home-built devices.

(a) Equipment authorization is not required for devices that are not
marketed, are not constructed from a kit, and are built in quantities of
five or less for personal use.

(b) It is recognized that the individual builder of home-built
equipment may not possess the means to perform the measurements for
determining compliance with the regulations. In this case, the builder

is expected to employ good engineering practices to meet the specified technical standards to the greatest extent practicable. The provisions of Sec. 15.5 apply to this equipment.

If you assembling the equipment yourself it need not be FCC-authorized, you just need to do your best to build the equipment in a way which complies with the technical constraints of some section in Part 15 (just the way you'll need to build it to conform to Part 97 if you operate under amateur regulations instead).

Since some of the best Part 15 frequencies overlap amateur bands, however, and since the modes available under Part 15 are usually also legal under Part 97, it would probably still be appropriate to identify with your callsign regardless given that it might help someone find you if the station screws up. If the equipment technically complies with the requirements of both Parts, the somewhat academic discussion of which Part it was actually operating under can probably be left for the very unlikely event that you need to talk to the FCC about it.

This post is not directly related to Ham radio, but I figure there are probably many knowledgeable people here that would be able to provide advice. I'm trying to build a low cost antenna for my radio scanner to receive from around 30-470MHz. I'm not sure what kind of antenna or how long it should be. I assume it should be some sort of vertical antenna. I realize that there isn't a "perfect" antenna for this wide range, but any help would be greatly appreciated since I am mostly a novice when it comes to radio skills.

Thanks!
Greg

Dennis -

Thanks for the info. I wasn't aware of the hobbyist clauses in the type acceptance for Part 15. That makes it far more tempting. I especially like your advice to have it comply with both parts 97 and 15.

I'll be digging into the CFR 47-97, starting with 97.221, but my experience with other Parts is that often the meeting minutes are required in order to understand the intent of the regulations. Do you have any advice on where to go for pre-fabricated interpretations of the regs?

- Bill

Hi Dennis -

I spent last night surveying Part97, and I have a followup question regarding the relative merits of an "auxiliary station" (AS, cfr47:97.201) vs. an "automatically controlled digital station" (ACDS, cfr47:97.221).

According to 97.201(b,d,e), an AS can be put into service on 1.25 meters and shorter wavelengths, with automatic control and one-way transmissions. However, this mode excludes the 2m band.

In 97.221(b,c-2) we learn that 6 meters or shorter is OK for an ACDS. But paragraph 97.221(a) specifically excludes AS from this category.

Furthermore, I see two possible interpretations due to the use of the word "other" in 97.221(c): "A station may be automatically controlled while transmitting a RTTY or data emission on any other frequency authorized for...".

Interpretation one: Does this imply operation as a two-carrier system with one for command and control and the other for traffic?

Interpretation two: Or is this sub-rule intended to extend the range of an ACDS to wavelengths above 6 meters but not specifically listed in 97.221(b)?

Seems like Interpretation #2's extension of the service to the really low frequencies fits the technical specifications of very low bandwidth and autoresponse found in 97.221(c). This would tend to improve the efficiency of utilization of the more-valueable spectrum down there.

Other than that, the only difference between an AS and an ACDS that I can see is the bands of operation (<=1.25m vs <=6m) and the explicit permission for one-way transmit (97.201(e)) from an AS (but not for an ACDS).

Does anyone have a good read on which interpretation applies to the ACDS rule?

Any other advice on which one (i.e. which of the AS or ACDS rules) is more appropriate for a low-data-rate weather station feed?

Thanks again,

- Bill KG6PNN

>in 97.221(b)?

I think this is correct. You can put an autoresponder on any
HF frequency, but an automatic station which initiates its own
transmissions needs to keep to the narrow HF bands listed in (b).
VHF and above is always okay.

>Any other advice on which one (i.e. which of the AS or ACDS rules) is
>more appropriate for a low-data-rate weather station feed?

I think the differences between an auxilliary station and an automatically
controlled digital station are these:

- An AS can use any mode, including a voice mode, while an ACDS is limited
to digital modes. Since your application seems to need a digital mode
in any case this distinction doesn't matter to you.

- An AS is specifically allowed to make one-way transmissions of anything,
while an ACDS is limited to one-way transmissions only for the generally
permissible purposes listed in 97.111. Since your goal is to transmit
"telemetry", 97.111 allows this type of one-way transmission and this
distinction doesn't matter to you either.

An ACDS is hence more limited in function than an AS, but has a broader
range of permissible frequencies available. Since your application
seems to meet the limitations of an ACDS you are free to call the
station that if you want to use frequencies where an AS is not permitted.
If you use a frequency where an AS is permitted, however, it doesn't
matter what you call it.

From: Chris R <nospamplease@hotmail.com>
Message-ID: <b6vh2s$879$1@slb0.atl.mindspring.net>
Source record: 67935

I'm considering the VX-7R and have read the freeband mod info, but have a question about its effectiveness on the air band. Is the transmitter producing enough power to be usable in the air band for short distances? I am a ham as well as a flight instructor, and am hoping to have my new HT double as a backup aviation VHF radio.

2392. Please help me find my Fathers old call

Do your local repeaters require a PL access tone? If so and it is not
programmed into your rig, you won't be able to activate the repeaters.

Your test with an HT isn't really meaningful as you are simply so close,
you'd hear your car radio even without an antenna on either rig.

If the PL tone is not an issue, then get an inexpensive VHF SWR meter and
check out your antenna. Most people that I know have not been happy with
the glass mount antennas.

You can't be a flight instructor if you were you would know AC
coms are AM and the VX-7 is FM. If you were a flight instructor you
would know it is a violation of the FARs to use the VX-7 for flight
coms. If you were a flight instructor you would understand why AM
is used and why there are FARs not teach students to flout the rules.
Please tell me you're not really a flight instructor.

2395. Looking for 6 meter amp

I suppose I should say thanks for the reply...now calm down. I have been a CFI for three years, much longer than I have been a ham. I am well aware of the use of and reasons for AM on the air band, but from your reply (which assumes a lot) the VX-7 can only transmit FM, a fact of which I was unaware. As for use of the radio for communications, find me the FAR that prohibits it. In fact 47 CFR Part 87 (Telecommunication, FCC not FARs) deals with aircraft radio requirements, and in part 87.89(d) you will note that no station or operator license is necessary for VHF use on domestic US flights. This makes sense, what difference is this than buying a VHF transceiver from Sporty's? (assuming the VX-7 can do AM, which it cannot) and that such a radio would satisfy the technical requirements of 87.89(c) and (e). There is no special type certificate for portable VHF. In fact I encourage my students to research FARs when they have obscure questions like this, instead of blindly following what someone else tells them. Indeed, please tell me YOU are not a flight instructor.

I know this is off subject, but there is a lot of good input here. I
am posting for a friend, he has a Cobra 146gtl,SSB that was in
storage for several years, and he would like to have a 'ballpart' idea
of what to ask for the unit on sale.????? From my point of view
apperance wise I would say "8 on a scale of 10'. There is NO mobil
mount..
He also has two '8 track' Stereo Recorders, brand name ,,,, CRAIG
about a 7 or 8 on 'the scale',,,,, the second 8 track recorder is a
JVC, on the 'scale' about a 9.
I had 8 track when I was younger, but didn't know until I saw these
units that there WERE 8 track recorders ''''outthere''''. I will
relay any and all info about the sale value of these three units.
Thanks in advance. cl.

Bob will never forget that horrible evening he took his grandmother to the emergency room.

After over an hour and a half of nervous pacing the doctor finally came out of the emergency room, walked to Baghdad Bob and said, "Son, your grandmother has been put on a life-support system. Your grandmother is brain dead, but her heart is still beating."

Bob said, "Oh, God! All her life she always told me that she never wanted to be a Democrat!"

Excuse me, Chris, now YOU calm down.

47CFR87 does in fact deal with aircraft radio requirements. However, you will please to note 87.145 and 87.147 require any device to be used in the aircraft band to be type accepted FOR THIS SERVICE. That is, just because a transceiver is "type accepted", unless it is specifically type accepted under one of the categories in part 87 and that had been part of the submission to the Commission at the time of type acceptance, it may NOT be used for aviation purposes.

Just because it satisfies the requirements of the technical specifications of part 87 means absolutely nothing about whether or not it has been type accepted for use in this part.

Yes, there IS a requirement for type acceptance in the aircraft band, whether it be portable or fixed. The operator does not need a station or operator license, but the equipment certainly needs approval under the provisions of parts 2, 15, and 87.

I would suggest that **YOU** might do well to research the CFRs a bit yourself before making statements like the one below. Reading just one part of a reg is like looking at the altimeter and assuming the rest of the airplane is flying properly.

And yes, I am a Flight Instructor (Airplane and Glider) for 35 years, a designated Aviation Safety Counselor for 20 years, a ham (WX6RST Extra) for 42 years, an A&P (IA) for 32 years, and have done 11 TA & C for aircraft radios to parts 87 and 15 for my company www.rstengineering.com over the past 30 years as well as a dozen or so more to other parts of 47CFR over the years.

I'm hopeful that you don't have this know-it-all attitude with your students.

Jim

Mr Weir,

Thanks for your reply, and I'll buy into your interpretation of the regulations, especially given your reputation. Today at the avionics shop a tech mentioned this same interpretation as well. I certainly don't intend to take a know it all attitude, I was just a bit upset at the original reply from "Myself". I did research the regs before posting the original question. I agree I should have conducted an even more exhaustive search myself, but the original reply to my question was rather offensive.

No need to post a reply, I will no longer be seeking advice from this newsgroup.

yourself.

http://regulareverydaypeople.com/ Lots of links

http://www.robert-fisk.com/iraqwarvictims_mar2003.htm

http://www.robert-fisk.com/articles207.htm

Today the Twenty First Century starts with another blot on our collective soul. America, shining beacon to

the world, the land of democracy, liberty and truth, has just as often shown the world greed, death and

dictatorship.

All too often the United States has betrayed its highest ideals to wage wars of lust and greed. The native

peoples here when the Europeans arrived suffered through war, displacement and genocide because they

had the land and gold we wanted. Mexico owned the Texas and California that were our self-declared

destiny and we took them by force. We have fought Spain, Cuba, Columbia, the Philippines and Hawaii for

control of naval stations and shipping routes. More recently the U.S. has kept tight control of Middle

Eastern oil by propping up dictators in Iran, Iraq, Saudi Arabia, Kuwait, and Pakistan.

The horrific events of 9/11 would make any country tremble. But with the right leadership we could have

shown the world our steady resolve and courage and we could have celebrated an American love and life

and liberty that no airplane could destroy. But President George W. Bush has had uses for terror. For

eighteen months he has beaten the drums of revenge till fear has become a second heartbeat in our

pysche. Simmer America over a low flame of fear and spice it with contempt for the world and you can

bring her and her people to cry hungrily for blood.

By now, most Americans have come to believe that Saddam Hussein was somehow behind 9/11. Like a

schoolboy crossing his fingers behind his back, President Bush has repeatedly hinted at a connection he

knows doesnï¿½t exist. He winks at reporters while he lies to the American people. George W. must have

been listening in class when he read Lincolnï¿½s assurance that you can fool most of the people at least

some of the time. ï¿½Remember 911!ï¿½ has become the rallying cry for this new war, a cry of fear and bullying

ignorance that takes its place in a large collection of presidential demagoguery, right next to ï¿½Remember

the Maine!ï¿½

Yet again America loses herself to this appetite for blood and oil.

Fortunately there are those who remember that this is not our destiny. There are those who know we stand

for more than fear and lust. With every war there have been people who have said No!, sometimes

immediately and sometimes after the glow fades from the advancing armyï¿½s glory. These protesters and

truth-tellers are the true foot-soldiers of American greatness. May God bless the protests, may we shout

out with righteous anger and irredeemable love that our country stands for a greatness that canï¿½t be

measured by our armies.

In peace,
Martin Kelley

You're a day late, and a dollar (or Pound Sterling) short bud. The war IS winding to a close rapidly.

Yes, some innocent Iraqi civilians have died during the past three weeks, and that is unfortunate, But, if you were to go to Baghdad or Basra today (April 9th) and ask the average Iraqi citizen on the street "Was it (war) worth it to be freed forever from Saddam?" I have no doubt that the answer would be a resounding "Yes!"

Have you not seen the jubilation and celebration shown today on news outlets throughout the world? (And not just American news either). Have you not read of the Kurds in the northern Iraq town of Mahad turning out by the tens of thousands to cheer coalition troops - many weeping with joy at finally having the yoke of Saddam's oppression lifted from their backs some 30 years after their land was taken, and their homes destroyed by the Baath thugs?

Yes, there is still some resistance in many parts of Iraq... resistance by the remaining forces of Saddam's regime, who would rather die in battle than give up - because they are terrified of the alternative: facing their fellow citizens who have been tortured, murdered, stripped of their land, money and property for decades by Saddam's minions. "Revenge is a dish best served cold", and the remaining loyalists understand this well. Better to die quickly on the receiving end of an air strike or artillery shell explosion, than slowly at the end of a hangman's noose (or worse).

If you had gotten your wish, and caused the war to end before the goal of bringing down Saddam had been accomplished, it would have led to the VERY thing you supposedly abhor: the wholesale slaughter of thousands of innocent Iraqi citizens. - not by our troops, but by Saddam himself... just as he did at the end of the 1991 Gulf War.

That would indeed have been "insanity".

Coalition forces have taken incredible pains to avoid causing civilian deaths whenever possible - many times at the risk of their own lives. Saddam, on the other hand, had no regard for human life whatsoever - hiding behind "Innocent Iraqis", desecrating holy sites, deliberately putting women and children in harm's way to protect himself and his inner circle.

No doubt, there will still be those in some quarters of the Isalmic (and non-Islamic) world who claim (without authority) to "speak for the innocent citizens of Iraq" who will continue to attack and vilify the United States and Great Britain for what has occured over the last 21 days... but, over the coming weeks, months and years I feel very safe in saying that there will be many MANY average citizens in Iraq itself who will continue to feel a sense of profound gratitude to the US, UK, and other coalition members for what we have done.

When all is said and done, who do you think the truly innocent Iraqis will remember and honor: the coalition soldiers and airmen who laid down their own lives to help defeat a horrible tyrant, or the (supposed) "peace lovers" who stayed safely at home and tried to do eveything possible to try to keep that very same tyrant in power?

You sir, are *naive*! The insanity didn't start last month, and
it isn't going to end this month.

>Yes, some innocent Iraqi civilians have died during the past three weeks,
>and that is unfortunate, But, if you were to go to Baghdad or Basra today
>(April 9th) and ask the average Iraqi citizen on the street "Was it (war)
>worth it to be freed forever from Saddam?" I have no doubt that the answer
>would be a resounding "Yes!"

That may well be true... but only for those who are still alive.
And for them the problem is now how to change sides at exactly
the right moment, in order to *stay* alive. Last month they
knew whose ass to kiss, this month they don't, and the process
of learning might just be deadly (as it has been already for
several thousands).

You don't really think we are providing anyone in Iraq with
"freedom" do you? Or democracy or anything else. Just
remember, *we* are the ones who gave them Saddam Hussien.

>Have you not seen the jubilation and celebration shown today on news

>as he did at the end of the 1991 Gulf War.

I've got news for you. It makes very little difference what we do or don't do in Iraq (short of staying there and running the country forever), there is going to be "wholesale slaughter of thousands".

>That would indeed have been "insanity".

Yep, but no different than what is going to happen anyway.

The real question is, are we doing something that is worth one American mother's son or daughter? Are we gaining freedom, or protecting it, for America? Or are we doing something else (extending GWB's ego, for example)?

I personally would not be able to look into the eyes of even one mother and tell her that the life of her child was well spent dying in Iraq in 2003.

"The Countess" <countess@upticks.com> wrote in message
news:0304081633176294@news.ttnet.net.tr...
EXECUTIVE SUMMARY VICTOR INDUSTRIES Victor Industries, Inc. (OTCBB: VICI) is beginning the transition from a development stage Company to the operating stage. Sales of its revolutionary moisture and fertilizer conservation tool, ENVIROLIZERTM , began in October of 2002. Additional sales have been booked for March, 2003. Nesland Enterprises of Snohomish, WA was the first distributor to successfully market the product. Nesland Enterprises is a regional distributor and the sales were relatively small, given the timing of introduction. (Apparently, not a lot of fertilizer is sold during the winter in the Northwest) The Company recently hired the Lawn and Garden Performance Group (www.lgpg.com) to introduce ENVIROLIZERtm on a nationwide basis. The Lawn and Garden Performance Group has a twenty year track record of successfully introducing new products to the lawn and garden industry. (Progress Report available by contacting the VICI) Rumor is that ENVIROLIZERtm will be in the running to be voted on as a candidate for the best new lawn and garden product for 2004. (Free samples are available by contacting VICI) A successful launch of ENVIROLIZERtm sales on a nationwide basis would greatly enhance Victor Industries in the eyes of investors across the country. The manufacturing and shipment of ENVIROLIZERtm is largely out sourced and does not require a great deal of managements time. With the present pricing the gross margins are approximately 400 percent. Pre-tax net margins should equal approximately 25% so that 1mm in sales should result in $250,000 in EBITDA. In addition, the present management has the resources necessary to alter the strategy of Victor Industries to reflect a "holding company" mentality. Recently, the management provided the vision and resources to develop a new company that will be spun off to shareholders. New Wave Media Corporation began operating a new radio station in Great Falls, MT on February 1st, 2003. It is already, in the managements opinion, the first or second most popular radio station in Great Falls, MT. Josh Gager will be the Company's president. Mr. Gager's vision for New Wave Media is to own or operate 22 radio stations in Western, MT. Due to Montana's status as a relative economic back water there are operating radio stations that reach very small population centers, that with minor modifications could be transformed into radio stations reaching the major population centers in Montana. The economic growth in Western, MT has been very rapid. In short, Western Montana has been "discovered". This first station is owned by Flinn Broadcasting of Memphis, TN. Flinn currently owns approximately 40 radio stations. Flinn is in the business of acquiring radio stations and around the country and allowing "locals" to operate the stations through a"Local Marketing Agreement" for a set monthly amount. The communication companies that specialize in radio command high premiums to the market. Fisher Communications, Clear Channel and Westwood One

are examples of the premiums commanded by the radio station industry. Mr. Gager believes that the stations will average approximately 1MM per station to the top line, annually, with about half dropping to the bottom line of the Company before taxes. These numbers, if realized, would place the Company's shares at slightly more than one times EBITDA, before accounting for any sales of ENVIROLIZERtm. Radio station companies such as Fischer Communications and Clear Channel Communications (CCU) sell for 30 times earnings. Further, Victor Industries is in the process of developing two additional shells that the management intends to merge operating company's into, and spin them off to shareholders as separately traded entities. In sum, Victor Industries offers exceptional growth opportunities through sales and profits via its revolutionary product ENVIROLIZERtm, rapid expansion of radio stations in a high growth area of the country and the potential to own four publicly traded companies. For the near term, over the next year, it is not unreasonable to assume 1mm in sales of ENVIROLIZERtm with $250,000 in EBITDA combined with $500,000 of EBITDA from the single radio station to total $750,000. The market cap at one cent is $1,250,000. At a multiple of 30 times EBITDA the stock would trade at 30 cents per share or 20 times today's price. Forward from N3QK

R.E.: FLORIDA TODAY

Radio antennas get some slack

Operators don't have to pay for $2,000 permit

By John McCarthy
FLORIDA TODAY

VIERA -- Amateur radio operators in Brevard County got a temporary break from having to get an expensive conditional-use permit for their radio antennas. The Brevard County Commission voted Tuesday to hold off enforcement of a law that, for all practical purposes, limits antennas to 35 feet, while it considers amending that ordinance.

Dozens of amateur radio operators jammed the commission chambers to tell the commissioners that 35-foot antennas were not high enough to be functional and would not allow them to provide critical communications services during natural
disasters or other emergencies.

"Community safety will be compromised, if the current ordinance is continued to be enforced," said Robert Keim, a radio operator from Mims.

A county ordinance aimed at controlling the spread of cell phone towers also requires amateur radio operators get a conditional-use permit for any antennas taller than 35 feet. Applying for such a permit could cost as much as $2,000
with no guarantee of approval, Keim said. Many of the radio operators at the meeting said they had antennas as high as 75 feet.

Keim pointed out federal and state laws require local ordinances dealing with such antennas should be only the "minimum practicable regulation." Those laws recognized the important communications role amateur radio operators play in
emergency communications.

"They are, in fact, an integral part of our county's comprehensive emergency plan," said Bob Lay, director of emergency management for the county." He said amateur radio operators take their equipment to shelters, police station
and other key points during hurricanes to provide emergency communications abilities.

"Many counties in Florida and many states in the union don't have these regulations," operator Stephanie Phillips said."Instead they are encouraging

amateur radio operators, especially after Sept. 11."

Few people outside the amateur radio community realize the emergency communication services they provide, Nelson Guadalupe said. He is a member of an operators' network that provides emergency services to the military. "We
have emergencies once in a while, and the military utilizes us . . . because their other channels are all being used. Guadalupe said he once relayed emergency communications from an Air Force C-130 cargo plane that had lost an engine
to that plane's home base.

Commissioner Ron Pritchard said the law most likely would be amended. "We're on board with you," he told the radio operators.

The commissioners voted unanimously to have the county staff draft a report on how the law could be amended to accommodate the amateur radio operators' antennas, and to discontinue any enforcement efforts while doing so.

I am hardly naive. I've been an ardent student/observer of world history
and politics for over 40 years, have served in the military, and have
travelled in countries where I have seen standards of living ranging from
the sublime to utter despair. I have lost close friends who have died in
combat.

"Freedom" yes. Compared to what they had before - absolutely. An analogy: A
man with no toes is still disabled (compared to a man who is whole) - but
far better off than a man with no legs.

Life holds no guarantees. The road ahead for Iraq has many pitfalls. No one can "give" democracy to any person or nation. We have at least started a process which gives the people of Iraq a fighting chance to build a better life than what they have endured for the last 40 years. This is especially true for the Kurds, who have been repressed with extraordinary brutality by the Baath regime, and who are particularly appreciative of the potential that the future may now hold.

I am disgusted by the utter cynicism of those (like you) who are absolutely certain that disaster is inevitable in post-Saddam Iraq. You KNOW this is going to happen, so why bother trying to change anything right? It's precisely that attitude that permits the Saddams of the world to survive unchecked.

>Just remember, *we* are the ones who gave them Saddam Hussien.

That's not totally correct. Saddam seized power through his own devices long before the United States began to provide him with direct financial and military support - which began in earnest after the fall of the Shah of Iran. We were wrong to do so. We are in the process of correcting that mistake - at considerable cost. The mistake should have been corrected many years ago. For once, this country is taking responsibility (albeit years after the fact) for the consequences of previously supporting a tyranical regime. Better late than never.

The same thing was said of post-war Japan. We did not stay there "forever",
and did sucessfully plant the seeds of democracy in a country which had
never previously known anything but autocratic rule .

Certainly there are dangers ahead. The rise of Islamic fundamentalism among
the Shiite majority is a possibility. Ages-old tribal rivalries are very
likely to resurface just as they did in Yugoslavia after the end of Soviet
domination. The possibilites for "disaster" are indeed there - but they are
not inevitable.

>
>>That would indeed have been "insanity".
>
> Yep, but no different than what is going to happen anyway.

Again, how do you "know" what is going to happen, pray tell?

It may surprise you to know I am neither a Republican nor a supporter of GW
Bush (in general). I do, however, feel that his decision to take out Saddam
was correct and necessary, and do support the President in this action
without hesitation.

>
> I personally would not be able to look into the eyes of even
> one mother and tell her that the life of her child was well
> spent dying in Iraq in 2003.

The sons and daughters who have died in this conflict are not children.
They are adults, who have freely chosen to serve in the armed forces
knowing full well that doing so involves the definite risk of death or
serious injury. This is especially true for members of the Marine Corps.
but holds true for members of all branches.

There is no question that the loss of a son or daughter is incredibly
painful for any parent. That is especially true for the parents of the
thousands of Iraqi conscripts who had no desire to fight or die for Saddam,
but who were literally sent into battle with guns pointed at their backs by
their own commanders. Do you think that only American lives have "value"

On the other hand, thousands more conscripts are now alive because they
took the opportunity (that we made possible) to escape from their
involuntary servitude and lay down their arms.

As for the Saddam loyalists in the Republican Guard who were his instruments of control and repression, I feel no pity or sorrow at their deaths. They freely chose to follow an evil man on an evil path and have paid the ultimate price for doing so.

Jim Barrett

http://www.robert-fisk.com/iraqwarvictims_mar2003.htm

http://www.robert-fisk.com/articles207.htm

By Martin Kelley

What is the purpose of the United States military?
The large military of the U.S. is not needed for defense. The country has two peaceful and relatively-weak neighbors and hasn't seen an invasion since the War of 1812. On both sides, the United States is buffered by large oceans which make an oversees invasion all but impossible. There is no more invasion-proof country in the world as the United States.

For fifty years, the United States has used its military against much weaker, third world countries like Korea, Vietnam, Panama, Iraq. None of these wars has ever threatened the sovereign borders of the United States. But they have all revolved around access to resources and trading partners.

For example, activists were spotlighting human rights abuses in Saddam Hussein's Iraq for many years prior to the Gulf War. Rather than imposing embargos then, the U.S. government gave monetary and military support to Hussein in his war against Iran. It wasn't until Hussein invaded Kuwait and threatened American petroleum supplies that President Bush started a rhetoric of hate against Hussein, a rhetoric sponsored by American corporate greed.

The U.S. military serves to maintain U.S. control over the world's raw materials. The U.S. government has supported dictatorships (like Saudi Arabia, Indonesia, Zaire) and fought democracies (Chile, Nicaragua) in order to keep the price of raw materials down.

The military also serves domestically as an income-redirecting scheme. The $663 billion dollars that Americans pay in military-related income taxes (see the War Resisters League's Where Your Income Tax Money

Really Goes) is used to support industries that Americans don't need.
The assault ships and stealth bombers are expensive toys, and the bill
for them goes into the pockets of the military machine's wealthy
stockholders.

This money would be better spent on a national health care system, on
rebuilding our crumbling industrial infrastructure, and on reducing
our taxes. How many have to die to maintain a U.S. standard of living
that is based on such oppression? Is cheap gas really worth thousands
of lives?

Check with the ARRL. They have callbooks back to the first year they
were printed, and in the early years they were indexed by call and by
name.

With their help I was able to determine my grandfathers callsign - I
had the name and address from my folks genealogical research. With
that info the league folks were able to find out his callsign.
Unfortunately the modern versions were all taken.

Mike WA6ILQ

I hate to respond to trolls, but I feel that it is valid to make a point.
Whenever leftists have it proven that their claims are entirely wrong
(100,000 Iraqis will die, the US will kill thousands of innocents, etc),
they then resort to conspiracy theories. Sure those people burning the
posters of Saddam were not really Iraqis, they were Republicans imported
especially for that purpose.

Do you know how stupid you sound?

Tom

Hi CL,
You are right, it IS off topic. There are more appropriate newsgroups
to ask your question, where you are more likely to get a good answer.
I checked among the rec. newsgroups and found these two for you:
rec.audio.car, for the question about 8 tracks, and rec.radio.cb for
the Cobra rig.

73,
Rick

We have a regime like the one in Iraq. It was not chosen by a vote because the votes were not counted. The election was decided by the Supreme Court.

Piss someone off ? You can end up held without hearing or trial, and without contact with the outside world, just like the Russians and the Nazis.

The powers that be are not nice people.

There's nothing wrong with being highly optimistic, but that dispensation doesn't extend to being foolish and overly simple-minded.

Some Iraqis were seen in a *few* scenes on TV toppling statues of Saddam and praising America. This is *not* THE Iraqis, but a few Iraqis. One simply cannot draw firm conclusions about general Iraqi public opinion from a few images played over and over on TV. (What you're doing is exactly the same as seeing footage of the yearly Roswell UFO convention, and concluding that all or the majority of Americans are keen UFO buffs, and exactly as unsupported by evidence so far.)

The *real* question is not whether the average Iraqi is happy to see Saddam deposed (obviously, a lot of them have much reason to celebrate), but rather does the average Iraqi hate Saddam more than he or she hates being occupied by a foreign power?

Saddam has plenty of mortal enemies among the Kurds, who would probably praise Israel itself if it was the invading force. This tells us nothing of how the average Iraqi views the USA and being occupied. The problem with filming activists and demonstrations, is it tells us what the most extreme and passionate people feel, but little or nothing about the average.

The larger issue of Iraqi public opinion will impact upon how governable the country will be. It doesn't take a lot of homicide bombers to throw attempts to keep stability in peace into chaos. Don't count those chickens yet.

Furthermore, only time will tell how the rest of the Arab world views this. It's great that there is such visible support for the US within Iraq, and we can hope it's felt generally among Iraqis and this will convince the rest of the Arab world that we're really the good guys in all this, BUT. But there's not enough evidence yet to draw any

conclusions.

It's with a certain amount of shame that I read such simple-minded drivel, and watch it being uncritically sucked down by people who at least ought to have the ability to examine facts before forming strong beliefs.

Now that it is clearly apparent that the coalition forces are
doing just what they set out to do, and the Iraqi people are
celebrating, waving U.S. flags, greeting U.S. soldiers, Al-Jazeera
and other Arab news sources are not too interested in reporting
anymore. Now they don't want the rest of the Arab world to see the
success the coalition forces have had and how wrong and one sided
their reporting of the conflict has been.

To a point this can be agreed upon. But you're only speaking about one incident in Baghdad, and those scenes have been repeated in many places in Iraq. Peter Jennings referred to the scene in Baghdad as a few people - to be certain, it wasn't the whole of Baghdad - but this was happening in one part of the city, and I'd dare say that it was more than a "few" or "handful" of people, unless you're the Jolly Green Giant and have enormous hands. I don't think you can really make the comparison, however, between the jubilation becoming more and more prevalent in Iraq to the ramblings of UFO conspiracy types - clearly, the Roswell convention folks are a small minority, and can't really be compared to the freeing of people from a dictator. There were those in France that supported the Vichy government that was, to put it nicely, sympathetic to Hitler, but outside of a few demented people, there was no sadness at the demise of THAT dictator, and one couldn't minimalize the jubilation of those that saw Hitler fall.

That would be jumping on the Al-Jazeera bandwagon of calling this an "invasion" and "occupying force". The analysis should be left for AFTER the smoke clears - the coalition has clearly stated it's intentions, and it would be irresponsible, at best, to challenge that before all is said and done. The coalition has stated many times that this is not about occupation, and many know of the horrors of Hussein. There have been no coalition flags, American, British, ore otherwise hoisted up in any of the cities that have been taken from the government's hold. What WOULD be a major debacle would

be if after all of this, the UN is allowed to try to "manage" the country, instead of trying at the earliest possible time to turn the governing of Iraq over to an IRAQI government, which is the stated intention of the coalition. Did the average citizen of any of the people who suffered under the likes of Hitler regret that others came in to oust him - even the German citizenry?

Listen to the interviews with Iraqi exiles all over the world. Something else that should be kept in mind is the fact that Hussein's party is the MINORITY in Iraq, and are and have been despised for years. Look at the Baath party members now being hung from posts by the Iraqi people. Look at the excesses of the Baath party, and compare that to how MOST Iraqis have been forced to live.

> The larger issue of Iraqi public opinion will impact upon
> how governable the country will be. It doesn't take a lot

Israel has had to deal with that for years, and I'd hardly say that their country has fallen into chaos.

> Furthermore, only time will tell how the rest of the Arab

The problem is that the leaders of other Arab nations are watching all of this with some amount of fear, and have every reason to fuel the flames of those that are opposed to what's happening in Iraq - look at how most (actually ALL but one) of those countries in that region are ruled. Those rulers fear an "outbreak" of democracy - certainly THEY don't want to see something like that happen in THEIR countries. The governments of those countries don't WANT their people to see the coalition as the "good guys". What will happen once their citizens see the truth, and decide to wake from their slumber and apathy and decide that THEY want to rise up against the absolute control that THEY live under? Good press on the events in Iraq would set a bad precedent in the eyes of most Arab leaders.

> It's with a certain amount of shame that I read such
> simple-minded drivel, and watch it being uncritically sucked

> down by people who at least ought to have the ability to

>
> -- Ross

The only real "belief" I, and I'm sure many others have in this whole thing as that the Iraqi people deserve to live better than they have been forced to live, and should have the opportunity to live as a prosperous people, without living in fear of their leadership. Listen to the reports and interviews of people in Iraq and abroad. A couple of reporters in Iraq one day made a comment in a taxi about the disposition of the Iraqi people - something to the effect of questioning why, if there's such dissent in Iraq, do they not hear lots of people crying out about their displeasure. The driv er looked at them and asked if they were crazy - anyone who speaks out against Hussein can consider themselves a dead person. Look at what Hussein did to his own son-in-law when HE returned to Iraq. Don't bother to try to locate him for an interview - he's quite dead.

I would agree that the facts should be looked at before making strong beliefs - keep that in mind before you decide that the coalition represents an occupying force. Let's wait until this is said and done, and we can have this discussion again. But let's not confuse the joy of the Iraqi people and that of those that are in other countries with some sort of fanaticism, unless you call those that support freedom and want others to share in it as "fanatics". If so, count me in.

Endthewar.org Editorial

by Mike Zmolek

It's the defining moment the media has been waiting for, the toppling of a Stalinesque statue of Saddam Hussein by a smallish (200-300) crowd of cheering, angry Iraqis. Celebrations in Kurdish-controlled cities in northern Iraq were understandably larger and more exuberant. The pent up anger at the brutality of Saddam Hussein's dictatorship will no doubt be on display in US/UK held cities in the days to come, and should not be under-estimated.

The symbolic moment a million Iraqis will never see.

Absent from the celebrations were hundreds of thousands of Iraqi children who died quietly from easily treatable diseases like diarrhea or diphtheria, during twelve years of brutal economic sanctions that turned Iraq's hospitals into houses of mercy for the dying. Many estimate that sanctions claimed the lives of a million and a half Iraqis in all, some estimate over two million.

In 1996 then Secretary of State Madeleine Albright explained on CBS' Sixty Minutes that 500,000 children dying from sanctions were "worth it", worth the cost of containing Saddam "so that American soldiers do not have to go and re-fight the Gulf war." Now that the Gulf War has been re-fought, and thousands more Iraqis have died in battle, in marketplaces and hopitals, it bears asking what it was all "worth" to let Iraqis suffer and die in epic numbers all to "contain" and topple one dictator.

When anti-sanctions activists began hitting Congress hard with statistics, images and arguments for the end of sanctions in the late

'90s, the response they got from the far right in Washington was that it was all "Saddam's fault", often phrased as though Saddam Hussein had chosen to or had himself imposed sanctions on Iraq. A combination of chosen ignorance and denial had set in. The hawks did not even want to look at the numbers; or discuss the impact on the Iraqi people of the $15 billion dollars of supplies and medicines that were kept on hold at the request of the US representative to the UN's 661 committee. In more moderate offices, there was a greater willingness to accept that sanctions were an evil, but no commitment to act, to end the suffering and death caused by sanctions.

In short, Washington left itself no exit strategy on the issue of sanctions; none other than war. Enter the Bush team, who understood that the best defense is a good offense. By threatening to invade Iraq, the 'chickenhawk' gang of Cheney, Wolfowitz and friends managed to spin the Iraq crisis the other way. Like the Taliban, they picked an enemy guilty of gross and indefensible human rights violations. Like the Taliban, they picked an enemy that the US had previously supplied with arms and training, and had once considered a strategic ally, but now branded as 'evil' or 'terrorist'.

The sanctions that were imposed by the UN Security Council on August 6, 1990 set a condition that Iraq should vacate Kuwait. It is doubtful that such a policy would have passed had the Security Council known that the US would destroy much or most of Iraq's civilian infrastructure in the bombing that ensued. It was the bombing that made sanctions extremely lethal, and the Department of Defense knew this would happen. By taking out Iraq's water and sewage treatment plants, bombing Iraq's chlorine production plants (all three) and banning the importation of chlorine as a potential 'dual-use' item under sanctions, Iraq's water supply was quickly contaminated. Forced to drink water contaminated by untreated sewage and multiple water-borne diseases, Iraqi children fell prey to a host of diseases, most of which would be easily treatable, but which could not be treated under the curtailment of medical supplies under the (mostly arbitrary) 'dual-use' restrictions of sanctions. The death rate for Iraqi children soared.

While the US and its close ally in the UK, along with Israel, led the charge for sanctions, the international community as a whole must be faulted for turning their backs and closing their ears to the Iraqi peoples' cry for help, amplified by the voices of a growing anti-sanctions movement by the mid to late 1990s. We should be careful then about making too much of the international rifts that have developed over the threat of invasion, especially between France and the US; for such rifts are more a factor of US and French oil interests than any concern on either side for human rights.

That the Bush administration has managed to take Baghdad with 'merely' a few thousand lives lost (imagine anyone saying that about 9-11) will be celebrated as a major accomplishment, and the gloating has already

begun. Now the progressive movement which championed the human rights of Iraqis suffering under the brutality of both sanctions and dictatorship is being chided for not seeing that liberation flows from the barrel of a gun.

Or does it?

Once the major fighting is over, the political struggle begins. Since its founding in 1917 under British occupation, Iraq has been dominated by a Sunni majority. The Kurdish tribes were seen by the British as too unstable and unpredictable to govern, the Shi'a too likely to align Iraq with Shi'a dominated Iran. The biggest change among the players in Iraqi politics is the name of the occupying power.

The end of the dictatorship of Saddam Hussein opens the door to new possibilities for Iraqis. Ordinary Iraqis who have lost loved ones or who have suffered torture or political imprisonment under the Ba'ath regime have good reason to celebrate 'regime change'. And right now many Iraqis must have tears of sorrow mixed with hope that the end of sanctions is at hand. There are two reasons for this jubilation.

The progressive peace movement must now apply pressure to the Bush administration to live up to its promises of providing humanitarian aid and seeing to it that Iraq is rebuilt. The US has the resources not only to reverse the humanitarian crisis in Iraq, but to transform Iraq's infrastructure and economy to become vibrant and robust. But where Iraq is concerned, the major challenge for the progressive peace movement is to hold the Bush administration to live up to its claims that Iraq will experience democratization.

Does the US really intend to restore Iraq to Iraqi civilian control? A people living under house to house searches, an army acting as police force, and one that does not even speak the local language has a long road to travel toward true liberty, democracy and self-determination. Around the world, US-led coups and invasions has left a trail of dictatorships and oppressive regimes: Chile, Indonesia, Congo-Zaire, Nicaragua. And even the staunchest pro-war advocate should view with skepticism the contracts for rebuilding Iraq's oil fields being given to Dick Cheney's old boss, Halliburton. Congress is already launching a GAO investigation.

The Bush administration only began seriously talking up the 'liberation' line when it became clear that the international community would not support the invasion and was not buying the US's speculation about Iraq's weapons of mass destruction. If the US wants to find evidence of weapons of mass destruction in Iraq, it should seek out the graveyards of hundreds of thousands of children who have died needlessly over the past twelve years from a weapon of mass destruction known as sanctions.

I look at the the Midland G-11 and it is two watt five miles range.
Then I look at the Midland G-227 and it also has two watts... but 7
miles of range...
How can two pair have the same wattage but more range? Am I missing
something?

With two watts and the proper mobile or base antenna, seven miles should
come easily.

Either could be correct depending on the altitude of the two transceiver
antennas, terrain, obstructions, etc. Figures given are the manufactures
attempt to give line of sight range.

For guides to transmitter range -- see URL:

It has dual receive so I guess it's possible. Won't be easy though. I've done it with Icom W32A and a dual band Diamond whip but there are a lot of hogs on sats like AO-27. You better get an arrow handheld beam antenna and a bit of power if you want any real chance. It's doable but it's not easy at all. Listening is fun though.

Hello All!

I have a problem I'm hoping someone can help me with.

I have a Kenwood TS-140S that seems to have a transmit problem. I think its the Microphone but I'm not sure. My funds are VERY limited at the moment so I don't want to buy a mike unless I'm sure thats the problem. I try to transmit and see no output on the meter. When I tap on the mike I see the meter deflect, or if i tap the mike the meter deflects with the taps. I checked all the connections and they are fine (Inside the mike also). If I whistle I also see the meter deflect for a second. The radio was fine and then this started the other day. I tried the mod for intemittent TX power that i found during a search but that didnt help (and the problem isnt intermittent).

Can someone steer a financially strapped Ham with some suggestions.

Thanks in Advance!

The eCaveMan

I'm not sure I understand your symptoms/observations correctly, however, are
you sure it's not working correctly? What you describe regarding whistling
or tapping the mic causing meter deflection sounds fairly normal for SSB
operation - i.e., no output until audio is provided from the mic.

regards,

mark

ab1x

I agree with Mark, but want to take it one step further. If the problem is NOT in the SSB mode, try
CW mode with the key down momentarily. Don't forget to increase the RF gain (more power) to see if
the rig will give you a solid output level.

Amateur Radio Newsline™ Report 1339 - April 11, 2003

The following is a closed circuit report. Here is Amateur Radio Newsline's support fund administrator, Andy Jarema, N6TCQ.

--

For the month of February we heard from: Monthly contributors Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, and Scott Hensley of the Area Communications Team, of San Jose, CA. Total contributions were $25, with NO clubs heard from. On the other hand, our expenses were $661.

That doesn't work! We need your help to keep these newscasts on the air!

I'll make you a deal: you send whatever you can, and I will take the next few weeks to catch up on who's been helping us stay on the air over the past year.

A reminder that Am,ateur Radio Newsline™ is a federal, 501 (c)(3) non-profit corporation. All contributions are tax-deductible.

The address for the Newsline Support fund is PO Box 660937, Arcadia, CA 91066. If you missed it, it will be given again at the end of this week's newscast. I'm Andy Jarema, N6TCQ.

--

Thanks Andy. That ends the closed circuit with Amateur Radio Newsline report number 1339 with a release date of Friday, April 11 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia says its time to restructure that nations Amateur Radio Service and ham radio in Iraq. These stories and more on Amateur Radio Newsline report number 1339 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: AUSTRALIA SAYS TWO LICENSES WILL DO

The Wireless Institute of Australia says that its time to restructure ham radio down-under and that two licenses will do. David Jones, VK4OF, reports from last weekends W-I-A Annual General Meting in the city of Adelaide:

--
Audio report only. Hear it at http://www.arnewsline.org
--

Jones' report quotes a press release from Wireless Institute of Australia President Ernie Hocking, VK1LK. We will have more in future Amateur Radio Newsline reports. (Q-News)

**

AMERICA AT WAR: BAGDHAD RADIO CLUB STATION CLOSED FOR DURATION OF WAR

Ham radio will hopefully re-emerge in Iraq after the war has ended. In the meantime, the Daily DX and the ARRL Letter relay information from Diya Sayah, YI1DZ. This, on the plight of one of that nations best known Amateur Radio operations.

YI1DZ, is one of the primary operators at the Baghdad Radio Club YI1BGD station in Baghdad. He reported that just prior to the outbreak of hostilities in Iraq that he had dismantled the station. Also, that all of the equipment is stored in as safe a place as possible.

Daily D-X Editor Bernie McClenny, W3UR, says that he doubts there will be any activity in the near future from YI1BGD or any other Iraqui Amateur Radio station. The YI1BGD club station went on the air in the 1970s and the Iraqi Association for Radio Amateurs remains an International Amateur Radio Union member-society. (ARRL, Daily DX)

**

IN THE PUBLIC LIGHT: AMATEUR RADIO AT NAB-2003

I'm Bill Pasternak, WA6ITF, in Las Vegas Nevada, where the National Association of Broadcasters Convention Amateur Radio Reception is just winding down. An estimated 700 hams involved in the broadcast profession spent the last 2 hours enjoying one anmothers company. They also heard a brief talk by ARRL Presodent Jim Haynie, W5JBP, who used the occasion to thank thee Las Vegas Amateur Radio Club for an important monetary donation:

--

Haynie: "I want to thank the members for the $1000 donation to the (ARRL) Education and Technology Fund. We think it is particularly important in as much as the Big Project as we call it -- in slang terms -- is teaching kids about Amateur Radio who will hopefully be the next engineers at your radio station or something like that. This exposure to electronics is very important to Amateur Radio and very important for industry.

So with that, have a good time , and again my thanks to the Las Vegas Amateur Radio Club for your vey wonderful and generous donation."

--

Well over 100,000 broadcasters and those in allied businesses attended the 2003 National Association of Broadcasters convention. Among them where three friends who hads not seen one another in almost three decades. They are Dick Flanagan, W6OLD, Martin Geisler, WA6TIC and this writer. All of us were members of the Palisades Amateur Radio Club back in the 1970's. Ill be back with more about this radio club after a short airplane ride home.

Annd less we forget. The N-A-B Amateur Radio Reception was again co-sponsored by Kenwood Communications and CQ Magazine.

Reporting from a quiet alcove just outside the Las Vegas Convention Center on my way to McCarren airport, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline. Don. (ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD9AKO and K9BAR repeaters serving Bolngbrook Illinois.

(5 sec pause here)

**

RADIO LAW: HAM RADIO CC&R BILL REINTRODUCED IN CONGRESS

Another Congressional attempt is under way to provide relief to amateurs prevented by private deed covenants, conditions and restrictions from installing outdoor antennas. The ARRL Letter says that New York Representative Steve Israel has again introduced the "Amateur Radio Emergency Communications Consistency Act" into the current session of Congress. The measure, designated HR 1478, would require private land-use regulators such as homeowners' associations to reasonably accommodate Amateur Radio antennas consistent with the PRB-1 limited federal preemption. PRB-1 now applies only to states and municipalities. (ARRL)

**

RADIO LAW: CALIFORNIA PRB1-LIKE LAW TAKES A GIANT STEP

Some good news for hams living in the Golden State. ARRL Southwestern Division Director Art Goddard, W6XD, says that the California version of PRB-1 passed the Local Government Committee on a unanimous vote at its April 2nd meeting. Goddard says that the next step for A B 1228 is the full California State Assembly.

Representing ARRL at the Committee hearing were Dean Straw, N6BV and Pacific Director Bob Vallio, W6RGG. In his bulletin, Goddard took the time to thank Mike Mitchell, W6RW, Assembly member Bob Dutton and his staff as well. (ARRL SW Div. Newsletter)

**

SPECTRUM SHARING: SATELLITE-FED TRANSLATORS IN THE COMMERCIAL FM BAND

The FCC has assigned RM-10609 to a proposal by Calvary Chapel of Twin Falls and two smaller broadcasters. This, for authority to allow satellite-fed translators or Satellators in the "non-reserved" F M 92 to 108 MHz band. Amateur Radio's Bruce Tennant, K6PZW, has more.

--
As we all know, 92 to 108 Mhz is the band that is currently used by commercial broadcasters, over-the-air-fed translators and most Low Powe F-M stations. Currently, what are called Satellators are restricted to the 88 to 92 MHz band and the translator must be owned by the primary station.

But Calvary Chapel of Twin Falls and the other petitioners want the FCC to allow satellite-fed translators in the non-reserved F M 92 to 108 MHz band. The petitioners claim this proposal will have little impact on existing stations in the spectrum. This is because there is currently a freeze on new terrestrial translators in that band.

The FCC has not indicated when it might act on the Calvary Chapel of Twin Falls rules change request.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

So far the only major objection has come from National Public Radio. N-P-R generally supports the Twin Falls petition, but proposes that coverage distance limitations be set for Satellator operations. More is on the web at http://gullfoss2.fcc.gov/prod/ecfs/comsrch_v2.cgi (CGC Communicator)

**

HAM TESTING: FCC AND VEC'S TO MEET IN JULY

The 2003 National Conference of Volunteer Eximination Coordinators Conference in Gettysburg, Pennsylvania is set for July 25th. This is the annual get-together between the FCC and the Volunteer Examination Coordinators that maintain the question pools and handle all Amateur Radio testing.

Planners say that last years conference was a success and that they are looking for input for this year'a agenda. Please send any thoughts you have for this years conference to John Creel, WB3GXW. John's e-mail is WB3GXW@arrl.net (NCVEC)

**

RESCUE RADIO COMS: THE BOSTON MARATHON NEEDS YOU

If you are planning a trip to Massachusetts later this month and will have a hand held radio with you, the ARRL Letter says that the Boston Marathon can use you.

The 107th running of the event is slated for Patriots' Day, Monday, April 21st. Planners say that they still need more Amateur Radio volunteers to assist with communications for this year's event. If you want to donate your time, please contact Paul Topolski, WSEX by e-mail to w1sex@arrl.net or Steve Schwarm, W3EVE, at w3eve@arrl.net.

Once again, that's the Boston Marathon, on Monday April 21st and its looking for hams top help out. (ARRL)

**

ON THE AIRWAVES: THE LIBERAL RADIO NETWORK

Venture capitalists from Chicago are reportedly behind an effort to start a liberal leaning talk radio network. One that might offer an alternative to conservative talk show hosts heard across the airwaves these days.

The group will be called AnShell Media L.L.C.. Its backers are reportedly investing an initial $10 million. They are also hoping for assistance from like minded entrepreneurs.

With the intent to be on the air by this fall, the are talking with comedian and author Al Franken about working with the network. They also hope to attract other politically liberal entertainers and political guests as well. (ThePolicyPeport nerwsletter)

**

UPCOMING EVENTS: FIELD DAY - VCARS AT THE REAGAN LIBRARY

The Ventura County Amateur Radio Society will conduct it's Field Day 2003 operations on the grounds of the Ronald Reagan Persidential Library and Museum, in Simi Valley, California. According to Peter Heins, N6ZE, this will mark the third year of Field Day operations in conjunction with and co-sponsored by the Reagan facility. (N6ZE)

**

UPCOMING EVENTS: COMMEMORTING FRANK LLOYD WRIGHTS WESTCOTT HOUSE

The Westcott Wireless Preservation Association will be hosting special event station W8AGA on Saturday, May 3rd. The operation will taker place from Frank Lloyd Wright's Westcott house in Springfield, Ohio.

The Westcott Wireless Preservation Association serving the Westcott House Foundation by continuing radio operations at the Frank Lloyd Wright designed Westcott home. Wright designed Ohio's only prairie style house for Burton and Orpha Westcott in 1907. The house is now undergoing extensive restoration and will eventually be opened to the public as a house museum.

But in the here and now, the special event station is coming on the air. A special QSL card will be issued to any station with a confirmed QSO with W8AGA and who sends a QSL card and SASE to the Westcott Wireless Preservation Association. QSL information is on the web at

www.westcotthouse.org/w8aga (Press release)

**

CONVENTIONS AND HAMFESTS: MILWAUKEE - A SUPER SUCCESS

On the convention and hamfest circuit, word that last weekends A-E-S Superfest in Milwaukee Wisconsin is being called a super success. A late season storm made for some fairly inclement weather but it did not dampen the spirit of the regions ham community that showed up in droves to see what was new and buy what was hot.

According to industry sources the weather may have played to the advantage of dealers by driving the crowds to the display floor. And while Friday was a bit slow, Saturday more than made up for it with lots of high tickeet items moving out. We are told that averaged out sales were pretty good on both days and nobody is complaining.

The Superfesrt is held every April and is sponsored by Amateur Electronic Supply. (ARNewsline™)

**

CONVENTIONS AND HAMFESTS: RENO NEVADA IN MAY

And word that the Spring 2003 Reno Ham Swap will be held Saturday May 10th between 7:00 AM and 1:00 PM local time. The event is sponsored by the Reno Nevada Area Metro Simplex Amateur Radio Club. For Complete Details Visit the website at http://k7xc.tripod.com/hamswap/ (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: BIG UK ARISS SUCCESS

Its one of the best ARISS contacts to date. This, as students at the Rushey Mead secondary school near Leicester England spent about 10 minutes talking with U-S Astronaut Ken Bowersox KD5JBP on board the International Space Station. It took place on Friday April 4th, and this is how it sounded:

--
contact audio
--

Rushey Mead is a U-K secondary school for 11 to 16 years olds. It also has an active amateur radio club. But for this special occasion, the GB2NSC station of the National Space Center was chosen for the space talk. John Heath, G7HIA operated the station. Here's more of the QSO.

--
contact audio
--

Students, teachers, parents, and the media were present as twelve youngsters asked questions about life in space of Ken Bowersox, KD5JBP.

More contact audio is at Howard Longs website. It is in cyberspace at http://users.skynet.be/fa059641/2003_04_01.htm (ARNewsline™ audio with courtesy of Howard Long, G6LVB.)

**

HAM RADIO IN SPACE: PC SAT ECLIPSE POWER PROBLEMS

AMSAT says that PC Sat is still going strong, but is on ragged edge of power budget during maximum eclipses. This is according to Bob Bruinga, WB4APR, who reports that controllers have caught the satellite on several occasions doing a low power reset.

Bruninga adds that fortunately they have been able to restore the bird before the batteries went to negative power budget. WB4APR recommends that since there are as many as 50 users per day, it is best if everyone turns off any unattended user stations at night when PC Sat is in eclipse. (ANS)

**

EMERGING TECHNOLOGY: SECURITY PROBLEM WITH SENDMAIL - PSTCH AVAILABLE

According to its developer, the most widely used program for transferring e-mail between computer networks has a security flaw. One that could allow attackers to disrupt the flow of e-mail and intercept messages.

The program involved is called Sendmail. The security flaw does not directly affect your personal computers but it does put e-mail and information sent over the Internet at risk. Fixes for the vulnerability are available, free of charge, at Sendmail's Web site by applying a patch or upgrading to the latest version of Sendmail.

Atlanta-based Internet Security Systems Inc estimates that Sendmail handles as much as three-quarters of all Internet e-mail traffic. Sendmail Inc. which developed the program is located in Emeryville, California. (Published news reports)

**

EMERGING TECHNOLOGY: TUBE-TYPE PC'S

It seems that a venerable old friend simply refuses to die the death of technical obsolescence. The vacuum tube continues its reemergence into the audio marketplace, this time -- believe it or not -- in Personal Computerss.

The first tube motherboard appeared last year in response to PC gamers who craved the allegedly "more natural" sound produced by vacuum tube technology. Those who have seen the boasrds call it a strange sight to behold.

More on this May-December marriage of filament and silicon can be found at the website at http://www.neoseeker.com/Articles/Hardware/Reviews/aopenax4btube (CGC Communicator, Clayton Creekmore and neoseeker.com)

**

ON THE AIRWAVES: DIGITAL RADIO MONDIALE IS ON ITS WAY

After long years of gathering a consortium, prototyping and testing, Digital Radio Mondiale has announced that there will be an official launch at the World Radio Conference in Geneva, in June. Thiis according to a report in shortwave.com.

Digital Radio Mondiale, better known by its initials D-R-M is the world's only non-proprietary, digital broadcasting system for short-wave, medium-wave and long-wave with the ability to use existing frequencies and bandwidth across the globe. With near-FM quality sound, DRM hopes to revitalize the AM broadcasting bands below 30 Mhz in markets worldwide.

And right on the heels of the launch announcement came the granting of two highly significant standards for DRM. First, the International Electrotechnical Committee has given the Digital Radio Mondiale on-air system its highest stamp of approval as an International Standard. This was followed by the International Telecommunication Union granting permission for any broadcaster to use existing frequency assignments for DRM digital transmissions. This, provided that there is no interference with other stations. (ASWLC)

**

INTERNATIONAL -IRELAND" A WALKERS FESTIVAL

Over in Ireland, word that theTipperary Amateur Radio Group provided emergency communications support for up to 300 walkers expected to take part in the A-her-low Hillwalking Festival. The event was held the weekend of April 5th and 6th in Irland's Galty Mountainsl. (GB2RS)

**

DX

In DX, word that G3RWL, will be active as 8P6DR from Barbados through the 20th of April on 10 to 40 meters. He will also be on 80 and 6

meters if he can arrange the antennas. (GB2RS)

And VK3OT will be active as VK9XI from Christmas Island through April 21st. He will be concentrating on CW on the H-F bands and 6 metres. Priority will be given to High Frequency CW when 6 is closed. More info is on the web at http://members.datafast.net.au/electronics/path.htm

**

THAT FINAL ITEM: THE PARC FIELD DAY FILM LIVES AGAIN

And finally this week some very good news for ypou ham radio cinema fans. After having been among the missing for over two decaders, a famous ham radio movie has surfaced. And it will soon have its first official public screening since its restoration was completed. The guy who has the movie on his shelf -- our own Bill Pasternak, WA6ITF, has some background on this ham radio cinematic classic:

--
The film's real name is simply Field Day 1971. It is a tongue - in cheek look at the planning and execution of the ARRL Field Day operating event by what was then one of the most active radio clubs in the United States. My home radio club The famed Pallisades Amateur Rado Club of Culver City California. Home of "good-guy the gokld plated radio" repeater.

Field Day 1971 was produced and edited by George Hively, W6GRH, -- then WA6YEA -- as a club project over thirty years ago. Hively, who has spent his life in the motion picture business wrote the script, supervised the filming, edited it together and provided the music and the narriation. And notice we said filming. Field Day 1971 was produced long before the advent of home videotape. It was shot using Super 8 millimerter motion picture film and consumer cameras. The sound track was on a separate tape cassette. In fact, it still must be projected that way -- even today.

A preview screening of the restored movie took place a March 8th at the HandiHams winter camp in Malibu California. They loved it. As a result of that enthuiastic welcome, a public showing of Field Day 1971 to the California ham radio community has been tentatively scheduled for Wednesday evening May 14th. This, hosted by the Santa Clarita Amateur Radio Club that meets just North of Los Angeles.

And for those of you who are wondering where the movie has been hiding the past 20+ years, this might surprise you. It has been kept safe and well protected by a former PARC member -- Richard Burton, the ex-WB6JAC. Richard contacted us a few months ago asking if we would like to have the movie. We said yes, and with the assistance of Anita O'Delll, N2IHX, the movie was brought back to projectable condition.

Because there is only one projectable print of Field Day 1971 available it cannot be lent out. But W6GRH tells Amateur Radio Newsline that plans call for it to be transferred to video -- either VHS casssette or

possibly DVD. And the sound will always match the picture that way. We hope.

With Field Day `71 -- the movie -- sitting on my desk as I record this, I'm Bill Pasternak, WA6ITF.

--

Meantime, those wanting to attend this first public screening in two decades of this riotous movie, you should consult the Santa Clarita Valley Amateur Radio Club website for meeting details. Its on-line at www.w6jw.org. Scroll down and click on "Monthly Meetings" for more. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's™ only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Don't forget that the nominating period for the 2003 Amateur Radio Newsline™ Young Ham of the Year Award is now open. You will find all the rules and a fill-in-the blank nominating form in cyberspace at www.yhoty.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline™ is Copyright 2003. All rights reserved.

And the naysayers are STILL at it! They will choke on their Liberalism
before they admit that President Bush and our wonderful troops freed a
depressed and subjugated country.
These are the same Libs that argued that the U.S. should "contain"
Saddam....yeah, right.
Sorry, Libs, but you guys are quite simply on the wrong side of history. You
guys need not order breakfast tomorrow what with all the egg already on your
faces.
Oh, by the way. The exiled Iraqis in Michigan are sure jumping for joy!
Freedom is a precious commodity, something that "containment" could never
have accomplished.
How do you like your egg? Scrambled or over easy?

Come on, Ross. Stop being such a condescending twit. To be honest with you, few of us, and especially the recently freed Iraqis care not a whit about your "shame".
Speaking of forming beliefs...why are yours, according to you, "valid" while the ideas of those with whom you disagree are not ? Because YOU say so?
Methinks your opinion of yourself and your notions are highly overrated, at least in your own mind.
Talk about unmitigated drivel !!!!!

Now that it is clearly apparent that the coalition forces are
doing just what they set out to do, and the Iraqi people are
celebrating, waving U.S. flags, greeting U.S. soldiers, Al-Jazeera
and other Arab news sources are not too interested in reporting
anymore. Now they don't want the rest of the Arab world to see the
success the coalition forces have had and how wrong and one sided
their reporting of the conflict has been.

Exactly. Freedom is intoxicating. The old-line monarchies are worried that
their stranglehold on their citizens will soon be a thing of the past. Once
their "subjects" discover freedom the old religious zealots and dictators
will be a thing of the past and they will have nowhere to go but exile.
If Liberal Pacifists had had their way in 1776 WE would still be bowing down
to Queen Elizabeth. The Iraqis are on this path.....

Find out what you can do to help.....

http://www.stopwar.org.uk

http://truemajority.org/

www.endthewar.org

www.antiwar.com

www.notinourname.net

www.antiwar.org

Our government told us we had to go to war because of terrorism - but Iraq
has never been proven to have any links with Al Qaeda.

Our government told us we had to go to war because of weapons of mass
destruction - and now it's been revealed that the evidence of Iraq's nuclear
program, which Colin Powell brought to the UN Security Council and George
Bush brought to the nation in his State of the Union address, contained
forged
documents that were the so called proof that Iraq was trying to buy 500 tons
of uranium oxide from Niger.

Geesh....
Give it a break. Our government broke Saddam Hessein and his cruel
dictaorship into a has-been government. Our guys and gals in our military
sent a very cruel regime running......
You have a problem? Ask the newly-freed Iraqis...look at what freedom means
to them.
Forged Documents? No...only in your Liberal mind....too bad, you lose.
Watch the Iraqis celebrate casting off the yoke of a sick dictator.
Watch you Democrats whine....you hate freedom of choice. Democracy to you is
a goal to be avoided....
And you wonder why the Dems are losing membership so fast.....

Sorry about the desription of symptoms....
If I try to speak there is no meter deflection , only if i tap on the
microphone or whistle will the meter deflect....NOTHING if I speak ! and
there seems to be no transmit unless i tap on the microphone and then it
only deflects for the duration of the tap. I have looked in the mike and all
connections seem OK.

Any ideas?

Have you only tried SSB - or have you also tried AM/CW or FM? If the radio still doesn't transmit with any of these, then it may well be more than a bad mic. If there is a carrier, try monitoring your signal and see if there is any audio - if none, then you have a pretty good idea that the problem is on the audio line, and from your description, it could well be in the microphone - having said that, there could well be other probems internal to the radio.

Hello
I might have a really stupid question..
If I have a device,(a magnetic card reader) ,that I have disconnected from the RS232 card,but still have it connected to the decoder circuit(from impulses to 1*s and 0*s) ,can I transmit the data with a radio transmitter? Do I need any other circuits apart from theFM transmitter itself?
Any info appreciated.Thanks.

Actually it is like the VX-5 and VX-7 Yaesus dual receive or not it
does not hear when it transmits therefore you cannot hear your own
downlink. The only current production radio that allows you to
hear your own downlink is the Kenwood THD-7. Several older
models are perfect for satellite work the Yaesu FT-530 and FT-51
come to mins. Those models will easily let you hear your own
down link and have accommodation to tune the 70cm while
transmitting on the 2m. The Arrow recommendation is a good one
but even more for the receive than getting in to the bird.

Have fun

FM (like telephone wires) isn't normally used to transmit DC (1's and 0's), so you need a special modulator/demodulator (also called a modem). Radio, as you probably expect, has more requirements for media access than telephone lines and uses something called a Terminal Node Controller which includes modem circuitry. TNCs range from very basic that operate at 1200 baud to multi-mode types that operate at higher baud rates and sometimes provide stand-alone modes for unattended operation.

A group called Tucson Amateur Packet Radio pioneered early TNC designs and has lots of useful information. Check thier webpage at http://www.tapr.org/tapr/html/pktf.html .

> Any info appreciated.Thanks.

It's not a stupid question, but watch out for the answer!

Bottom line is the 0 and 1 signals that you want to transmit are 'levels',
not tones. Your radio at the mic input only accepts a range of
frequencies for tones. A range that pretty much overlaps what's been
determined as the 'intelligence' portion of the voice spectrum. Basically
tones between a few hundred cycles per second to up beyond 1000
cycles. Usually much above 2000. It is NOT HiFi!

There are devices that translate 'levels' to 'tones'. They 'modulate'
and 'demodulate'. Put that together ... MoDem.

On radio, most modems are just what is called FSK or Frequency
Shift Keying. What that means is that they just put out one tone for
a 0, another for a 1. The frequency is 'shifted' as the input changes.

2464. PS supply problem

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-12 18:19:01 UTC
From: samuel_ramac@hotmail.com
Message-ID: <6ebdc475.0304121019.160ddfb8@posting.google.com>
Source record: 68009

My power supply (MFJ 4225MV) shutsdown in the middle of a PSK31 transmission. I am running around 25watts. I can usually turn on the PS but when I try again in PSK31 it shutsdown again in the middle. I monitor the current and voltage levels (around 8A) and I don't see any spikes. The PS does not seem to be overheating though.

The MFJ4225 is about 2 years old. Is it about time to change the PS? Or is there something I can check and fix?

Regards,

Sam N2MXY

Antenna gain? Better RX sensitivity?

(Probably the same - antenna is a dummy load - and no material enginering
differences - so someone is simply lying more than the other.)

If you MUST eat, stick to things like beef jerky and chocolate chip cookies, washed down by beer or milk, whichever you prefer. If you eat anything else, be sure to neutralize it with at least a half-pint of rumplemintz.

Hey folks,

I get an email from WD4IHS with an AOL account about a
QSO I had on 20M. Well, based upon his comments,
it seems that he didn't like what I said on the air, so he replies with a
tirade
via email from his AOL account. Well, I think, I wonder why he
didn't reply to me on the air? So I reply to him via email to his
AOL account. Then, this COWARD has my email rejected by
AOL, I guess he doesn't want to hear what I said to him. Well, below is
the entire exchange. It is here now for all the world to see..
I guess Jeffy will have to deal with this...let's see AOL block this
out...If any of you know this clown, show him this.

73,
Chuck K1KW..

MY REPLY IS BELOW:

Hey,

Chill out...

If you listened you would have seen that the group agreed that the VE7 had
a wide
signal and they were working with him on it.

So...what's your beef?

AND...Why didn't you break in? Do you have a call that you would be
proud of, or even be heard? Did you listen for the rest of the interchange
or just fire from the hip....?

BTW, what were you drinking? Before you send such a missive again,
get your wife or significant other to OK it...because you are obviously
out of control, based upon that totally maundering email you sent to
me......

73,
Chuck...K1KW

Subject: POLICING THE AMATEUR BANDS...

Hey Chuck,
My name is Jeff and I was listening on 20 meters a few minutes ago
and I noticed those gentleman were having a nice conversation.You could
have told them they were splattering and then moved on,but,you had to keep
on
and on about it.You say you have been a ham since 63 or whenever but
I thought you would have learned some manners by now.First of all,I live in
Brentwood,Tennessee and you were wider than they were just talking normal.
You have entirely too much background noise and you are over driving your
amp
and/or your mic. gain is too high.I realize that some people HAVE to run
a KW for whatever reason but sometimes they are not necessary...DAH.YOU
were causing much more interference than any of those other guys were at
all.
You need to look at your own signal and back your mic gain down some and
QUIT over driving your amp.I got my ticket in 77(big deal).Was it necessary
to screw up there QSO like that?You might ought to stay off the rig when you
have been drinking huh?Oh well,some constructive critisism might go along
way
here! Like,MIND YOUR OWN BUSINESS and worry about yourself.I can not stand
people who police the bands and try to tell people what to do.He who knows
it
all,knows NOTHING.Think before you ruin somebodys QSO next time.

73's,Jeff.

The Lib Nazis are at it again. Spewing their ultra right-wing idiocy as usual. They continue to claim that we should not have invaded Iraq because there were no WMDs found. Did these intellectuals ever stop to think that there is a LOT of territory to be searched yet? That Saddam shipped out a lot of what he had to other countries?
These guys are funny and it is laughable to watch them feed on each other's paranoia.
I get the idea that these goofs don't care one whit about the mass killings and tortures that Saddam inflicted upon his people...but then, they just HAVE to have something to bitch about.
Yawn.

the entire exchange. It is here now for all the world to see..
I guess Jeffy will have to deal with this...let's see AOL block this
out...If any of you know this clown, show him this.

73,
Chuck K1KW..

MY REPLY IS BELOW:

Hey,

Chill out...

If you listened you would have seen that the group agreed that the VE7 had
a wide
signal and they were working with him on it.

So...what's your beef?

AND...Why didn't you break in? Do you have a call that you would be
proud of, or even be heard? Did you listen for the rest of the interchange
or just fire from the hip....?

BTW, what were you drinking? Before you send such a missive again,
get your wife or significant other to OK it...because you are obviously
out of control, based upon that totally maundering email you sent to
me......

73,
Chuck...K1KW

Subject: POLICING THE AMATEUR BANDS...

Hey Chuck,
My name is Jeff and I was listening on 20 meters a few minutes ago
and I noticed those gentleman were having a nice conversation.You could
have told them they were splattering and then moved on,but,you had to keep
on
and on about it.You say you have been a ham since 63 or whenever but
I thought you would have learned some manners by now.First of all,I live in
Brentwood,Tennessee and you were wider than they were just talking normal.
You have entirely too much background noise and you are over driving your
amp
and/or your mic. gain is too high.I realize that some people HAVE to run
a KW for whatever reason but sometimes they are not necessary...DAH.YOU
were causing much more interference than any of those other guys were at
all.
You need to look at your own signal and back your mic gain down some and
QUIT over driving your amp.I got my ticket in 77(big deal).Was it necessary
to screw up there QSO like that?You might ought to stay off the rig when you
have been drinking huh?Oh well,some constructive critisism might go along
way
here! Like,MIND YOUR OWN BUSINESS and worry about yourself.I can not stand
people who police the bands and try to tell people what to do.He who knows
it
all,knows NOTHING.Think before you ruin somebodys QSO next time.

73's,Jeff.

Jeff. He used a word I've never seen before. What the heck is "maundering
"?????
Maybe he has a dictionary I am not aware of????

It's called the English dictionary.

This is true. It is a valid word.
Now if only I can find some pictures to color....
Is that not part of the 5 wpm Extra test????

I agree with the guy if you kept going on and on about it, you should of
just told them once and moved on, since when are you a ham authority anyway.
get a life for Christ's sake. We have guys like you over here in the UK that
think they know everything.
We call them pain in the butts.

Yeah, their idea to fix this is to do what the U.N. was doing:

Just keep yelling this:

"Stop, or.....we're going to yell stop again."

Yup, that's effective!

Just another redundant bunch of old
men on a ham radio acting like
14 year olds.

2480. PA-SitRep - PA Amateurs Radio Volunteers Wanted

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-13 14:23:52 UTC
From: kb3fxi@yahoo.com
Message-ID: <3e9972b8.416559937@news.verizon.net>
Source record: 68025
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (49)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 550 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists.

In addition to providing the situation reports for our
own emergency alert lists, the eventual long-term goal
of PA-SitRep is to provide rapid emergency situation
reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for the National
Weather Service.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-nospamsitrep.com
(remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder
www.PA-SitRep.com

PA-SitRep website and mail lists are
100% non-commercial / non-profit.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/April, through Sunday, 13th/April there were 232 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, I, IS, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VK9X, VP2V, VP5, VP8, VP8/h, VP8/o, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4S, SRI LANKA. Ivan, UR9IDX (ex-8Q7VG), will be active as 4S7DXG until May 1st. His activity over the past week was on 30/20/15 meters CW/SSB. Watch 21020 kHz after 1630z. Also watch 14014, 14195 and 10107 kHz between

1630-2230z. QSL via UR9IDX, P.O. Box 85, Mariupol 87531, UKRAINE.

4X/4Z, ISRAEL (Contest). The Israel Amateur Radio Club will run the Holyland Contest on Saturday, April 19th, between 0000-2359z, both CW and SSB. This is a good opportunity to work a good number of 4X/4Z stations towards the famous "Holyland Award" as well as other Israeli awards. The Contest Manager is Mark, 4Z4KX (E-mail address: 4z4kx@iarc.org). For complete details on this contest, please visit the Web page at: http://www.iarc.org

5Z, KENYA. QSL Manager Allan, G0IAS, informs OPDX that after nearly 12 years (when it was virtually impossible for a U.S. citizen to get a 5Z callsign) Don Gardner, ex-7Q7DC (KC7JDC), has been allocated 5Z4DE. Don is in Nairobi and will be transmitting after a long period of inactivity; as soon as possible (as soon as he gets his mast up!). ALL QSL cards are DIRECT ONLY to G0IAS. NO BUREAU and NOTHING sent to Don. ADDED NOTE BY ALLAN: Allan can still confirm any outstanding 7Q7DC QSL cards, but he states that he will probably close the books at the end of the year.

7P, A25 & ZS, LESOTHO, BOTSWANA AND SOUTH AFRICA. Operators Mauro/IN3QBR, Fabrizio/IN3ZNR and Joe/AA4NN are teaming up to go on the air as the "African Double Jump DXpedition". The team will be going to South Africa, Lesotho and Botswana starting at the end of June. According to their Web page, the team will meet with Andre, ZS6WPX, who will become their tour guide. Between June 28th and July 1st, the team will go on a Safari. There is a possibility they "MAY" do some operating using callsigns ZS/homecall. Early July 2nd, the team will head to Botswana's capital, Gaborone City. They plan to erect their antennas and operate from their hotel that day. Callsigns mentioned so far are A25NN and A25ZNR. They plan to leave for the town of Rustenburg on July 5th, and will travel to Sun City, South Africa. There "MAY" be some activity as ZS/homecall. Early July 7th, they will leave for Lesotho and expect to be there late afternoon. They will be active that same day. Expected callsigns will be 7P8JB and 7P8NR. Activity will last until July 11th. They depart for Johannesburg on July 12th and expect to leave for home July 13th. Please visit their Web page for updates at: http://www.qsl.net/xu7aay/africa

7P, LESOTHO. "NOT TO BE CONFUSED with the African Double Jump DXpedition" listed above, look for three Texans (Frosty/K5LBU, Madison/W5MJ and Tom/WW5L) and one Canadian (Neil/VA7DX) to be active as 7P8CF, 7P8MJ, 7P8TA and 7P8NK, respectively, from July 18-25th. Activity will be on all bands 160-10 meters CW/SSB/PSK31/RTTY. QSL each by their home calls. The group currently does not have a Web page, but more details will be released after June 1st. Watch Frosty's Web page for possible updates at: http://WWW.k5lbu.com

DAYTON HAMVENTION DX DINNER PROGRAM. Steve Bolia, N8BJQ, informs OPDX that this year's SWODXA DX Dinner Banquet Program will be "A DXer's Expedition through the Halls of Power" with guest speaker Vice Admiral Scott Redd, U. S. Navy (Retired), K0DQ/A92Q. There are still some tickets available (Please refer to OPDX.597 for details).

DU, PHILIPPINES. Jon, N0NM, continues to be active as DU9/N0NM until April 23rd, before he leaves on a trip to HS-land. He was active this past week on 80 meters (between 3500-3506) after 1000z. If the bands are decent, he will usually try top band (watch 1828.3 kHz).

ELECTED OFFICERS FOR 2003. The following are the officers for the Spokane DX Association for 2003:
President - Gary Elliott, K7OX Secretary - George Tuncil, W6AEA
Vice Pres - Randy Foltz, K7TQ Treasurer - Dan Hearn, N5AR

GM, SCOTLAND (Special Weekend Activity). The annual Scottish Activity Weekend takes place on April 19/20th, and is organized by the GM DX Group. This is not a contest, just an opportunity to work Scottish stations on all LF and HF bands, and to gain credits for several awards, including the new "Celtic Connections Award". For complete details, visit the Web page at" http://www.gmdx.org.uk
Please work GM, MM, GS and MS stations during the weekend.

IN SEARCH OF BY YOUR EDITOR (Still Looking)! I know this has nothing to do with DX, but your editor's second love (other than DXing) is MUSIC. I have been searching for a music CD (not LP) called the "Young and Rich" by the group "The Tubes". Not just the song, but the entire CD. The CD is now out of print. Please look at your local record/CD store to see if they have a copy. I am interested in buying a copy (or even a backup version) at a reasonable price......Thanks Tedd, KB8NW

IOTA NEWS.....
AF-019. Operators ON6VP, ON4CAQ and ON1AEO will be active as IG9/ON4DST from Calla Madonna, Lampedusa Island, between May 24-29th. Activity will be on 80/40/20/15/10 meters SSB only. They will be using a FT-757 with groundplanes and wire antennas. For skeds, please E-mail: ON6VP@pi.be
QSL to ON4DST via the bureau, or direct via ON4AMM (Mary Lou Moons, Oudestraat 9, B-3560 Lummen, Belgium).

AS-079. Takeshi "Take", JI3DST, will be active as JI3DST/6 from Miyako Island (Miyako-jima Hirars-City Okinawa-ken) starting at 0600z, April 26th to 0000z, May 5th. Activity will be on 17/15/12/10/6/2 meters SSB. He will be looking for AF and SA on 6 meters. QSL via the Bureau (Bureau is Best) or direct to the address on QRZ.com.

EU-008. Members of the Calderdale Raynet Group will activate the Island of Colonsay (IOSA NH19 and WAB NR39) from Saturday evening, April 26th to Thursday lunch-time, May 1st. Their activity will be on all HF bands depending on the conditions. They will use the club callsign MM0CRG. All stations worked will be sent a QSL card via the RSGB or QSL direct (w/SAE) to G3TAY.

EU-031. Walter, IN3XUG, will be active on Ischia Island from April 16-27th using the callsign IC8/IN3XUG. Activity will be on the IOTA frequencies (28460, 21260, 14260 and 7060 kHz) SSB.

He will pay particular attention to U.S. stateside stations.
QSL via IN3XUG, Bureau or direct.

EU-172. Peter/DL4AMK and his XYL will activate the Danish Island of
Aaroe (JY-003) as OZ/DL4AMK from April 16-21st. He will use
an Icom 735 with an ZZ-1004 amp and a Gap-Eagle antenna.
Activity will be on 40/20/17/15/12/10 meters SSB. QSL via
the DARC bureau or direct.

OC-NEW. Just a reminder (refer to OPDX.602), to look for Tom/VK3ZZ,
Keith/VK3FT, Jack/VK3WWW and Peter/VK3QI to activate the
IOTA, Waldegrave Island in the South Australia State West
Centre Group, April 17-22nd. Callsign will be VI5WCP. QSL
via VK3ZZ.

OC-241. Irfan, YC4FIJ, will sign YC4FIJ/P from Utan Island, April
19-21st. QSL via YC9BU, with SAE+IRCs only (Note: DO NOT
send USDs, they will be stolen in YB-land's post office).

OC-241. Look for a Multi-operation using the callsign 8A9R to activate
Rote Island in the middle of June. Activity will be on several
bands. Kadek, YC9BU, will be one of the operators and also
the QSL Manager.

LIGHTHOUSE/LIGHTSHIP ACTIVITY.....
A special event station signing CS5E will be active April 25th from
Cabo Raso Lighthouse - reference number ARLHS POR011. This activity
will also be valid for the Portuguese Lighthouses Award reference
number DFP FES04, and Portuguese Castles and Fortresses Award reference
number DCFP F141 - Forte de Sao Bras. Activity will be on 20, 15 and
10 meters, SSB. Look for them near the World Lighthouse frequencies.
Suggested SSB frequencies (+/- 20 khz) are: 14270, 21370, 28370 kHz.
QSL via the address on QRZ.com or via the Bureau.

Look for Kevin/MW3AFR and Melfyn/MW3AGN, to be active as homecall/p
from the Liverpool Bar Lightship "Planet" (ENG-065, WW Loc. IO83LJ)
on April 18th and April 21st. Activity will be on various HF bands,
including 40 meters and also 2 meter FM/SSB. QSL via their home
callsigns, direct or bureau.

OH0, ALAND ISLAND (Cancelled!). Ben, SM6CCO, reports that he had to cancel
his OH0CO operation from Aland Island. It was scheduled to take place
between April 10-16th.

PJ2, NETHERLANDS ANTILLES. Operators John/K1AR, Martin/W1MD, Jeff/WC4E,
Steve/N8BJQ, Ron/K8NZ and Geoff/W0CG will be active from Curacao as PJ2T
in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/2 entry.
QSL via N9AG.

QSL INFO AND NEWS.....
CT QSL HISTORICAL ARCHIVE. Carlos Nora, CT1END, reports: "We are the
only organization in Portugal that is devoted to documenting and
preserving the history of Amateur Radio in Portugal, from the early

days to the present. If you have Portuguese QSL cards prior to 1960, and Portuguese QSL cards from DXpeditions and other special events, we would appreciate receiving them as a donation to our collection, or as an alternative, send a digital image of the QSL card." If you can help them, please respond by E-mail (ct1end@netcabo.pt) or by mail to the address:
Carlos Nora, CT1END, Praceta D.Mecia N 15 - 2 Dto., Massama Norte, 2605 Belas, Portugal.

The LLDXT trip to Faroer Islands (OY) went QRT during the morning of April 10th. Pictures and the team's diary are available at the LLDXT Web site, as are the logs. The logs are updated April 13th with all QSOs. The LLDXT Website : http://www.qsl.net/lldxt/oy_2003/
LAST MINUTE PRESS RELEASE BY ROB, PA5ET:" We have completed our Faroe Island DX-pedition and had lots of fights with the propagation and the high winds. We managed to log 26,964 QSOs in 10 days of operation of which 14,041 in CW and 11,054 in SSB, 1,532 in RTTY, 300 in PSK and finally 37 in SSTV from 10-160 meters although it is better to say we worked mainly from 17-160 meter due to the bad propagation. The QSO statistics can be found on out web-site. Despite the lots of Europeans in the log we worked outside Europe every oppurtunity we had. There have simply not been that many openings unfortunately. Despite of that we are very happy with the result. The on-line logs have now been finalized so all QSOs should be visible on our web-site. The LLDXT web-site will be updated in the coming days with pictures and real-audio files. I like to thank the Europeans for the many times they had to QRX to allow us to work the 'rare' DX, a great example it can be done regardsless what other DX-peditions say. All QSLs will be handled by the LLDXT QSL manager PA5ET, Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands..... 73 de Bill OY7WB (AK0A), Tom OY7TW (GM4FDM), Ronald OY7WP (PA3EWP), Dick OY7QA (PA3FQA) and Rob OY7ET (PA5ET)"

VISALIA CONVENTION. QSL card checking at the "2003 Visalia International DX Convention" will take place from 2-4 PM on Saturday, May 3rd, in the Plaza Room of the Visalia Holiday Inn Hotel. All DXCC QSLs can be checked which would include 160 meters, deleted countries and cards over 10 years old. Also this year they will be able to check cards for the CQ WAZ Award and other ARRL Awards such as WAS and VUCC. Application forms for DXCC and WAZ will be available at the door, however, you can download the forms from these organizations in order to fill them in prior to the convention Any questions can be directed to Gary Stilwell, KI6T at: ki6t@arrl.net

QSL XR6T (active in the 2003 CQ WPX Contest) via CE6TBN at: Box 1234, Temuco, Chile.

Georg, DF7JN, announced this past week that he has lost contact (even a couple weeks before the war) with his friend YI1FC. His friend YI1FC supplied Georg with some (more or less uncomplete) logbooks from YI1 stations. For this reason, Georg has quit his job as QSL Manager for

the YI1 stations until further notice.

S0, WESTERN SARAHA. The S05X team is expected to be active on Wednesday, April 16th. In the S05X press releases this past week, they informed the DX community that the S05X Team will also be active in the U.S. General Class Operator's bands. They also announced that another operator was added to the team. Joe, KO4RR, from Georgia and a well-known Contester and DXer/Dxpeditioner (E30GA, T32R, KO4RR/KH5K- Palmyra, K5K- Kingman Reef and KO4RR/I8) was added to the team of YT1AD, YU1AU, I8NHJ, CT1BWW, N6TQS, EA1BT, EA2RC, EA5RM, EA5XX and S01MZ. QSL Manager is EA4URE. Also, due to the high expense to travel into the desert, all donations to the S05X Team are WELCOME. Donations can be sent to the S05X QSL Manager: URE, Union de Radioaficionados Espanoles, Avda. Monte Igueldo 102, Madrid 28053, Spain. All names will be listed on their Web site at: http://www.pagus.it/s05x/

S2, BANGLADESH. Takeda, S21YY, was pleasing the RTTY operators this past weekend on 20 meters. Watch for him on/around 14080 kHz after 0100z.

SILENT KEY. Victor Rivera, ZK1CG and ZK1USA, received word from Poko, the son of Tuatai Tupou (ZK1MA North Cooks and ZK1CY South Cooks), that his father passed away in Australia on the morning of April 12th. Victor states, "Tuatai will be missed here and in Manihiki by a lot of people. Poko ask me to inform all his Ham radio friends of his passing away." OPDX and its readers would like to send out our deepest sympathy to Tuatai's family and friends.

SPECIAL EVENT. The French Government Service ART has issued the special callsign TM0GAY, to Jean Marc, F8IXZ , to be used from June 20th to July 4th. This special callsign is issued as part of the French Gaypride activities. Activity will be on HF bands from 40-10 meters mainly on CW, SSB possibly as well. QSL via F8IXZ either direct (+ postage IRC or USD) or via the French REF Bureau. Direct cards with insufficient postage dues will be answered by the bureau.

SV9, CRETE. Jim, SM2EKM, will be active as SV9/SM2EKM from Agia Marina, Crete, May 29th through June 12th. Jim informs OPDX that most of his activity will be CW on all bands (but this depends on antenna instalation). QSL to his home callsign, bureau or direct. If there are any Bureau requests, E-mail to: sm2ekm@telia.com

VP8/LU1BR (Pirate Activity). Luis, LU1BR, has informed OPDX that a station using his callsign was operating on 10 and 12 meters on the CW mode was a PIRATE. Activity took place on March 13th, 2140-2240z on 28006 and 24896 kHz. Also, Luis mentions that probably this same person changed all his data entered on the QRZ.com Web page. All QSLs received for these bands activity will be returned.

WARD (Remember!). Just a reminder that the "World Amateur Radio Day" (WARD) will be celebrated by IARU on April 18th (Please refer to OPDX.602). For rules on how to receive the special WARD 2003 Award, go to the following Web site: http://qtc.radio.org.pl/ward2003/

XW, LAOS. Plently of activity from this one over the past week. Stations heard were XW1A, XW1FAN, XW6KM and XW1X. Operator Kamphan, XW1FAN, seemed to be the most active over the past week. Watch around 21220, 21225 and 21260 kHz after 0830z or between 1330-1430z.

YI, IRAQ. Some interesting QSNs where reported over the past week. Jim, KT4CK, was spotted as YI/KT4CK on the DX cluster system. Jim is with or has been with the 101st Airborne and lives near Ft. Campbell. DX Mail Reflectors suggest he was trying to attempt to contact his family on 21312 kHz at 1438z and 21278 kHz at 1632z. Also, heard was Mark, NG5L, signing as YI/NG5L over the past weekend. He was very active on 20 meters after/or just before 0500z and between 1945 and 2300z. Watch around 14195 kHz and 14240 kHz. Mark is with the 82nd Airborne in the Iraqi desert near Nassaryia. Remember, WORK FIRST WORRY LATER.

YK, SYRIA. Saad, N5FF, informs OPDX of the following: "This is to advise the DX community that my planned trip to the YK land, initially scheduled for tomorrow (April 12th), has been postponed due to the current overall situation in the Middle East. No firm date has been set for my trip yet, but it's possible to take place in couple of weeks or so, and it may even be postponed till later on in the year. I guess it's fair to say that the trip is now up in the air, but I will update you the minute I have concrete plans."

ZA, ALBANIA. Fred, IK7JWX, reports to look for "Team ZA3/ On The Air" from the city of Durazzo, Albania, May 29th through June 3rd. Activity will be on HF, WARC, and 6/2 meters. Modes to be used are: CW, SSB, RTTY and PSK31. Their Grid Square will be JN91RH. Operators are: ZA1FD, ZA5G, IK7JWX, IK7LMX, IZ7CTE, IZ7ATN, IZ7BNH, IK7QMJ, IK7FPX, IK2DUW, IZ2DPX, IK6CAC, IZ0CKJ, IV3FSG, IK5MDF and IK5BHN. All the operators will have the prefix ZA3/. Please, QSL via their home call, either the bureau or direct w/SASE (addresses on QRZ.com).

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active as ZD8Z from April 16-26th. Activity will be on CW/SSB on the WARC bands and low bands. QSL via VE3HO, direct ONLY!

ZF, CAYMAN ISLAND. John, NC8V, informs OPDX that he will be conducting his usual operation from the Little Cayman Island (NA-016) this year from April 12th through April 19th. He will be using the callsign ZF2JC and will be operating mostly SSB near the IOTA frequencies on 20, 15, 12 and 10 meters. He will have a 6 meter antenna with him this year and will give that a try if the band should open. QSLs should go to his home address at: 15100 E. Scatter Ridge Rd., Athens OH 45701 (w/SASE etc... would be appreciated).

Sounds like you are getting some RF feedback into the PS. The 4225 is a switching supply and my guess is, some rf is getting back into the voltage sensing stages. Is it just on one frequency?? Or all bands??? Does the problem go away when you lower the power level??? Can you try another antenna???

You may try moving the power supply.

Putting a toroid with a couple of turns of wire on the DC primary leading to the radio.

Checking the antenna lead, making sure you have good connections and the antenna lead is not radiating.

Big deal.. Two weeks ago they were holding up pictures of Saddam,
cheering him, burning the American flag and Bush's / Blair's pictures.
Lets see how it pans out in a year or so after we turn it over to the
Iraqi's.

If we treat a defeated Iraq like we are treating Afghanistan now heaven
help them. To this point Bush has not put any money in the budget to
help them rebuild their country. On the other hand Iraq has oil (i.e.
money) and Afghanistan doesn't...

Let us hope GWB does the right thing and doesn't abandon them.

BTW, It's great to see our POW's are OK and now free. A big thanks to
all of our troops for that matter. Your unselfish service to our country
is always appreciated!!!

-cdb

GREAT!!! If she had no brain OR a heart she'd be TRUE Republican.

On the other hand, what the heck does this have to do with scanning or amateur radio?

Hello,
I have written some programs to clone FT817 and IC-90 to PC, with the
abililty to load the images back to the radios.

the software can be found at:

http://thenetfather.dyndns.org/ft817clone
http://thenetfather.dyndns.org/ic90clone

regards
Matteo

I'm a soldier stationed in the carribean and I know very little about radios. What type of radio do I need to buy in order to listen to baseball games on AM radio from the States? Simple and cheap solutions are the best.

Not sure where you are at but perhaps Guantanamo Bay. Depending on what you can afford, there are many choices from Shortwave Radios to just a basic digital AM set. Not sure if you are wanting something small like an analog or perhaps a digital radio. I would suspect you would want a digital AM radio due to the fact that its a whole lot easier to pull out stations than a plain old analog radio. I would recommend a Sangean or Sony radio for that from www.aesham.com or www.universal-radio.com. You can receive both AM and Shortwave on those as well as FM. Not sure how much you want to spend so it might be something that can be found at your local PX or some local market wherever you are stationed. A good digital radio would probably set you back anywhere from 50 to 100 dollars and you can get more expensive sets for up to 200 dollars. I would recommend a digital set because of the ability to hear signals and you will suffer from interference from Caribbean stations. Also, you would want a decent outside antenna so you can pick up the games from the states.

Usually you can find many baseball games on the air and I will list them below. P.S. Thanks for your service to the country and best wishes for military career. Thanks for everything you do.

720 AM WGN, CHICAGO, CHICAGO CUBS
750 AM WSB, ATLANTA, ATLANTA BRAVES
760 AM WJR, DETROIT, DETROIT TIGERS
770 AM WABC, NEW YORK, NEW YORK YANKEES
820 AM DALLAS, TEXAS RANGERS
830 AM MINNEAPOLIS, MINNESOTA TWINS
850 AM, DENVER, COLORADO ROCKIES
1000 AM, CHICAGO, Chicago White Sox
1020 AM, PITTSBURGH, Pittsburgh Pirates
1100 AM, CLEVELAND, Cleveland Indians

Im sure there are more but I cant recall all the frequencies. What you might do is to go to the webpages of the teams and they will tell the local AM broadcast outlet.

I don't know about now, but in years past, Armed Forces Radio would
transmit the games on Shortwave. Perhaps a look around the web would
confirm that. Just a thought.

And thanks for your service.

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday April 20th 2003
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

********** $1 buyers discount with hard copy of this notice ************

That's correct. There is only one weapon of mass destruction; a nuke.

All that chemical and bio stuff is a short-term, haphazardly applied,
limited-scope weapon that while vile, frightening, and against the
rules of civilized warfare, is, nonetheless, NOT a WMD.

Riiiiiiiiiiiiiiiiiiiiiiight.

Tell that to the thousands who perished in horror after assailed by
one/some.

They were destroyed, in masses, by a weapon. WMD couldn't be a more
appropriate description.

Slide down into ther 10 Meter Band with some
"Breaker Breakers" and roger beeps and
echo mics for a weekend or two. That's a
sure bet to get their BVD's in a knot for the next Year or two.....

2511. Pin out for PT31963 power transistor

Newsgroup: rec.radio.amateur.misc

Hi there,

I'm trying desperately to find out the pin-out for a PT31963 RF power transistor. Can anyone help? I know which wires are the emitter & I'm presuming the small wire is the base, but not 100% sure!

Had a trade deal on some equipment with john_lalonde@sympatico.ca .
Four weeks ago I shipped a package to him at an address in Canada.

I've never received my package and now his e-mail bounces. Bottom
line: I've been had. Anyone else had any dealings with him? By the
way, he signed his e-mail with the name "Mike". Guess I should have
seen this one coming.

Well, after being told we're OK, now I'm being told we stand at NO-GO.

SO.... yet again, I still need four sets, HIGH POWER ONLY:

A4 head and cable WITH compatible:
DEK
Light Control Head
Microphone
Speaker
Jumper cables for DEK, etc.

I need all these items from the same source please, I cannot source from 12 people, it's just too intricate of a plan to deal with. I also cannot purchase anything that requires "mods" or "adaptation", per customer request.
Please, if anyone out there that isn't a cutthroat can offer this equipment, I would GREATLY appreciate it!!
thanks and sorry for the continuing saga...

PLEASE EMAIL DIRECT,
thanks,
Randy

Message-ID: <kgk0av4lsdmgos9k08e815mgpeajnd9hes@4ax.com>
Source record: 67913

I want to thank everyone who repsonded to my message concerning john_lalonde@sympatico.ca both by e-mail and in the groups. Special thanks to the Canadian writers who offered information and help.

I have been able to determine that this person saw my ad posted in mics.emergency.services and not on the ham groups. While several persons admit to knowing him no one has been able to give his address.

Unfortunately, I had already deleted the e-mail containing his mailing address from my computer once I had mailed my package to him and he said his was sent to me, keeping only his e-mail address to confirm when the package arrived. Big mistake. No ham call, no mailing address, bouncing e-mail.

Again thanks to everyone,

Jim, W8EMS/9

2519. Oregon QSO Party - May 10

I offer the following as the last of my Atlas radios,,,
All are sold as-is, but if you have a little time, these would make a fine radio. All faceplates look good, supplied with CD of radio, power plug if I have it.
Would consider a package for all.
Atlas 180, 160-20, $165 shipped
Atlas 215x, 160-15, Noise Blanker option, 30-40 watts out depending on band, probably needs alignment - $140 shipped
Atlas 210x, 80-10, 40-80 watts output depending on band, $140 shipped
Atlas 210x, 80-10, 30-90 watts output depending on band, $140 shipped
Best Regards, Frank, KG9H

I saw today that R.H. issued some
traffic-tickets to a few hams for running
something called "enhanced ssb".

What exactly are the technical specs of
this mode of SSB? URL's which explain it?

It is when you take twelve to twenty KHZ of AF and force it into your
microphone input stage of the transmitter, which is designed to pass
aproximately 300 to 3000 cycles.

Adjust your carrier frequency of the transmitter to enable more 'LOW' tones.

Then listen to the results on the air.

Can you say too wide?

No, in their case there is NO attempt at enhancing their audio. They just
want to run everything to the right, processor on, and scream into the mike.
They all use those 'banana' style mics, most of them 12 inches long.

Truse me Jay, your not missing anything except:

...Vic's usual 6 kc W-I-D-E enhanced SSB signal
...Harvey's s-3 signal and incoherent, senile "special english" babblings
...FAM's re-hashed political diatribes from when he used to work at a
midwestern "agri-belt" 5KW AM radio station, that was noted
for broadcasting MORE to corn and soybeans, instead of people
...MVU's plugging of his radio show thru his intermittent mic which has
been broken as such for going on 5 Months now
...the guy in Ohio who has his mic gain cranked up *so high* that you can
hear
air rushing past his nose hairs (or filling up his empty brain cavity?)
when he
inhales, but alas, like so many others on the Liberty Net, is very
proficient
at saying "very little in so-many words"

"The Liberty Net" "Almost as good as the piped in music you hear in
elevators, or the 4 month old magazines you read at your el-cheapo
dentist's office while waiting for a root canal...."

What is the calculation to get Pmpo to rms
i have a 3600 w pmpo computer speaker system
some people say its 3600/27 or 23
but i'm not sure
so plz help

I have one 16ch HT-1000 radio in excellent condition electronic and
cosmeticly. The radio is the "R" model 403-470mhz split. It will do the Ham
and Commercial band at the same time.
Comes with a very good battey, belt clip, antenna and rapid charger.

I will do free programming if needed, just send your info once purchased.

Price: $250 plus shipping in the U.S. only.

Payment via Money Order or PayPal

You can't do much in the shack without a VOM, so when you already know
which is emitter it is very easy to find base and collector

he wont, he's probably the type of guy that parks his vfo on 14313 all
day long to play "frequency cop", and everyone still laughs
at him. ;)

2540. Motorola Radius P200 question

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-20 22:15:31 UTC
From: Toscano <toscano2@ix.netcom.com>
Message-ID: <b7v6iu$ph4$1@slb1.atl.mindspring.net>
Source record: 67835

I recently obtained two 2-channel UHF P200s. I am wondering if it is true that my removing the "stopper" ring on the channel selector dial (little prong that limits the radio to two channel positions and opens it up to six positions), if I have those six positions, can I then get the radio programmed for six channels? I noticed after making the mod to one radio that the two existing channels repeat each other in the positions for channels 3 to 6.

Thanks!
KB1ILS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3 YEAR DXPEDITION (Amazing Lady!). OPDX was informed by Skipper Susan Meckley, W7KFI, that she was starting her 3 year DXpedition to Central America and the South Pacific. At the time she contacted us she was

in Mexico soon to sign W7KFI/mm. NOW FOR THE AMAZING PART! Susan told OPDX that she originally was to go on a 1946 Brewer, the vessel called Menage-A-tROIS. However, she states she soon found out that, at the age of 69 years old (YES 69), she could no longer single handedly sail the boat in heavy weather. She stated, "It was just too much boat for an old lady." (ed. AMAZING) Susan traded her boat for a Challenger 1932. The Vessel S/V Dharma. She stated, "This size boat I can handle all by myself." (ed. WOW!). Susan left Oakland, CA, in January and has been slowly working her way south. She has spent time in many ports, and she found them very nice. Susan has been in Ensenada, Mexico (Baja California), for the last month, but has now left again on Wednesday, April 16th, for San Jose, Punta Cabras. Heading south, Susan told OPDX that she would be operating from an island that has not been operated on before, the Isle San Martin (NA-162). She was heard April 17th as XE2/W7KFI from San Martin on 14249 kHz at 2341z. The length of her stay is not unknown. However, Susan provided OPDX with her next stops (no dates given). Her next stop will be at Bahia de Torguga (Turtle bay), and from there to Magdelina Bay, Cabo San Lucas, and finally La Paz. Susan will be in La Paz for a few weeks, then it is off to the islands in the Sea of Cortez for operating....and into Guymas for the hurricane season. Come fall she will go down the mainland coast ending in Costa Rica. In April 2004, she is off to Galapagos Islands and into the South Pacific. Susan states, "I will be in the South Pacific for up to three years, operating from any island that will give me a license to operate. This is a fully self-funded expedition. I asked all around for support but was unable to get any. Rig is an FT-847 with two 32' pop-up masts and I will be on all modes except SSTV...including Pactor. I intend to follow in the footsteps of Danny Weil from the 50's. Hopefully, I will not end up on a reef like he did." We hope Susan will continue to contact us on her amazing trip, and we wish her the best. One last note. Susan told us that she has room on board for a crewmember if anyone wants to go. If interested, let us know and we will forward the message.

7P8, LESOTHO (Update). A fifth operator has been added to the July 7P8 Lesotho DXpedition that will give the group an added plus in the digital mode operation. The newest operator to join the group is Dave Anderson, K4SV, a veteran of many world-class DXpeditions and a world class RTTY and digital modes operator. Dave Anderson of Ashville, NC, whose 7P8 callsign is expected to be 7P8DA. Dave joins Charles Frost, K5LBU/7P8CF; Madison Jones, W5MJ/7P8MJ; Neil King VA7DX/7P8NK; and Tom Anderson WW5L/7P8TA, on the all bands and modes operation July 18-25th from Mohale's Hoek, Lesotho. REMEMBER: THIS OPERATION IS NOT TO BE CONFUSED with the "African Double Jump DXpedition". Dave gives the team some added strength on the digital modes and is a very experienced DXpedition member (member of the A50A and A52A Bhutan, VP5/KW4DA Turks & Caicos 2000 & 2003 operations, T2DA Tuvalu, 3D2CW Fiji, K1B Baker Island, and ZL7C Chatham Islands). QSLs will be handled by each operator separately via their home callsign as each will have their own 7P8 callsign. Look for more details to be released after June.

A6, UNITED ARAB EMIRATES. Ghis, ON5NT, is now in Dubuai for the UN for the next 3 months. Look for possible activity from him.

C9, MOZAMBIQUE (Update). Filippo, IK4ZHH, has informed OPDX that he has left for Mozambique on Friday, April 18th. Remember to look for Max/IZ4DPV and Filippo/IK4ZHH to be active as C93CM and C93FF, respectively, now through May 4th. Activity will be on 80-10 meters CW/SSB and possibly RTTY and 6 meters. They will also participate in the ARI DX Contest (May 3-4th). QSL via their home callsign, either direct or through the bureau.

GD, ISLE OF MAN. Phil, G4OBK, will be on holiday here soon and will operate as GD4OBK/P from near Andreas in the north part of the Island from April 27th until May 2nd. The WAB square is NX40. Phil expects to be active for an hour or two every day on HF 40-10 meters on CW and RTTY. He will use an Icom IC-706 and doublet antenna/ATU. QSL is via his home callsign on QRZ.com. Also, a log search will be available on his home page in early May at: http://www.qsl.net/g4obk/

IOTA NEWS.....
EU-017. A group of operators from the "Radio Group Etna" will be active as ID9RGE from Filicudi Island (IIA ME-003), April 24-27th. The team is: IT9EJW, IT9GAC, IT9GIE, IT9LCY, IT9TPJ, IT9VKY, IW9BCW, IW9BDV, IW9FY and IW9HDS. They plan to operate on HF bands CW/SSB and 6/2 meters. QSL via IT9EJW either via the bureau or direct: Alfio Bonanno, P. O. Box 18, 95028 Valverde - CT, Italy. For further information, go to the Web site at: http://www.rgetna.org

EU-030. Thomas, DL7UZO, will be active as OZ/homecall from Bornholm Island, May 18-23rd. Activity will be on the IOTA frequencies 80-10 meters, including the WARC bands and 6 meters (50.100 MHz CW and WSJT on 50.250 MHz). Operations will be on CW, SSB, RTTY and PSK31 using a FT-847 + Dipole. QSL direct or via Bureau. http://portal.funkstation.info

EU-030. Ben, OZ6B, will be active from Bornholm Island (BO-001 for Danish Island Award), June 19-26th. Activity will be on 14265 kHz (+/- QRM). QSL via the bureau or direct (CBA).

EU-039. As announced earlier, Franck/F5JOT, Daniel/F5LGQ and Claude/F6CKH will be on Chausey Island, but from April 26th to May 2nd (not April 18-26th). They will be active on 80-10 meters on CW, SSB, may be RTTY and SSTV.

EU-047. Peter, DH9YPA, will be active from Borkum Island (German Island Award N-01), April 27th through May 9th. Activity will be on SSB. QSL via bureau.

EU-048. Members of the Radio Club of Provins (F6KOP IOTA Team) will be active as TM7R from the Island of Groix (AT 012), May 7-12th. Their activity will be on HF, VHF and UHF on CW, SSB, RTTY, PSK31 and SSTV. There may also be operations for the French Castle and Forts Award (DFCF). Operators mentioned F4AJQ, F4BTP,

F4BUX, F4EAV, F4EAX, F5AGB, F5PVF, F5TST, F5VHQ, F8BUI, F8BJI,
F8BQQ and F9IE. QSL via F6KOP.

EU-063. Terje, LA3OHA, is once again heading up DXpeditions to Prins
Karls Forland Island. DXpeditions will take place between July
1st and August 2nd. Activity will be on 160-6 meters. This is
the same type of activity that took place in June 2001 as a
multi-national team operated from Prins Karls Forland Island
as JW0PK. The IOTA Community/Group states that it was the "Most
outstanding IOTA expedition in 2001". You can join and operate
from this expedition with your family/friends. For more
information and pictures, please visit the Web page at:
http://www.dxpedition.org/dxjwpk
QSL Manager will be SP5DRH: Jacek Kubiak, P.O. Box 4,
00-957 Warszawa, Poland.

EU-155. The Northern Italy DX Team will be active from Piallazza Island
(IIA ref. is FE-001), April 25-27th. Activity will be on 5 HF
bands CW/SSB. During this stay, the Team will try to activate
a little island (New One for IIA) near Piallazza Island. Expected
callsigns are: IK2SNG (CW only), IK4ALM, IK4VET and IK4XCL.
QSL via their home callsigns or via Bureau.

NA-013. Mike/AD5A and his sons Micheal/AB5EB and Jake/KB5SKN will
activate Little Corn Island between May 31st and June 2nd.
This is a RARE island and only about 10% of the IOTA chasers
have it. All operators are experienced IOTA operators and have
activated several island before. The family operators will use
an IC-706 with an amp and a vertical antenna. The team will
be active on RTTY and possibly 6 meters. The callsign is not
known yet. For more details, please visit the Web page at:
http://www.islandradio.org/na013.htm

NA-076. Operators David/WA4ET, Cory/N1WON, Ron/N4KE and Jim/NU4Y will
be active as WA4ET from Havens Island (USI FL 104S, Grid EL89).
They will be on the air starting around 0000z Friday, April
25th and ending at 1400z Monday, April 28th, WX and conditions
permitting. This island is in the Cedar Key Group on the west
coast of Florida. Activity will be on 40-6 meters CW/SSB/RTTY.
IOTA Frequencies will be used +/- QRM. QSL to WA4ET.

OC-057
OC-067. Yoshitake, JJ8DEN, will be active as FO/JJ8DEN from Maupiti
Islands (OC-067) between April 28th and May 1st. This also
includes activity from Maupihaa Atoll (OC-057). Look for him
to be active on HF on CW and RTTY with an IC-706 and HX52A.
QSL via JJ8DEN either via the bureau or direct to:
Yoshitake Izumi, Minami-24-7, Nishi-1, Obihiro-City, Hokkaido,
080-0011, JAPAN.

OC-066
OC-152. Fabien, F8CFU, will be active as homecall/FO from Hao Atoll

(OC-066), now through May 5th, and Tubuai Island May 6-16th.
Activity will be on 30/20/17/15/12/10 meters using a 2 element
dipole.

OC-121. Tad, JF6OJX, plans to be active as 3D2JX between now and April
24th from Mana Island, Fiji. Activity will mainly be on the
low bands. QSL via JN1HOW.

OC-202. Roland, DU1KGJ, is organizing another trip to Calagua Islands,
April 26-28th. Possible/probable callsign will be DX4CN. QSL
via VE7DP.

SA-015. The "Caracas DX-Group"/ARV will be active as YW5M from Los
Monjes Archipel, located at the extreme west part of Venezuela,
July 17-20th. Activity will be on all bands CW/SSB. QSL via
W4SO (maildrop!).

SA-063. The "Caracas DX-Group"/ARV will be active as YW8D from the
Island of La Cotorra, located at the east-coast of Venezuela
in the Orinoco-delta, June 20-24th. Activity will be on all
bands CW/SSB. QSL via W4SO (maildrop!).

J5, GUINEA- BISSAU. Sebastien, F8DQZ, who was active from 3X with the
callsign 3XD02 from the mainland and IOTA AF-051, will be here for the
next two weeks starting April 19th.

KH9, WAKE ISLAND. Jake, N6XIV, will once again operate from Wake Island.
His travel plans will have him arriving on or about April 19th. At this
point he expects to stay for at least 30 days...with the possibility of
up to 60 days. Once again operating time(s) will be limited due to his
work requirements. However, Jake states he will carry along his AH-4 tuner
in order to try and operate on multiple bands if the opportunity affords
itself. As before, K2FF - Glenn in Mississippi and W6FRH - Bob in California
will help with piloting duties. All QSLs go via K2FF direct or via the
bureau.

OE, AUSTRIA. Dieter Kritzer, OE8KDK (HF-Contest Manager), informs OPDX
that the Austrian Radio Amateurs and the Austrian Goverment Radiostations
will do a national EMERGENCY TEST on the 1st of May. Activity will be
from 0500-0800z and 1400-1700z on the 80 and 30 meter bands and they
will be using the CW and SSB mode. The following stations are expected
to be active:
OEC State Department
OEP213 Ministry of Interior
OEY??? Military
OEH??? Red Cross
The Goverment Stations have no permission to make international QSOs,
but SWL reports are available via the Austrian QSL-Bureau.

PIRATE ALERT. Sasi, 9V1SM, informs OPDX that his QSL Manager W3HNK has
been receiving QSLs for 9V1SM on 12 meters CW. This is not Sasi and this
operation is a pirate. Sasi states that he only operates on PSK31 and
SSB. All QSLs received for this band and mode will be returned to the

sender. If you did happen to have a QSO on this band/mode, Sasi would
greatly appreciate it if you could drop him a note before sending the
card to his manager at: tmssn@nus.edu.sg

QSL INFO AND NEWS.................
PA5ET is the QSL manager for the following callsigns: HB0/PA3ERC,
VP5C (1995), VP5/PA3BBP, VP5/PA3ERC, VP5/PA3EWP, VP45/PA3EWP, FG/PA3BBP,
FG/PA3ERC, FG/PA3EWP, FG/PA3FQA, TO5C (1996), J79BP, J79RC, J79WP,
J79QA, J77C (1996), FM/PA3BBP, FM/PA3ERC, FM/PA3EWP, FM/PA3FQA,
J6/PA3BBP, J6/PA3ERC, J6/PA3EWP, 9Y4/PA3BBP, 9Y4/PA3ERC, 9Y4/PA3EWP,
6Y5/PA3ERC, 6Y5/PA3EWP, ZF2RC/ZF9, ZF2WP/ZF9, PJ7/PA5ET, PJ7/PA4WM,
PJ7/PA3EWP, PJ7/PA3GCV, PJ7/PA4WM, PJ7/PA4EA, FS/PA5ET, FS/PA4WM,
FS/PA3EWP, FS/PA3GCV, FS/PA4WM, FS/PA4EA, V47ET, V47WM, V47WP, V47CV,
V47WM, V47EA, VP2EET, VP2EWM, VP2EWP, VP2ECV, VP2EWM, VP2EEA, 8Q9RC,
8Q9WP, V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9JS, 8P9JT, 8P9JU,
J3/PA3EWP, J3/PA5ET, J3/PA7FM, J38PA (2001), J8/PA3EWP, J8/PA5ET,
J8/PA7FM, J8PA (2001), J75ET, J75EA, J75ZH, J75WP, J75PA (2002),
VP2MET, VP2MEA, VP2MWP, VP2MPA, VP2MCV and VP2MWM (2002), OY7ET,
OY7QA, OY7TW, OY7WB, OY7WP and OY8PA (2003). Direct cards via:
Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.
ADDED NOTES: Rob states that OLD type IRCs are not accepted anymore.
Also, IRCs that are not stamped are treated as NO contribution which
means he will send the QSL(s) via the bureau. There are a few other
guildlines to follow (as mentioned in his press release) when QSLing
to Rob, PA5ET. His complete press release will be provided to OPDX
InterNet Subscribers as an additional bulletin.

QSL STATUS OF RI0B and RU0B (Also Ham Video) of the "Lost Islands"
DXpedition. EDITOR'S NOTE: We did our best to interpret the following
information. Yuri Zaruba, UA9OBA, informs OPDX that all direct QSLs
received in Russia after the polar expedition to "Lost Islands" (2001)
were answered by RW3GW and UA9OBA during last year. Also, ALL QSLs for
all QSOs were sent via UA3DX-QSL-Bureau in 2002. More than 25,000
beautiful 2 page QSLs were printed and they want you to please QSL!
They feel some direct QSL may have been lost in the postal system
to/from Russia. Yuri, UA9OBA, now has all the expedition logs (for
RI0B, RU0B, RS0B, RU0B/p,RS0B/p, R3CA/0 - 2001) and if you did not
receive your QSL(s), please send your QSL with SASE directly to:
Yuri V. Zaruba, P.Box 1, Novosibirsk-92, 630092, Russia. Also, please
remember, that one IRC will only pay for air mailing of only 20 grams
of foreign mail from Russia, so don't forget to enclose sufficient IRCs
for a few QSLs. ADDED NOTE: Also Yuri, UA9OBA, informs OPDX that a
professional video on the "Lost Islands" is now available. This is
the same English version that was shown during the IOTA/DX Hamvention
in England on October 12, 2002. This film-and-radio polar expedition
("Lost islands" which included Ushakova Island AS-156 as RI0B and
Uyedineniya Island AS-057 as RU0B in April 2001) was awarded the
"MOST COURAGEOUS IOTA DXPEDITION OF THE YEAR" by the IOTA community to
the team of Russian operators. This video can be ordered at the following
Web page at: http://www.nsiradio.com
Video will be shipped next business day directly from Russia by

Registered AIR Mail. Please specify the version you are interested in (PAL for Europe and NTSC for America). They also welcome comments about their professional HAM-video and would like to hear from you on the Web page at: http://www.hamradio.ru/rrc

RRA/RDA ACTIVITY. Members of the RZ6AZZ team (which include UA6AMB, RU6AX, RX6AH, RW6CT, RA6AX, UA6MF and RA6AU) will be active from the Caspian Sea Islands between April 23-28th. They plan to activate Morskoy Ivan Karaul Island (RRA-new for the Russian Robinson Award and RDA KM-05 for the Russian Districts Award) using the call UE6IKI, and Morskaya Chapura Island (RRA-new, RDA KM-05) using the call UE6IAA. Activity will be on 40-10 meter CW/SSB. It is possible that the team will be active with personal callsign/p. QSL UE6IKI and UE6IAA via RA6AU.

S0, WESTERN SAHARA. By the time you read this, the S05X DXpedition should be winding down or QRT. Full details on the DXpedition are available at: http://www.pagus.it/s05x/
Logs will be updated daily and will be available at: http://www.pagus.it/s05x/
As this bulletin was being prepared, a press release announced last Saturday that the S05X DXpedition has logged about 26,000 QSOs (CW 8135, SSB 14491 and RTTY 1953). QSL via EA4URE either direct or through the bureau. Donations to help offset the trip will be gratefully accepted and can be sent via the QSL Manager, EA4URE (URE - Union de Radioaficionados Espanoles, Avda. Monte Igueldo 102, Madrid 28053, Spain; E-mail ure@ure.es).

SPECIAL EVENT. A team of SP4KSY club members will be active as HF650O to celebrate 650 years of Olsztyn city. The station will be active from May 1st to July 31st, on CW, SSB, RTTY and PSK. QSL via SQ4NR, bureau or direct to: Grzegorz Gawel, ul. Herdera 16/14, 10-691 Olsztyn POLAND.

TM5, FRANCE. Dominique, F5SJB, will once again be active as TM5CW from May 24th to June 7th. There was NO mention what the special callsign is for.

VP2V, BRITISH VIRGIN ISLANDS. Bob, N6RFM, will be active as VP2V/N6RFM from April 22-25th. He will be on vacation, so his activity will be limited as time permits. Activity will be PSK31 QRP on 20 meteres only. QSL via his home callsign.

VUSHF NEWSLETTER. Derek, G0NFA, reports that the 144 MHz & Above Newsletter (Now Includes 50 MHz News), which is updated daily, and includes all the VUSHF News, DXpeditions, VUSHF Contests, 50MHz News, Beacon News, Etc Etc and much more, can be found at: http://www.144mhz.co.uk
You will also find at the bottom of the page a link to join the VUSHF E-mail List. The 144MHzEu is hosted by G0NFA using Topica and is very popular (w/500 Subscribers). Please sign the guestbook with your comments. ADDED NOTE: G0NFA will be active in Gibraltar for the August 2003 Perseids.

YI, IRAQ (Update). With the mention of portable YI operations in last week's bulletin, many have been wondering whether or not these operations would count for DXCC. Well, this past week ARRL Membership Services Manager

Wayne Mills, N7NG, provided the answer in/on the ARRL Letter and ARRL Web page. Here is your answer: "ARRL Membership Services Manager Wayne Mills, N7NG, says the League will accept for DXCC credit YI/ operations from Iraq by U.S. or British military personnel provided the operator has written permission from his or her commanding officer. 'There is precedent for this,' Mills said, citing an operation during the 1991 Gulf War. 'These operators will need written authorization to operate from their commanding officers until an interim Iraqi civilian government is in place,' Mills said. After that point, operators would need documented permission from Iraqi authorities." YI portable activity heard so far has been from Mark Smith/NG5L, Jim Dunkerton, KT4CK and Bob Furzer/9K2ZZ/K4CY. ADDED NOTE: There has been some mention of Ed Giorgadze, 4L4FN, who is now in the Middle East after wrapping up his North Korean (P5) operation last fall, may be heading to Iraq because of his involvement in the United Nations World Food Program.

ZA, ALBANIA (Update to OPDX.607). Team ZA3/ has announced that during their May 29th-June 3rd operation, they have organized on June 2nd a demonstration called the "Day of the Forces of Peace from the Foreign Countries". They will have two stations (radio/mobile) active from the Port of Durres, Albania, for mutual QSO exchanges by civilians and military personnel from Italy and the bordering nations with Albania (that includes Kosovo - Greece - Macedonia - Yugoslavia). All the radio amateurs of the world, particularly military (and ex-military) operators are invited to be on the radio June 2nd.

ZK1, SOUTH COOK ISLANDS. Operators Jun/VK4SJ and Doug/VK4BP will be active as ZK1AYL and ZK1SIM from April 27th through May 26th. They plan to visit Aitutaki (OC-083) April 27th through 14 May, and then Rarotonga (OC-013) from May 15-26th. Activity will be on 40-10 meters. QSL via VK4SJ either via the bureau or direct to: June Sim, P.O. Box 406, Caloundra 4551, Queensland, Australia. E-QSLs will not be accepted.

Don't worry about him Dan. He pretty much sounds like a dick anyway. I've seen a few of his other posts and he doesn't really care for anyone elses opinion anyway. Like he has any authority to be the newsgroup cop. I read your post and I didnt find it to be racist or anything.

A shameless plug for which I apologise for in advance.

The Coffs Harbour and district amateur radio club has a new web site. Take a look at-
http://www.qsl.net/vk2ep/index.html

Its still growing so check back in a while to see it updated. Any suggestions will be welcome. Yes, I do think a guest book would be a good idea, I just haven't figured out how to do that yet :o)

cheers

Well good onya Terry

IRLP never had a chance as you cant throw away your Amateur Radio and use a headset instead. I wonder what ramification this has on equipment manufacturers. What incentive do radio manufacturers have when 50% of those on echolink use headsets ?? Amateur Radio can pat itself on the back and be proud it has a technology that makes Radio equipment obsolete and then the ARRL pats HIM on the back.....what a weird world we live in !

OH, we're still waiting patiently for your response to the ECHOlink pircay issue and how you intend to weed out all those that started with iLink. Yeah Yeah, the silence is deafening....Dont you ever come up for air ? Ostriches do !!! And I DO love the slapping people get on the yahoo e-group when they demonstrate how easy it is to get around your "validation"....

Hi,

I upgraded a 9913 run (125') to LMR-600. I left the old 9913 cable
there.

If possible, I'd like to put a color video camera on the mast and use
the 9913 cable (50 ohms) to get the signal back. I'd also like to be
able to power the camera via the coax.

Is this reasonable? Doable? What kind of camera would you recommend?

Thanks,
John

> was a rhetorical question.]

Threatened, lets look at what modes you specified above... Oscar satellites, yup they had radios and tx/rx'd on amateur spectrum. Whats your point ?

If you cant understand the difference about headset to headset communications and radiating out of an antenna then there is no hope. I personally dont feel threatened but I find it increasingly humerous to see the ARRl giving out an award for a technology that in may instances uses NO RADIO!.

The funny part was also the mention of software regarding the playing of pre-recorded files. SHeesh, never heard of cron on a linux box. Why the hell didnt Linus get an award from the ARRL ? He's been around longer :-)

Its total indifference like yours where you cant grasp the implications that adds to the amazement. ARRL might as well give out awards for working all countries via e-mail, why bother using RF anymore.

Do you know that person on 20 and 75 meters, that does his best to make his mark on the world? Is he not getting the recognition he deserves? Well, here is an upcoming award for him/her/it!

Nominate your favorite ham radio op for the "Ham Radio's most wanted"!

This award give the proper recognition for outstanding QRM'ing! Wheather the QRMing be for 75 and 20 meters, 30 meter CW or 2 meter repeaters, this is the one!

We will take things for, but not limited to:

Wide SSB
Music
Starting bulletins services on top of QSO's
no call signs
roger beeps
just plain being annoying!

people from the past and Present are welcome!

e-mail your nominations to lloyd_vfp@msn.com

You have till the monday before Dayton Hamvention. I will announce via newsgroup post who the winners are, at high noon on Friday of the Dayton Hamvention.

The winner gets a certificate, sutiable for framing in his shack.

2555. Batteriesamerica.com battery eliminator

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-21 18:59:22 UTC
From: "Mike M." <>
Message-ID: <qff8avk05qfe2es5vtu4dtfi0bv78odh95@4ax.com>
Source record: 67850

Has anyone had any experience with the battery eliminators sold by batteriesamerica.com for use with Icom handheld transceivers?

I would like to be able to power my IC-V8 from the lighter socket and so far this is the only option I've found?

Do any of you know of other alternatives?

TIA

No, what a weird world you live in. It's backwards-minded
people like you, what have held this hobby back and resisted
change for YEARS. First it was CW, then it was "no-code"
now it's Echolink. Hams with mindsets resistant to change
like U are why we are not ahead in the technology game anymore.

eh eh , now that you gave me a nice belly laugh. When there is a radio at each end, we're using the internet as a long haul medium and I have NO problems with that so you dont have to go down the path.We're amatuer RADIO operators, we like to propogate data or voice onto our allocated spectrum. ECHOlink should receive an INTERNET award for VOIP usage, whats Amateur Radio got to do with 2 headsets talking to each other ? I simply have a MAJOR issue with ECHOlink and its PC connectivity.

Go and read the threads in the ECHOlink e-group and look at the talk about PIRACY. It has a piss poor validation system, has users on it from the iLink days where there was NO validation. IRLP doesnt allow PC connectivity exactly for this reason.....can't smell the flowers yet ?

In using a PC to communicate instead, what benefit is there for yaesu, kenwood, icom, jrl, hro, gigaparts etc etc etc to stay in the amateur market. Time for them to sell PC's maybe ?

50% of echolink users use their PC's.....WHere is the spectrum in that? I thought this was Amateur Radio ? From the threads, its highly suspicios that many of them are probably not even Amateurs and here is the ARRL rewarding this behaviour....

Oh, sorry I'm backward minded...

Mistake #1 is thinking that Echolink is "hi-tech". If you like it,
fine, but it is pretty much a chat room with radio links. It would work
better if the whole thing was carried over the internet.

Backwards minded?? As outlined by Sandman, there are problems with
echolink - not with amateur radio using the internet - the main one being
that there are serious authentication issues with it - I mean how in the
hell can we allow a system where it is so easy to get a logon for the system
when you are not a licenced amateur, and yet could access amateur freqs with
it.
Whilst some of the users have RF gateways, many use the system only use
chatrooms - what sort of amateur radio is that where we chat away on the net
rather than chatting away on RF - if we don't use it (the RF), then we could
well loose it as a result of the commercial pressure to grab our freqs.
I would hardly call sandman backwards - he is one of the leading lights in
VK for IRLP, and that is certainly a lot more progressive than plug and play
headset technology. Wake up and smell the roses sunshine.

There are no wankers in the 30m band. Most QRM'ers of any real stature
are too brain dead to be able to work CW at a usable speed. I've never
heard one on that band. Maybe thats why 30m is such a good band. :/ I
ignore QRM'ers on the other bands. I'm not into listening to braying
jackasses. MK

LOL!!
Hear hear.

Face it, anyone who calls themself "sandman" and has a childish "welcome to the sandpit" theme on their website has to questioned.

This fool can't even get "ARRL" correct, and yes, we've all noted his overly defensive nature on many of his posts. Dare anyone say anything against his precious IRLoserP.

What do expect from some sicko that has a history of stalking others on the internet? Ohh, you're not aware of that one either?

I just passed my Technical Exam. I am looking for reccommendations of
a good entry level HT.
I have read several reviews, and have found several positive comments
about ICOM readios.
The ICOM IC-T90A caught my attention.
Also looking at the ICOM IC-W32A. Both af these are currently
available.
I also foung the ICOM IC-T81A, but it has been discontinued. Was it
discontinued because it was not a good radio..
I am just looking for recommendations on at least a dual band, with
wideband scanning if possible and batteries that are readily
available.
Thanks in Advance
Bill C. (callignsign to be issued in approx 15 days)

> I also foung the ICOM IC-T81A,

When I received my tech ticket back in January I had already decided on the Kenwood th-f6a, a triband rig covering 2m, 1.25m, and 70cm. I purchased one within a week. It's still the only rig I have and I use it almost daily. I found the Kenwood menus easy to learn and use, and the audio via the smc-34 is pretty decent (if you get this mic, leave the mic volume at 100% and adjust the volume with the control on the rig to avoid distortion).

The biggest down side for me has been that there is zero activity on 1.25m here. I've never used the band, so I could have done just as well with a dual band rig or perhaps the Icom T90A that offers 6m instead of 1.25m. I also get some intermod when I'm close to Newark airport and a few other places that have large antenna towers and a lot of 'qrm' to deal with. However, I think you will find this with any HT and even with a lot of mobile rigs - especially ones with wide band receivers.

I'd say you probably can't go wrong with any of the top offerings from Yaesu, Icom, or Kenwood. Try reading the reviews over at eham.net if you haven't already. They can be very helpful in the decision making process.

Good luck!

Bill, congratulations, I hope you have many years of learning more about radio. My suggestion for a handheld? Find a used 2m HT for under $50 get on and play radio awhile, you'll learn more about what you really want in few months then you can make a decision based on what you want.

As for HT's in general, Bill, honestly, the newer HT's have ALL the buzzers and bells and for the most part it comes down to personal favorites, sometimes cosmetics, yes there are some that are a better value and perhaps perform or sound better but overall they are all about the same.

Tim

2568. Help with TVI problem

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-22 21:01:21 UTC
From: Jeff C <jcamp2@cox.net>
Message-ID: <B4ipa.249294$S14.52955@news1.central.cox.net>
Source record: 67863

I could use some suggestions on how to get rid of a TVI problem I have with a couple of Sony TV's. We have 5 TV's in our house and only the Sonys seem to be succeptible to TVI. Whenever I key up on any band, both of them get a scrambled picture and audio. It doesn't make any difference if I run 50 watts or 1500. Same story either way. When I crank up my amplifier to about 800 watts, the picture on the larger TV just turns black and I have to shut off the TV and restart it.

I put high pass filters on the cable inputs for both TVs, plus some RF chokes on both the power cords and cable inputs, but no luck. The Sharp, JVC, and GE TV's don't have a problem at all, even when I run legal limit. Anyone have any ideas? Maybe the best answer is to trade in the Sonys for something else...

Thanks and 73,
Jeff

It's been a while since I dealt with a Kenwood HT. I have never found them easy to program. The ICOM HT's (W2A and the 2/3/4SAT line) were extremely easy to program. A neighbor had an Alinco which took me a little while for me to help her program it. Standard's HT's were hard too. (Although Kenwood's HT's suck in this quality, their mobile radios were very easy to program.)

There's no shortage of 222Mhz in Southern California, where I am. 6m and 23cm are sparser. The strange thing is that very few of the "misfits" we have out here jam 6m, 125cm, or 23cm; only 2m, 70cm, and HF.

Swap the Sony out with a set that is not being effected. If the TVI
follows. Its in the TV. If it dont follow it, then you have a problem
with that hookup. Process of ellimination.

But I suspect the 'Sony' is the problem.

Sometimes a simple missing ground can cause havoc on the cable lines.

Some brands are very susceptible to front end overload and there isn't much you can do about it but get a different television. The reason that I say it sounds like front end overload is that the filtering doesn't make any difference and that the picture turns black. I had a Magnavox that would totally black out when I keyed up with just 100 watts. I replaced it with an RCA and haven't had any problems since.

Years back the RCA was the main problem with TVI. However it seems they have gotten better.

I have two of them. One a older 80s model in the BR. And the other a consule in the LR (much newer). I dont bother either of them....thank goodness...

However the consule does trash my HF radio on occassion from its power supply. Guess you just cant win.. hi.

2577. KAM Enhancement Board / KAM EPROM Upgrade

Newsgroup: rec.radio.amateur.misc
Date: 2003-04-23 04:29:14 UTC
From: Stuart Blake Tener <stuart@misty.com>
Message-ID: <b854rc$655$1@news.misty.com>
Source record: 67872
Cross-posted to: rec.ham-radio.packet,rec.radio.amateur.digital.misc,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.ham-radio.swap

To whom it shall concern:

It has been years since I have played on packet radio, so I recently dug out my olde KAM, which by the way has firmware version 2.84!?! I am in desperate need for some upgrades for the unit!!! Any advice on where to get a firmware upgrade for a version greater than 2.84 would be very appreciated!

I am also looking for a KAM Enhancement Board!

I spoke with a friend of mine whom told me the firmware in the KAM is not public domain, therefore my understanding is that the only way I can ask someone to email me a copy of the firmware is if it a version that you paid for and are no longer using due to your unit being broken or a version you are no longer using that you paid for, since you have upgraded to a later verion of the firmware. I am looking for anything greater than 2.84, but 8.2E would be the most optimal to receive. I do own an EPROM programmer so an image is fine. Obviously if you are sending me the firmware via email, a notice indicative of your transfer of the license to me would have to be included with the image I imagine. I am trying to locate a copy of the firmware legally, though I suppose there is little I can do if someone just sends it.

The big problem is that Kantronics doesnt seem to want to help people with olde KAMs anymore, so I am left to my own devices to find what or how I can upgrade the unit!

Here are some of my questions:

What is the compatible version E2PROM (EEPROM) to use instead of a 27C512 EPROM?

What EEPROM/E2PROM will work to replace the 27C512 in the KAM?

Is 8.2E the latest firmware the KAM that I could have if an Enhancement Board is installed in the KAM?

What is the latest version of the firmware for the KAM that works if you do NOT have an Enhancement Board?

I understand there was a memory upgrade, can anyone tell me about that upgrade?

I also understand there was a clock upgrade, can anyone tell me about that upgrade?

Is there a place I can get a PDF or digital copy of the KAM manual, KAM Enhancement Board manual, or DVR 2-2 manual?

What can I do to upgrade or enhance my DVR 2-2 to make it work better?

Does anyone know what I must do to align or setup the DVR 2-2 if I want to add a second channel/crystal to it?

Where do I get crystals and of what type for the DVR 2-2?

Please carbon copy my email address on all replies if you can.

Thanks in advance,

Stuart

You say: "The big problem is that Kantronics doesnt seem to want to help
people with
olde KAMs anymore, so I am left to my own devices to find what or how I can
upgrade the unit! (sic)"

Interesting. KAM manuals and BIOS flash upgrades are available for download
on their site.

Maybe if you visited their web site and contacted them:
http://www.kantronics.com/index.htm

Joe S.:

Unless I am mistaken, the only software and manuals they have on their site right now are for the KAM Plus and KAM XL. Those of us with the olde KAM do not seem to be getting the privledge of a software EPROM or manual to download.

Have I missed something, or did you find the 8.2E or other firmware for the Enhanced Board or KAM there?

Linux Packeting Amateurs:

I am running RedHat 9.0, and I have compiled my kernel with support for AX25 built into the kernel (not as a module), when I boot up it is my understanding I should see some entries in /proc/sys/net/ax25; I do not. Any ideas?
